7452™ Tak Pak® acetone-based and 712™ isopropanol-based accelerators are used where increased cure speed of cyanoacrylate adhesives is required. They can be either pre- or post-applied to the bond. Especially suited for post-application on cyanoacrylate adhesive to provide rapid fixturing. Typical applications include securing wires or coils to PCBs, tamperproofing adjustable components, mounting stand-offs, edge guides and board stiffeners. Color: clear/amber. **NOTE:** Because acetone may adversely affect some thermal plastic substrates, 712™ Tak Pak® isopropanol-based accelerator is recommended for these materials.

Mfg. Part No.	Description	Size	Stock No.	Price Each 1-4
● 18490	7452™ Tak Pak® Acetone-Based Accelerator	1.75 oz. Brush-Cap Bottle	90B8317	16.24
● 20352	712™ Tak Pak® Isopropanol-Based Accelerator	1.75 oz. Bottle	00Z1829	21.03

LIQUID THREADLOCKERS

RoHS Compliant Available

LOCTITE®

Threadlocker single-component, anaerobic adhesives cure only when confined between metal parts. Solvent-resistant, low-toxicity, nonflammable. Ideal for threadlocking, thread sealing, gasketing, retaining and bonding. Lock nuts, bolts, and studs to prevent vibration and wear. Seal out moisture that causes corrosion. Available in varying viscosities and strengths for many applications.

222MS™ THREADLOCKER — LOW STRENGTH

222MS™ threadlocker is ideal for fastener diameters of ¼″ (6mm) and smaller. Controlled lubricity for accurate clamp loads. Parts can be separated using hand tools. Applications include adjustable screws, calibration screws, meters and gauges. Meets MIL-S-46163A specifications for existing designs; agency approval rated ASTM D-5363, NSF P1, CFIA.

Mfg. Part No.	Description	Color	Bottle Size (ml)	Stock No.	Price Each 1-4
● 22221	222MS™ Threadlocker Low-Strength Adhesive	Purple	10	00Z781	28.22
● 22231	222MS™ Threadlocker Low-Strength Adhesive	Purple	50	00Z782	79.10

242® THREADLOCKER — MEDIUM STRENGTH

242® general-purpose, removable threadlocker for fasteners between ¼″ and ¾″ (6mm to 20mm) diameters. Controlled lubricity for accurate clamp loads. Parts can be separated using hand tools. Applications include machine tools and presses, pumps and compressors, and mounting bolts. Meets MIL-S-46163A specifications for existing designs; agency approval rated ASTM D-5363, NSF/ANSI 61, NSF P1, ABS, CFIA.

Mfg. Part No.	Description	Color	Size (ml)	Stock No.	Price Each 1-4
● 24205	242® Threadlocker Medium-Strength Adhesive	Blue	0.5 Capsule	98B9938	3.90
● 24221	242® Threadlocker Medium-Strength Adhesive		10 Bottle	00Z783	30.66
● 24231	242® Threadlocker Medium-Strength Adhesive	Blue	50 Bottle	00Z784	85.23

➤ CONTINUED ➤

LIQUID THREADLOCKERS (CONT.)

262™ THREADLOCKER — MEDIUM-TO-HIGH STRENGTH
262™ permanent threadlocker for fasteners up to ¾″ (20mm) diameter. High-lubrication for easy assembly. Excellent for preventing rust and corrosion in extreme chemical/environmental conditions. Meets MIL-S-46163A specifications for existing designs; agency approval rated ASTM D-5363, NSF P1, ABS, CFIA.

Mfg. Part No.	Description	Color	Bottle Size (ml)	Stock No.	Price Each
26221	262™ Threadlocker Medium-to-High Strength Adhesive	Red	10	00Z944	22.76
26231	262™ Threadlocker Medium-to-High Strength Adhesive	Red	50	00Z1034	63.50

271™ THREADLOCKER — HIGH STRENGTH
271™ permanent, low-viscosity threadlocker for fasteners up to 1″ (25mm) in diameter. Ideal for heavy equipment, suspension bolts, bearing cap bolts/studs, and motor and pump mounts. Meets MIL-S-46163A specifications for existing designs; agency approval rated ASTM D-5363, UL classified for U.S., CFIA.

Mfg. Part No.	Description	Color	Bottle Size (ml)	Stock No.	Price Each 1-4
27121	271™ Threadlocker High-Strength Adhesive	Red	10	00Z785	31.00
27131	271™ Threadlocker High-Strength Adhesive	Red	50	00Z786	84.75

272™ THREADLOCKER — HIGH STRENGTH/HIGH TEMPERATURE
272™ threadlocker withstands temperatures to 450°F. Provides a fast cure on most surfaces, including "as received" fasteners. Recommended for bolts up to 1 ½″ (36mm) in diameter. Removable with heat and hand tools. Ideal for heavy equipment, suspension bolts, bearing cap bolts/studs, and motor and pump mounts. Agency approval rated CFIA.

Mfg. Part No.	Description	Color	Bottle Size (ml)	Stock No.	Price Each 1-4
27240	272™ Threadlocker High-Strength/ High-Temperature Adhesive	Reddish Orange	50	00Z945	79.10

290™ THREADLOCKER — WICKING GRADE
290™ medium-strength, wicking-grade threadlocker for preassembled bolts and instrumentation screws up to ½″ (12mm) diameter on electrical connectors and carburetors. Penetrates threads by capillary action. Secures set screws and other assemblies after setting is complete. Seals welds and porous metal parts. Protects threads from rust and corrosion. Localized heating and hand tools are needs for disassembly. Meets MIL-S-46163A specifications for existing designs; agency approval rated ASTM D-5363, NSF/ANSI 61, NSF P1, CFIA.

Mfg. Part No.	Description	Color	Bottle Size (ml)	Stock No.	Price Each 1-4

ELECTRICALLY-CONDUCTIVE ADHESIVES

RoHS Compliant Available

LOCTITE®

3888™

Electrically-conductive adhesives provide a robust mechanical bond and a low-impedance electrical interconnection for board level assembly. Room-temperature-curing makes it suited for bonding heat-sensitive components where solder temperatures are impractical. Delivers a lead-free alternative to solder and allows nonsolderable substrates like plastic or glass to be used.

3888™ ELECTRICAL INTERCONNECT ADHESIVE
Mfg. part no. 3888™ epoxy adhesive is designed for bonding metals, ceramics, rubbers and plastics used in electronic parts, where good adhesion combined with electrical and thermal conductivity is required. Two parts: silver paste resin and clear hardener.

Mfg. Part No.	Description	Size (gm)	Stock No.	Price Each
3888	Electrically-Conductive Epoxy Adhesive	2.5	31M3709	76.95

(90378)

CIRCUITWORKS® CONDUCTIVE EPOXY

RoHS Compliant Available

ITW Chemtronics®

Conductive Silver Epoxy provides excellent electrical conductivity. Ideal for precision repairs and high-strength conductive bonding. Restores defective traces and creates jumpers to board. Quick solderless electronic connections. Multilingual instructions and regulatory information included. One 7g tube of adhesive and one 7g tube of hardener conveniently packaged in a blister pack.

Mfg. Part No.	Description	Size	Stock No.	Price Each
CW2400	Conductive Epoxy	2, 7g Syringes	00Z1602	71.91

ELECTRICIAN'S AND BUNDLING TAPE

RoHS Compliant Available

3M

2000 2120 3939 6969 8979

Mfg. part no. 2000 cloth-free, electrician's bundling tape is embossed with PVC backing, which offers a clear adhesive transfer. Tape tears easily and evenly by hand for quick, on-the-go application. Comes off clean leaving no sticky residue. The temperature-stable adhesive makes it easy to handle; does not melt in hot weather or fail to stick in cold. Color: gray. **Mfg. part no. 2120** transparent bundling tape is strong enough to tackle almost any repair project in or around the home, vehicle, boat or job site. Transparent when applied, this clear duct tape makes repairs less noticeable. Lasts six times longer than other heavy-duty duct tapes, based on accelerated weathering, providing long-lasting repairs.

Mfg. Part No.	Description	Roll Size (yards)	Stock No.	Price per Roll 1-9
2000 GRAY (2″X50YDS)	Scotch® Duct Tape, Gray	50	18C0979	15.69

MULTI-PURPOSE DUCT TAPE 3900

RoHS Compliant Available

3M

- High tack adhesive for good quick stick to many surfaces
- Conformable and tears easily by hand

Multi-Purpose Duct Tape 3900 is a polyethylene backing that resists moisture prolonging the tape bond in moist or humid environments. The rubber adhesive sticks well to many surfaces. It is a versatile tape for many applications. Available in seven colors for color coding. Used for sealing, holding, bundling, reinforcing, identifying, tabbing, wrapping, splicing and protecting.

ROLL SIZE: 1.88″ X 60 YARDS

SCOTCH® GLASS CLOTH ELECTRICAL TAPE 27 SERIES

RoHS Compliant Available

27 series Scotch® glass cloth electrical tape is a 7-mil woven insulating glass cloth tape with pressure-sensitive rubber thermosetting adhesive. Designed to operate in 600V dry applications requiring high mechanical strength and resistance to high temperatures. Specially treated and prepared to provide corrosion-free protection. Glass cloth will not shrink, rot or burn, has a high tensile strength and is printable. Performs at Class B (130°C/266°F) temperatures. Provides heat-stable insulation around thermocouples and other hot-spot applications. UL recognized, CSA certified.

Mfg. Part No.	Roll Size	Stock No.	Price per Roll 1-49	50-99	100-249	250-499
● 27 TAPE (1/2"X60YDS)	½" x 60'	29K7272	20.79	18.86	17.28	16.05

ALUMINUM FOIL TAPE 425

RoHS Compliant Available

3M

Dead-soft aluminum foil-backed tape provides excellent heat and light reflection to protect against high temperatures and UV degradation. The foil also serves as an excellent barrier against moisture, dust, flame, and certain chemicals. The acrylic adhesive supplies superior temperature, UV and solvent resistance. Can be used indoors or out. It provides excellent age life and is ideal for harsh, long-term outdoor environments.

Mfg. Part No.	Roll Size	Stock No.	Price per Roll 1-4
425 (1/2"X60YDS)	½" x 60 yards	95C2759	27.31

471 White

471 Yellow

5702

471 series conformable colored 5.2 mil vinyl-backed tape with a rubber adhesive ideal for lane and safety markings, color coding, masking, sealing, splicing and other general-purpose applications. Maintains vivid color even when exposed to heavy abrasion. Dead stretch properties provide straighter lines when masking, marking and sealing. Resistant to most common solvents (avoid ketones, chlorinated hydrocarbons, esters). **Mfg. part no. 5702** safety black/yellow stripe tape features a 5.4 mil vinyl backing with rubber adhesive, resists most common solvents. This durable vinyl tape is ideal for identifying and marking traffic areas and physical hazards. **Mfg. part no. M-77** lane marking applicator available; *go online or call.* **Roll length: 36 yards.**

POLYIMIDE FILM TAPE 5413

RoHS Compliant Available

3M

- Designed for high temperature applications

3M™ **5413** polyimide film tape used as mask for protection of gold fingers of PC boards during wave solder or solder dip process. Kapton® polyimide film is flame-retardant, radiation- and chemical-resistant, and does not soften at elevated temperatures, thus the film provides an excellent release surface at elevated temperatures. Silicone adhesive offers high-temperature performance reducing adhesive transfer. Temperature use range: -100° to 500°F (73°C to 260°C). Roll length: 36 yards. Color: amber. **Sold in pack quantities listed in table below.**

Q-CEE'S QUP SERIES VINYL WRAP-UP CALIBRATION LABELS

RoHS Compliant Available

TE connectivity

Authorized Distributor

AVAILABLE COLORS
BK, BR, BU, GR, GY, LB, LG, MG, OR, RD, VT, YL

QUP3, QUP6 Series

QUP12 Series

- Three styles
- Multiple colors for color control of calibration interval
- Designed for use on handles and odd shapes
- Clear protective cover wraps around label
- Resist cutting oils, coolants and chemicals
- Permanent adhesive backing

Q-CEE's wrap-up calibration labels feature clear covers that wrap around and protect data from tampering, smearing, weathering, chemicals and abrasion. Use on small cylindrical surfaces like gauges and handles. Ideal for any narrow part of an instrument too. Easy to use, just wrap completely around the part until the clear tail covers the writing on the label. All three label styles feature preprinted text and provide blank spaces to record standard information.

Q-CEE'S QCC SERIES VINYL COVERALL CALIBRATION LABELS

RoHS Compliant Available

TE connectivity

Authorized Distributor

AVAILABLE COLORS
BK, BR, BU, GR, GY, LB, LG, MG, OR, PK, RD, VT, YL

QCC311 Series Small-Size — Violet (VT)

QCC306 Series Mid-Size — Violet (VT)

QCC330 Large-Size — Green Only

QCCLIM — Orange Only

- Four styles
- Multilpe colors for color control of calibration interval
- Easy to write or stamp on
- Self-laminating clear cover
- Permanent adhesive backing

Q-CEE's coverall calibration labels are designed for use on gauges and instruments that are subjected to constant handling, cutting oils or chemicals. Features a clear polyester cover prepositioned at the top of the vinyl label. The cover protects data from tampering, smearing, weathering and abrasion. Permanent adhesive backing keeps label in place. All label styles feature preprinted text and provide blank spaces to record standard information. **NOTE:** Use labels on flat or slightly curved surfaces.

DUAL-LOCK™ RECLOSABLE FASTENERS

RoHS Compliant Available

3M

Mini-Pack

SJ3542

MP4570 Low Profile

- Fast, easy attachment
- Excellent holding power
- Extreme flexibility

Interlocking Mushroom-Shaped Stems

Dual-Lock™ reclosable fasteners offer advanced closure alternatives to zippers, screws, snaps, bolts and more. Often better than conventional closure methods because they offer greater design flexibility, faster product assembly, smoother and cleaner exterior surfaces and improved product performance in many applications. These fasteners feature mushroom-shaped stems that interlock with one another with audible snap. Five times more holding power than hook and loop fasteners. Engaged strength varies depending on mating component, options include 170, 250, 400 and 705 mushroom-shaped stems per square inch. Available in mini-packs, standard roll lengths or trial bags.

DUAL-LOCK™ RECLOSABLE FASTENERS — MINI-PACKS
Dual-Lock™ reclosable fastener mini-packs contain different or the same strength-type fastener, making them great for design development, prototypes or small jobs. Mini-packs simplifies storage and dispensing and are available in different pressure-sensitive adhesive backings. **Mfg. part no. MP-3541/42** has general-purpose synthetic rubber adhesive that bonds well to most substrates. **Mfg. part nos. MP-3551/52** and **MP3560** have high-performance acrylic foam adhesive that bonds well to high surface energy substrates. **Mfg. part no. MP4570** Dual Lock™ low profile reclosable fasteners have acrylic LSE adhesive that bonds well to low surface energy substrates.

SCOTCHMATE™ HOOK AND LOOP FASTENERS

RoHS Compliant Available

3M

Mini-Pack

3526 Hook and 3527 Loop

Quick Fastening Hooks and Loops

Scotchmate™ nylon hook and loop reclosable fasteners offer an advanced closure alternative to zippers, screws, snaps, hooks, bolts, latches, and more. They provide greater design flexibility, faster product assembly, smoother and cleaner exterior surfaces and improved product performance in many applications. The hook and loop fasteners consist of two strips of nylon fabric which engage to form a quick fastening attachment. Simply pull the strips apart by hand to disengage. The woven hook backing is covered with flexible self-supporting J-shaped hooks, about 300 hooks per square inch (46/sq. cm.) protruding up from a woven backing. The woven loop backing is covered with thousands of soft, pliable loops, providing for thousands of openings and closings (cycles). Mini-packs contain one 4.9 yard roll each of the hook and the loop fastener, making them great for design development, prototypes or small jobs. Mini-packs also simplify storage and dispensing. Standard roll lengths are also available; *go online or call.*

SCOTCHMATE™ PRESSURE-SENSITIVE ADHESIVE-BACK FASTENERS — MINI-PACKS
The plain backing can be sewn on, stapled, or ultrasonically bonded in place. Provides an adjustable closure with a tailored appearance for garments and fabrics and is washable and dry cleanable.

Mfg. Part No.	Qty. per Mini-Pack	Color	Roll Size (W x L)	Stock No.	Price per Mini-Pack 1-9
The pressure-sensitive rubber adhesive-backing allows hook and loop fasteners to be attached to substrates with convenience and ease — simply peel off the liner and press in place.

HOOK AND LOOP FASTENERS — TRIAL BAGS 1 MATED STRIP PER BAG
TB3000 is a thin back to back hook and loop fastener which can wrap around and attach to itself to be used for bundling items.

Mfg. Part No.	Description	Color	Roll Size (W x L)	Stock No.	Price per Trial Bag 1-9
TB3000 BLACK	1 Ea.-TB3000 Hook/Loop	Black	1" x 10 ft.	63T8033	12.03
TB3000 RED	1 Ea.-TB3000 Hook/Loop	Red	1" x 10 ft.	63T8034	12.03
TB3000 WHITE	1 Ea.-TB3000 Hook/Loop	White	1" x 10 ft.	63T8035	12.03
TB3401/TB3402 is a plain backed fastener for applications not requiring an adhesive, most commonly sewn.					
TB3401/TB3402	1 Ea.-TB3402 Hook/TB3401 Loop	Black	1" x 10 ft.	63T8036	20.05
TB3506/TB3507 Thin hook and loop fasteners offer clean smooth lines for applications where aesthetics are critical.					
TB3506/TB3507	1 Ea.-TB3506 Hook/TB3507 Loop	White	1" x 10 ft.	63T8037	12.03
TB3526N/TB3527N are coated on the backside with a high performance rubber based pressure sensitive adhesive to be easily attached to a variety of substrates.					
TB3526N/TB3527N	1 Ea.-TB3526N Hook/TB3527N Loop	Black	1" x 10 ft.	63T8038	20.05
TB3530/TB3531 are coated with a general purpose rubber based pressure sensitive adhesive.					
TB3530/TB3531	1 Ea.-TB3530 Hook/TB3531 Loop	Black	1" x 10 ft.	63T8039	20.05
TB3546/TB3547 are coated on the backside with a general purpose acrylic pressure sensitive adhesive designed to adhere to variety of surfaces including low surface energy materials while still providing good temperature resistance.					
TB3546/TB3547	1 Ea.-TB3546 Hook/TB3547 Loop	Black	1" x 10 ft.	63T8041	20.05
TB3571/TB3572 coated with high performance acrylic pressure sensitive adhesive which has high temperature resistance and is resistant to many environmental and chemical conditions.					
TB3571/TB3572	1 Ea.-TB3571 Hook/TB3572 Loop	Black	1" x 10 ft.	63T8045	20.05
TB3576/TB3577 woven polyester hook backing has flexible, self-supporting inverted J-hooks protruding up from the backing.

BUMPON™ PROTECTIVE FEET/SPACERS/BUMPERS

RoHS Compliant Available

3M

- Excellent skid resistance
- Long aging resiliency – will not crack or harden
- Abrasion, marring and staining resistance
- Easy to apply — just press-on
- Bonds fast and permanently

Self-sticking, press-on Bumpon™ protective feet/spacers/bumpers can be used almost anywhere slamming, scratching, nicking, scuffing, marring, sliding, vibration, or noise could be a problem. Ideal for fans, small appliances, furniture and glass shelves, telephones, computers, calculators, scales and speakers, cabinet doors, lids and drawers, chairs, walls, sliding doors and for stacking glass and metal sheets. Bonds with metal, wood, glass, steel, acrylic plastic, and aluminum. Molded of durable, resilient polyurethane. The aggressive, high-tack, pressure-sensitive adhesive backing is protected with a release liner making application fast and easy. **Sold per card of quantities listed below.**

STANDOFF AND SPACER ENGINEERING KITS

RoHS Compliant Available

KEYSTONE

Ideal for R&D, prototype, maintenance and low-volume users. Popular lengths for mix-and-match design flexibility. **STR series** kits supplied with threaded female hex and male-female hex standoffs in both aluminum with clear iridite finish and nylon 6/6 materials. **SCR series** kits are supplied with round clear hole spacers in aluminum with clear iridite finish, brass with a nickel finish, nylon 6/6 and flat aluminum precision formed into a round spacer. All kits come in a convenient mini-cabinet with clear plastic drawers.

Each kit contains 25 pieces of each assortment.

Mfg.Part No.	Kit Includes	Stock No.	Price Each
● STR-440	4-40 Threaded 1/4″, 1/2″, 3/4″, and 1″ Standoffs and 4-40 Threaded Panhead Screws	65H4616	120.28
● STR-632	6-32 Threaded 1/4″, 1/2″, 3/4″, and 1″ Standoffs and 6-32 Threaded Panhead Screws	65H4617	120.28

PLASTIC FRAME STORAGE CABINETS

DURATOOL

High-density storage can be achieved with these all-plastic cabinets. Maximize any work area by organizing and storing tools, hardware or parts. Designed with a sturdy shell and drawer rail structure for extra strength. These rugged cabinets can be stacked or wall mounted for greater storage flexibility. Drawers are all molded in clear styrene resin for optimum visibility and speedy retrieval of contents. Each cabinet features drawer stops to prevent accidental spills.

AKRODRAWERS

AKRO-MILS

Gray, Yellow, Blue, Red, Crystal Clear

Crystal Clear AkroDrawer™ shown with Dividers

Cover, Store, Protect and More with AkroDrawers™

- Choice of five convenient sizes
- Choice of five colors – Crystal Clear, Red, Blue, Yellow and Gray
- Colors made of high-impact polystyrene
- Crystal Clear made of durable acrylic blend to keep contents visible
- Stackable to optimize space
- Wide front handle for easy gripping
- Sturdy backstop tab allows AkroDrawers™ to hang securely from shelves

AkroDrawers™ are designed for use in a variety of environments — from industrial to health care. Helps keep supplies, parts, tools and other materials secure, dust-free, and organized. Freestanding or used with available shelving, racks and mobile carts. Offered in 12″ or 18″ depths to work with compatible shelving. Easy to label and color code inventory for quick identification of parts and supplies. AkroDrawers™ drawer dividers, *ordered separately below,* help keep contents neatly separated in drawers.

19 SERIES HEAVY-DUTY STEEL STORAGE CABINETS AND STORAGE-GO-ROUND STORAGE CABINET RACK

AKRO-MILS

- For industrial-strength small parts storage that stands up to the toughest environment
- Two steel cabinets fit side-by-side on standard 36″ wide shelving
- Choice of five different drawer sizes
- Removable drawers are rust-, corrosion- and dent-proof
- Molded-in label holder and transparent drawers allow instant content identification
- Unique rear stop tab on each drawer prevents spills

Storage-Go-Round with Turntable Base

19-715

19 series heavy-duty steel cabinets organize and protect components. A variety of drawer configurations provide versatile storage solutions. Cabinet features heavy-duty welded steel frame with gray chip-proof, powder-coated finish. High-impact, polypropylene transparent drawers are removable and dividable. Comes complete with two dividers and one label for each drawer. Cabinets stack securely and are wall mountable or create a carousel-type storage system with **mfg. part no. 98325** Storage-Go-Round storage cabinet rack; *ordered separately below.*

UV INSPECTION LAMP

RoHS Compliant Available

LUXO

- Two 4W ultraviolet bulbs for precise inspection
- Also includes: Two 4 Watt fluorescent bulbs for normal use
- Dual switching for "Fault Finder" and normal inspection modes
- 5-Diopter, 4" X 2.5" lens with 2.25X magnification
- Color: Gray

Perfect for inspection of conformal coatings. Coatings glow brilliantly under UV black illumination, especially when magnified through a five-diopter (2.25X) optical-quality glass lens. Unique combination of two 4W UV black bulbs and two 4W fluorescent white bulbs is also perfect for inspection of welds, solder joints, flux residues and hairline stress cracks.

KFM LED MAGNIFIERS

LUXO

- 3-diopter (1.75X) or 5-diopter (2.25X) optical quality glass lens
- Fully enclosed neck assembly and 30" or 45" reach
- Heavy-duty internal-spring K-arm
- Edge clamp or weighted base
- Color: black (ESD safe), light grey
- UL/CUL listed

KFM LED is Luxo's newest, and most energy-efficient, addition to its growing line of KFM magnifiers ideal for any inspection or assembly application. Now with a dimmable 9W LED lightsource which produces 2500 lux at 12" working distance, it produces nearly 75% greater light output than traditional KFM models. A ¾ hour automatic shut-off feature further ensures energy savings. No knobs to tighten, nothing to adjust a flexible, self-balancing shade and hands-free neck design allows the lamp head to be secured in any position.

A ESD-Safe version for use in static-sensitive environments is also available. The ESD-Safe lens guards against uncontrolled static dissipation and is protected with a special coating that alters the electrical characteristics at the surface of the material. The shade and arm are powder-coated with a metal-laced paint that measures 1010 Ω/sq. (static dissipative) making the surfaces no longer insulative. Triboelectric charging results in drastically lower voltages, especially since any charge (under 50 volts) is uniformly distributed throughout the entire surface of the unit's head assembly. 45" heavy-duty internal-spring K-arm. 5-diopter (2.25X) optical quality glass lens. Edge clamp mount. Color: black.

LFM LED MAGNIFIERS

NEW

LUXO

- 9.5W dimmable LEDs (10W total power consumption)
- 4000°K color temperature
- Diecast aluminum housing
- 5" diameter lens
- 3 (1.75X) or 5diopter (2.25X) lens
- 45" or 30" heavy-duty internal spring K-arm
- Edgeclamp or weighted base mount
- Color: light grey

LFM LED Magnifier is Luxo's most cost-effective addition to its growing line of LED Magnifiers. 9.5W dimmable LEDs (with a total power consumption of 10W) with a 4000°K color temperature guarantees both energy savings and accurate color rendition. The LFM LED Magnifier is well-equipped for any inspection or assembly application.

Mfg. Part No.	Arm Length (in.)/mm	Mount	Diopter	Stock No.	Price Each

STAYS (Self-Traction Accessory Yield System) LENSES

Luxo's new STAYS lenses are for use with KFM LED, KFM, WAVE LED, WAVE+Plus, LFM LED and Circus Magnifiers. 4-diopter (2X), 6-diopter (2.5X), or 10-diopter (3.5X) lenses are available. The diameter of the STAYS lens itself is 2" (2.5" including the silicon gasket frame).

CIRCUS MAGNIFIERS

LUXO

- 6.5" diameter optical-quality white-crown lens
- 3.5- (1.88X) or 5-diopter (2.25X) magnification
- 45" covered spring-balanced arm
- Edge clamp mount
- Color: white
- UL/CUL listed

Luxo's Circus Magnifiers now combine sleek styling and high-output illumination with a newly redesigned metal housing which is non-corrosive and durable. A highly flexible, self-balancing shade with built-in handles allows the lamp head to be positioned horizontally, vertically and laterally. Tinted hinged lens cover protects the lens from unwanted dust, debris and contamination and allows for safe operation in direct sunlight. A 22W T-5C fluorescent light source provides 2.5X greater light than comparable magnifiers and virtually eliminates shadows. A fully enclosed arm and neck assembly make the Circus ideal for environments where cleanliness and sanitation are sought.

WAVE® LED MAGNIFIERS

LUXO

- Lighting: two dimmable 6W LEDs
- Left/right lighting controls
- Auto shut-off
- Magnification: 3.5- (1.88X) or 5-diopter (2.25X) lens
- 6.75" x 4.5" precision-ground white crown optical-quality glass lens
- 30" or 45" heavy duty K-arm with 0.5" square steel tubing - 20 gauge CRS
- Edge clamp or weighted base
- Color: black (ESD safe), light grey
- UL/CUL listed

WAVE LED Magnifier is Luxo's newest, and most energy-efficient, addition to it's growing line of WAVE+Plus Magnifiers. The WAVE LED is ideal for any inspection or assembly application. No knobs to tighten, nothing to adjust a flexible, self-balancing shade and hands-free neck design allows the lamp head to be secured in any position. A fully enclosed neck assembly and 30" or 45" reach heavy-duty internal-spring K-arm for environments where cleanliness and sanitation are sought. ESD-Safe versions for use in static-sensitive environments also available in black.

IFM SERIES MAGNIFIERS

LUXO

- Sturdy, all steel construction
- 5" diameter lenses in 3-diopter (1.75x) or 5-diopter (2.25x) magnification
- 22W circline florescent light source
- Light gray or white finish

IFM series light-duty illuminated magnifiers are perfect for the econonmical user. Features a built-in starter so the switch doesn't have to be held down for several seconds to illuminate the tube. All models come with a lamp diffuser cover, 5-wire cord, and 22-watt fluorescent tube which provides shadow-free illumination. Operates on 115VAC. UL/cUL listed.

ESD-SAFE VISION-LITE® MAGNIFIERS WITH FULLY DIMMABLE LIGHT SOURCE

RoHS Compliant Available

O.C.White Co.

71600-B

72400-B

- Free 10 diopter swing away lens included

Vision-Lite® magnifiers with patented microchip controlled ballast allows operator to dim the unit from 100% down to 25%. Highly reflective surfaces can be easily seen by dimming the units bulb. Light is provided by the 3-sided illuminated bulb, which eliminates shadows and provides 10,000 hours service life. Eye fatigue is reduced by eliminating fluorescent flickering. 7.5″ x 6.2″ provides 46.5 sq. inches of viewing area. "3 Diopter" Lens provides 1.75x - 1.85x power. Unit provided with an ergonomically designed ESD Safe Shade. Clamped model has a 43″ Ultraflex® reach arm. The weighted base model is provided with a 25″ reach arm. Black or shadow white finish. 10 yr. warranty. Addtional colors available: *go online or call.*

MIGHTY SCOPE HAND-HELD INSPECTION MICROSCOPES

RoHS Compliant Available

AVEN

- Easy-to-use digital and analog models
- Hand-held, compact design
- Simply plugs into a PC — USB interface or 75Ω RCA jack
- LEDs can be turned on or off
- Brightness can be adjusted using control wheel on body
- Magnifucation can be easily changed by adjusting the distance from the object
- Active pixel technology for sharp images and accurate color
- Microtouch shutter trigger allows for convenient image capture
- Windows® XP SP2 and Vista operating system

Mighty Scope in 26700-210 Boom Stand

Mighty Scope LED hand-held inspection microscopes provide high-resolution magnification at your fingertips. Can be used for science and engineering work, dermatology, detailed repair, electronics/mechanical assembly and quality control, hobbies and collecting (coins, stamps, jewelry), law enforcement (counterfeit ID, crime lab, etc.), entertainment and much more. Available in an analog and four digital versions including a UV digital model consisting of six UV LED lights operating at 405nm and a digital model with polarizer designed for use with reflective surfaces. Digital versions feature ¼″ color CMOS image sensor and effective pixels 1280H x 1024V; analog model has ⅓″ color CMOS image sensor and effective pixels 510H x 496V (NTSC), 628H x 586V (PAL). All Mighty Scopes come complete with PC software for easy capture of images or videos (measurement function included), 6-ft. long cord and adjustable stand . *Order* **mfg. part no. 26700-210** *boom stand separately below.*

MIDAS® HAND-HELD DIGITAL MICROSCOPE INSPECTION SYSTEM

LUXO

MIDAS

MIDAS-GS

MIDAS-ST

- 1.3 mega-pixel USB camera
- Polarizing filter prevents glare and reflection
- Adjustable 10x-200x magnification range
- ¼″ color CMOS image sensor
- Six white-light LEDs provide abundant illumination
- Auto gain control
- Automatic white balance
- Windows® XP SP2 and Vista operating system
- 5-year manufacturer's warranty
- ESD Safe
- UL/cUL listed

MIDAS® (Microscope Inspection Digital Application System) is a universally-positionable digital inspection system which provides a versatile way of viewing, capturing and documenting images from any direction or angle. With a 150mm working distance at 10X magnification and a 13mm working distance at 50X magnification, this system is ideal for assembly, repair, inspection, leak detection, document authenticity, criminology, museum and artwork restoration, currency verification and gemstone and mineral examination Easily operated using a hand-held trigger which permits hi-resolution, 1280H x1024V pixel image capture. MIDAS® can be used alone or is available with either an adjustable 13.8″ gooseneck arm stand or an adjustable boomstand with a 9.8″ vertical and 11.6″ horizontal reach.

Mfg. Part No.	Description	Stock No.	Price Each
MIDAS	MIDAS® Hand-Held Digital Microscope Inspection System, ESD Safe	73R4317	295.00

SYSTEM 250 BINOCULAR STEREO-ZOOM MICROSCOPE

LUXO

- 26" stainless steel horizontal boom extension
- Flexibility and adjustability — alter angles up to 45°; 360° head rotation in its focus mount
- Magnification range of 6.5X to 45X
- 10X wide-field eyepieces
- 10" x 10" base
- Zoom control is by graduated knobs on the sides of the body

18712

System 250 Microscopes - Binocular Stereo-Zoom Microscopes with sturdy, heavy duty, cast aluminum alloy housing that rotates 360° in its focus mount. Models are standard with 10X widefield eyepieces and have a zoom range from 6.5X to 4.5X giving them a magnification range of 6.5X - 45X. The zoom control is by graduated knobs on the sides of the body. The extended magnificaion range is from 3.25X to 225X when using optional eyepieces and accessory lenses. **Mfg. part no. 18750** .05X reducing lens extends working distance to nearly 6"; *ordered separately below.*

Mfg. Part No.	Description	Stock No.	Price Each
18712	Binocular Stereo-Zoom Microscope, Fluorescent Ring Light	28C7586	1690.00
18714	Binocular Stereo-Zoom Microscope	95C3196	1470.00
18750	.05X Reducing Lens	29C2729	160.00

SYSTEM 273 BINOCULAR MICROSCOPES

RoHS Compliant Available

LUXO

23712RB Dual Boom Stand

23727RB Dual Boom Stand

- 23mm optics system
- 8 in. (203 mm) working distance (when used with an accessory 0.5X reducing lens)
- 15% greater field of view
- 7X to 45X magnification
- 5 year warranty
- Dual boom ball-bearing stand with 10 in. x 10 in. base, 19.5 in. (495 mm) vertical boom and 26 in. (660 mm) horizontal boom extension

System 273 - Binocular Microscopes with a 23mm optics system, 8 in. (203 mm) working distance (when used with an accessory 0.5X reducing lens), 15% greater field of view and a 7X to 45X magnification range. Select from three different light sources: 17W fluorescent ring light, dimmable 150W fiber-optic illuminator with continuous ring light, 18W dimmable LED high output ring light or 9W dimmable LED ring light, which produces up to 3600 footcandles at 4.5" working distance. A 26" stainless steel horizontal boom extension and 19.5" vertical boom are mounted to a 10x10" die-cast base. Ball-bearing design allows fluid horizontal extension of the boom stand. Extensive flexibility and adjustability allow this microscope to alter angles up to 45°; the head can be rotated 360° in its focus mount. *Order accessories separately below.*

ESD-SAFE, SYSTEM 273 BINOCULAR MICROSCOPES

RoHS Compliant Available

LUXO

- Only ESD-safe microscope available on the market today
- Ideal for use in static-sensitive environments
- Nearly 8" of working distance when used with a 0.5X reducing lens

ESD-safe, System 273 stereo-zoom binocular microscopes are designed for inspection and assembly applications in static-sensitive environments. The housing and stand are powder-coated with a metal-laced paint that measures 10^5 Ω/sq. (static dissipative). Available with dual boom ball-bearing stands, which feature a 26" stainless steel horizontal boom extension and 19.5" vertical boom mounted to a 10" die-cast base. Ball-Bearing design allows fluid horizontal extension of the boomstand. Extensive flexibility and adjustability allow this microscope to alter angles up to 45°; the head can be rotated 360° in its focus mount. Microscope magnification range of 7X to 45X. **Mfg. part no. 23714-RB-ESB** comes without lighting, allowing purchaser to select from three different light sources; *ordered separately below.* **Mfg. part no. 23750** 0.5X reducing lens extends working distance to nearly 8" ; *ordered separately below.*

LED METAL FLASHLIGHTS

Energizer

MLT Tactical

EMHIL21E

- Big light in a compact size
- Sleek, easy-to-carry design
- Bright LED light source
- Precision-machined, high-strength aluminum case
- Cost-efficient, reduced battery consumption

MLT series two AA tactical metal flashlights are built tough to withstand harsh treatment. Features a durable, black case, shatterproof lens, tail switch and handy lanyard. Choice of 1W or 3W models, both include two AA lithium batteries. **Mfg part no. EMHIL21E** high intensity white LED provides up to 150 lumens and the light features a robust machined aluminum body that survives a 2-meter drop. Its weatherproof construction makes it suitable for outdoor use. The easy push button tail cap switch allows for onehanded operation.

Mfg. Part No.	Description	Run Time	Stock No.	Price Each
MLT1WAAE	Tactical Metal Flashlight — 1W LED	2.5-Hrs. (Lithium)	82T3327	31.78
EMHIL21E	High Intensity LED Flashlight	2-Hrs. (Alkaline)	83T0903	36.62

M12™ LED WORK LIGHT

Milwaukee

- Aluminum head: impact and weather resistant
- 90° rotating head: aims light at work space
- Magnetic back: hands-free use
- Voltage: 12V
- Length: 7"
- Tool warranty: 1 yr.

The M12™ Cordless LED Work Light outlasts and outperforms all other subcompact lights. Powered by an M12™ RED LITHIUM™ battery, the work light is 2X brighter and whiter than conventional incandescent bulbs and runs up to twice as long. Milwaukee® provides a limited lifetime LED warranty. Quickly charge all M12™ batteries in less than an hour with the M12™ Lithium-Ion Charger.

Mfg. Part No.	Description	Stock No.	Price Each

HIGH PERFORMANCE LED FLASHLIGHTS

NTE® ELECTRONICS, INC.

COAST

- Lightweight aluminum case
- Impact and water resistant
- Batteries included
- Lifetime manufacturer's guarantee

Mfg part nos. HP5 and **HP14** High Performance LED Flashlights offer the best combination of small size and bright light. A quick cycle switch gives you the option to select between a high or low output setting. Pure Beam Focusing Optic System with Fingertip Speed Focus Control provides superior beam consistency from spot to flood, with no dark rings associated with focusing flashlights. The Bulls Eye spot beam pattern gives you a great focused spot, while producing an outer ring of flood light which allows you to see a broader area to the sides. Beam Lock System easily locks in your desired beam. Tested and rated to ANSI/FL1 standards.

Mfg. Part No.	Light Output High/ Low (Lumens)	Length (in.)	Runtime (hrs.)	Beam Distance (ft.)	Stock No.	Price Each 1-9

COAST LED FLASHLIGHTS

COAST

NTE® ELECTRONICS, INC.

- Compact design
- Lightweight aluminum case
- Batteries included
- Lifetime manufacturer's guarantee

PROFESSIONAL USE LED FLASHLIGHTS

Mfg. part no. PX20 dual color led flashlight combines five super bright white LEDs with one red LED, each color controlled with its own switch. The white light is for general flashlight use, while the red LED is perfect when you only need minimal light, such as when reading a map. Max Beam Optic System combined with the 5 high quality white LED's gives you a broad, diffused beam that lights up a large area with no dark spots. **Mfg. part no. PX25** LED Flashlight is easy to carry in the included belt sheath. The Bulls Eye spot beam pattern gives you a great focused spot, while producing an outer ring of flood light which allows you to see a broader area for added side vision. Both tested and rated to ANSI/FL1 standards.

Mfg. Part No.	No of LED's	Light Output (Lumens)	Length (in.)	Beam Distance (ft.)	Runtime (hrs.)	Stock No.	Price Each 1-9

LUMIFA LED LIGHTING

RoHS Compliant Available

IDEC

Features:

- Energy saving: One-third of fluorescent lamps
- Long life: Five times more than fluorescent lamps
- Vibration and shock resistant
- Voltage rating: 24V DC

LF1D Slim LF1D Wide

These environmentally-friendly light units pay for themselves, you recoup their cost with savings over time. Perfect for narrow areas, those not easily accessible or that are dangerous to access, these LEDs have a minimum lifespan of 40,000 hours. Once it's installed, customers won't have to worry about maintenance issues for a long time! Plus these LED light strips provide a bright light source while producing very little heat (even less than a fluorescent lamp). IP40 degree of protection. IP67f protection water, dust and oil resistant. Stainless steel front bezel. Oil and heat resistant cable. IP54 degree of protection water and dust resistant.

CLA SERIES LED LIGHT BARS 100-1500MM

RoHS Compliant Available

PATLITE

The CLA Series LED Light Bar produces bright, uniform lighting in an IP-69K enclosure for high-temperature washdown applications for food and pharmaceutical applications, as well as illumination for control panels and workstations. The 4 different mounting options and 7 different lengths from 100mm to 1500mm make this product and ideal consideration for fluorescent tube replacement as well.

WORK BENCH VISES

PANAVISE®

301 350 381 396

PanaVise workstations feature full tilt, turn and rotate on three planes to optimize your work conditions.

VICE COMBINATIONS

Mfg. part no. 301 combines **mfg. part no. 303** head with **mfg. part no. 300** multi-position base. All-purpose work holding unit. Overall height: 6¾".

Mfg. Part No.	Stock No.	Price Each
301	75F017	70.55

Mfg. part no. 350 multi-purpose work center combines **mfg. part no. 376** wide-opening head, **mfg. part no. 312** tray base mount and **mfg. part no. 300** base. Overall height: 7-7/8".

350	75F030	125.96

Mfg. part no. 381 combines **mfg. part no. 380** vacuum base with **mfg. part no. 303** head. Allows for rapid set-ups in a variety of locations. Overall height: 6-1/8".

381	75F032	95.13

Mfg. part no. 324 combines **mfg. part no. 315** circuit board holder, **mfg. part no. 371** solder station with nib soldering iron sponges, **mfg. part no. 300** base and **312** tray base mount.

391	83F7678	59.49

Mfg. part no. 396 wide-opening vise combines **mfg. part no. 300** base with **mfg. part no. 366** head. Overall height: 7-5/16".

396	50F2993	89.80

VICE HEAVY DUTY

Mfg. part no. 400 Heavy Duty Base is for projects requiring added holding power. Accepts any 1" (25.4mm) diameter shaft. Recent engineering changes all the 400 base to hold up to 75lbs (34.0kg) at 45 degrees.

400	91B0704	58.03

VICE BASE MOUNTS

Mfg. part no. 310 Surface Plate Base Mount is compatible with the 201 PV Jr. Vise and 300 & 305 bases. This unique Base Mount features a precision cast iron flat surface (Blanchard ground): ideal for layout work.

310	92C8195	147.73

VICE HEADS

Mfg. part no. 203 PV Jr. Head with 5/8" shaft for **300 series** bases. Jaws feature horizontal grooves perfect for holding small tubes, rods, or small circuit boards firmly in place and are made of reinforced thermal composite plastic [continuous heat tolerance to 350°F (177°C), intermittent heat up to 450°F (204°C)].

203	39C3887	34.16

(5812)

CIRCUIT BOARD HOLDERS

PANAVISE®

PV201 207 315

316 324 333

PanaVise workstations feature full tilt, turn and rotate on three planes to optimize your work conditions.

VICE COMBINATIONS

Mfg. part no. PV201 compact PVjr. workstation turns, rotates and swivels for soldering, drilling, painting, assembly. Die cast zinc base. Thermal plastic alloy jaws open to 2⅞" wide. Overall height: 6¾".

Mfg. Part No.	Stock No.	Price Each
201	97F8324	38.48

Mfg. part no. 207 Vice Buddy Jr. transform your bench vise into a precision vise without changing work stations.

207	07W3759	27.63

Mfg. part no. 209 Vacuum Base PV Jr. ideal for light-duty field repairs, electronics, hobbies and more! Attaches securely to any smooth, flat, non-porous surface.

209	68K1480	47.84

Mfg. part no. 324 combines **mfg. part no. 315** circuit board holder, **mfg. part no. 371** solder station with nib soldering iron sponges, **mfg. part no. 300** base and **312** tray base mount.

324	75F027	125.96

Mfg. part no. 333 board holder has 8-position rotating adjustment and 6-position lock positions in vertical plane. Offers tilt angle and height adjustment, board rotation. NOTE: Not compatible with other PanaVise models.

333	75F028	123.44

CIRCUIT BOARD HOLDER

Mfg. part no. 315 circuit board holder accommodates boards from 0.125" (3.18) to 12" (304.80) wide. Fits **mfg. part nos. 300, 305** and **380** bases.

315	75F022	49.87

QS SERIES WORKMASTER™ WORKBENCH AND ACCESSORIES

LAC industries

- Workbench and shelves available in standard or ESD versions
- Sizes to fit every need
- Heavy-gauge steel
- 1000 lbs. distributed weight on worksurface
- Adjustable 30" worksurface height; bench legs adjusts to 32", 34", and 36" high
- Bolt-on heavy-duty bench leg extensions accept floor glides
- Adjustable bench leg extender kit included
- Full line of accessories

Easy-to-assemble WorkMaster™ workbenches for assembly, lab and technical environments. A variety of optional drawers, cabinets and electrical components allow easy customization. Worksurface is laminated over industrial-grade particleboard to a full 1¼" thickness; metal threaded inserts are installed in sealed underside for easy installation and strength. Features a 180° rolled front edge and front and rear heavy-gauge steel top support beams that allow 1000 lbs. of distributed weight on work surface. All attachment points have preinstalled inserts for easy assembly and high-strength connections. Color: sky blue powder coat paint finish with low-glare white standard or ESD laminate with white contrast trim. ESD bench version includes dual ground studs and a 10-ft. ground cord. Workbenches are available in three popular sizes. Height adjusts 30" to 36" on two inch increments.

Mfg. Part No.	Description	W x D (in.)	Stock No.	Price Each
QS-1000002-D	Workmaster Standard Workbench	60 x 30	19K6187	458.00
QS-1006002-D	Workmaster ESD Workbench	60 x 30	24K0854	625.00

QS-1006003-D	Workmaster ESD Workbench	72 x 30	36K4177	694.00
QS-1000013-D	Workmaster Standard Workbench	72 x 36	36K4176	760.16

WORKMASTER™ SHELVES, DRAWERS, CABINET AND ACCESSORIES

Instrument shelves constructed in same manner as worksurface with matching low-glare white laminate and preinstalled threaded inserts. Heavy-gauge, formed steel risers clamp onto worksurface and attach to underside. Access cover detachs for installation of **QS-1022161-D** riser electrical panel (QS-SECIS). Full-length under-shelf channel support beams allow up to 500 lbs. distributed weight on shelf's work surface. ESD shelf version includes dual ground studs and 5-ft. coiled ground cord. Color: sky blue powder coat paint finish. Choice of two sizes: 60"W or 72"W x 18"H x 15"D.

ARLINK® 8000 TECHNICAL WORKSTATIONS AND ACCESSORIES

LISTA making workspace work

A-SS Single-Sided Starter

A-SA Single-Sided Adder

A-DS Double-Sided Starter

A-DA Double-Sided Adder

8614 Hanging Cabinet

8619 Hanging Cabinet

8658 Hanging Cabinet

- Select single-sided or double-sided starters and adders
- Choose either 60″ or 72″ wide sections
- Pick the worksurface in plastic laminate or ESD laminate
- Fast and simple set-up and reconfiguration
- Cold-rolled steel construction
- Ergonomically designed

Modular Arlink® 8000 technical workstations consist of easy-to-assemble starter and adder workstation sections, that can be adapted and reconfigured to suit the user's needs. Ideal for assembly, repair, light manufacturing, clean rooms and a host of other applications, these section are easily linked together to create infinite layout options, section widths can be mixed and matched, and sections can be converted from single- to double-sided at any time. Constructed of high-strength, cold-rolled steel that's powder-coated in an attractive light gray paint finish. Blue plastic accent trim gives support columns, lights, steel shelves and footrests a contemporary appearance. Ergonomically designed to improve comfort, eliminate wasted motion, and minimizes fatigue and strain. Each starter and adder section includes the necessary accessories to design a custom workstation. Arlink® 8000 hanging cabinets, *ordered separately below*, provide convenient below-worksurface storage. Other Arlink® 8000 workstation accessories are also available; *go online or call.*

A-SS series single-sided starter section includes: one starter assembly frame, one footrest, two outriggers, one worksurface assembly (choice of plastic laminate or static-dissipative plastic laminate), one single-sided power beam (15A), one 12″D open wire shelf, one light fixture assembly and one parabolic light diffuser.

MODULAR DRAWER STORAGE CABINETS (CONT.)

XSSC1350-1502/BB

XSST0750-0701M/BB

XSHS0750-0701M/BB

- High-quality, all-steel construction provides strength and stability
- 100% full extension drawers with 440-lb. load capacity
- Steel bearing drawer glides for problem-free operation
- PreventTip® locking system prevents accidental tipping
- Ergonomic, flush drawer handles for safety and good looks
- Hinged label holders for easy identification of drawer contents
- Key lockable for security and safety
- Choice of counter-height, eye-level height or mobile models
- Ideal for replacing shelving
- Maximizes floor space

XSSC and **XSHS series** storage drawer cabinets are ideal for a wide range of workspaces and storage needs, from manufacturing to warehousing to research and development. Designed to provide years of safe, convenient, high-density storage and problem-free operation. Heavy-duty steel construction, unique Z-bar support drawer design and fork truck base, with front and rear covers, provide full dimensional stability. Drawers fully extend 100%, even with a full 440 lb. (200 kg) load, allowing complete use of the furthest corners and easy access to all contents. PreventTip® locking system prevents cabinet from tipping by locking remaining drawers closed when one is extended open. Ergonomic drawer handles are full width, located at top of each drawer and flushed with cabinet housing when closed so nothing protrudes, improving safety and appearance. Drawer handles have a unique hinged plastic cover that protects identification labels and is easily opened and closed to allow labels to be added and changed. Installed drawer dividing accessories for better item organization and faster retrieval. All cabinets come with individual removable core lock with two keys for secure, safe storage. Cabinets can be anchored directly to the floor or bolt to adjacent units for stable, secure positioning with no shifting. Finish: bright blue.

XSST AND XSHS SERIES MOBILE CABINETS — 22½″D x 41½″H

Keep what's needed close at hand with **XSST** and **XSHS series** mobile storage drawer cabinets. Ideal for safe and secure storage and transport for parts and tools. Designed for the utmost ergonomic efficiency, each mobile cabinet includes a mobile base with two fixed and two swivel 6x2″ casters with wheel locks, tubular steel handle and removable core lock with two keys. PreventTip® locking system prevents cabinet from tipping by locking remaining drawers closed when one is extended open. Features individual drawer latches to secure drawer in closed position for safety when moving. Heavy-duty steel construction with bright blue painted finish. Drawer capacity: 440-lbs.

V-4 AND V-8 SERIES VALUE-LINE UPHOLSTERED AND ESD (STATIC CONTROL) SEATING

BEVCO ergonomic seating

VALUE-LINE by BEVCO

V4007HC-BLK

V4507MG-BLU

V4507MG-GRY

V800SMG

- Ergonomic waterfall seat for comfort
- Easy-to-use pneumatic seat height adjustment
- 360##UndefTag-786## swivel
- Tilt back with adjustable tension control
- Sturdy five-legged, black, reinforced-plastic base
- Easy-to-assemble with a #2 Philips screwdriver
- Meets applicable ANSI/BIFMA X5.1 standards for quality, durability and safety
- Three-year manufacturer's warranty
- Made in the U.S.A.

V850SHC

V-4 series upholstered seating and **V-8 series** static-control ESD-protective seating are both available on smooth-sliding glides or hard-floor casters. Dimensions: seat: 18″W x 18″D x 2.75″H; back: 16″W x 15″H x 2″D.

V4 SERIES UPHOLSTERED SEATING

V-4 series task chairs and task stools with 18″ adjustable footring feature BIFMA Class 1 rated Olefin fabric upholstery that resists fading, pilling, punctures and moisture. Meets flame retardant standards of California Technical Bulletin 117. Choice of three popular colors: black, blue or gray. Comfortable foam padding and contoured back with durable scuff-resistant back pan. *Order* **mfg. part no. AV** *ergonomic height-adjustable armrests with polyurethane arm pads separately below.*

V8 SERIES STATIC-CONTROL ESD-PROTECTIVE UPHOLSTERED SEATING

V8 series ESD-protective task chairs and task stools with 18″ adjustable footring are static-dissipative with a resistance of less than 106 ohms and have a grounding brass drag chain. All models feature navy blue, conductive fabric upholstery that is BIFMA Class 1 rated for durability and meets flame retardant standards of California Technical Bulletin 117. Comfortable foam padding and a contoured back with durable molded bumpers to prevent fabric wear.

Mfg. Part No.	Description	Seat Height Adjustment (in.)	Base Size (in.)	Stock No.	Price Each
V800SMG	ESD Task Chair on Glides	16 to 21	23	73P9737	186.00

9000 SERIES DELUXE UPHOLSTERED ESD (STATIC CONTROL) AND CLEANROOM SEATING

BEVCO ergonomic seating

9051ME-NY 9551ME-NY 9051MC2-BLV 9551MC2-BKV

- Ergonomic seat with waterfall edge for and comfort
- Contoured backrests for upper and lower back support
- Easy-to-use pneumatic seat height adjustment
- 360° swivel
- Tilt back and seat with adjustable control
- Polypropylene back shell for improved durability
- Sturdy five-legged, polished-aluminum base on smooth-sliding glides
- Exceeds ANSI/BIFMA standards for quality, durability and safety
- 12-year manufacturer's warranty
- Made in the U.S.A.

9000 series top-of-the-line seating provides advanced ergonomic features and total body support for around-the-clock comfort and reliability in a variety of workplace environments. Models designed specifically for static control (ESD) or cleanroom use, these deluxe chairs will fit almost any requirement. Featuring a large, comfortable waterfall seat and backrest, both with tilt function: 6° seat tilt range rearward/forward and backrest that tilts 110° forward/150° backward. Dimensions: seat: 20"W x 18"D x 3"H; back: 17.5"W x 16"H x 3"D.

DELUXE ESD (STATIC CONTROL) FABRIC-UPHOLSTERED SEATING

Deluxe static control ESD-protective task chairs and task stools with 20" adjustable ESD footring are fully assembled at the factory and tested for conductivity prior to shipment. The ESD fabric upholstery has a surface resistance of 108 ohms or less and comes with a conductive backing that more than doubles its abrasion surface. Averages 1.0x105 ohms resistance from any part of the chair to the ground, exceeding NFPA standards. All ESD models include drop chain, ESD glides, protective ESD backshell, and other chrome-plated components. *Order* **mfg. part no. A8** *height-adjustable ESD armrests and* **mfg. part no. CARD/5 S** *heavy-duty ESD dual-wheel casters for hard floors separately below.*

7000 SERIES ERGONOMIC INDUSTRIAL SEATING

BEVCO ergonomic seating

Blue, Gray, Black

7000-BLK 7501-BLK

- Durable polyurethane seat and back with ventilated ribs for comfort and support
- Fully adjustable contoured back with heavy-duty back bracket
- Contoured waterfall seat edge for and comfort
- Easy-to-use pneumatic seat height adjustment
- 360° swivel
- Tilt back and seat with adjustable control on **mfg. part nos. 7001, 7301, 7501**
- Sturdy five-legged, reinforced-plastic base on smooth-sliding glides
- Scratch-resistant, baked-enamel finish on metal components
- Meets ANSI/BIFMA standards for quality, durability and safety
- 12-year manufacturer's warranty
- Made in the U.S.A.

7000 series egonomic industrial polyurethane seating is specifically designed for outstanding comfort and long lasting use in the toughest workplace environment. These durable task chairs and stools offer total body support with advanced ergonomic features that improve productivity and reduce worker fatigue. The rugged self-skinned polyurethane seat and back resist stains and damage from punctures, grease, water, and chemicals. Ventilation ribs increase air circulation, comfort and ease of cleanup. **Mfg. part nos. 7001, 7301,** and **7501** come with an articulating seat and back tilt control for maximum ergonomic benefit. Tilt function: 6° seat tilt range rearward/forward and back tilts 11° forward/15° backward. **Mfg. part nos. 7300, 7301, 7500** and **7501** feature a wider base with an 18" diameter adjustable chrome footring. Dimensions: seat: 18.5"W x 17"D x 1.5"H; back:16.52"W x 12.5"H x 1"D. *Order* **mfg. part no. 3850S/5** *heavy-duty dual-wheel casters for hard floors separately below.*

1864 SERIES FLOOR MAT

3M

The main purpose of a conductive floor mat or runner is to remove static charge from personnel as they approach work areas. This could include supervisors and parts delivery personnel, as well as the worker who removes his or her wrist strap and momentarily steps away. Floor mats provide significant passive protection in well-traveled assembly areas. Continuous runners extend static protection throughout and between entire areas. This is a semi-flexible conductive floor mat that contains a rubber filler for resilience.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
1864 4X6	Electrically Conductive Floor Mat, 1/8 x 4' x 6'	93K6229	395.47
1864R 2X40	Electrically Conductive Floor Runner, 1/8 x 2' x 40'	93K6230	1246.80

(88905)

ESD FLOOR MAT GROUNDING KIT

DURATOOL

Dual-layer, rubber ESD floor mat is resistant to heat and chemicals. Comes with 15' domed ground cord, 10mm stud, one megohm resistor on mat, termination end, and a universal snap kit: 10mm stud, 10mm socket, groundable point label, washer and screws. Mat size: 4'W x 6'L, 3/32" thick. Color: dark blue.

Mfg. Part No.	Description	Stock No.	Price Each
MC35757	ESD Floor Mat Grounding Kit	83R0274	214.72

(89637)

STATFREE DPL PLUS DIAMOND PLATE ESD FLOOR MATS AND RUNNERS

DESCO

- Anti-fatigue, conductive
- Embossed diamond plate surface offers high-tech look while providing traction

Statfree DPL Plus™ homogeneous vinyl conductive material laminated to double-thick rubber foam base provides anti-fatigue properties. Diamond plate surface supplies traction in wet areas and abrasion resistance for high traffic areas. Black with yellow safety borders and laser engraved ESD protective symbol on top of mat alert employees to ESD sensitive areas. Non-humidity dependence allows consistent electrical performance. Statfree DPL Plus™ meets the technical range recommended in ANSI/ESD S20.20 for ESD Floor < 1 x 10E9 ohms tested per ANSI/ESD S7.1.

STATFREE T2 DISSIPATIVE DUAL-LAYER RUBBER WORKSURFACE MATS AND ROLLS

DESCO

Statfree T2™ Dual Layer Rubber Mats and Rolls

Lead-Free Green Mats and Rolls

- Ideal for soldering and assembly areas
- 10E6-10E8 Dissipative top with conductive bottom layer (Ref. ESD S4.1 and S20.20)
- Conductive properties warranted for life of product
- 100% premium nitrile butadiene rubber
- Superior heat-, chemical-, and wear-resistance

Statfree T2™ worksurface mats and rolls are available in other sizes and colors; *go online or call*. Green mats and rolls are lead free and laser engraved with "Lead-Free Workstation" to clearly identify the workstation as a Lead-Free work area.

STATFREE T2™ DUAL-LAYER RUBBER MATS

Statfree T2™ worksurface mats come complete with **mfg. part no. 14213** common ground point kit that consists of one **09826** common point ground (1 megohm resistor, 15' ground cord) and one universal 10mm stud snap kit.

STATFREE B2 DUAL LAYER VINYL ESD BENCH MAT

DESCO

Statfree B2™ meets the worksurface required limits of ANSI/ESD S20.20 of < 1 x 10E9 ohms. Statfree B2™ is designed for the dissipative dark blue side to be used as the top working surface meeting the upper limit requirement of ANSI/ESD S20.20 and lower limit recommendation of ANSI/ESD S4.1. The black side of Statfree B2™ is more conductive and provides a reliable path to ground which makes it compatible with continuous or constant monitors. Mat top kit includes benchmat and **mfg. part no. 14213** common point ground kit.

Mfg. Part No.	Description	Dimensions W x L	Thickness (in.)	Stock No.	Price Each
66161	Static Protection Bench Mat	30" x 50'	0.06	12P4358	984.11

(194910)

DISPOSABLE ESD MATS

DESCO

- Disposable fiberboard with internal conductive layer
- Dissipative worksurface 10E6 - 10E8 ohms Rtt per ANSI/ESD S4.1
- Volume resistance 10E6 - 10E7 ohms per ANSI/ESD STM11.12
- Material thickness 0.060"
- Recyclable
- Made in America

Disposable ESD mat meets ANSI/ESD S20.20 worksurface required limit and recommendation of ANSI/ESD S4.1 for contact with ESD susceptible items. The material is intended to be a sacrificial material to protect a more expensive worksurfaces from damage caused by conformal coating, solder fluxes, or other contaminates.

STATIC-DISSIPATIVE TABLE AND FLOOR MATS AND RUNNERS

3M

Static-Dissipative Rubber Table Mat

Static-Dissipative Vinyl Three-Layer Floor Mats

STATIC-DISSIPATIVE RUBBER TABLE AND FLOOR MATS AND RUNNERS
Static-dissipative rubber table and floor mats and runners feature a dual-layer construction consisting of a top layer of static-dissipative rubber laminated to a bottom layer of conductive rubber. The synthetic rubber work surface offers excellent resistance to oil, grease, and most common solvents, plus a higher degree of resistance to heat and hot solder than vinyl. Easy to keep surface clean with **mfg. part no. 8001** static control surface mark remover; *ordered separately below.*

STATIC-DISSIPATIVE RUBBER TABLE MATS
Each table mat includes one **mfg. part no. 3048** wrist strap grounding system and two **mfg. part no. 3034** female snap fasteners (installed). Table mat rolls come with no hardware.

Mfg. Part No.	Size	Color	Stock No.	Price Each 1-4

8871	4′ × 6′	Blue	66F9509	256.53

STATIC-DISSIPATIVE VINYL THREE-LAYER TABLE AND FLOOR MATS AND RUNNERS
Static-dissipative vinyl table and floor mats and runners feature a three-layer construction. The top layer is semiconductive vinyl with a sufficiently low-resistance to discharge static-laden conductors while preventing the shorting of PC boards laid on the mat. The second layer is a highly conductive scrim, which provides the main discharge path to ground. The third layer is nonconductive foam backing, which prevents the bypassing of the protective conductive layers. Easy to keep surface clean with **mfg. part no. 8001** static control surface mark remover; *ordered separately below.*

STATIC-DISSIPATIVE VINYL THREE-LAYER TABLE MATS
Each three-layer constructed table mat includes one **mfg. part no. 3048** wrist strap grounding system and two female snap fasteners (installed), except **mfg. part no. 8243** mat does not include hardware.

Mfg. Part No.	Size	Color	Stock No.	Price Each 1-4

STATIC CONTROL SURFACE MARK REMOVER
Mfg. part no. 8001 static control surface mark remover is an extra-strength cleaner for removing ordinary dirt and grime, as well as difficult spots and stains, from all types of static control surfaces: table and floor mats and runners, hard laminate benchtops, portable field service kit work surfaces, etc. This easy-to-use cleaner is suitable for any washable static control surface. Designed to be used full-strength, it's a clear, homogenous, water-based liquid that contains detergents, conditioners, and other cleaning additives, and has a fresh, clean scent. Comes in a handy, refillable 1-quart spray bottle.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
8001	Static Control Surface Mark Remover, 1-Quart Bottle	83K9447	9.01

ULTRA R-2 LAYER RUBBER
Resistant to heat and chemicals, excellent electrical properties, thickness 0.060 in. (1.5 mm).

STATIC DISSIPATIVE RUBBER MATS AND RUNNERS 6800 SERIES

3M

- Material: nitrile
- Thickness: 0.065 in. (1.7 mm)
- Hardness: 65 Shore A
- Width: ± .25 in.
- *Resistance:
  Surface to Ground (RTG) < 108 ohms
  Surface to Surface (RTT) < 109 ohms
- *Tested per ESD Association Standard S4.1.

6800 series matting is a dual layer rubber mat featuring a smooth finish. **6800 series** mat is available in blue/black and grey/black colors with standard sizes in 2 feet, 3 feet and 4 feet widths and 50 feet lengths. The **6800 series** mats are also available as 2 x 4 ft. cut mats in blue/black and grey/black, including snaps only.

Mfg. Part No.	Size (ft.)	Color	Stock No.	Price Each 1-4
6810	2 x 4	Grey	62W4292	60.97
6811	2 x 4	Blue	62W4293	62.25

STATIC CONTROL WORKSTATION GROUNDING KITS

3M

Each Kit Includes:
- 2′ x 4′ Table mat
- 4′ x 6′ Floor mat
- 15′ Ground cord 3040
- Adjustable wrist strap 2214
- Wrist strap/table mat grounding system 3048

Workstation Monitor

Workstation grounding kits provide the basic items needed to create a static-safe work environment for fabrication, assembly, storage, kiting, testing, and repair operations. Workstation grounding kit **8020 series** floor and table mats are made from three-layer static-dissipative material to ensure resistance-to-ground measurement will be same from any point on surface of material. Workstation grounding kit **8030 series** table mats are made of softer three-layered, static-dissipative material, while floor mat is of more-rigid, durable, volume-conductive material. Table and floor mats connect to building ground using components included in kit. Up to 2 wrist straps connect to the wrist strap/table mat grounding system. Wrist strap features 1-megohm resistor to protect personnel from electrical shock through cord.

Mfg. Part No.	Mat Color	Description	Stock No.	Price Each 1-4
8021	Brown	Kit with 3-Layer Material Table and Floor Mats	46F7446	587.92
8023	Gray		46F7448	601.15
8024	Blue		46F7449	601.15
8033	Gray	Kit with 3-Layer Material Table Mat and Velostat™ Floor Mat	46F7453	620.50
8034	Blue		46F7454	620.50

(4552)

PORTABLE FIELD SERVICE GROUNDING KITS

3M

These portable grounding kits provide all the basic items needed to create a static-safe work environment for field service work. All kits contain adjustable wrist band, ground cords, and a static-dissipative work surface. Static dissipative grounding kit **8501** is portable and compact. **Mfg. part no. 8505** kit is lightweight and, when folded, small enough to fit in a shirt pocket. Portable field service kit **8507** also includes wrist strap monitor **725** and dual conductor wrap strap with grounding cord, to give a field technician the same continuously monitored, static-protected working environment as that enjoyed by workers in a manufacturing facility.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
8501	Field Service Grounding Kit	46F7444	117.55
8505	Small, Lightweight, Portable Field Service Grounding Kit	95F2864	165.21
8507	Portable Field Service Kit with Continuous Monitoring	90B4103	219.16

(4660)

STATIC CONTROL FIELD SERVICE KIT

MADE IN USA

DURATOOL

- 0.018 in. (0.46 mm) red laminated dissipate vinyl
- Antistatic, low tribocharging, portable, protective worksurface with two ground snaps
- 15′ long common point ground cord
- Provided with 1 megohm resistance between mat and ground and banana jacks for two wrist straps
- Large threaded grounding clip
- Construction is a supported laminate for added tear strength
- Holds up longer in demanding and rough "Field Service" environment
- Adjustable wrist strap included
- Everything needed is provided
- Ground cord threaded end designed to fit ground jack AC outlet
- Canvas carrying pouch
- Easy to store and transport service kit
- Made in America

Mfg. Part No.	Description	Stock No.	Price Each
MC23796	Field Service Kit	14N9060	63.72

ESD BENCHTOP GROUNDING KITS

DURATOOL

All Kits Include:
- Dual-layer rubber mat — available in 2′ x 4′
- Adjustable elastic wrist strap with 4mm male stud snap
- 6′ retractile coil cord with 4mm socket snap, molded banana plug
- 15′ black ground cord with 10mm male stud snap, 1megohm resistor, ring terminal
- One Universal 10mm snap kit

These static control grounding kits include everything needed to install an ESD-safe work area. **Mfg. part nos. MC35758** and **MC35759** benchtop mat grounding kits include a soft elastic wrist strap that has silver impregnated polypropylene on the inside for reliable removal of static charge.

Mfg. Part No.	Description	Mat Size (Ft.)	Mat Color	Stock No.	Price Each 1-9

WRIST STRAP GROUNDING SYSTEM, MONITOR-TO-MAT CORD AND MAT SNAP FASTENERS

3M

3048

2380

3033 Male

3034 Female

3050 Female

Mfg. part no. 3048 grounding system for wrist straps easily snaps on mats and runners (10mm male snap); grounds two single conductor wrist straps. Comes complete with ring connector and 15 feet (4.6m) ground cord. Ground cord has a one megohm resistor for mat connection only. **Mfg. part no. 2380** six foot (1.8 m) monitor/table mat replacement cord with 10mm snap does not have a resistor molded into the snap fastener cap. Use with **mfg. part no. 724** 3M™ wrist strap workstation monitor, ordered separately *on page 2148*, to extend monitor to the static control work surface to be monitored. **Mfg. part nos. 3033** and **3034** male and female snap fasteners 0.125″ (3.2mm) hole, 10mm diameter, for 3M™ **1800** and **8800 series** mats and runners. **Mfg. part no. 3050** female snap fastener, 10 mm diameter, for 3M™ **8200 series** mats and runners. **Mfg. part no. 3040** straight 15 feet (4.6 m) ground cord molded-in male snap fastener with integral 1-megohm resistor on one end, solderless terminal on other. **Mfg. part no. 3042** grounding system for wrist strap . Grounds two single conductor wrist straps and conveniently mounts beneath the edge of most work benches. Comes complete with 10 ft. (3.0 m) ground cord. **Sold in packs of 10.**

(75445)

FLOOR AND TABLE MAT GROUNDING CORD KIT WITH 10MM STUD

DESCO

- 15′ ground cord with 10mm snap stud
- Screw allows ground cord to be bolted to mat; keeps cord from disconnecting
- Low profile helps keep users from tripping on cord connection

14234 Kit

Mfg. part no. 14234 grounding cord kit includes one **mfg. part no. 09813** ground consisting of: 10mm (0.395″) snap stud with threaded hole, 6-32x1/4″ flat head screw, countersunk washer, resistor, ring terminal at end of 15′ ground cord and one **mfg. part no. 09864** universal snap kit consisting of: 10mm stud, 10mm socket, long and short screws and ESD common point ground symbol label.

Mfg. Part No.	Description	Stock No.	Price Each
14234	Grounding Cord Kit with Resistor	50H8164	24.40
09813	10mm Stud with Resistor	50H8153	21.03
09814	10mm Stud without Resistor	50H8154	23.83

(75446)

COMMON POINT GROUNDING CORD KIT FOR BENCH MAT AND TWO WRIST STRAPS

DESCO

- Grounds snaps to bench mat and accepts two wrist straps
- Two banana jacks — provides two grounding points for wrist straps or carts
- Low profile reduces snagging of clothes and work instruments

14213 Kit

Mfg. part no. 14213 common point ground cord kit with resistor includes one **mfg. part no. 09826** common point ground consisting of: 10mm socket snap, resistor, two banana jacks, ring terminal at end of 15′ ground cord, extra ring terminal for customizing cord length and one **mfg. part no. 09864** universal snap kit consisting of: 10mm stud, 10mm socket, long and short screws and ESD common point ground symbol label.

Mfg. Part No.	Description	Stock No.	Price Each
14213	Common Point Grounding Cord Kit with Resistor	50H8163	25.32
09820	10mm Socket without Resistor, 10′ Cord	50H8158	20.77
09821	10mm Socket with Resistor, 10′ Cord	50H8159	23.83
09825	10mm Stud without Resistor, 15′ Cord	50H8160	21.41
09826	10mm Stud with Resistor, 15′ Cord	50H8161	24.12

(75447)

SCC GROUND CORDS

3M

Low Profile Commom Ground Cord

Bench Ground Block

- Table mat ground cord **LPCGC151M** connect a mat and two wrist straps to ground
- Floor mat ground cord **FGC151M** has domed profile to help avoid snap disconnect
- Ground block mounts to bench and connects two wrist straps to ground. Two parking studs reduce damage to cords left at the bench. No Resistor.

Use SCC ground cords to connect your table, floor mats and wrist straps to a ground point and comply with ANSI/ESD S-20.20 and ESD STM-6.1. Both ground cords include one megohm resistor and #10 ring terminal.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
FGC151M	Floor Ground Cord w/ 3/8″ Stud and 15′ Cord	39M5829	13.36
LPCGC151M	Low Profile Common Grnd Cord w 3/8″ Stud	39M5830	13.75
WSGR2	Bench Ground Block for Wrist Straps, 10′ Cord, No Resistor	39M5831	15.22

STATIC CONTROL ADJUSTABLE FABRIC WRIST STRAP AND SETS

3M

2204

BLUEWS61M Set

Ideal for all static control processes, these fully-adjustable stretch fabric wrist straps are made of a conductive threads woven together with elastic nylon to allow full conductivity, comfort and reliability, while providing rapid and continuous drain of static charge. One size adjusts to most any size wrist for reliable, 360° protection. Wrist strap sets include one adjustable wrist strap with 4mm snap, one black 5-ft, 6-ft. or 10-ft retractable coil grounding cord with one megohm resistor and banana jack, and one alligator clip to provide an alternative ground attachment method.

DISPOSABLE WRIST STRAP

UL

3M

Disposable wrist strap 2209 is ideally suited for shipping with valuable products to provide protection at the receiving end; or in the plant environment for short-term usage by visitors and others who don't need the durability of a reusable strap. Hypo-allergenic adhesive provides 360° contact with skin to minimize skin-to-band resistance. Adhesive-backed copper foil at other end adheres to any convenient electrical ground. 1MΩ resistor contained in the black volume-conductive layer. UL listed.

HEEL AND TOE GROUNDING ASSEMBLIES

3M

Heel Grounder

Toe Grounder

3M™ heel grounding assemblies provide greater freedom of movement without compromising static control protection. Effectively ground worker in contact with conductive flooring materials. Feature comfortable elastic ankle straps. Simply place assembly over shoe, adjust strap for a comfortable fit and insert extra long contact ribbon between shoe and sock. Foot perspiration produces enough moisture to create electrical contact between conductive ribbon and the body. The intrinsic resistance in the heel strap does not increase shock hazard to wearer. Accommodate most shoes and boots. **Mfg. part no. 2044** is a COP-Style heel grounder with a high visibility "yellow glow" strap that helps facility supervisors

➤CONTINUED➤

HEEL AND TOE GROUNDING ASSEMBLIES (CONT.)

effectively manage their static control problem. **Mfg. part no. 2053** is designed for use with high-heeled shoes, the toe grounding assembly grounds personnel when they are in contact with conductive/ dissipative flooring. To be effective, the shoe grounders must be worn on both feet.

WRIST STRAP AND FOOTWEAR RESISTANCE TESTERS

3M

740, 741

746C

718 CERTIFIED

Mfg. part no. 740 3M™ wrist strap and footwear resistance tester for static control wrist straps is simple to operate. Wall-mounted unit tests the wrist strap and cord while they are being worn and can also test each component independently to isolate an identified fault. Red and green LEDs give a clear "go" or "no go" indication. Features four different resistance levels. A digital output allows the unit to interface with a computer, automatic door lock, alarm or other control devices. Wrist strap and footwear tester comes with an output connector, 3M Dual Lock™ wall-mounting system and template, cover for the wrist strap plug-in jack, AC/DC transformer and instructions. To test footwear, simply attach **mfg. part no. 741** shoe electrode, *ordered separately below.*

Mfg. Part No.	Description	Stock No.	Price Each 1-4
740	Wrist Strap and Footwear Resistance Tester	16F1764	680.09
740 CERTIFIED	Wrist Strap and Footwear Resistance Tester (Certified)	66K5718	839.95

Mfg. part no. 741 shoe electrode connects to **mfg. part no. 740** resistance tester, *ordered separately above,* converting it into a footwear tester as well as a wrist strap tester. By standing on the shoe electrode test plate, the user can check static control footwear, heel straps, etc.

741	Shoe Electrode	16F1765	166.56

Mfg. part no. 746C battery-operated wrist strap tester tests wrist straps while being worn or tests individual wrist strap components. Wall mountable. Resistance measuring range: 750 kohm to 10 mohm. Tester comes complete with 9VDC lithium/manganese dioxide battery, AC/DC adapter, 3M™ dual lock system wall mounting kit, cover for wrist strap plug-in jack and instruction manual.

746C	Wrist Strap Tester	08P3411	519.62

Mfg. part no. 718 CERTIFIED static sensor (certified) easy-to-use, hand-held instrument is designed to measure static voltages on objects and surfaces for electrostatic charge buildup. Measuring range: 2kV to 20kV. Sensor comes with instruction manual and Certificate of Conformance. Operates on a 9V battery (not included).

718 CERTIFIED	Static Sensor (Certified)	46M4958	1061.40

COMBOTESTER	Combination Wrist Strap and Footwear Tester	39M5836	625.78

SINGLE WIRE CONTINUOUS WRIST STRAP MONITORS

Single wire continuous wrist strap monitors offer the most cost-effective means for continuously testing the connection integrity of the entire ground loop including the person, the wrist strap and the coil cord. By using new impedance sensing technology, adjustments and false alarms are virtually eliminated. This system is fully automatic and activates when a wrist strap is plugged into the unit. It provides a green light for safe condition and a red light and tone for unsafe condition. Units are powered and grounded by the included AC adapter. Compatible with most standard wrist straps. Easy to install and use. **Mfg. part no. WSMONITOR1** monitors one wrist strap/person. **Mfg. part no. WSMONITOR2** monitors one wrist strap/person and the bench mat. **Mfg. part no. WSMONITOR3** monitors two wrist straps/persons and the bench mat.

EM EYE METER

CE c UL us RoHS Compliant Available 3M

Touch Screen and Color LCD Display
Easy to Use...Quick to Navigate

The Power of a Benchtop Meter in Your Pocket

- Compact, hand-held meter for ESD event, EMI field and RF signal detection and measurement
- Modular construction expands to different applications by using interchangeable sensor modules
- Touch screen and color LCD display
- miniSD™ memory card slot for data logging capability
- Audio indicators with volume control
- Convenient headphone jack
- Remote or local antenna selection

CTM048 series EM Eye Meter is one of the smallest, most versatile instruments for measuring electro-magnetic (EM) fields, radio frequency (RF) signals and electro-static discharge (ESD) events determined by the sensor module connected to the meter. Key functions include: ESD event detector, electromagnetic field (EMF) meter, power density meter, effective isotropically radiated power (EIRP) meter and radio frequency (RF) meter. Technicians can expand their instrumentation capabilities by connecting a different sensor module to the meter — it's less expensive than purchasing a completely new instrument. *Order additional sensor modules separately below.* The EM Eye Meter supports data logging by using a miniSD™ memory card and exports to an Excel® spreadsheet. Having data at hand enables quick analysis and with the EM Eye Meter, problems can be measured and solutions developed quickly on the spot. Lightweight, only 9.75 oz. Dimensions: 2.6″ W x 1.3″ D x 4.2″ L. Each meter includes sensor module (indicated in table below), local directional antenna (except **mfg. part no. CTM048-29** which includes an RF BNC cable and 20dB attenuator), memory card, AC power supply/battery charge, users guide, and one-year manufacturer's limited warranty. UL listed, CE compliant.

SURFACE RESISTANCE METER

3M

- Measurement: 10^3 to 10^{12} ohms/square ASTM D257 10^2 to 10^{11} ohms EOS/ESD 11.11
- Resolution: one order of magnitude
- Accuracy: ±1/2 decade
- Power: 9 volt battery
- Electrodes: Parallel Bar

The SCC-625 is a wide range, multi-scale, auto-ranging meter. It measures resistivity per ASTM D257, resistance per EOS/ESD S11.11, and resistance to ground (RTG). Useful for audit testing required by ANSI/ESD S-20.20, EIA 625, MIL-STD-1686. Measures conductive, dissipative and insulative items. The meter is battery powered and simple to use. High speed electronics insure repeatable measurements. Wt.:6.2oz. Size:115mm x 69mm x 26mm

Mfg. Part No.	Product Description	Stock No.	Price Each 1-9

ESD TESTERS & MONITORS • APPAREL

JEWEL® MINI MONITOR

DESCO

- Wave distortion technology continuously monitors for operator path to ground and presence of 1 Meg resistor
- Stand-by parking snap
- Full-time status LEDs and audible alarm
- Miniscule electrical current required to generate waveform

Small size unit 2.77" x 2.07" (7cm x 5cm) provides true 100% continuous monitoring, not pulsed current that's off over 90% of time. Stand-by parking snap keeps unit from going into alarm when user disconnects cord . Wave distortion technology provides real-time monitoring, pays for itself and ensures ESD protected workstation, reducing catastrophic failures and latent defects. Miniscule electrical current required to generate waveform, no reported case of skin irritation. Two 10mm studs on bottom of unit permanently snap monitor flush on mat. Two 10mm push & clinch sockets included.

Mfg. Part No.	Description	Color	Stock No.	Price Each

SURFACE RESISTANCE CHECKER

DESCO

- Color-coded LEDs
- Automatic test range voltage selection per compliance verification ESD TR53
- Reading displayed as long as test button is depressed
- Portable operation with 9V battery (included)
- Flashing LED warns when battery is low
- NIST calibrated with certificate
- Made in America

19640

Mfg. part no. 19640 economical compliance verification surface resistance checker used for determining if a surface is dissipative, conductive, or insulative. Starts tests at 10 volts and automatically switches to 100 volts if the measurement is over 10E5 ohms. Provides exponent range of resistance measurement which is often all that is required for determining if a material is intended for an ESD protected area . Surface resistance checker comes complete with one 9V battery and calibration certificate. *Order electrodes and test leads, separately below, for external resistance point-to-point (Rtt) and resistance to ground (Rtg) measurements of larger surfaces, such as flooring and mats.*

DIGITAL STATIC FIELD METER AND IONIZATION TEST KIT

DESCO CE

- Portable meter for testing of electrostatic fields
- Durable dissipative housing design with membrane switches
- Stainless steel conductive plate for static field meter **mfg. part no. 19493**
- ±1000 volt charger **mfg. part no. 19493**
- LED range finder
- Hold button
- NIST calibrated
- Made in America

19492

Digital Static Field Meter is a high quality, portable non-contacting static field meter which consistently produces accurate readings with ease and provides years of trouble-free operation. Ionization test kit **mfg. part no. 19493** allows **mfg. part no. 19492** digital static field meter to be used to measure the offset voltage (balance) and charge decay of ionization equipment. The test kit also includes a charger used to place a ±1000V charge on **mfg. part no. 19498** conductive plate, making it possible to also measure the discharge times of air ionization equipment per ANSI/ESD SP3.3 Periodic Verification of Air Ionizers. **Mfg part no.19492** digital static field meter is designed to operate only with **mfg. part no. 19493** ionization test kit. Digital static field meter includes a 9V alkaline battery, data output cord and cert. of calibration. Ionization test kit also includes conductive plate and charger.

Mfg. Part No.	Description	Stock No.	Price Each
19492	Digital Static Field Meter	11R6159	923.07
19493	Ionization Test Kit	11R6160	1769.92

(196359)

ANALOG SURFACE RESISTANCE TEST KIT

DESCO CE

- Analog compliance verification surface resistance checker
- Automatic test range voltage selection per compliance verification ESD TR53
- LED illuminates when battery power is low
- Test kit includes set of five pounds electrodes and leads
- NIST calibrated
- Made in America

Analog surface resistance test kit is a portable battery-powered instrument designed to measure resistance point-to-point (RTT) and surface to ground (RTG). The meter is equipped with an automatic test voltage selector. The test voltage will switch from 10V to 100V should the measured resistance exceed 10E5 ohms. Kit includes analog surface resistance meter, 9V alkaline battery, two shielded test leads and five pound electrodes, carrying case and cert. of calibration.

Mfg. Part No.	Description	Stock No.	Price Each
19784	Analog Surface Resistance Test Kit	69R7109	893.64

(196360)

MULTI-GROUND CONTINUOUS MONITOR

EMIT

- Continuously monitors 8 ground connections and 1 ground hub
- Each ground channel can be set to 1 ohm, 1 megohm, 10 megohms, and 35 megohms resistance limits
- 2 relay terminals allow for output to a light pole or programmable logic controller
- Ground reference connection
- Self calibration and self diagnostic modes
- Enclosed in stainless steel
- Mounting tabs allow mounting underneath a bench top
- Operating temp.: 32°F-104°F
- 5-year limited warranty
- Made in America

Multi-ground continuous monitor is a continuous monitor designed to verify that a worksurface, shelving, or equipment is connected to ground, which depending upon the value of ESD sensitive items should be a continuous task. Includes 1 multi-ground hub which has six banana jacks and six 10-32 screws with split washer, interchangeable plug power supply, right angle ground wire, 12' long, ground wire with ring terminal, 10' long and cert. of calibration.

Mfg. Part No.	Description	Stock No.	Price Each
50570	Multi-Ground Continuous Monitor, 110-240VAC, 50/60Hz	01N0579	691.57

ESD INSPECTION GLOVES

DESCO

- Dissipative (10E5 - 10E8 ohms) Thunderon® fibers
- Kevlar Kleen® carrier yarn
- Seamless fine gauge knit
- Durable construction

ESD inspection gloves are designed to be worn when handling ESD susceptible items. The seamless fine gauge knit is designed for all-day wear allowing easy hand movement and a high level of tactile sensitivity. ESD inspection gloves may be laundered and will retain their ESD properties for 30 washings or approximately 1 year.

Mfg. Part No.	Size	Length (in.)*	Stock No.	Price per Pair
68120	S	7-3/8	27T9667	7.57

newark.com/duratool

(212563)

DISSIPATIVE NYLON GLOVES WITH POLYURETHANE COATING

NEW **DESCO**

- Dissipative (1 x 10^5 < 1 x 10^6 ohms) Thunderon® fibers
- Kevlar Kleen® carrier yarn
- Polyurethane coated palm and fingers
- Seamless fine gauge knit
- Non-scratch touchscreen compatible
- Sold in pairs

ESD inspection gloves are designed to be worn when handling ESD susceptible items. The carrier yarn will also absorb sweat and oils produced by the operator's hands to help prevent contamination. The seamless fine gauge knit is designed for all-day wear allowing easy hand movement and a high level of tactile sensitivity. ESD inspection gloves may be laundered and will retain their ESD properties for 30 washing or approximately 1 year.

BLACK ESD ARM BAND BADGE HOLDER

NEW **MENDA**

- ESD symbol allows people to immediately know the badge holder has ESD control properties: low charging antistatic and dissipative
- Perfect for active personnel if standard badges fall off their clothing
- Adjustable black elastic band flexs with arm movement for secure fit

Ideal for use by electronic manufacturers working with ESD sensitive components. Made with a custom dissipative material.

CLEAR ARM BADGE ESD HOLDER

ESD STATSHIELD PROTECTIVE JACKET SMOCKS AND LAB COATS

DESCO

- Meets requirement for groundable static control garment
- Compatible with most single-wire wrist strap monitors and testers
- Patented hip-to-cuff grounding
- Easy on/off snap front closure
- Comfortable conductive elastic knit cuffs
- Three roomy patch pockets on front
- Badge holder tab on front (**Black only**)
- Handy pen pocket on each sleeve (**Black only**)
- Made in America

Jacket Smock Jacket Smock Lab Coat

Statshield® groundable static control garments meet the ANSI/ESD S20.20-2007 required limit of < 3.5 x 10E7 ohm Rtg tested per ANSI/ESD STM2.1. Designed to be antistatic, low tribocharging, these garments offer protection from electrostatic fields generated by clothing on the user's body. Using high-quality texturized polyester material with a minimum 9% carbon nylon monofilament, the garment creates a Faraday Cage around the torso of the wearer. Static charges generated by the wearer and wearer's clothing will be shielded from ESD susceptible products. The dissipative material becomes part of the ground path to remove static charges. Patented hip-to-cuff grounding allows connection of wearer's ground cord to a 4mm snap stud on the hip of the garment providing hands-free grounding thereby increasing productivity. Available in black and blue. Other sizes and colors available; *go online or call.*

METAL-OUT CUSHIONED REUSABLE STATIC-SHIELDING BAGS AND WRAP

2120R Bags

2126R Wrap

2120R series metal-out cushioned bags are used for physical protection as well as static shielding. Cost-effective and convenient, the five-layer construction protects against direct discharge, triboelectric charge and static fields. The inside layer (closest to components) is a smooth, static-dissipative polyethylene liner that minimizes snagging of pins or sharp edges during insertion and removal. Open-cell cushioning enhances shock protection. Metal-out construction makes bags easily testable and reusable. Thickness: 125 mil. Strength tested to ASTM D882 (tensile), and FTMS 101 (puncture) standards. **2126R series** cushioned static-shielding wrap provides shielding and physical protection for large or irregularly shaped circuit boards. Made of the same open-cell cushioning construction used for **2120R series** static-shielding bags and is heat-sealable, but does not have the smooth inner liner. Can be cut to fit various wrapping applications.

2120R SERIES CUSHIONED STATIC-SHIELDING BAGS — SOLD IN PACKAGES OF 100

METAL-OUT STATIC-SHIELDING BAGS

RoHS Compliant Available

Metal-out static-shielding bags **2100R** and **2110R series** are produced with a construction in which the shielding layer is very near the exterior surface. A thin abrasive-resistant coating protects this metal surface from scratches, but still permits rapid charge draining when the bag is placed on a conductive or dissipative work surface. The bags use a double-thick polyester with an applied thin metallization layer which makes the bags more durable and provides electrical isolation that prevents electrical currents from passing through the bag. The interior features an amine-free antistat agent that limits triboelectric charging of parts as they move around inside the bag. Functions properly in conditions as low as 10% relative humidity. **2110R series** bags feature a zipper closure for easy opening and closing. **Sold in packages of 100.**

METAL-IN STATIC-SHIELDING BAGS

Metal-in static-shielding bags **1900** and **1910 series** are an economical alternative shielding bag for less demanding applications where testing and reusing bags are not prime considerations. Aluminum is vapor-coated on half-mil polyester. This shielding layer is bonded between the polyester layer and a static-dissipative polyethylene inner layer. These static-shielding bags are amine-free, non-corrosive and meet EIA-541 definition for static shielding/dissipative packaging. **1910 series** bag features a zipper closure for easy opening and closing. **Sold in packages of 100.**

METAL-IN STATIC-SHIELDING BAG SCC 1000

RoHS Compliant Available

- Faraday Cage effect shielding protects electronic devices from ESD and electrostatic fields
- Durability is enhanced by positioning the metal layer between polyester and polyethylene
- Four layer construction offers excellent protection from punctures and tears
- Bags are printed with ESD warning symbol and date coded for QC traceability

SCC 1000 is atransparent, metallized static shield bag helps provide a static safe environment for sensitive electronic devices. SCC 1000 bags are tested to meet or exceed the requirements of certain electrical and physical requirements of ANSI/ESD S541, EIA 625, and to be ANSI/ESD S20.20 program compliant.

ZIPTOP RECLOSABLE STATIC-SHIELDING BAG SCC 1000

RoHS Compliant Available

3M

- Same Faraday cage shielding, durability, and four layer structure as the SCC 1000
- Durability is enhanced by positioning the metal layer between polyester and polyethylene
- ZipTop zipper is welded to the bag interior for reliability
- Bags are printed with ESD Warning Symbol and date coded for QC traceability
- Testable to industry standards
- ANSI/ESD S-20.20, ANSI/ESD S-541

SCC 1000 ZipTop bags provide an alternative to folding your bags and securing them with a warning label. Quality-tested zipper material is used to provide zipper bags with high reliability. **Sold in packages of 100.**

MOISTURE BARRIER BAG DRI-SHIELD 2000

RoHS Compliant Available

3M

- Designed for dry packaging of electronic devices
- Flexible structure is easy to vacuum seal
- Protect SMD's from moisture and static damage
- Printed with ESD and moisture symbols
- Coded for QC traceability
- Tested to meet or exceed industry certain electrical and physical requirements of ANSI/ESD S-541, EIA 625
- ANSI/ESD S20.20 program compliant
- 3.6 mils

Dri-Shield 2000 family of moisture barrier bags satisfy many dry packing applications and provide the same static control benefits as static shielding bags. Moisture barrier bags work by enclosing a device with a metal shield that has a high resistance to moisture vapor permeation. Dry devices are placed inside this shield, and the moisture-laden air is evacuated. Desiccant filled pouches scavenge the remaining moisture from the bag's interior. **Sold in packages of 100.**

SCC HUMIDITY INDICATOR CARDS

3M

51015HIC125

4HIC100

- **Mfg. part no. 3HIC125** complies with MS 20003-2, and MIL-P-116: popular for military applications, this card is approved for use by DOD, NATO, and governmental agencies for Method II packaging
- **Mfg. part no. 51015HIC125** complies with IPC/JEDEC J-STD-033A standard
- **Mfg. part no. 51060HIC125** complies with IPC/JEDEC J-STD-033B standard
- **Mfg. part no. 4HIC100** complies with EIA 581, MIL-P-116, and MIL-I-8835: designed for dry packaging SMD's, color reference bar assists with accurate readings
- **Mfg. part no. 6HIC200** complies with EIA 581, MIL-P-116, and MIL-I-8835: used in a variety of dry packaging application, this card monitors humidity levels across the widest range

Humidity indicator cards are used as part of protective dry packaging for moisture sensitive devices with SCC moisture barrier bags, desiccant, and moisture labels; *ordered separately on this page.* Cards are printed with moisture sensitive spots, which respond to various levels of humidity with a visible color change from blue to pink. Accuracy based on ambient temperature of 75°F. Meet JEDEC, EIA, and military standards and are lot traceable. When used inside vacuum-sealed moisture barrier bags, the interior humidity conditions are easily monitored. **Sold in air-tight cans of quantities listed in table below.**

CONDUCTIVE CONTAINERS

3M

Round Container w/ Cover — Hinged Container

Injection-molded plastic, noncorrosive and lightweight. Static-sensitive devices can be transported in these containers which provide protection from direct static discharges as well as from static fields from charged personnel and materials.

HINGED CONTAINERS

Hinged containers feature molded pin hinges that provide better security and reliability than traditional snap hinges.

STATIC-FREE CONDUCTIVE FOAM

MADE IN USA

DURATOOL

- Antistatic, low tribocharging
- Dissipative and corrosion resistant for long term storage
- Volume and surface resistivity: 10E3 - 10E5 ohms
- Made in the U.S.A.

High-density conductive foam is ideal for lead insertion packaging, providing ESD and physical protection to components leads. Material minimizes exposure to discharge and will conduct charges if grounded. Offers uniform protection that will not affect the solderability of device leads. Construction: polyurethane open cell, carbon/acrylic impregnated. Size: 24 × 36". Color: black.

Utility Tape 40 | Polymide Film Tape 5419 | Tape Dispenser 620

40 PRINTED AND UNPRINTED ANTISTATIC UTILITY TAPE

3M™ **40** printed and unprinted antistatic utility tape is perfect for use in static-sensitive areas. Transparent polyester film with acrylic adhesive is available clear (unprinted) or printed with black 3M™ logo and ESD protective symbol. Made with a proprietary technology, this tape generates extremely low levels of triboelectric charge when it is unwound from the roll and also when removed from most surfaces on which it is placed, making it an excellent choice for use near electronic components and assemblies.

STATIC-DISSIPATIVE BOTTLES

DURATOOL

- Static-Dissipative 2 oz. Flux Bottles: Available with 26, 20 or 16 Gauge Needle
- Static-Dissipative 6 oz. Solvent Containers: Standard or Purity Pump, which Prevents Contamination by Stopping Fluid Return to Dispenser. Both Stainless Steel with Airtight Check Values
- Static-Dissipative 8 oz. Water Bottle
- Static-Dissipative 32 oz. Sports Bottle: for Personal Consumption of Cold Beverages
- Static-Dissipative 16 oz. Catch-All Bottle: General-Purpose Cup for Holding Small Items
- Static-Dissipative 16 oz. Spray Bottle: ESD-Safe Bottle with Spray Pump

Regular plastic bottles produce a 10,000V charge, damaging sensitive components, while non-static generating dissipative bottles average 10^9 to 10^{10} Ω surface resistivity. Dissipate ±5000V charge <2 sec. @ 40% relative humidity.

Mfg. Part No.	Description	Stock No.	Price Each
1462	2 oz. Flux Bottle, 26 Gauge Needle	**10N685**	13.46
1463	2 oz. Flux Bottle, 20 Gauge Needle	**10N686**	13.46
1464	2 oz. Flux Bottle, 16 Gauge Needle	**10N687**	12.75
1465	6 oz. Standard Solvent Dispenser	**10N688**	31.16
1466	6 oz. Solvent Dispenser	**10N689**	34.65

ESD PROTECTIVE WASH AND ONE-TOUCH PUMP BOTTLES

MENDA

- Squeeze wash bottle has angled non-drip spout
- Stainless steel, genuine Menda one-touch pump
- Patented one handed operation frees operator's hands
- Dispenses approximately 2cc of liquid with each pump
- durAstatic yellow HDPE bottles are dissipative
- No migratory additives – reduce the chance for contamination from the bottle
- Highly-visible and marked with ESD protective symbol

Wash Bottle

Mfg. Part No.	Description	Capacity (oz.)	Stock No.	Price Each

ESD PROTECTIVE WORKSTATION ORGANIZERS

MENDA

35872

35874

35892

- Extruded, conductive, high-impact polypropylene
- Conductive 10E2 - 10E4 ohms per ANSI/ESD S 11.11
- Superior strength and durability
- Chemical and moisture resistant
- Made in America

Ideal for improving the appearance of ESD workstations and properly setting up and standardizing the placement of tools in any ESD work area. Constructed of extruded, conductive polypropylene Plastek™ material that provides reliable path-to-ground. These multiple compartment storage units are perfect for organizing various items, such as dispensing bottles, wash bottles, flux bottles, solder spools, cutters, tweezers, lotion, and much more. Color: black.

Mfg. part no. 35872 ESD workstation organizer kit includes multi-compartment organizer assembly, one **35354** ESD-safe bottle and one **35666** 8-oz. unscented lotion. Overall size: 16⅞″W x 8⅛″D x 2⅜″H.

STATIC-DISSIPATIVE STACKABLE MODULAR TOTE BOXES

RoHS Compliant Available

DURATOOL

Modular Tote Box

Snap-On Lid

Static-dissipative tote boxes are vacuum formed from sheets of high-density polyethylene. Vacuum forming produces a stress-free container with maximum resistance to cracking. These containers are impervious to oils, most chemicals, rot, solvents, and temperature extremes. Totes stack with or without lids so they do not rest on the storage contents. Divider grooves on 1¼″ centers allow for the formation of 1⅛ x 1⅛″ compartments or multiples thereof. *Order lids, dividers, and standard card holders separately below.*

AEROSTAT® XC™ EXTENDED COVERAGE IONIZING AIR BLOWER

SIMCO ION™ An ITW Company

- Inherently Balanced to ±5V
- Built-in Emitter Point Cleaner
- 3-Speed Fan and Integrated Heater

The Aerostat® XC™ extended coverage ionizing air blower provides excellent coverage, stability of balance and rapid static charge decay times. The XC™ neutralizes static across an entire 3′ x 6′ benchtop area and has an integrated heater for operator comfort. 3-speed fan delivers a controlled air volume of 70, 90 or 120 CFM. Weighs 17.5 lbs. Dimensions: 15⅜W x 4-1/2H x 8⅛″D.

Mfg. Part No.	Description	Stock No.	Price Each
4002612	XC™ 120V, 60Hz	08H0343	650.00

AEROSTAT GUARDIAN OVERHEAD IONIZING AIR BLOWERS

SIMCO ION™ An ITW Company

- Rapidly neutralizes static charges
- Covers an extended area with ionized air
- Inherently balanced ion output to ±5V
- Built-in emitter point cleaner
- Variable speed, three-fan units with wide range of airflow
- Power rated: 120V, 60Hz
- Dimensions: 42-3/4L x 4″H x 6¾″D
- UL listed, CE complaint

4004063 Standard Model

4008630 Cleanroom Model

Aerostat® Guardian™ ionizing air blowers provide fast static charge decay over an entire work surface area. These blowers offer user-friendly operation while effectively protecting even the most sensitive components from ESD damage. **Mfg. part no. 4004063** standard version Guardian™ produces an air volume of 150 to 300 CFM , is equipped with task lighting, an ionization indicator light and an integrated heater. The standard version Guardian™ covers a 2½′ x5′ area and weighs 16 lbs. **Mfg. part no. 4008630** cleanroom version Guardian™ CR2000 is designed specifically for use above critical cleanroom applications where ESD is a concern and is Class 10 209E (ISO Class 4) compatible. The Guardian CR2000 provides cleanroom compatibility using specially chosen components and materials, and is manufactured to insure cleanliness and minimize risk of contamination. The Guardian™ CR2000 produces an adjustable air flow velocity of 135 to 270 CFM, is equipped with ion output and ion balance monitors, and has a lock-out keyswitch for performance in critical applications. The Guardian™ CR2000 covers a 2′ x4′ area and weighs 15 lbs.

AEROSTAT® PC™ PERSONAL COVERAGE IONIZING AIR BLOWER

SIMCO ION™ An ITW Company

- Inherently Balanced to ±5V
- Built-in Emitter Point Cleaner
- Variable Speed Fan and Integrated Heater

Small, quiet and lightweight yet uncompromising in performance, SIMCO's Aerostat® PC™ provides superior static charge decay over a targeted work surface area. Provides optimum protection from the destructive effects of ESD and features an integrated heater for operator comfort. Variable speed fan produces an air volume of 35 to 70 CFM. The PC™ covers a 1′ by 5′ area, weighs 5.3 lbs. Dimensions: 5.5W x 8.625H x 3.25″D.

TOP GUN™ IONIZING AIR GUN

SIMCO ION™ An ITW Company

- Electronically Balanced to ±15V
- Operates on Compressed Air or Nitrogen
- Adjustable Airflow Control (5 to 100psi)
- 0.01 Micron Filter at Gun Exit Provides Clean Air
- UL Listed

SIMCO's Top Gun™ is a high-performance ionizing air gun for electronics manufacturing and clean room applications. Balanced to ±15V, the Top Gun™ features high blow-off force of up to 100psi to provide efficient cleaning and rapid static charge decay. The gun body is static dissipative, lightweight (less than 7 oz.) but durable, and features a light-touch trigger. All control functions are built into the gun for easy operator use: airflow control, ion balance adjustment, and a 2-level LED to indicate both power and ionization. The Top Gun™ operates on 120VAC.

(74178)

MINION2™ IONIZING AIR BLOWER

SIMCO ION™ An ITW Company

- Compact design — perfect for benchtop
- Covers 1′ x 4′ area
- Self-Balancing to ±10V
- Power and fault indicators
- 24VDC input
- Modular wiring system allows for "daisy chaining" up to 3 units via RJ-11

4011424 MinION2

MinION2 Shown in 5051441Stand

MinION2™ ionizing air blower is designed to control electrostatic charges in sensitive electronics assembly and automated tool applications requiring stable operation with fast discharge time performance. Incorporates Simco's steady-state DC corona ion technology with patented radial ion emitter design for enhanced performance. Unique geometry and airflow control (21 to 42 CFM) meets the demands of electronics and critical assembly applications. Hardwiring of power can be accomodated by use of a terminal block located on back of blower. The terminal block also features a relay contact output of the fault signal to enable remote monitoring. Discharge time 1000V - 100V less than 2 seconds. Two-position ON-OFF switch. Recessed potentiometer controls fan speed. Weight: 1.1 lbs. Size: 3⅞W x 5⅜H x 2⅜D ″. **Mfg. part no. 5051441** clamp-on, articulated spring-arm stand is available for applications requiring an elevated position or to save work surface space; *order separately below.*

FMX-003 HAND-HELD ELECTROSTATIC FIELDMETER

SIMCO ION™ An ITW Company

- Graphic display of charge
- Self-storing plate for ionizer measurement
- Auto-ranging digital display
- HOLD function

Mfg. part no. 4010723 FMX-003 hand-held electrostatic fieldmeter is a compact, portable instrument for measuring electrostatic charge. Measures positive and negative polarity electrostatic charges to 20 kV (20,000 V) at a distance of one inch. Two LED guide ring lights on the measuring side of the unit converge at the proper distance from a charged test object. The conductive case and ground lead facilitate reference grounding for accurate measurement.

Mfg. Part No.	Description	Stock No.	Price Each
4010723	Compact Hand-held Fieldmeter with Charge Plate	69K6574	625.00

AIR FORCE IONIZING AIR GUN

SIMCO ION™ An ITW Company

- Small ergonomic gun design
- Flexible lightweight air hose
- IsoStat® "self balancing" technology
- Class 10 cleanroom approved
- UL listed, CE compliant

AirForce gun was designed with the operator in mind. The lightweight, flexible, air hose (⅜ diameter) moves with the operator making work easier. The guns ergonomic design - light touch trigger, and easy view LED minimizes fatigue and eliminates wrist hyper extension. The compact console can be mounted anywhere and does not take up valuable workspace. The AirForce incorporates steady state DC ion emission with average discharge times of < 1 second, and also features low audible noise with an ion balance of +/-30V, and a .01m filter. The gun measures 8L x 3W x 1″D. Wt. 12oz. The console measures 8.5L x 3W x 1.6″D. Wt. 11.5oz.

Mfg. Part No.	Description	Stock No.	Price Each

CONVERTS AIR GUN — IONIZED AIR

SIMCO ION™ An ITW Company

- Air gun ionization
- IsoStat® "self balancing" technology
- CE compliant

Attach the 6110A to an ordinary air gun and the air stream is ionized. The optional 6110A has an internal sensor to initiate ionization only when the gun is triggered. The unit measures 3.1L x 2.2″D and weighs 6oz, air line requirements are 1/4 ″ input and output. (1/8″ adapter available).

Mfg. Part No.	Description	Stock No.	Price Each
91-6110	Model 6110 Ionizing Cartridge	20T0548	385.00
91-6110A	Model 6110A Ionizing Cartridge (with air flow sensor)	20T0549	445.00

POINT OF USE IONIZING BLOWER

SIMCO ION™ An ITW Company

- Smallest footprint
- IsoStat® "self balancing" technology requires no calibration
- Automatic point cleaning system
- Visual & remote alarm indicator
- UL listed, CE compliant

91-6422E-AC-01

Mfg. part no. 91-6422E-AC-01 is the most efficient small ionizing blower of its kind for controlling static charges in target, hard to reach areas, and process tool applications. The 6422e incorporates our patented "auto clean" system that cleans the emitter points each time the unit powers down. This substantially reduces maintenance, insures consistent performance, and extends emitter life. Dimensions: 4.95H x 3.26W x 2.84″D. Wt. 12.7oz. including the bracket.

- Visual and remote alarm indicator
- UL listed, CE compliant

921-6432E

Mfg. part no. 921-6432E is designed to control static charges in assembly, inspection, packaging areas, and in process tool applications, wherever static build-up can cause ESD damage, particle contamination, or microprocessor lock-up. The 6432e utilizes Steady State DC ion emission to provide fast discharge with low airflow for greater operator comfort. Depending on application – choose either a standard benchtop or a small in-tool bracket/stand. Dimensions: 5.3H x 5.0W x 2.5"D. Wt. 21oz.

BENCH TOP IONIZER

DESCO

- Adjustable high volume output air flow to 117 CFM max.
- Auto-balanced AC ionizing system with less than 2 sec. discharge time at 12 in.
- Gold plated emitters
- Multi-mount stand
- Fixed temperature heater
- Grounding Jack
- NIST calibrated
- Made in America

Ionizing unit is a self-balancing bench top ionizer. The ionizer's patented* Faraday Balance System assures perfect ion balance automatically. It offers greater efficiency and easier cleaning than conventional ionizers. The bench top ionizer is designed to neutralize static electricity from insulators in localized work areas in assembly rooms, wavesolder lines, laboratories, QC, test stations, packing and shipping areas and clean rooms. Unit includes power cord, 6' IEC type, cleaning brush, filter and guard assembly. Dimensions: 11" x 9" x 7".

Mfg. Part No.	Description	Stock No.	Price Each
19500	Bench Top Ionizer,120VAC, 50/60Hz, 3.0A	61H6006	807.69

*Manufactured under U.S. patent #5,008,594

(196356)

CHARGEBUSTER JR. H/O IONIZER

DESCO

Features and Benefits:

- Compact Auto-Balanced 60-77 CFM Adjustable Output Air Flow
- Patented Emitter Replacement Cassettes and Removable Back Grill
- Active Balancing System with Audible and Visual Alarm
- Stainless Steel Housing
- Multi-Mount Stainless Steel Stand
- Grounding jack
- Made in America

Compact auto-balanced 60-77 CFM adjustable output airflow unit features efficient design that minimizes bench top space while maximizing neutralization efficiency and overall performance (less than 2 sec discharge time at 12" and ±15V offset). Patented emitter replacement cassettes and removable back grill allow cleaning away from workstation and for emitter pins to be replaced with minimal downtime. Active balancing system with audible and visual alarm continually adjusts voltage output for optimal performance and automatically alarms when maintenance is needed or unit is not operating correctly. Stainless steel housing minimizes foreign objects debris, corrosion, and other contamination. Multi-mount stainless steel stand. Grounding jack for operator grounding or other grounding requirements.

CHARGEBUSTER OVERHEAD IONIZERS

DESCO

Features and Benefits:

- Two 3-blade fans with steady-state DC ionization for 2'x4' coverage area
- Auto-Feedback System — automatic shut-down with audible and tri-color LED alarms
- 120/220 VAC input voltage selectable
- Air volume: 100-200cfm
- Ionization performance is consistent at all three fan speeds (Low, Medium, High)
- Field replaceable emitter pins allow for minimal downtime
- Made in America

Mfg. part no. 60640 Chargebuster® is a steady-state DC overhead ionizer designed to cover a 2 foot by 4 foot ESD sensitive work area. The specially designed 3-speed fan modules create better coverage, consistent offset voltage (±10V), and superior discharge times (<3 seconds) tested per ANSI/ESD STM 3.1. Equipped with a auto-feedback system, that continually optimizes the unit's performance and will automatically shut down the ionizer and alarm if/when the supply voltage drops. Can be used with 110V or 220V power sources. AC line power, 120VAC, 50/60Hz, but can be changed internally to 220V. Durable white, powder-coated steel housing. Overall size: 3.5H x 6.5W x 24"L. Chargebuster® overhead ionizer comes complete with hanging kit, power cord, three emitter point cleaners and certificate of calibration.

Mfg. Part No.	Description	Stock No.	Price Each
60640	Chargebuster® Overhead Ionizer, 2 Fan	08R2388	1065.93
60473	Chargebuster® Overhead Ionizer, 3-Fan	88M1061	1258.46

(177484)

2-FAN AND 3-FAN OVERHEAD IONIZER

EMIT

Features and Benefits:

- Overhead installation for versatile and stable ionization system
- Three levels of air velocity
- Hand-held remote control
- User programmable maintenance and alarm levels
- Removable fan modules
- Up to 124 units can be daisy-chained into one serial port
- **Mfg. part no. 50664** dimensions: 3.50H x 6.50W x 27.00L"
- **Mfg. part no. 50665** dimensions: 3.50H x 6.50W x 42.00L"

NEUTRALIZING ION PYTHON HAND GUN

DESCO

- Point-of-use ionizer, adjustable (30-100 PSI) compressed air ionizer
- Detachable 7' long ESD protective flexible hose with thumb button
- Adjustable balance (±20 Volts) with less than 1 second discharge time at 6 inch
- Stainless steel housing
- Made in America

Ion Python is a point-of-use ionizer using compressed air or nitrogen to neutralize electrostatic charges from a small, defined area and/or to facilitate removal of charged particles. These ready-to-use units are designed for use in applications and areas where electrostatic attraction contamination create manufacturing or handling problems. The Ion Python meets or exceeds the recommended technical requirements of ANSI/ESD S20.20 tested in accordance with ANSI/ESD S3.1. Includes cord with IEC connector.

Mfg. Part No.	Description	Stock No.	Price Each
19587	Ion Python Hand Gun, 120VAC	61H6010	1314.64

3M

Benchtop Air Ionizer | Mini Air Ionizer | Overhead Air Ionizer

Mfg. part no. 960 versatile, mini-size air ionizer is ideal for small, confined spaces. Generates a well-balanced flow of ionized air particles, which neutralizes any stray electrostatic buildup. Perfect inside OEM equipment, on ESD workstations, and in or around electronic equipment. Comes complete with mounting bracket and a 3' modular telephone plug cable assembly to connect it to **mfg. part no. 960X/980X** wall transformer power supply, *ordered separately below.* Input power: 24VAC, 5.5W supplied by the wall transformer power supply that can handle for up to four mini ionizers. Size: 4.5H x 3.3W x 2"D (including bracket). UL listed, CE compliant.

➤ CONTINUED ➤

BENCHTOP AND OVERHEAD AIR IONIZERS (CONT.)

Mfg. Part No.	Description	Stock No.	Price Each 1-4
960	Mini Air Ionizer	95B9131	573.50
960X/980X	Wall Transformer Power Supply	95B3900	137.17

Mfg. part no. 963E air ionizer blankets the benchtop with ionized air to help prevent static from damaging sensitive electronics. Features a two-speed fan (100fpm and 300fpm), power indicator lamp, static-dissipative plastic housing, and a combination metal-plastic stand that doubles as a mounting bracket. Provides fast neutralization of static charges on nonconductive objects. Maintains equal balance of positve-negative ions. The ionizer uses AC 110V power. Supplied with 6′ (1.8m) power cord with IEC 320 and U.S. plugs. One-year manufacturer's warranty. Size: 7.4H x 6W x 3″D UL listed, CE compliant, NOM certification.

● 963E	Benchtop Air Ionizer — 110V	98P0364	703.98

Mfg. part no. 991 air ionizer with its overhead mounting system handles an area 2 x 4 ft. (61x 122 cm) directly under ionizer to provide consistent static control coverage. Steady-state DC ion emission enables fast discharge with low airflow, providing a more comfortable work environment. Emitter points behind the three fans eliminate field-induced charge and provides a homogeneous mixture of ionized air. Features alarm relay closure circuitry, bi-color LED visual performance indicators, high and low speeds. Air flow: 114 CFM (per fan, high speed, free-air). IEC60320 power inlet with removable line cord, 100-230VAC, 50/60 Hz, 27W max., 0.4A max. IEC60320 female outlet, unfused, 5A max. load. Includes four eyebolts with one 1/8 in. S-hooks, three air filters; one 8.2 ft. power cord, one-year manufacturer's warranty and instruction manual. Dimensions: 44L x 6W x 4″H. UL listed, CE certified, TUV approved. *Order* **mfg. part no. 991-F** *replacement filters separately below.*

(49175)

IONIZED AIR GUN

Ionized air gun 980 lightweight, ergonomically designed air gun is an excellent tool for blowing particulate contamination off any surface. Releases a constantly balanced stream of compressed ionized air or gas that neutralizes static charges that attract particulates to a surface. Its unique ionization system is completely self-balancing; it maintains balance to within ±30V of 0V at a distance of 6″. Maintenance-free gun uses safe, efficient, low-voltage power allowing for the use of much lighter wiring. Includes a transformer that converts line power from a standard 120V outlet to 24V. *Order accessories separately below.* UL listed, CSA certified, CE compliant.

ELECTRONICS VACUUM

RoHS Compliant Available

Powerful 3M™ electronics vacuum cleaner developed for high-efficiency cleanup of most business equipment. Features high-quality filtration system, portability, quick setup, and efficient and safe operation. Plastic accessories have a resistivity low enough to dissipate electrostatic buildup, yet high enough to limit current to safe levels at 220V or less. Replaceable, 1HP motor is continuous-duty rated with one sealed ball bearing and one sleeve bearing lubricated for life. Comes complete with a type 2 toner/dust filter, stretch hose (approximately 10-ft.), wand crevice tool and brush, needle nose nozzle, and dusting brush.

ESD SAFE COMPUTER/ ELECTRONIC CLEANING SYSTEM

METRO DATA-VAC

- Anti-static wrist strap
- Powerful, 2-speed, 1.7 peak horsepower motor
- Integrated toner filter system
- Ballistic nylon carry case
- Rugged, heavy-duty, all-steel body
- Manufactured to government specifications

DATAVAC/3ESD with it's 4 Stage HEPA filtration system is 99.97% effective in trapping dust particles down to 0.3 microns preventing them from re-contaminating the office environment. **DataVac/ 3ESD series** is equipped with a unique anti-static wrist-strap grounding the user from generating static. **DataVac/3ESD series** features a rugged all-steel body and a 2-speed 1.7 peak horsepower motor. Accessories included anti-static 3-6 ft. expandable stretch hose, crevice tool, dust brush, 4-Piece micro tool kit; 6 disposable 3-ply toner filter bags, repl. foam filter, shoulder strap and fully padded soft carry case. Weight: 8 lbs. Technical Specifications; 7.5 Amps; 100 CFM; 80" water lift (sealed suction measurement); 115V; 60Hz.

TBS1000 SERIES DIGITAL STORAGE OSCILLOSCOPES

Tektronix

Key Performance Specifications
- 150 MHz, 100 MHz, 60 MHz and 40 MHz bandwidth models
- 4 and 2-channel models
- Up to 1 GS/s sample rate on all channels
- 2.5k point record length on all channels
- Advanced triggers including pulse width trigger and line-selectable video trigger

Ease-of-Use Features
- 16 automated measurements, and FFT analysis for simplified waveform analysis
- Built-in waveform limit testing
- Automated, extended data logging feature
- Autoset and signal auto-ranging
- Built-in context-sensitive help
- Probe check wizard
- Multiple-language user interface
- 5.7 in. (144 mm) Active TFT Color Display
- Small footprint and lightweight - Only 4.9 in. (124 mm) deep and 4.4 lb. (2 kg)

Connectivity
- USB 2.0 host port on the front panel for quick and easy data storage
- USB 2.0 device port on rear panel for easy connection to a PC or direct printing to a PictBridge®-compatible printer
- Includes Tektronix OpenChoice® software for connecting your bench

The **TBS1000** digital storage oscilloscope series provides you with affordable performance in a compact design. Packed with standard features – including USB connectivity, 16 automated measurements, limit testing, data logging, and context-sensitive help – the **TBS1000** series oscilloscopes help you get more done, in less time.

TBS1000B SERIES DIGITAL STORAGE OSCILLOSCOPES

NEW

Tektronix

Key Performance Specifications
- 200MHz, 150 MHz, 100 MHz, 70 MHz and 50 MHz bandwidth models
- 2-channel models
- Up to 2 GS/s sample rate on all channels
- 2.5k point record length on all channels
- Advanced triggers including pulse and line-selectable video triggers

Key Features
- 7 inch WVGA (800X480) Active TFT Color Display
- 34 automated measurements
- Dual window FFT, simultaneously monitors both the time and frequency domains
- Built-in waveform limit and trend plot testing
- Dual channel frequency counter
- Zoom Function
- Automated, extended data logging feature
- Autoset and auto-ranging functions
- Built-in context-sensitive help
- Multiple-language user interface
- Small footprint and lightweight - Only 4.9 in. (124 mm) deep and 4.4 lb. (2 kg)

Connectivity
- USB 2.0 host port on the front panel for quick and easy data storage
- USB 2.0 device port on rear panel for easy connection to a PC

The **TBS1000B** Digital Storage Oscilloscope Series provides you with affordable performance in a compact design. Packed with standard features - including USB connectivity, 34 automated measurements, limit testing, data logging, frequency counter, trend plot and a context-sensitive help menu - the **TBS1000B Series** oscilloscopes helps you get more done, in less time.

TPS2000B SERIES DIGITAL STORAGE OSCILLOSCOPES

Tektronix

- Autoset
- FFT Standard on All Models
- Simplified Setup
- Built-in I/O Interface
- 11 Automatic Measurements

TPS2000B series oscilloscopes from Tektronix are versatile portable instruments ideal for taking differential measurements up to 30V rms floating. When combined with OpenChoice® PC connectivity software, your measurement results can be captured, transferred, documented, and analyzed. **TPS2000B** scopes have been designed with your safety in mind. They employ innovative isolated channel technology, providing either 2- or 4-isolated channels (depending on the model) allowing you to safely, accurately and quickly measure three-phase power. **TPS2000B** scopes have familiar dedicated knobs and analog style controls, plus simplified functions and setup including auto set, auto range, automatic measurements, probe check wizard and context-sensitive help. These scopes can be used effectively in both bright daylight and dimly lit areas by adjusting the brightness and contrast controls and the backlit menu buttons. **TPS2000B series** scopes include integrated compact flash mass storage and accept any type 1 compact flash card as large as 1 GB. FFT and I/O printer port interface is standard on all models. *Order additional accessories and test probes separately on page 2166.*

Use **TPS2000B series** scopes on your bench, in your lab, or in the field with up to 8-hours of continuous battery operation. Hot-swappable batteries allow measurements to continue even while batteries are being replaced. Digital real-time sampling acquisition technology makes it possible to capture high-frequency information, such as glitches and edge anomalies that eludes other oscilloscopes in its class.

SPECIFICATIONS	TPS2012B	TPS2014B	TPS2024B
Channels	2-Isolated	4-Isolated	4-Isolated
Bandwidth (MHz)	100	100	200
Sample Rate (GS/s) Per Channel	1.0	1.0	2.0
Record Length	2.5 K Points on All Models		
Vertical Resolution	8-Bit (Normal or With Averaging)		
Vertical Sensitivity	2 mV to 5V/div on All Models with Calibrated Fine Adjustment		
Vertical Accuracy	±3% on All Models		
Vertical Zoom	Vertically Expand or Compress a Live or Stopped Waveform		
Isolated External Trigger Input	Standard on All Models		
Float Voltage (When use with P2220 Probes)	30V rms Floating		
Float Voltage (When use with P5122 Probes)	1000Vrms CAT II or 600Vrms CAT III Floating		
Position Range	2 mV to 200 mV/div ±2V; >200 mV to 5 V/div ±50V		
Bandwidth Limit	20 MHz for All Models		
Linear Dynamic Range	±5 div		
Time Base Range	5 ns to 50 s/div	5 ns to 50 s/div	2.5 ns to 50 s/div
Time Base Accuracy	50 ppm		
Input Impedance	1MΩ ±2% in Parallel with 20 pF		
Input Coupling	AC, DC, GND on All Models		
Horizontal Zoom	Horizontally Expand or Compress a Live or Stopped Waveform		
FFT	Standard on All Models		
RS-232, Centronics - Parallel Ports	Standard on All Models		
PC Connectivity	Standard on All Models		
Integrated CompactFlash Mass Storage	Standard on All Models		
NI LabVIEW SignalExpressTM Tektronix Edition, Limited Edition Software	Standard on All Models		
TPS2PWR1 Power Software	Instantaneous Power Waveform Analyis, Waveform Analysis, Harmonics Analysis, Switching Loss, Phase Angles, dv/dt and di/dt Cursors		

Mfg. Part No.	Bandwidth (MHz)	Sample Rate (GS/s)	Channels	Stock No.	Price Each

OSCILLOSCOPES & LOGIC ANALYZERS

TDS2000C SERIES DIGITAL STORAGE OSCILLOSCOPES

Tektronix

Key Performance Specifications:
- 200 MHz, 100 MHz, 70 MHz, 50 MHz bandwidth models
- 2- and 4-channels
- Up to 2 GS/s sample rate on all channels
- 2.5k point record length on all channels
- Advanced triggers including Pulse Width Trigger and Line-selectable Video Trigger

Ease of Use Features:
- 16 automated measurements and FFT analysis
- Built-in waveform limit testing
- Automated, extended data logging feature
- Autoset and signal auto-ranging
- Built-in context-sensitive help
- Probe check wizard
- Lifetime warranty
- 5.7 ″ (144 mm) active TFT color display
- 4.9 ″ (124 mm) deep and 4.4 lb. (2 kg)

Connectivity:
- USB 2.0 host port on front panel for quick and easy data storage, printing and connecting a USB keyboard
- USB 2.0 device port on rear panel for connection to a PC or direct printing to a PictBridge®-compatible crinter
- Includes National Instrument's LabVIEW SignalExpress™ TE Limited Edition and Tektronix OpenChoice® software for connecting your bench

TDS3000C SERIES DIGITAL PHOSPHOR OSCILLOSCOPES

CE Tektronix

Features and Benefits

TDS3054C

Key Performance Specifications:
- 100, 300, and 500MHz bandwidth models
- 2 or 4 analog channels
- Sample rates up to 5GS/s on all channels
- 10 kilosample record length on all channels
- 3600wfm/s continuous waveform capture rate
- Suite of advanced triggers
- CE compliant

Ease of Use Features:
- Optional battery operation provides up to three hours without line power
- USB 2.0 host port on front panel for quick and easy data storage
- 29 automated measurements, and FFT analysis for simplified waveform analysis
- Integrated 10/100 Ethernet port for network connection and video out port to export the oscilloscope display to a monitor or projector
- WaveAlert® automatic waveform anomaly detection
- TekProbe® interface supports active, differential and current probes for automatic scaling and units
- Small footprint and lightweight

Additional Application Support:
- Advanced Analysis
- Limit Testing
- Telecommunications Mask Testing
- Extended Video
- 601 Serial Digital Video

SPECIFICATIONS AT A GLANCE

Mfg. Part No.	TDS3012C	TDS3014C	TDS3032C	TDS3034C	TDS3052C	TDS3054C

Maximum Record Length	10k points	10k points	10k points	10k points	10k points	10k points
Analog Bandwidth (-3dB)	100MHz	100MHz	300MHz	300MHz	500MHz	500MHz
Maximum Sample Rate (All Channels)	1.25GS/s	1.25GS/s	2.5GS/s	2.5GS/s	5GS/s	5GS/s

TDS3000C Series portable digital phosphor oscilloscopes make dealing with complex signals simple. Displays, stores and analyzes in real-time three dimensions of signal information: amplitude, time and distribution of amplitude over time. An intensity graded color display to provide frequency information of signal amplitudes and widths, to help locate and characterize elusive waveform anomalies. Fast update rate makes it easier to capture and display infrequent waveforms or waveform variations. Optional communication and application modules, *ordered separately below*, enable the instrument to be configured for specific applications or upgraded without returning it to the manufacturer. The TekProbe® interface provides power to a range of application specific accessories. All models include probes, power cord, accessory tray, protective front cover, NIST - traceable certificate of calibration and three-year manufacturer's warranty. *Order additional accessories and test probes separately online or call.*

Mfg. Part No.	Description	Stock No.	Price Each
TDS3012C	100MHz, 2-Channel Digital Phosphor Oscilloscope	84M7358	5480.00
TDS3014C	100MHz, 4-Channel Digital Phosphor Oscilloscope	84M7359	6690.00

DPO2000B / MSO2000B SERIES MIXED SIGNAL OSCILLOSCOPES

Tektronix

MSO2024B

Key Performance Specifications
- 200, 100, 70 MHz Bandwidth Models
- 2 and 4 Analog Channel Models
- 16 Digital Channels (MSO Series)
- 1 GS/s Sample Rate on All Channels
- 1 Megapoint Record Length on All Channels
- 5,000 wfm/s Maximum Waveform Capture Rate
- Suite of Advanced Triggers

Ease of Use Features
- Wave Inspector® Controls Provide Easy Navigation and Automated
- Search of Waveform Data
- FilterVu™ Variable Low-pass Filter Allows for Removal of Unwanted Signal Noise while still Capturing High-frequency Events
- 29 Automated Measurements, and FFT Analysis for Simplified Waveform Analysis
- TekVPI® Probe Interface Supports Active, Differential, and Current Probes for Automatic Scaling and Units
- 7 in. (180 mm) Widescreen TFT-LCD Color Display
- Small Footprint and Lightweight – Only 5.3 in. (134 mm) deep and 7 lb. 14 oz. (3.6 kg)
- Five-year warranty

Connectivity
- USB 2.0 Host Port on the Front Panel for Quick and Easy Data Storage
- USB 2.0 Device Port on Rear Panel for Easy Connection to a PC or Direct Printing to a PictBridge®-compatible Printer
- Optional 10/100 Ethernet Port for Network Connection and Video Out Port to Export the Oscilloscope Display to a Monitor or Projector

Optional Serial Triggering and Analysis
- Automated Serial Triggering, Decode, and Search Options for I2C, SPI, CAN, LIN, and RS-232/422/485/UART

Mixed Signal Design and Analysis (MSO Series)
- Automated Triggering, Decode, and Search on Parallel Buses
- Multichannel Setup and Hold Triggering

Offering up to 200 MHz bandwidth and 1 GS/s sample rate, the **MSO/DPO2000B** Mixed Signal Oscilloscope Series delivers advanced debug features at an entry-level price. With up to 20 channels for analyzing analog and digital signals, you can quickly find and diagnose problems in complex designs. To capture long windows of signal activity while maintaining fine timing resolution, the **MSO/DPO2000B** offers a deep record length of 1 Mpoints standard on all channels. With Wave Inspector® controls for rapid waveform navigation and automated serial and parallel bus analysis, the **MSO/DPO2000B** Oscilloscope Series from Tektronix provides the feature-rich tools you need to simplify and speed debug of your complex design.

Mfg. Part No.	Bandwidth (MHz)	Sampling Rate (GS/s)	Channels	Stock No.	Price Each

MDO3000 SERIES MIXED DOMAIN OSCILLOSCOPES

NEW

Tektronix

Key performance specifications

- 2 and 4 analog channel models
- 1 GHz, 500 MHz, 350 MHz, 200 MHz, 100 MHz bandwidth models
- Bandwidth is upgradable (up to 1 GHz)
- Up to 5 GS/s sample rate
- 10 M record length on all channels
- >280,000 wfm/s maximum waveform capture rate
- Standard passive voltage probes with 3.9 pF capacitive loading and 1 GHz, 500 MHz, or 250 MHz analog bandwidth

Key features

- FastAcq™ high-speed waveform capture rate finds elusive signal anomalies quickly
- Wave Inspector® Controls provide easy navigation and automated search of waveform data
- 33 automated measurements and waveform histograms for simplified waveform analysis
- TekVPI® probe interface directly supports active, differential, and current probes for automatic scaling and units
- 9 in. (229 mm) WVGA widescreen color display
- Small footprint and lightweight – Only 5.8 in. (147 mm) deep and 9.2 lb. (4.2 kg)

Today's integrated designs need an oscilloscope that is just as integrated - such as the **MDO3000 Mixed Domain Oscilloscope (MDO) Series**. It is the ultimate 6-in-1 integrated oscilloscope that includes an integrated spectrum analyzer, arbitrary function generator, logic analyzer, protocol analyzer, and digital voltmeter/counter. The **MDO3000** is completely customizable and fully upgradeable. Add the instruments and performance you need now - or later.

Mfr. Part No.	Bandwidth	Scope Channels	Rise Time	Sample Rate	Stock No.	Price Each

MSO3000 SERIES MIXED SIGNAL DIGITAL PHOSPHOR OSCILLOSCOPES

CE Tektronix

MSO3054

Features:

- 100, 300, and 500 MHz bandwidth models
- 2 or 4 analog channels, plus 16 digital channels
- Sample rates up to 2.5 GS/s on all analog channels
- Sample rates up to 8.25 GS/s on all digital channels
- 5 Megasample record length on all channels
- 50,000 wfm/s maximum waveform capture rate
- Suite of advanced triggers
- Wide-screen 9" WVGA intensity-graded, color digital phosphor display
- USB 2.0 host port on front and rear panel; USB 2.0 device port on rear panel
- TekVPI® probe interface supports active, differential and current probes for automatic scaling and units
- Small footprint, only 5.8" (147mm) deep
- Lightweight, only 9 lbs. (4 kg), for easy transport
- CE compliant

Capture:

- Long standard record lengths
- Complete set of triggers, including serial packet content
- Trigger across all signals
- MagniVu™ high-speed acquisition provides 121.2ps fine timing resolution on digital channels

Search:

- Wave Inspector® navigation and search with front-panel controls
- Pan/Zoom, Play/Pause, User marks
- Automated search and mark for analog, digital and serial bus data

Analyze:

- 29 automated measurements — triggering, decode and search on parallel buses
- Advanced waveform math
- Serial bus triggering, decode and search options for I²C, SPI, CAN, LIN, RS-232/422/485/UART, and I²S, LJ, RJ, TDM
- Specialized application support: power analysis, HDTV and video debug options

SPECIFICATIONS AT A GLANCE

MDO4000B SERIES MIXED DOMAIN OSCILLOSCOPES

NEW

Tektronix

Key Performance Specifications
- 4 analog channels (1 GHz, 500 MHz, 350 MHz, and 100 MHz bandwidth models)
- 16 digital channels (MagniVu™ high-speed acquisition provides 60.6 ps fine timing resolution)
- 1 spectrum analyzer channel (9 kHz to 3 GHz or 9 kHz to 6 GHz frequency range models; Ultra-wide capture bandwidth ≥1 GHz)
- Standard passive voltage probes with 3.9 pF capacitive loading and 500 MHz or 1 GHz analog bandwidth

Mixed Domain Analysis
- Time-correlated analog, digital, and RF signal acquisitions in a single instrument
- Wave Inspector® controls provide easy navigation of timecorrelated data from both the time and frequency domains
- Amplitude, frequency, and phase vs. time waveforms derived from spectrum analyzer input
- Selectable spectrum time to discover and analyze how RF spectrum changes over time - even on a stopped acquisition

Spectral Analysis
- Dedicated front-panel controls for commonly performed tasks
- Automated peak markers identify frequency and amplitude of spectrum peaks
- Manual markers enable non-peak measurements
- Trace types Include: Normal, Average, Max Hold, and Min Hold
- Detection types include: +Peak, -Peak, Average, and Sample
- Spectrogram display enables easy observation and insight into slowly changing RF phenomena
- Automated measurements include: Channel Power, Adjacent Channel Power Ratio (ACPR), and Occupied Bandwidth (OBW)
- Trigger on RF power level
- Triggered or Free Run spectral analysis

Ease of Use Features
- Optional serial triggering and analysis - serial protocol trigger, decode, and search for I2C, SPI, USB, Ethernet, CAN, LIN, FlexRay, RS-232/422/485/UART, MIL-STD-1553, and I2S/LJ/RJ/TDM
- 264 mm (10.4 inches) bright XGA color display
- Small footprint and lightweight - Only 147 mm (5.8 inches) deep and 5 kg (11 lb.)

Connectivity
- Two USB 2.0 host ports on the front panel and two on the rear panel for quick and easy data storage, printing, and connecting a USB keyboard
- USB 2.0 device port on the rear panel for easy connection to a PC or direct printing to a PictBridge®-compatible printer
- Integrated 10/100/1000BASE-T Ethernet port for network connection and video out port to export the oscilloscope display to a monitor or projector

MSO/DPO4000B SERIES OSCILLOSCOPES

Tektronix

Key Performance Specifications
- 350MHz, 500MHz, 1GHz bandwidth models
- 4 analogue channels
- 16 digital channels (**MSO4000B Series**)
- Sample rates up to 5GS/s on all channels
- 20 megapoint record length on all channels (5 megapoint for **-L**)
- 50,000wfm/s maximum waveform capture rate
- Standard passive voltage probes with less than 4 pF capacitive loading and 500MHz or 1GHz analog bandwidth
- Suite of advanced triggers

Ease of Use Features
- Wave Inspector® controls provide easy navigation and automated search of waveform data
- 41 automated measurements, waveform histograms and FFT analysis for simplified waveform analysis
- TekVPI® probe interface supports active, differential and current probes for automatic scaling and units
- 10.4" (264mm) bright XGA color display
- 5.8" (147mm) deep and 11lb. (5 kg)

Connectivity
- Two USB 2.0 host port on front panel and two on rear panel for data storage, printing and connecting a USB keyboard
- USB 2.0 device port on rear panel for connection to a PC or direct printing to a PictBridge®-compatible printer
- Integrated 10/100/1000BASE-T Ethernet port for network connection and video out port to export oscilloscope display to a monitor or projector

Mixed Signal Design and Analysis (MSO Series)
- Automated triggering, decode and search on parallel buses
- Per-channel threshold settings
- Multichannel setup and hold triggering
- MagniVu™ high-speed acquisition provides 60.6ps fine timing resolution on digital channels

MSO/DPO5000B SERIES OSCILLOSCOPES

NEW

Tektronix

- Wave Inspector® navigation with Advanced Search and Mark
- Parallel and serial bus triggering and decode
- 16 digital channels (**MSO models**)
- Long record length (standard record length of 25M/channel, optional up to 125M points/channel)
- Standard high-impedance, low-capacitance passive voltage probing with up to 1 GHz bandwidth
- FastAcq maximum waveform capture rate of >250,000 waveforms per second
- FastFrame segmented memory acquisition
- Optional analysis for jitter and eye diagram measurements, serial compliance test, power measurements, limit test, mask test, and DDR memory bus analysis
- LXI Class C compliance
- Windows 7 Ultimate 64-bit operating system
- Standard removable solid state disk drive (≥480 GB)
- Field upgradeable MOS capability

DPO7000 SERIES DIGITAL PHOSPHOR OSCILLOSCOPES

NEW

Tektronix

Key performance specifications

- 3.5 GHz, 2.5 GHz, 1 GHz, and 500 MHz bandwidth models
- Up to 40 GS/s real-time sample rate on one channel, up to 20 GS/s on two channels, and up to 10 GS/s on three or four channels
- Up to 500 megapoint record length with MultiView Zoom™
- >250,000 wfms/s maximum waveform capture rate with FastAcq™
- FastFrame™ segmented memory acquisition mode with >310,000 waveforms per second capture rate
- User-selectable bandwidth limit filters for better low-frequency measurement accuracy

Key features

- Pinpoint® Triggering provides the most flexible and highest performance triggering, with over 1400 combinations to address virtually any triggering situation
- Visual Trigger and Search precisely qualifies triggers and finds unique events in complex waveforms
- Advanced Search and Mark to find specific events in the entire waveform
- MyScope® custom control windows and right mouse click menus for exceptional efficiency
- 53 automated measurements, waveform histograms, and FFT analysis for simplified waveform analysis
- TekVPI® Probe Interface supports active, differential, and current probes for automatic scaling and units
- 12.1 in. (307 mm) bright XGA display with touch screen

Connectivity

- USB Host Ports on the front and side panels for quick and easy data storage, printing, and connecting USB peripherals
- Integrated 10/100/1000BASE-T Ethernet port for network connection and Video Out port to export the oscilloscope display to a monitor or projector
- Microsoft® Windows 7 64-bit operating system for easy connectivity and integration into your environment
- LXI Class C compliant

Tektronix understands that engineers rely on an oscilloscope throughout their design cycle, from prototype turn-on to production testing. The **DPO7000 Series** oscilloscopes' unique capabilities combined with exceptional signal acquisition performance and analysis accelerate your measurement tasks.

AC/DC CURRENT MEASUREMENT SYSTEMS

Tektronix

- AC / DC measurement capabilities
- Automatic scaling and units*2 – oscilloscope on-screen readout of magnitude and units reduces measurement errors with no more hand calculations
- DC - 100MHZ, current probe amplifier (Type TCPA300) uses:
  - DC - 100MHz, 30 A DC (Type TCP312)
  - DC - 50MHz, 50 A DC (Type TCP305)
  - DC -15MHz, 150 A DC (TypeTCP303)
- DC - 50MHZ, current probe amplifier (type TCPA400) uses:
  - DC - 2MHz, 750*1 A DC (Type TCP404XL) (500 A DC continuous)

TCPA300

Mfg. part no. TCPA300 amplifier, when used with **mfg. part no. TCP312A**, **mfg. part no. TCP305A**, or **mfg. part no. TCP303** probes, provides a wide range of current measurement capability and spans the gap between low level milliamp measurements and very high current levels. The three probes provide current measurement capabilities of 30A, 50A, and 150A DC continuous. For even higher current levels, **mfg. part no. TCPA400** amplifier with **mfg. part no. TCP404XL** current probe measures 500A DC continuous and 750A DC continuous, derated with duty cycle.

All TCPA300 / TCPA400 current probe amplifiers include: AC/DC current probe amplifier, instruction/service manual, TEKPROBE interface cable, male to male BNC cable (50 Ω), 50 Ω feed-through termination, certificate of traceable calibration.

Mfg. Part No.	Description	Stock No.	Price Each
TCPA300	Wide-Range Current Amplifier	20H0193	2430.00
TCPA400	High-Range Current Amplifier	54H4607	2420.00
TCP404XL	DC-2MHz, 500A, Current Probe	54H4815	4040.00
TCP2020	DC-50MHz, 20A, Current Probe	44W0172	2430.00
TCP312A	AC/DC current, DC to 100 MHz, 30 A DC	72W0955	1830.00
TCP305A	AC/DC current, DC to 50 MHz, 50 A DC	72W2796	1580.00
TCP303	DC-15MHz, 150A, Current Probe	29H2811	2970.00

BK PRECISION

2-Channel

4-Channel

- Bandwidth up to 300 MHz
- 2 GSa/s sample rate
- 4-channel acquisition (on select models)
- Large 7" widescreen color display
- 32 automatic measurements
- FFT plus four additional math functions
- Built-in context sensitive help system
- 50Ω input coupling
- PC software that lets you remotely control the oscilloscope and capture, save, and analyze waveform data
- Front and rear panel USB host port for convenient storing and recalling of waveform data, setups, and screenshots on a USB flash drive
- Standard LAN (supports SCPI) and USB device port (USBTMC compliant) for remote PC control

The **2550 series** digital storage oscilloscopes deliver performance and value in 2-channel and 4-channel configurations. With bandwidth from 70 MHz to 300 MHz and 2 GSa/s sample rates, these oscilloscopes offer 24 kpts/Ch waveform memory, 32 automatic measurements, and advanced triggering capabilities including math functions. Engineered to allow you to see more of your signal under test, the **2550 series'** widescreen 7" TFT display offers a significantly larger viewing area than typical economy oscilloscopes (5.7").

GDS-2000A SERIES VISUAL PERSISTENCE DIGITAL STORAGE OSCILLOSCOPES

RoHS Compliant Available

GW INSTEK

Simply Reliable

CE

2-Channel

4-Channel

- 300MHz/200MHz/100MHz/70MHz Bandwidth ,2 or 4 Input Channel
- 2GSa/s Real-time Sampling Rate and 100GSa/s Equivalent Time Sampling Rate
- 2MegaPoints Record Length
- 1mV /div to 10V/div of Vertical Range
- 1ns/div to 100s/div of Time Base Range
- 80,000 wfm/s of Waveform Update Rate
- 8 inch 800*600 High Resolution TFT LCD Display
- Built-in Segmented Memory and Waveform Search Functions to Optimize the Efficiency of Record Length
- Zoom Window and Play/Pause can Rapidly Navigate the Waveforms
- 36 Automatic Measurement Functions Offers Various Measurement Selections
- Optional 8 or 16 digital channel with Logic analyzer(MSO)
- Optional Function Generator
- Flexible Remote Control Connectivity(Standard:USB ;Option:LAN/GPIB)

GDS-2000A Series Digital Storage Oscilloscope offers 2 and 4-channel configurations and wide bandwidth selections, including 300MHz, 200MHz, 100MHz and 70MHz. Each model provides 2GSa/s maximum real-time sampling rate and 100GSa/s high-speed equivalent-time sampling rate. Equipped with an 8-inch 800 x 600 high-resolution TFT LCD display, 1mV/div to 10V/div vertical range and 1ns/div to 100s/div time base, the **GDS-2000A Series** is able to faithfully demonstrate waveforms of complicated and obscure signals. The **GDS-2000A Series** provides 2Mega point record length, and Waveform Search and Segmented Memory functions as standard features. The events of interest can be captured and saved into the Segmented Memory, which can be divided into 2048 sections, for observation, while the irrelevant waveforms can be ignored. Consequently, the overall efficiency of memory usage can be enhanced. Under Waveform Search mode, after the input signal is triggered, the **GDS-2000A Series** is able to Search and Mark the waveform sections, which comply with user-defined search condition and threshold level within the whole memory. Meanwhile, with Zoom window and Play/Pause button to scroll through whole displayed waveform, the user can rapidly navigate all the waveforms in an efficient way.

1000 SERIES PORTABLE DIGITAL STORAGE OSCILLOSCOPES (DSO)

KEYSIGHT TECHNOLOGIES

DSO1000B

DSO1000A

- 50 – 150 MHz bandwidth, 2 channel models
- 5.7-inch color display
- 23 automatic measurements
- Sequential acquisition of up to 1000 trigger events
- Mask testing
- 11-language user interface and built-in-help menus

1000 Series deliver the performance and features found in bigger scopes and the portability and economical price required in smaller scopes. All models come complete with documentation CD, localized front panel overlay (if language option other than English is chosen), power cord, and 10:1 passive probe for each input channel (2 or 4). Education student lab guide and professor slide set downloadable free from Agilent's website. A Model Dimensions: 12.78 W x 6.21 H x 5.08"D. A Model Weight: 6.68 lbs. B Model Dimensions: 11.9 W x 6.06 H x 5.23"D. B Model Weight: 5.3 lbs. *Order additional accessories separately; go online or call.*

KEYSIGHT TECHNOLOGIES

NEW

- 200 MHz to 1.5 GHz bandwidth, 4 Mpts memory standard, DSO and MSO models
- Up to 1,000,000 waveform updates/sec
- 12.1-inch capacitive touch display – 40% larger than competitive scopes
- Industry's only InfiniiScan Zone touch triggering
- MegaZoom IV uncompromised smart memory with segmented memory standard
- Fully upgradable – bandwidth, MSO, dual-channel WaveGen built-in 20-MHz arb/function generator, integrated 3-digit voltmeter and serial analysis including USB

These 200 MHz to 1.5 GHz oscilloscopes deliver waveform update rates 20 times faster than the competition, the power of MegaZoom IV smart memory, and an intuitive GUI – all with a capacitive touch screen interface. Experience the speed with the ability to find the most difficult problems in your design with 1 million waveforms/sec update rate, MegaZoom IV smart memory and standard segmented memory. Experience the usability of the first oscilloscope designed for touch capability with the industry's largest 12.1-inch capacitive touch display and innovative InfiniiScan Zone touch triggering. Experience the integration of 5 instruments in one: oscilloscope, logic analyzer, serial protocol analyzer, WaveGen built-in dual channel 20MHz arbitrary/function generator, and integrated 3-digit voltmeter, with the ability to upgrade your scope at any time for complete investment protection.

OSCILLOSCOPES & LOGIC ANALYZERS

INFINIIVISION 7000B SERIES DIGITAL STORAGE (DSO) AND MIXED-SIGNAL (MSO) OSCILLOSCOPES

KEYSIGHT TECHNOLOGIES

- Engineered for the best signal visibility

Attractive:
- High-definition big 12.1" LCD display
- Display mode — main, delayyed, XY and roll with autoscale
- Easy-to-operate front-panel controls

Fast:
- Fast update rate to 100,000 waveforms per second
- MegaZoom III technology — always fast, always responsive, always on

Smart:
- Triggering:Edge, Pulse Width, Pattern, TV, Duration, Sequence, CAN, LIN, FlexRay, USB and more
- Compete connectivity — 2 USB 2.0 high-speed drive, 2 USB 1.1 host,10/100-BaseT LAN, XGA out

MSO7104B

InfiniiVision 7000B series highly-portable digital storage oscilloscopes (DSO) and mixed-signal oscilloscopes (MSO) are the only scopes in their class engineered for maximum signal visibility, showing jitter, infrequent events and subtle detail other scopes miss. Powered by MegaZoom III technology that delivers a responsive deep memory, high-definition display system and a superior ability to capture transient signals. Displays up to 20 channels simultaneously with serial protocol on 12.1" display in a package only 6.8" deep. Dimensions: 17.9 W x 10.9 H x 6.8" D", weight: 13 lbs. All models come complete with user's manual and three-year manufacturer's warranty. *Order accessories, options and applications separately below.*

USB MODULAR OSCILLOSCOPES

KEYSIGHT TECHNOLOGIES

U2701A

U2702A

➤CONTINUED➤

USB MODULAR OSCILLOSCOPES (CONT.)

Features:
- Bandwidths of 100 MHz and 200 MHz
- Up to 1 GSa/s maximum sample rate
- 32 Mpts of waveform memory
- Advanced triggering, including edge, pulse width, and TV
- Compatibility with Hi-Speed USB 2.0, USBTMC 488.2 standards
- Four math functions, including FFTs standard
- Standaione and modular capability; Requires U2781A for modular capability

The U2701A and U2702A modular oscilloscopes combine a set of essential features that are ideal for analyzing designs in an affordable way. These devices are uniquely designed to accommodate your needs for flexibility with the dual-play function. The U2701A and U2702 give you the debugging power you need.

Mfg. Part No.	Description	Stock No.	Price Each
U2701A	USB Modular Oscilloscope, 100 MHz	05N1302	1501.00

GENERAL PURPOSE PROBES

KEYSIGHT TECHNOLOGIES

10070D

1165A

1007XD PASSIVE VOLTAGE

Rugged, high-quality 1007XD family of passive probes are for general purpose measurements, they feature a durable cable and a solid stainless steel probe body encased with a hard, fracture resistant plastic. General purpose probes are designed and tested to ensure operation in the toughest of conditions and are available with attenuation ratios of 1:1, and 10:1.

Mfg. Part No.	Description	Stock No.	Price Each
10070D	1:1, 20MHz, Passive Probe	13T9145	193.00
10072A	Fine-Pitch Probe Kit	91F3016	136.00
10073D	10:1, 500V, 500MHz, Passive Probe	83R9177	372.00
10075A	0.5 mm, IC Clip Kit	91F3019	267.00

116XA PASSIVE VOLTAGE

Compact 116XA family of general purpose replacement probes significantly reduce the problem of probing densely populated integrated circuit components or minute conductors on printed circuit boards. For tight probing areas, the probe handle can be unscrewed and pulled back along the cable. Resistive divider probes are useful for probing low voltage signals such as ECL circuits, 50 Ω transmission lines, and GaAs circuits.

Mfg. Part No.	Description	Stock No.	Price Each
1165A	10:1, 10 Megohm, 1.5 m, miniature passive probe	95H8259	646.00

PROBES AND PROBE POSITIONERS

KEYSIGHT TECHNOLOGIES

N2780B

N2791A

N2787A

N2780B SERIES AC/DC CURRENT PROBES WITH N2779A POWER SUPPLY

Using hybrid technology that includes a hall-effect sensor and an AC current transformer, the probes provide accurate measurement of DC or AC currents up to 500 Arms for N2780B or DC–100 MHz for N2783B, without breaking into the circuit. Using split core construction, the probe easily clips on and off of a conductor.

PICOSCOPE 6000 SERIES HIGH PERFORMANCE USB OSCILLOSCOPES

pico Technology

- 4 channels
- Up to 500MHz bandwidth
- 5GS/s real-time sample rate
- Up to 2 GS buffer memory
- Arbitrary waveform generator and spectrum analyzer
- Hi-speed USB 3.0 connection to PC
- Serial bus decoding and mask limit testing built-in
- Supplied with a full SDK including example programs
- Supports Linux, Windows XP, Vista and Windows 7 and 8

The PicoScope **6000 Series** scopes have the best bandwidth, sampling rate and memory depth of any USB oscilloscopes. These features are backed up by advanced software developed with the help of feedback from customers.

PICOSCOPE® 5000 SERIES FLEXIBLE RESOLUTION OSCILLSCOPES

pico Technology

- Flexible resolution, from 8 to 16 bits
- Up to 200MHz analog bandwidth
- Up to 512MS buffer memory
- Up to 1GS/s real-time sampling
- Up to 10GS/s equivalent-time sampling
- Up to 200MHz spectrum analyzer
- Built-in function generator or AWG
- USB-connected

4-Channel

Pico Technology continues to push the limits of PC oscilloscope design. The new PicoScope® **5000 Series** scopes have a significantly different architecture in which multiple high-resolution ADCs can be applied to the input channels in different time-interleaved and parallel combinations to boost either the sampling rate or the resolution. Careful front-end design and shielding reduces noise, crosstalk and harmonic distortion. In 2-channel mode the **5000 Series** scopes can be powered from USB only, making them ideal for the engineer on the move. The external power supply is only needed when operating more than 2 channels. The **5000 Series** oscilloscopes are suitable for field use in many applications, such as design, research, test, education, service and repair. Each PicoScope® **5000 Series** oscilloscope kit comes with probes specifically trimmed to match the performance of your oscilloscope. Pico Technology now offers both Windows and Linux drivers for this Oscilloscope Series.

PICOSCOPE 4000 SERIES HIGH-RESOLUTION PC OSCILLOSCOPES

pico Technology

- Accurate 12-bit resolution inputs
- 20, 50 and 100MHz bandwidth models
- 32M sample memory
- Up to 250 MS/s sample rate
- I²C and CAN serial decoding
- Mask limit testing
- USB 2.0 connection and power
- API compatible with LabVIEW, C, VB and excel

PicoScope 4000 series high-precision PC oscilloscopes are designed to meet the requirements of modern electronic engineering servicing, design and debugging. With their high input resolution, they can detect or trigger on voltage changes of less than 50µV. This makes them ideal for electromechanical applications such as monitoring transducers, and for spectral analysis of audio, noise and vibration. PicoScope 4000 oscilloscopes are bundled with PicoScope software, 2 or 4 scope probes and a tough carry case. Pico Technology now offers both Windows and Linux drivers for this Oscilloscope Series.

SPECIFICATIONS	PICOSCOPE 4224	PICOSCOPE 4424
No. of Channels	2	4
Bandwidth	20MHz	
Max. Sample Rate	80 MS/s	
Oscilloscope Timebases	100 ns/div to 200 s/div	
Timebase Accuracy	50ppm	
Spectrum Ranges	DC to 20MHz	
Buffer Size (Record Length)	32M Samples	
Resolution / Accuracy	12-bits / 1%	
Voltage Ranges (FSR)	±50 mV to ±100 V in 11 ranges	
Inputs	1 MΩ in parallel with 22pF	
Waveform Generator Output	Not fitted	
PC Connection	USB 2.0 (USB 1.1 compatible)	
Power Supply	USB Port	
PC Requirements	Windows XP, Vista, Windows 7 (32/64 bit)

PICOSCOPE® 3000 SERIES USB-POWERED OSCILLOSCOPES

pico Technology

Standard 2-Channel

Differential

- 4 channels
- 12-bit precision
- 5MHz bandwidth
- 20 MS/s sampling rate
- 400 V differential and common-mode range
- PicoScope PC Oscilloscope and spectrum analysis software included
- PicoLog PC Data Logger software included
- USB 2.0 for high speed
- Powered by USB port
- Application Programming Interface (API) and example code included

Standard 4-Channel

Standard

- 60-200MHz bandwidth
- 4-128MS buffer size
- Up to 1 GS/s real-time sampling
- Up to 10 GS/s repetitive sampling
- Advanced digital triggers
- 60-200MHz spectrum analyzer
- Built-in function generator/AWG
- USB 2.0 connected and powered

The **PicoScope 3000 Series** are the highest–performance USB–powered oscilloscopes available. These 2–channel oscilloscopes have 8–bit resolution and are accurate to within 3%. This combined with their large memory, high sampling rates and high bandwidths make them ideal for use in all areas of test and measurement — from manufacturing and repair, to research and development. The **PicoScope 3000 Series** also includes the **PicoScope 3425**. This has differential inputs that allow you to measure signals that are not referenced to ground. Pico Technology now offers both Windows and Linux drivers for this Oscilloscope Series.

PICOSCOPE 2000 SERIES PEN-TYPE PC-BASED OSCILLOSCOPES

pico Technology

Plug a PicoScope® pen-type PC-based oscilloscope into your computer's USB port, install the PicoScope® software and you are ready to take measurements, with no additional batteries, power supplies, or accessories required. Digital ETS provides up to 2 GS/s sampling for repetitive signals. Both models include PicoScope® software, PicoLog® data acquisition software, and 32-bit programming libraries. Pico Technology now offers both Windows and Linux drivers for this Oscilloscope Series.

Mfg. Part No.	No. of Channels	Bandwidth	Repetitive Sampling	Resolution (Bits)	Stock No.	Price Each
PICOSCOPE 2104	1	10MHz	1 GS/s	8	02M0837	206.25
PICOSCOPE 2105	1	25MHz	2 GS/s	8	02M0838	328.35

(89093)

PICOSCOPE 2200A SERIES PC OSCILLOSCOPES WITH ARBITRARY WAVEFORM GENERATOR

NEW

pico Technology

- Up to 1 GS/s sampling rate
- Arbitrary waveform generator
- Advanced digital triggers
- Persistence display modes
- USB connected and powered
- Free software upgrades
- Mask limit testing
- Serial bus decoding

PicoScope 2200A PC oscilloscopes offer from 10 MHz to 200 MHz bandwidth with advanced analysis features, and an integrated arbitrary waveform generator, in a slimline package for use on the move and in any location.

Mfg. Part No.	Input Channels	Bandwidth (-3 dB)	Max. Sampling Rate	Buffer Memory	Stock No.	Price Each
PICOSCOPE 2204A	2 Analogue	10MHz	100MSPS	8kS	18X2829	196.35
PICOSCOPE 2205A	2 Analogue	25MHz	200MSPS	16kS	18X2830	328.35
PICOSCOPE 2206A	2 Analogue	50MHz	500MSPS	32kS	18X2831	493.35
PICOSCOPE 2207A	2 Analogue	100MHz	1GSPS	40kS	18X2832	658.35
PICOSCOPE 2208A	2 Analogue	200MHz	1GSPS	48kS	18X2833	823.35

PICOSCOPE® 2205 MSO USB-POWERED MIXED SIGNAL OSCILLOSCOPE

NEW

pico Technology

- 25 MHz analog bandwidth
- 100 MHz max. digital input frequency
- 200 MS/s mixed signal sampling
- Advanced digital triggers
- SDK and example programs
- Supplied with a full SDK including example programs
- Software compatible with Windows XP, Windows Vista, Windows 7 and 8

With the **PicoScope 2205 Mixed–Signal Oscilloscope (MSO)** it is possible for you to measure both analogue and digital signals at the same time, using one device, and view the analogue waveforms and digital data on the same screen. The **PicoScope 2205 MSO** from Pico Technology is a 2+16 channel, 8-bit resolution oscilloscope. This means that along with 2 analog channels, the **PicoScope 2205 MSO** also has 16 digital inputs, so you can view your digital and analog signals simultaneously.

Mfg. Part No.	Kit Contents	Stock No.	Price Each
PICOSCOPE 2205-MSO W/O PROBES	PicoScope 2205 MSO, Software and Reference CD, Quick Start Guide, USB cable	71T8206	493.35
PICOSCOPE 2205-MSO KIT	PicoScope 2205 MSO, TA136 digital cable, 2 x TA139 pack of 10 test clips, 2 x MI007 probes, PicoScope probe pouch, Software and Reference CD, Quick Start Guide, USB cable	71T8205	575.85

(212418)

PC USB DIGITAL OSCILLOSCOPES

NEW

TENMA®

- Multi-language support, easy to use
- USB2.0 interface, no external power required
- 23 measurement functions, PASS/FAIL check, FFT
- OS: Windows NT, Windows 2000, Windows XP, Windows 7
- Labview/VB/VC SDK

Mfg. Part No.	Channels	Bandwidth	Sample Rate	Stock No.	Price Each
72-10155	2 Analogue	40MHz	100MSPS	26W6986	239.00
72-10160	2 Analogue	60MHz	150MSPS	26W6987	279.00

(211947)

PC USB DIGITAL OSCILLOSCOPES

NEW

TENMA®

72-10175

- Frequency Counter, FFT Spectrum Analysis
- 8-36V wide range of niput voltage, suptable for vehicle power
- USB2.0 interface plug and play, LAN and WIFI optional
- More than 20 kinds of automatic measurement functions, as well as a PASS/FAIL Check function, which are suitable for engineering applications
- OS: Windows NT, Windows 2000, Windows XP, VISTA, Windows 7

72-10175

72-10178

- 5 in 1 multifunctional testing instrument: Oscilloscope / Logic Analyzer / Arb. Waveform Generator / FFT Spectrum Analysis / Frequency Counter
- 16M memory depth oscilloscope
- 16 data input channels and 16M sample depth logic analyzer
- 200MSa/s DDS arb. waveform generator

Mfg. Part No.	Bandwidth	Channels	Sample Rate	Stock No.	Price Each
72-10175	60MHz	4 Analogue	200MSPS	26W6990	499.00
72-10178	60MHz	2 Analogue, 16 Digital	200MSPS	26W6991	559.00

(211974)

PASSIVE OSCILLOSCOPE PROBES

Pomona®

These general purpose probes feature high performance for greater flexibility. Complete accessory kit included. All probes are rated 300V (DC + Peak AC) per IEC1010-2-03. Cat I, cables are 1.2 meters except **Mfg. part no. 5827A**, which is 2.0 meters.

60, 100 AND 200MHz REPLACEMENT OSCILLOSCOPE PROBE KITS

TENMA®

- EN61010-2-031 CATI (IEC1010)
- 600V (DC+AC Peak)
- Low Noise - Improved Compensation
- 1.2m Cable Length
- 10-35pF Compensation Adjustment
- REF Position, Tip Disconnected and Scope Input Grounded (Types 76-102 and 76-105 Only)
- Accessory Kit and Storage Pouch Included

Mfg. part no. 76-109: 60MHz -3dB, x10 position, 10MΩ imped. (1MΩ input), 18pF capacitance, 5.8ns risetime. 15MHz -3dB, x1 position, 1MΩ imped. (scope input), 46pF capacitance, 27ns risetime. **Mfg. part no. 76-102**: 100MHz -3dB, x10 position, 10MΩ imped. (1MΩ input), 16pF capacitance, <3.5ns risetime. 6MHz @ -3dB, x1 position, 1MΩ impedance (scope input), 90pF capacitance, 58ns risetime. **Mfg. part no. 76-105**: 200MHz -3dB, x10 position, 10MΩ imped. (1MΩ input), 14pF capacitance, <1.8ns risetime. 10MHz @ -3dB, x1 position, 1MΩ imped. (scope input), 90pF capacitance, 35ns risetime.

TRUE RMS AC+DC BENCH MULTIMETERS

BK PRECISION

2831E / 5491B

- Basic VDC accuracy of up to 0.02%
- Up to 25 readings per second measurement rate
- AC volt and amp measurement over wide frequency range (ACV 100kHz/ACI 20kHz)
- Limit mode for Pass/Fail testing
- Built-in math functions: Rel, Max/Min, dBm, dB, %, Hold, Compare
- CATI (1000V)/CATII (300V) Protection
- USB (Virtual Com) and RS-232 interface
- SCPI compatible

2831E

5492B / 5492BGPIB

- 0.01% basic VDC accuracy
- Advanced triggering options such as external, bus and event trigger
- Two and four-wire resistance measurement up to 120MΩ
- AC voltage and AC current measurement over wide frequency range (ACV 100kHz/ACI 10kHz)
- AC (RMS) and DC current measurements up to 12A
- Limit mode for Pass/Fail testing
- Save/recall up to 10 instrument settings
- Built-in math functions: Rel, Max/Min, dBm, dB, %, Hold, Compare
- CATI (1000 V)/CATII (300 V) protection
- USB (Virtual Com) and RS-232 interface
- SCPI compatible

5492B / 5492GPIB

2831E and **5491B** are versatile and dependable bench-top multimeters suitable for applications in education, service & repair and manufacturing requiring basic and reliable measurements. Additionally, these instruments enhance your productivity with built-in math functions and USB connectivity, features not found in other bench meters in this price category. **5492B** is a versatile bench multimeter suitable for applications in education, service repair, and manufacturing. The instrument enhances your productivity with built-in math functions and USB connectivity. Rel, Max/Min, dBm, dB, %, and Hold functions provide educators with a convenient tool to teach basic math concepts. Additionally, the **5492B** offers powerful features not commonly found in other 5xxx- digit DMMs such as advanced triggering, buffer storage operation, and a GPIB interface option (**5492BGPIB**).

Mfg. Part No.	No. of Digits	Count	Features	Stock No.	Price Each
2831E	4-1/2	20000	Dual Display w/ USB Interface	53R0915	339.00

FLUKE-884xA SERIES BENCHTOP PRECISION DIGITAL MULTIMETERS

FLUKE. Calibration

- 2x4 Wire Ohms measurement technique
- Analytical Modes: TrendPlot™, Histogram and Statistics
- RS-232, IEEE-488 and LAN interfaces
- USB Device Port for memory storage devices (**Fluke-8846A** Only)
- Popular DMM emulation modes
- Three-year manufacturer's warranty

Fluke-8846A

Fluke-8845A and **Fluke-8846A**, 6.5 digit precision multimeters have the precision and versatility to handle demanding measurements on the bench or in a system. Both models are designed to comply with IEC 61010-12000-1, ANSI/ISA-S82.01-1994, CAN/CSA-C22.2 No.1010.1-92, 1000V CAT I/600V CAT II standards.

DIGITAL MULTIMETERS

FLUKE 8808A DIGITAL MULTIMETERS

FLUKE. Calibration

- 5.5-digit resolution
- Basic VDC accuracy of 0.01%
- Dual display
- Dedicated DC leakage current measurement
- 2x4 Wire Ohms measurement technique
- Six dedicated buttons for fast access to instrument setups
- Hi/Lo limit compare for pass/fail testing
- Three-year manufacturer's warranty

8808A

Fluke-8808A 5.5-digit multimeter has a broad range of functions, measuring volts, ohms and amps. Six setup buttons for instrument presets on front panel. Includes TL71 test leads, line cord, spare line fuse, user manual on CD ROM.

SPECIFICATIONS

Basic VDC Accuracy	0.01%
DC Voltage	1000V

DIGITAL MULTIMETERS

CE KEITHLEY

2000 & 2000/2000-SCAN
- 13 built-in measurement functions
- 2000 readings/second at 4½ digits
- Optional scanner cards for multipoint measurements
- IEEE-488 and RS-232 interfaces
- Fluke 8840/42 command set

2000

2001, 2001/MEM1 & 2002
- Exceptional measurement integrity w/ high speed
- High speed function and range changing
- Broad range of built-in measurement functions
- Multiple measurement display
- Built-in 10-channel scanner option
- IEEE-488.2 and SCPI compatible
- HP3458A emulation mode (**Model 2002**)

2001

2010
- 100nVrms noise floor
- 7ppm DCV repeatability
- Built-in 10-channel scanner mainframe
- Dry circuit and low power measurement mode
- 15 measurement functions including support for RTD and thermocouple temperature measurements
- Built-in ratio measurement function

5½ DIGIT USB DIGITAL MULTIMETERS

UL CE KEITHLEY

- High accuracy, high speed for general purpose measurements
- 15 measurement functions, including capacitance and thermocouple measurements
- Dual-line display allows concurrent measurements
- TMC-compliant US B 2.0 interface for use with SCPI test commands
- GPIB option for use in system applications
- Includes PC software utilities for graphing and data sharing in both Microsoft® Word and Excel
- Rugged construction for durability in bench/portable applications
- Includes all accessories, such as start-up software, USB cable,power cable, and safety test leads
- CE compliant and UL listed

Model 2110 5½-Digit Dual-Display Digital Multimeter provides a comprehensive set of capabilities, superior measurement accuracy, and high speed for a broad range of applications. It features 15 measurement functions and 7 math functions and has dual-line display capability, which allows it to display two different measurements concurrently. Its buffering capability and GPIB option further increases its performance and flexibility. **Model 2110** is ideal for production, R&D, and test engineers, scientists, and students making a wide variety of measurements in portable, bench, and system applications.

SPECIFICATIONS	
AC Current:	1A, 3A, 10A
DC Current:	10mA, 100mA, 1A, 3A, 10A
AC Voltage:	0.1V, 1V, 10V, 100V, 750V
DC Voltage:	0.1V, 1V, 10V, 100V, 1000V
Resistance:	100ohm, 1kohm, 10kohm, 100kohm, 1Mohm, 10Mohm, and 100Mohm

6½ DIGIT USB DIGITAL MULTIMETER

CE UL KEITHLEY

- High precision 6½ digit DMM for critical measurements at a 5½ digit price
- 11 measurement functions cover most commonly measured parameters
- Fully specified accuracies on all functions for ISO-compliant results
- TMC compliant USB 2.0 interface for use with SCPI test programs
- Included PC software utilities for graphing and data sharing in both Microsoft® Word and Excel
- Rugged construction for durability in bench/portable applications
- Selectable front/rear inputs facilitate bench or rack use
- Includes all accessories, such as startup software, USB cable, power cable, and safety test lead, for lowest total cost
- CE compliant and UL listed

Model 2100 USB Digital Multimeter has high accuracy (38ppm) and 6½ digit resolution which is ideal for critical measurements. It features 11 measurement functions and 8 math functions to easily accommodate the most commonly measured parameters. All accessories, such as USB cable, probes, and software, are included. With its unique combination of high precision and low total cost of ownership, **Model 2100** is an unbeatable value for R&D engineers, test engineers, scientists, and students making basic precision measurements on the bench and in system applications.

INTEGRA SERIES MULTIMETER / DATA ACQUISITION / SWITCH SYSTEMS

KEITHLEY

2700

2750

- Combines functions of DMM, switch system, and datalogger
- True 6½ digit (22-bit) resolution
- Choice of 12 switch/control plug-in modules
- Up to 200 differential input channels (with 300V isolation) for measurement and control
- Convenient front panel inputs
- Free LabVIEW®, LabWindows / CVI, Visual Basic, and C/C++ drivers (IVI style)
- Ethernet, GPIB, RS-232 communications capabilities
- Free ExceLINX™-1A datalogging software

Integra Series systems combine precision measurement, switching, and control in a single, tightly integrated enclosure for either rack-mounted or benchtop applications. These cost-effective, high performance test platforms offer affordable alternatives to separate DMMs and switch systems, dataloggers/recorders, plug-in card data acquisition equipment, and VXI/PXI systems. The **Integra Series** plug-in switching and control modules offer unmatched flexibility and testing efficiency for a wide range of industries and applications. System builders can create test solutions with a combination of channel count, cost per channel, and system performance unmatched by any other single-box measurement system. The input modules provide the flexibility to vary the channel count from 20 to 200 (2-pole), apply a stimulus to the device under test, route signals, control system components, and make precision measurements with up to 14 functions. Robust digital I/O capabilities can be used for triggering, handshaking with other automation equipment, and alarm limit outputs. Scan rates of up to 500 channels/second (up to 3500 readings/second on a single channel) will increase test productivity.

Model	2700	2750
No. of differential input channels:	80	200

TOTAL HARMONIC DISTORTION MULTIMETERS

KEITHLEY

- THD, THD+Noise, and SINAD measurements
- 20Hz–20kHz sine wave generator
- Fast frequency sweeps
- 4Vrms single-ended or 8Vrms differential output (**Model 2015**)
- 9.5Vrms single-ended or 19Vrms differential output (**Model 2016**)
- Individual harmonic magnitude measurements
- 5 standard audio shaping filters
- 13 DMM functions (6½ digits)

2015

Models 2015 and **2016** Total Harmonic Distortion Multimeters combine audio band quality measurements and analysis with a full-function 6½ digit DMM. Test engineers can make a broad range of voltage, resistance, current, frequency, and distortion measurements, all with the same compact, half-rack measurement instrument. **Model 2016** has twice the sine wave generator output of the **Model 2015** for applications that require test signals greater than 8Vrms.

Model	2015 / 2016
Digits	6-1/2
DCV Max. Reading	1000V
ACV Max. Reading	750V
ACV Bandwidth	3Hz to 300kHz
Ohms (2/4 Wire) Max. Reading	120MΩ
DCA Ranges	10mA to 3A
ACA Ranges	1A to 3A
ACA Bandwidth	3Hz to 5kHz

Mfg. Part No.	Description	Stock No.	Price Each
2015	6-1/2 Digit Total Harmonic Distortion DMM	59T7535	4450.00
2016	6-1/2 Digit Total Harmonic Distortion DMM w/ 9V Source Output	59T7546	4570.00

(198545)

USB MODULAR DIGITAL MULTIMETERS

KEYSIGHT TECHNOLOGIES

Features:

- Measures up to 300Vdc with 5.5 digits resolution
- Make fast measurements with up to 100 readings/s
- Frequency and temperature measurement capability
- Utilize wide measurement ranges: 100 mVdc to 300 Vdc and 10 mA to 2 A
- Standalone and modular capabilities; Requires U2781A for modular capability

The U2741A is a small form factor multimeter with huge capabilities. It provides a broad range of measurement functions, including temperature and frequency. The U2741A is a 5.5 digit resolution digital multimeter that is able to capture up to 100 readings/sec. It uses the common non-proprietary standard high-speed USB 2.0 interface that provides ease of connectivity - allowing users to set up and configure their tests swiftly with its plug and play feature.

Mfg. Part No.	Description	Stock No.	Price Each
U2741A	USB Modular Digital Multimeter	08P3578	1165.00

34000 SERIES BENCHTOP DIGITAL MULTIMETERS

NEW

KEYSIGHT TECHNOLOGIES

- Multi-function flexibility
- Laboratory accuracy at production-line speeds
- True RMS AC Volts and Current
- RS-232 and GPIB Standard
- Store up to 512 Readings

34000 series benchtop digital multimeters measure DC voltage up to 1000V across 5 ranges, AC voltage up to 750V from 3Hz to 300kHz, DC and AC current, resistance (up to 100MΩ across 7 ranges), frequency, and period (to 300kHz) with laboratory accuracy and at production-line speeds. They deliver dependable results and convenient features that minimize test and troubleshooting times. Standard commands for programmable instruments (SCPI) as well as other command languages are built in. Power: 100/120/220/240V, 45-65Hz, 360-440Hz. **Mfg. part nos. 34410A** and **34411A** high-performance, dual-display DMMs have all of the professional qualities of **mfg. part no. 34401A** plus greatly improved performance, flexibility and speed.

U3606B MULTIMETER / DC POWER SUPPLY

NEW

KEYSIGHT TECHNOLOGIES

- Combination of a 5.5 digit digital multimeter and 30-W power supply in a single unit
- 10 DMM measurements, including 4-wire miliohm measurement
- 8 built-in math functions
- OVP and OCP for load protection
- Ramp and scan function, and built in square-wave output
- USB 2.0 interface and GPIB connectivity
- Kensington lock slot for security

Mfg. Part No.	U3606B
Display	5-1/2 digits
Resolution	120,000 counts
DC Voltage	Accuracy: 0.025%, Range: 19.9999mV - 1000V
DC Current	Accuracy: 0.05%, Range: 10mA - 3A
Resistance	2-wire Accuracy: 0.05%, Range: 100Ω- 100MΩ
Low Resistance	4-wire Accuracy: 0.25%, Range: 100mΩ- 1000Ω

TRUEVOLT SERIES 34460A/34461A DIGITAL MULTIMETERS

KEYSIGHT TECHNOLOGIES

NEW

Display
- Save and document DMM data from your PC, mobile device or IO of choice
- Drag-and-drop USB file transfer – no software required
- Bright, 4.3 inch (109 mm), high-resolution, color graphical display
- Intuitive, menu-driven interface
- I/O: USB, LAN/LXI (Opt on **34460A**), GPIB (Opt on **34460A and 34461A**)
- Front panel USB memory

Measure
- Analog-to-digital converter enables patented metrology grade architecture and digital AC measurements
- Accounts for measurement errors created by real-world factors like power line noise and injected current – so you can be confident in your measurements
- All specifications tested, compliant and guaranteed according to ISO/IEC 17025

Move
- No need to rewrite your software programs with the industry's only 100% drop-in, SCPI compatible replacement for the Agilent **34401A** DMM

The **Truevolt Series** of digital multimeters (DMMs) is the next generation of bench/system DMMs from Agilent. Only with Agilent's Truevolt DMMs can you: 1) Display DMM results in ways you never have before, 2) Measure with unquestioned Truevolt confidence, and 3) Move to the next generation **34401A** DMM with 100% assurance. **34460A** comes with power cord, certificate of calibration (for full accessory kit, order 3446ACCU). **34461A** comes with power cord, certificate of calibration, test lead set, documentation and IO library CD, USB cable.

U3400 SERIES DUAL DISPLAY DIGITAL MULTIMETERS

KEYSIGHT TECHNOLOGIES

- Up to 120,000 counts resolution
- Up to 0.012% DCV accuracy
- 11 basic measurements:
  DC, AC and AC+DC (True RMS) voltage and current
  Selectable 2 or 4-wire resistance (Note: 2-wire only, for **mfg. part no. U3401A**)
  Frequency, continuity and diode tests
- Dual display on bright VFD
- Built-in math functions: dBm, relative, min/max, compare, hold
- Selectable resolutions for variable measurement speeds (**mfg. part no. U3402A** only)
- Kensington lock slot

Mfg. part nos. U3401A and **U3402A** dual-display digital multimeters provide basic capabilities with good performance at 4 1/2 or 5 1/2 digits. PC-grade lock slot for physical security. Benchtop units are ideal for use in educational, electronics and communications applications. Includes quick start guide, product reference CD, certificate of calibration, test lead kit and AC power cord.

DIGITAL MULTIMETERS

Tektronix

All Models:
- CAT I 1000 V, CAT II 600 V
- Three-year manufacturer's warranty

Mfg. Part No. DMM4020 Only:
- 5.5 digit resolution
- Basic VDC accuracy of up to 0.015% (1 yr.)
- 200 mV to 1000 V voltage range, with up to 10 µV resolution
- 200 µA to 10 A current range, with up to 1 nA resolution
- 200 Ω to 100 MΩ ohm range, with up to 1 mΩ resolution

Mfg. Part Nos. DMM4040 and DMM4050 Only:
- 6.5 digit resolution
- Basic VDC accuracy of up to 0.0024% (1 yr.)
- 100 mV to 1000 V voltage range, with up to 100 nV resolution
- 100 µA to 10 A current range, with up to 100 pA resolution
- 10 Ω to 1 GΩ ohm range, with up to 10 µΩ resolution

Digital multimeters offer a broad range of functions in one easy-to-use instrument. Easily capture, save, and analyze measurement results from your multimeter with the special limited edition of National Instrument's LabVIEW SignalExpress™ software. SignalExpress supports the range of Tektronix bench instruments*, enabling you to connect your entire test bench. This allows you to automate complex measurements requiring multiple instruments, log data for an extended period of time, time-correlate data from multiple instruments, and easily capture and analyze your results, all from your PC. All multimeters include USB to RS-232 interface adapter cable.

72-1055

Features:
- Fused current measurement to 10A
- 10MΩ input impedance
- Continuity buzzer
- AC or battery operation
- ideal for the service bench or in the classroom

All digital multimeters measure AC/DC voltage and current, resistance, capacitance and frequency. **Mfg. part no. 72-1015** also measures transistor hFE and temperature. **Mfg. part no. 72-1020** also measures temperature and provides 4–20mA loop testing. **Mfg. part no. 72-1055** also measures transistor hFE and temperature. All models are true RMS (except for **mfg. part no. 72-1055**).

4050 SERIES DUAL CHANNEL FUNCTION/ARBITRARY WAVEFORM GENERATORS

CE

BK PRECISION

- 14-bit, 125 MSa/s, 16k point arbitrary waveform generator
- Generate sine waves up to 50 MHz
- Large 3.5-inch LCD color display with waveform preview
- Linear and logarithmic sweep
- AM, DSB-AM, ASK, FM, FSK, PM, and PWM modulation functions
- Variable DC offset
- Adjustable duty cycle
- Two independent channels with individual output ON/OFF buttons
- Internal/external triggering
- Gate and burst mode
- 48 built-in predefined arbitrary waveforms
- Store/recall up to 10 instrument settings and 10 arbitrary waveforms
- Built-in counter

4052

- USB device interface and front panel USB host port
- GPIB connectivity with optional USB-to-GPIB adapter
- SCPI-compliant command set
- Arbitrary waveform editing software provided
- Short circuit protection on output

The **4050 Series** Dual Channel Function/Arbitrary Waveform Generators are capable of generating stable and precise sine, square, triangle, pulse, and arbitrary waveforms. With easy-to-read color displays and an intuitive user interface with numeric keypad, these instruments offer plenty of features including linear/logarithmic sweep, built-in counter, extensive modulation and triggering capabilities, a continuously variable DC offset, and a high performance 14-bit, 125 MSa/s arbitrary waveform generator. The main output voltage can be varied from 0 to 10 Vpp into 50 ohms (up to 20 Vpp into open circuit) and the secondary output can be varied from 0 to 3 Vpp into 50 ohms (up to 6 Vpp into open circuit).

4007B / 4013B

4014B / 4040B / 4045B

- Sine, square, and triangle/ramp waveform generation (**4014B / 4040B**)
- Sine, square, triangle, and arbitrary waveform generation (**4045B**)
- Bright color LCD display with waveform preview
- AM/FM modulation
- Independent DC offset amplifier design allows large offsets on small amplitude (e.g. 10 mV) waveforms
- Low-jitter square wave generation for simulating reliable clock signals, generating triggers, or validating serial data buses (**4045B**)
- Store and recall instrument settings
- Internal/external triggering
- Gate and burst mode (**4040B / 4045B**)
- Built-in counter
- USB interface with SCPI-compliant command set
- Short circuit and overvoltage protection on all inputs and outputs

ARBITRARY/FUNCTION GENERATORS

BK PRECISION

High performance laboratory grade synthesized function generators with arbitrary capability. Direct digital synthesis (DDS) creates stable, accurate output signals for all 27 built-in standard and complex (arbitrary) waveforms. Built-in 100 MHz universal counter with frequency measurement and totalize function.

ANALOG PULSE GENERATORS

BK PRECISION

- Internal frequency range: 0.1Hz to 10MHz in 8 decade ranges & variable
- Rate: 100ns to 0.1s
- Internal, external and manual triggering modes
- Pulse width: 50ns to 50ms (6 decade ranges & variable)
- Delay: 0 to 2us variable w.r.t. trigger
- Output polarity: Normal/Inverting
- Pulse out: 0.5V to 5V at 50Ω
- Rise & fall time: 10ns approximately
- Output terminal: BNC connector

4030

Mfg. part no. 4030 is a versatile signal source which combines four functions into one unit – waveform generation, pulse generation (through variable symmetry), frequency sweep operation, and triggered operation. It offers low rise and fall time pulsed signals to meet many test and measurement applications.

Mfg. Part No.	Frequency (MHz)	No. of Channels	Voltage (VAC)	Power (VA)	Stock No.	Price Each
4030	10	1	230	10	81C7888	395.00

DIGITAL PULSE GENERATORS

BK PRECISION

- Repetition rate of 0.1Hz to 50MHz
- Flexible trigger modes: Continuous, Triggered (internal, external, manual), Gated Burst and External Width
- Pulse width programmable from 10ns to 10s
- Transition times (rise and fall times) variable from 6ns to 25ms
- Programmable delay and double pulse
- Store up to 99 different test setups with auto retention of last power down setup
- Direct Digital Synthesis
- Closed case calibration
- Graphical LCD Display
- Programmable via GPIB and RS-232
- SCPI compatible

Mfg. part nos. 4033 and 4034 are high performance programmable pulse generators for testing digital systems and circuits based on TTL, CMOS, or ECL technologies. Both instruments generate clean and accurate pulses at up to 6 digits resolution with variable pulse widths from 10ns to 10s and pulse delays from 0ns to 10s. Output levels are adjustable from -10V to +10V, with pulse amplitudes settable from 0.1Vpp to 10Vpp into a 50Ω load. All parameters, modes, and functions are programmable via the front panel or remote control commands. Additionally, the pulse generators provide selectable complementary pulse and double pulse generation in continuous, triggered, gated, and counted burst modes.

FLUKE-271 DIRECT DIGITAL SYNTHESIS (DDS) FUNCTION GENERATOR WITH ARB

FLUKE. Calibration

- Four row alphanumeric LCD
- Arbitrary capability with storage for five user defined waveforms
- Multiple standard and complex waveforms recalled from internal memory
- Extensive modulation capabilities include Sweep, AM, Gating, Trigger/Burst, FSK and Hop
- Variable symmetry, variable duty cycle
- RS-232 and IEEE-488 interfaces

Mfg. part no. 271 is a high-performance function generator using Direct Digital Synthesis (DDS) techniques. Standard waveforms include: sine, square, positive pulse, negative pulse, triangle, ramp up, ramp down. Additionally arbitrary waveforms include multi-level squarewaves, waveform hopping and pseudo-random noise. Extensive modulation capabilities make this a highly versatile signal source. Up to five arbitrary waveforms of 1024 10-bit words can be stored in non-volatile memory. All waveforms can be swept over their full frequency range at a rate variable between 10 milliseconds and 15 minutes. All functions are accessible via the front panel. Size: 3U, 5.11" (130mm) high; half-rack 8.34" (212mm) wide, 12.99" (330mm) deep. Weight: 9 lbs. Power: 110 to 120VAC or 220 to 240VAC +/– 10 %, 50/60Hz AC by internal adjustment. Includes user manual, power cord. *Order* **mfg. part no. Y200H** *19" rack mounting kit separately below.* Also available, **mfg. part no. SW200ARB** Window®-based Waveform Manager Plus software, allows advanced waveform creation, editing and management; *order separately, go online or call.*

SPECIFICATIONS	
Frequency Range	0.0MHz to 10MHz
Frequency Resolution	7 Digits or 0.1MHz
Output Impedance	50Ω or 600Ω Switchable
Amplitude	5mV to 20V pk-pk Open Circuit (2.5mV to 10V into 50Ω/600Ω) Output can be specified as V-H: 2

280 SERIES ARBITRARY WAVEFORM GENERATORS

FLUKE. Calibration

281

284

- Choice of 1, 2 and 4 independent or linked channels
- Uses Direct Digital Synthesis (DDS) techniques
- 40MS/s max. sampling speed
- 16MHz function generator
- 10MHz pulse generator
- Pulse train pattern generator
- 12-bit arbitrary generator
- Link 16 (max.) arbitrary waveforms in a sequence
- Powerful modulation capabilities
- Built-in trigger generators
- Multi-channel phase locking and summing
- Waveform Manager Plus for Windows® software included
- Multiple standard waveforms recalled from internal memory
- RS-232 and IEEE-488 interfaces

280 series universal waveform generators combine many generators in one instrument. Their extensive signal simulation capabilities include arbitrary waveforms, function generator, pulse/pulse train generator, sweep generator, trigger generator, tone generator, and amplitude modulation source. These waveform generators use Direct Digital Synthesis (DDS) techniques and variable clock sampling technology to provide a fully featured programmable function and arbitrary waveform capability. Standard waveforms include: sine, square, triangle, dc, positive ramp, negative ramp, sine(x)/x, pulse, pulse train, cosine, haversine and havercosine. By using the Versatile Pulse generator capabilities each channel can generate complex pulse trains. Fully programmable via RS-232 or IEEE-488 interfaces. All functions are accessible via the front panel. Size: 3U, 5.11" (130mm) high; half-rack 8.34" (212mm) wide, 12.99" (330mm) deep. Weight: 9 lbs. Power: 110 to 120VAC or 220 to 240VAC +/– 10%, 50/60Hz AC by internal adjustment. Includes power cord, user manual, and Window®-based **mfg. part no. SW200ARB** Waveform Manager Plus software, that allows advanced waveform creation, editing and management. *Order* **mfg. part no. Y200H** or **Y200F** *19" rack mounting kit separately below.*

290 SERIES WAVEFORM GENERATORS

FLUKE. Calibration

291

292-294

- Choice of 1, 2 and 4 independent or linked channels
- 100 MS/s 12-bit arbitrary waveform capability
- 1M point waveform memory
- 40 MHz function generator capabilities using DDS (50MHz for square waves)
- 10ns pulse pattern generator
- Waveform sequencing with up to 1024 segments
- Unlimited waveform storage using CF® memory card
- Waveform Manager Plus software for Windows
- USB interface in addition to RS-232 and GPIB

290 series uses Direct Digital Synthesis techniques and variable clock sampling technology to provide fully featured programmable function and arbitrary waveform capability, combining many generators into one instrument. Signal simulation capabilities include arbitrary waveforms, function generator, pulse/pulse train generator, sweep generator, trigger generator, tone generator, and amplitude modulation source. Maximum arbitrary waveform size is 1 M points. Up to 500 user-defined waveforms may be stored on the removable memory card. Arbitrary waveforms can be defined by front panel editing controls, by downloading of waveform data via RS-232,USB or GPIB, or by writing directly to the removable memory card using the USB card reader/writer connected to a PC. Waveforms: Sine, square, triangle, DC, positive ramp, negative ramp, sin(x)/x, pulse, pulse train, cosine, haversine and havercosine.

AFG-3000 SERIES ARBITRARY FUNCTION GENERATORS

CE GW INSTEK Simply Reliable

- Wide frequency range from 1uHz to 80/50MHz
- High 200MSa/s sampling rate
- 16-bit Amplitude Resolution
- Output from any section of 1M-point-long waveforms
- 4.3" high resolution LCD display/on-screen help/ Impedance switch
- Four ways to generate arbitrary waveforms: Front Panel Operation, CSV file uploading, Direct Waveform Reconstruction (DWR), Arbitrary Waveform Editing PC Software
- USB, RS-232, GPIB interface support

The **AFG-3000 Series** is arbitrary waveform generator designed for industrial, scientific research and educational applications. The series comes in bandwidths of 80MHz (**AFG-3081**) and 50MHz (**AFG-3051**) with built-in multiple standard waveforms to meet users' diversified needs. The **AFG-3000 Series** also provides a high 16 bit resolution, 200MSa/s sample rate and a 1M memory depth for editing arbitrary waveforms directly through the intuitive user interface. The Direct Waveform Reconstruction (DWR) function enables users to directly import waveforms from a **GDS-2000 Series** oscilloscope to the **AFG-3000** via USB host, allowing users to edit waveforms and enhance measurement efficiency.

Mfg. Part No.	Description	Stock No.	Price Each
AFG-3051	50MHz Arbitrary Function Generator	91R2033	1800.00
AFG-3081	80MHz Arbitrary Function Generator	79T9500	2700.00

SIGNAL & FUNCTION GENERATORS

50MHZ ARBITRARY WAVEFORM / FUNCTION GENERATOR

KEITHLEY

- 50MHz sine wave frequency
- 25MHz square wave frequency
- Arbitrary waveform generator with 256k-point, 14-bit resolution
- Built-in function generator capability includes: sine, square, triangle, noise, DC, etc.
- Precision pulses and square waves with fast (5ns) rise/fall times
- Built-in 10MHz external-time base for multiple unit synchronization
- Built-in AM, FM, PM, FSK, PWM modulation
- Frequency sweep and burst capability
- Waveform creation software, KiWAVE, included
- LXI Class C compliance

Model 3390 is an easy-to-use programmable signal generator with advanced function, pulse, and arbitrary waveform capabilities. Superior signal integrity, faster rise and fall times, lower noise, and greater waveform memory combine to provide high quality output signals. High resolution waveforms are supported by four times the waveform memory of any competitive waveform generator on the market. From its fully featured arbitrary waveform generator (ARB) to its high speed and ease-of-use, the **Model 3390** is a complete signal generation solution for all your waveform application needs up to 50MHz.

Mfg. Part No.	Description	Stock No.	Price Each
3390	50MHz Arbitrary Waveform/Function Generator	58T8433	1780.00

33500B SERIES WAVEFORM GENERATORS

KEYSIGHT TECHNOLOGIES

- 8 upgradable models in 20 & 30MHz
- Sine waves with 5x lower harmonic distortion
- Higher bandwidth pulses with 10x less jitter
- Point-by-point arbitrary waveforms with sequencing
- 16-bit resolution with 1mV to 10V ranges
- LAN (LXI-C), USB, and GPIB are standard in all models
- Non-Arb models can be upgraded to Arb
- Memory options only available on non-Arb models
- Models with Arb include 1M memory and embedded editor (also applies to models upgraded to Arb)
- 1-channel models can NOT be upgraded to 2-channel
- MEM option is for 16M samples per channel

33500B Series waveform generators is the first in its class with Agilent's exclusive waveform technology. Agilent Trueform Ttechnology is the next generation in waveform signal creation and provides superior performance over previous waveform technology. This technology has more ability, fidelity, and choice than traditional DDS generators by offering the lowest jitter, lowest harmonic distortion and true point true point-by-point arbitrary waveforms. **33500B Series** comes in 8 different models with various configurations: 20 or 30 MHz, 1- or 2-channels, with Arb or without Arb and all models come with a large color display, embedded waveform editor, and CD with BenchLink Waveform Builder Pro Software 30-day trial. The 2-channel model has a flexible dual-channel mode with frequency and amplitude coupling, differential channels, and combined output channels. Upgrades available; *go online or call.*

33502A 2-CHANNEL 50Vpp ISOLATED AMPLIFIERS

KEYSIGHT TECHNOLOGIES

- Full-power BW 100kHz @ 50Vpp
- Small-signal BW> 300kHz
- Slew rate 20V/µs min.
- THD+N < 0.01% @ 10kHz, 40Vpp
- Output drive 200mA max.
- Isolation floats ±42Vpk to earth

Mfg. part no. 33502A is a dual-channel, high voltage output amplifier. It has an isolated analog front end with up to 50 Vpp (±25 V) output voltage range. It is also a very low-distortion amplifier with < 0.01% @ 10 kHz and 40 Vpp. **Mfg. part no. 33502A** is designed to work as a companion for function generators to offer low-distortion, higher voltage outputs. It is configured with LAN (LXI Class-C compliant) and USB interfaces to meet your computer IO needs. **Mfg. part no. 33502A** provides both a programmable interface and a softkey-driven front panel for flexibility in configuring.

Mfg. Part No.	Description	Stock No.	Price Each
33502A	Isolated Amplifier, 2-ch 50 Vpp	51R1557	2818.00
33502A/001	Isolated Amplifier, 2-ch 50 Vpp, Rear Output Channels	51R1558	3022.00

(211824)

33600A SERIES TRUEFORM WAVEFORM GENERATORS

NEW

KEYSIGHT TECHNOLOGIES

- 80 and 120 MHz, 1- and 2-channel models
- 2-channnel coupling and synchronization
- Trueform waveforms sequencing
- PRBS serial patterns
- Superior signal integrity with Trueform technology provides the lowest jitter and lowest distortion
- Flexibility to select needed functionality from four new value-priced models, with the ability to upgrade later when your needs change
- Superior user experience with intuitive front panel, complimentary software and localized online help and access to manuals from mobile devices
- Up to 120 MHz sine wave
- Up to 100 MHz pulse
- 1 GSa/s sampling rate
- 14-bit amplitude resolution
- Up to 64 MSa per channel arb memory
- Low jitter: 1 ps, low phase noise: –125 dBc/Hz
- Low harmonic and spurious distortion

Agilent's **33600A Series** of waveform generators with exclusive Trueform Technology offer more capability, fidelity and flexibility than previous generation DDS waveform generators. Four new upgradeable models are available at 80 and 120 MHz with 1- and 2-channels. The **33600A Series** offers a full set of standard features and an optional baseband I-Q signal player.

Mfg. Part No.	Bandwidth	No. of Channels	Stock No.	Price Each
33611A	80MHz	1	29X7419	4003.00

FUNCTION/ARBITRARY WAVEFORM GENERATORS

KEYSIGHT TECHNOLOGIES

33210A / 33220A / 33250A

- 10 standard waveforms with sine and square to 10MHz, 20MHz, 30 MHz or 80MHz
- Arbitrary waveforms at 50 MSa/s, 250 MSa/s or 200 MSa/s
- Custom waveform generation
- Direct Digital Synthesis for excellent stability
- Built-In Linear and Log Sweeps, AM, FM, FSK and Burst Modulation
- THD less than 0.04% and flatness as low as ±0.1dB

Mfg. part nos. 33210A, 33220A and **33250A** give you 10 standard waveforms and the ability to create versatile arbitrary waveforms, with 14-bit resolution. In addition, **mfg. part nos. 33210A, 33220A** and **33250A** can be used as a pulse generator with variable edge time. Built-in modulation capabilities and both linear and log sweeps do not require additional function generators. External clock-reference timebase increases frequency stability while letting you generate precise phase-offset signals, phase-lock to another function generator, or to a 10 MHz frequency standard. All include software to create and edit waveforms as standard. **Mfg. part no. 33220A** includes GPIB, LAN and USB interfaces. **Mfg. part no. 33210A** and **33250A** include GPIB interface. The 33500 series function/arbitrary waveform generators have < 40 ps jitter for any signal.

N9310A 9 kHz to 3 GHz RF SIGNAL GENERATOR

KEYSIGHT TECHNOLOGIES

- 9 kHz to 3 GHz CW output, 20 Hz to 80 kHz low frequency (LF) output
- -127 to +13 dBm output level range (maximum +20 dBm settable)
- -95 dBc/Hz SSB phase noise
- Full sweep function: RF (9 kHz to 3 GHz) /Amplitude (-127 to +13 dBm), LF (20 Hz to 80 kHz)
- Extensive analog modulation: AM, FM, Phase, and Pulse modulation
- Optional IQ modulator, 40 MHz bandwidth
- Intuitive GUI offering 11 languages
- Standard USB connectivity for test automation and memory stick support
- SCPI command set for remote control

Mfg. part. no. N9310A RF Signal Generator features 9 kHz to 3 GHz with 0.1 Hz resolution and generates CW, analog modulated (AM/FM/∅M) and pulse modulated signals. Wide bandwidth (40 MHz) IQ modulator enables digital modulated signals such as GSM, CDMA, OFDM from custom IQ signals. Easy programmable control for automation, either SCPI command or with Virtual Panel software in PC environment. Multi-language UI and USB connectivity for easy operation and data storage.

USB MODULAR FUNCTION GENERATORS

KEYSIGHT TECHNOLOGIES

- 20 MHz sine and square waveforms
- Ramp, triangle and DC waveforms
- Pulse generation edge
- Arbitrary waveform (14-bit, 64K points 50 MSa/s)
- 14-bit, 50 MSa/s, 64 Kpoint arbitrary waveforms
- AM, FM, PM, ASK, FSK, PSK modulation types
- High-speed USB 2.0 (480Mbits/s) TMC 488.2 compliant
- Standalone or modular capabilities; Requires U2781A for modular capability

The U2761A signal generator offers 10 standard waveforms plus pulse and arbitrary waveforms generation capabilities. It uses the common non-proprietary standard high-speed USB 2.0 interface that provides ease of connectivity - allowing users to set up and configure their test swiftly with the plug and play feature. It comes bundled with the Agilent Measurement Manager for quick setup to perform measurement. Users are able to customize waveform by drawing in the arbitrary waveform editor.

Mfg. Part No.	Description	Stock No.	Price Each
U2761A	USB Modular Function Generator, 20 MHz	05N1306	1863.00

AFG2021 ARBITRARY / FUNCTION GENERATOR

Tektronix

- 20 MHz sine, 10 MHz square and pulse waveforms provide coverage for your most common applications
- 250 MS/s sampling rate and 14-bit vertical resolution enable the creation of high-fidelity signals
- The innovative UI reduces setup and evaluation time with direct access to frequently used functions and parameters
- The internal 4 × 128 kS memory and the USB memory expansion capability provide substantial capacity for defining complex waveforms
- USB remote control port and USB flash drive port are included. GPIB and LAN interfaces are available as an option

- Built-in Modulation, Noise Generator, Burst, and Sweep modes for greater versatility
- Built-in waveforms provide quick access to commonly used signals
- Large 3.5 inch color screen displays both graphical and numeric waveform information simultaneously
- Menu and online help in 8 languages
- 2U height and half-rack width fits both benchtop and rack-mounted applications
- Free ArbExpress software makes waveform editing and downloading extremely easy
- Free SignalExpress software combines Tektronix bench instruments into a low-cost solution for automatic testing

Mfg. Part No.	Description	Stock No.	Price Each
AFG2021	Arbitrary/Function Generator	05W5104	1590.00
AFG2021/GL	Arbitrary/Function Generator (GPIB and LAN Interfaces)	05W5105	1690.00

(209482)

AFG3000C SERIES ARBITRARY FUNCTION GENERATORS

Tektronix

- 10 MHz, 25 MHz, 50 MHz, 100 MHz, or 240 MHz Sine Waveforms
- 14 bits, 250 MS/s, 1 GS/s, or 2 GS/s Arbitrary Waveforms
- Amplitude up to 20 Vp-p into 50 Ω Loads
- 5.6 in. Color TFT LCD Display for Full Confidence in Settings and Waveform Shape
- Multilanguage and Intuitive Operation Saves Setup Time
- Pulse Waveform with Variable Edge Times
- AM, FM, PM, FSK, PWM
- Sweep and Burst
- Dual-channel Models Save Cost and Bench Space
- USB Connector on Front Panel for Waveform Storage on Memory Device
- USB, GPIB, and LAN
- LabVIEW and LabWindows/IVI-C Drivers

Unmatched performance, versatility, intuitive operation, and affordability make the **AFG3000C Series** of Function, Arbitrary Waveform, and Pulse Generators the most useful instruments in the industry. Users can choose from 12 different standard waveforms. Arbitrary waveforms can be generated up to 128 K in length at high sampling rates. On pulse waveforms, leading and trailing edge time can be set independently. External signals can be connected and added to the output signal. Dual-channel models can generate two identical or completely different signals. All instruments feature a highly stable time base with only ±1 ppm drift per year. Color TFT LCD screen on all models shows all relevant waveform parameters and graphical wave shape at a single glance. This gives full confidence in the signal settings and lets you focus on the task at hand. Shortcut keys provide direct access to frequently used functions and parameters. Others can be selected conveniently through clearly structured menus. This reduces the time needed for learning and relearning how to use the instrument. Look and feel are identical to the world's most popular **TDS3000** Oscilloscopes. With this PC software waveforms can be seamlessly imported from any Tektronix oscilloscope, or defined by standard functions, equation editor, and waveform math.

SERIES 2400 GENERAL PURPOSE SOURCEMETER® INSTRUMENTS

CE KEITHLEY

- Five instruments in one (IV Source, IVR Measure)
- Source and sink (4-quadrant) operation
- 0.012% basic measure accuracy with 6½ digit resolution
- 2-, 4-, and 6-wire remote V-source and measure sensing
- 1700 readings/second at 4½ digits via GPIB
- Pass/Fail comparator for fast sorting/binning
- Available high speed sense lead contact check function
- Programmable DIO port for automation/handler/prober control (except **Model 2401**)
- Standard SCPI GPIB, RS-232 and Keithley Trigger Link interfaces
- Keithley LabTracer 2.0 I-V curve tracing application software (download)

Designed specifically for test applications that demand tightly coupled sourcing and measurement. All **SourceMeter** models provide measurement capabilities as well as precision voltage and current sourcing. Each **SourceMeter** instrument is both a true instrument-grade 6½ digit multimeter and a highly stable DC power source. The power source characteristics include low noise, precision, and readback. The multimeter capabilities include high repeatability and low noise. The result is a compact, single-channel, DC parametric tester. In operation, these instruments can act as a voltage source, a current source, a voltage meter, a current meter, and an ohmmeter. Manufacturers of components and modules for the communications, semiconductor, computer, automotive, and medical industries will find the **SourceMeter** instruments invaluable for a wide range of characterization and production test applications.

2450 SOURCEMETER® SMU INSTRUMENT

NEW KEITHLEY

- Capabilities of analyzers, curve tracers, and I-V systems at a fraction of their cost.
- Five-inch, high resolution capacitive touchscreen GUI
- 0.012% basic measure accuracy with 6xxx-digit resolution
- Enhanced sensitivity with new 20mV and 10nA source/measure ranges
- Source and sink (4-quadrant) operation
- Four "Quickset" modes for fast setup and measurements
- Built-in, context-sensitive front panel help
- Front panel input banana jacks; rear panel input triaxial connections
- 2450 enhanced SCPI and TSP® scripting programming modes
- Model 2400 SCPI-compatible programming mode
- Front panel USB memory port for data/programming/configuration I/O

The **Model 2450** is Keithley's next-generation SourceMeter source measure unit (SMU) Instrument that truly brings Ohm's law (current, voltage, and resistance) testing right to your fingertips. Its innovative graphical user interface (GUI) and advahced, capacitive touchscreen technology allow intuitive usage and minimize the learning curve to enable engineers and scientists to learn faster, work smarter, and invent easier. The **2450** is the SMU for everyone: a versatile instrument, particularly well-suited for characterizing modern scaled semiconductors, nano-scale devices and materials, organic semiconductors, printed electronics, and other small-geometry and low-power devices. All this combined with Keithley SMU precision and accuracy allow users to Touch, Test, InventTM with the new favorite go-to instrument in the lab for years to come.

SERIES 2600A / 2600B SYSTEM SOURCEMETER® INSTRUMENTS

CE KEITHLEY

- Combines a power supply, true current source, DMM, arbitrary waveform generator, V or I pulse generator with measurement, electronic load, and trigger controller (**2600A**)
- Tightly-integrated, 4-quadrant voltage/current source and measure instruments offer best in class performance with 6-1/2 digit resolution (**2600B**)
- Family of products offers wide dynamic range: 1fA to 10A and 1uV to 200V (**2600A**) 10A pulse to 0.1fA and 200V to 100nV (**2600B**)
- Built-in, Java-based test software enables true plug & play I/V characterization and test through any browser (**2600B**)
- 20,000 rdg/s provides faster test times and ability to capture transient device behavior (**2600A**)
- Precision timing and channel synchronization (<500ns) (**2600A**)
- USB port for saving data and test scripts (**2600A**)
- LXI Class C compliance supports high speed data transfer and enables quick and easy remote testing, monitoring, and troubleshooting
- Software: TSP® Express for quick and easy I-V test (embedded); ACS Basic Edition for semiconductor component characterization (optional)

2601B

2651A

Series 2600A System SourceMeter® instruments are for use as either a bench-top I-V characterization tool or as a building block component of multi-channel I-V test systems. For bench-top use, **Series 2600A** instruments feature an embedded TSP® Express Software Tool that allows users to quickly and easily perform common I-V tests without programming or installing software. For system level applications, **Series 2600A** Test Script Processor (TSP®) architecture along with new capabilities such as parallel test execution and precision timing provides the highest throughput in the industry to lower the cost of test. **Series 2600B** offers single- and dual-channel models that combine the capabilities of a Precision Power Supply, true Current Source, 6½ digit DMM, Arbitrary Waveform Generator, Pulse Generator, and Electronic Load all into one tightly integrated instrument.

LOW CURRENT METERS

KEITHLEY

- 10fA resolution (**Model 6485, 6487**), 1fA resolution (**Model 6482**)
- 5½ digit resolution (**Model 6485, 6487**), 6½ digit resolution (**Model 6482**)
- Dual ±30V bias sources (**Model 6487, 6482**)
- <200uV burden voltage (**Model 6485, 6487**)
- Up to 1000 readings/second (**Model 6485, 6487**)
- Built-in Model 485 emulation mode (**Model 6485**)
- Built-in Model 486 and 487 emulation mode (**Model 6487**)
- Alternating Voltage method ohms measurements (**Model 6487**)
- Automated voltage sweeps for I-V characterization (**Model 6487**)
- Floating measurements up to 500V (**Model 6487**)
- IEEE-488 and RS-232 interfaces
- Analog output
- Digital I/O (**Model 6487, 6482**)

6487

6485

Model 6485 Picoammeter combines Keithley's expertise in sensitive current measurement instrumentation with enhanced speed and a robust design. With eight current measurement ranges and high speed autoranging, this cost-effective instrument can measure currents from 20fA to 20mA, taking measurements at speeds up to 1000 readings per second. **Model 6487** Picoammeter/Voltage Source improves on the measurement capability of **Model 6485**, and adds a high resolution 500V source. It provides higher accuracy and faster rise times, as well as a damping function for use with capacitive devices. In addition, **Model 6487** source voltage from 200uV to 505V. **Model 6482** is a great measurement tool for analyzing multi-channel devices, monitoring currents in multiple locations on materials, and recording data from multiple sensors at once.

MODEL	6485	6487	6482

CURRENT SOURCES

KEITHLEY

6220 and 6221

- Source and sink (programmable load) 100fA to 100mA
- 1014W output impedance ensures stable current sourcing into variable loads
- 65000-point source memory allows executing comprehensive test current sweeps directly from the current source
- Built-in RS-232, GPIB, Trigger Link, and digital I/O interfaces
- Reconfigurable triax output simplifies matching the application's guarding requirements
- Model 220 emulation mode eliminates need to reprogram existing applications

6221

6221 Only

- Source AC currents from 4pA to 210mA peak to peak for AC characterization of components and materials; the 6221's 10MHz output update rate generates smooth sine waves up to 100kHz
- Built-in standard and arbitrary waveform generators with 1mHz to 100kHz frequency range; applications include use as a complex programmable load or sensor signal and for noise emulation
- Programmable pulse widths as short as 5us, limiting power dissipation in delicate components; supports pulsed I-V measurements down to 50us when used with Model 2182A Nanovoltmeter
- Built-in Ethernet interface for easy remote control without a GPIB controller card

Model 6220 DC Current Source and **Model 6221** AC and DC Current Source combine ease of use with exceptionally low current noise. Low current sourcing is critical to applications in test environments ranging from R&D to production, especially in the semiconductor, nanotechnology, and superconductor industries. High sourcing accuracy and built-in control functions make the **Models 6220** and **6221** ideal for applications like Hall measurements, resistance measurements using delta mode, pulsed measurements, and differential conductance measurements.

Mfg. Part No.	Current Type	Current Range	Stock No.	Price Each
CURRENT SOURCE

NANOVOLTMETER

KEITHLEY

- Make low noise measurements at high speeds, typically just 15nV p-p noise at 1s response time, 40–50nV p-p noise at 60ms
- Delta mode coordinates measurements with a reversing current source at up to 24Hz with 30nV p-p noise (typical) for one reading. Averages multiple readings for greater noise reduction
- Synchronization to line provides 110dB NMRR and minimizes the effect of AC common-mode currents
- Dual channels support measuring voltage, temperature, or the ratio of an unknown resistance to a reference resistor
- Built-in thermocouple linearization and cold junction compensation

The two-channel **Model 2182A** Nanovoltmeter is optimized for making stable, low noise voltage measurements and for characterizing low resistance materials and devices reliably and repeatably. It provides higher measurement speed and significantly better noise performance than alternative low voltage measurement solutions.

SPECIFICATIONS

Power Supply:	100V / 120V / 220V / 240V
Line Frequency:	50Hz, 60Hz, and 400Hz, automatically sensed at power-up
Power Consumption:	22VA
Operating Environment:	Specified for 0° to 50°C; Specified to 80% RH at 35°C
Dimensions (H x W x D):	Rack Mount: 89 × 213 × 370mm (3.5 × 8.375 × 14.563″) Bench (w/ handles and feet): 104 × 238 × 370mm (4.125 × 9.375 × 14.563″)

HIGH POWER SYSTEM SOURCEMETER® INSTRUMENT

KEITHLEY

- Source or sink up to 180W of DC or pulsed power (±3000V@20mA, ±1500V@120mA)
- 1fA low current resolution
- Dual 22-bit precision ADCs and dual 18-bit 1µs per point digitizers for high accuracy and high speed transient capture
- Fully TSP® compliant for easy system integration with other **Series 2600A** System SourceMeter models
- Combines a precision power supply, current source, DMM, arbitrary waveform generator, V or I pulse generator, electronic 18-bit load, and trigger controller
- Includes TSP® Express characterization software, LabVIEW® driver, and Keithley's Test Script Builder software development environment

Model 2657A is a high voltage, high power, low current source measurement unit (SMU) instrument that delivers unprecedented power, precision, speed, flexibility, and ease of use to improve productivity in R&D, production test, and reliability environments. **Model 2657A** is designed specifically for characterizing and testing high voltage electronics and power semiconductors, such as diodes, FETs, and IGBTs, as well as other components and materials in which high voltage, fast response, and precise measurements of voltage and current are required.

SPECIFICATIONS

Power Output:	180W

ELECTROMETERS / HIGH RESISTANCE METER

KEITHLEY

6514

- <1fA noise
- >200TΩ input impedance on voltage measurements
- Charge measurements from 10fC to 20uC
- High speed—up to 1200 readings/second
- Interfaces readily with switches, computers, and component handlers
- Cancels voltage and current offsets easily

6517B

- Measures resistances up to 10^{16}Ω
- 1fA–20mA current measurement range
- <20uV burden voltage on lowest current ranges
- 200TW input impedance
- <3fA bias current
- Up to 425 rdgs/s
- 0.75fA p-p noise
- Built-in ±1kV voltage source
- Unique voltage reversal method for high resistance measurements
- Optional plug-in scanner cards

6514

6517B

Model 6514 Electrometer combines flexible interfacing capabilities with current sensitivity, charge measurement capabilities, resolution, and speed. **Model 6514's** built-in IEEE-488, RS-232, and digital I/O interfaces make it simple to configure fully automated, high speed systems for low-level testing. The 5½ digit **Model 6514** is designed for applications that demand fast, yet precise measurements of low currents, voltages from high resistance sources, charges, or high resistances. **Model 6514** offers far greater current sensitivity and significantly lower voltage burden (as low as 20uV) than other instruments can provide. The 5½ digit **Model 6517B** Electrometer / High Resistance Meter offers accuracy and sensitivity specifications unmatched by any other meter of this type. It also offers a variety of features that simplify measuring high resistances and the resistivity of insulating materials. With reading rates of up to 425 readings/second, **Model 6517B** is also significantly faster than competitive electrometers, so it offers a quick, easy way to measure low-level currents.

ELECTROMETER

SUB-FEMTOAMP REMOTE SOURCEMETER®

KEITHLEY

- 0.4fA p-p (4E–16A) noise
- Remote PreAmp can be located at the signal source to minimize cable noise
- >1016W input resistance on voltage measurements
- High speed — up to 2000 readings/second
- Up to 6½ digit resolution
- Fast characterization of components with programmable digital I/O and interfaces

Model 6430 Sub-Femtoamp Remote SourceMeter combines the voltage and current sourcing and measurement functions of Keithley's popular SourceMeter and Source-Measure Unit (SMU) products with sensitivity, noise, and input resistance specifications superior to electrometers. This unique combination of broad functionality and exceptional measurement integrity is made possible by **Model 6430's** Remote PreAmp, which offers a very sensitive bi-directional amplifier with sensitive feedback elements for measuring or sourcing currents at the device being tested. The high level signals output by the Remote PreAmp are sent to the controlling mainframe via a two-meter cable. This allows the user to make a direct or very short connection to the signal, minimizing the effects of cable noise.

Mfg. Part No.	Current Range	Voltage Range	Output Power (W)	Resistance Range	Stock No.	Price Each
6430	±1pA to ±100mA	± 200mV to ± 200V	2.2	<2Ω to >20TΩ	**59T8598**	13900.00

(197860)

B2900A SERIES PRECISION SOURCE/ MEASURE UNITS

KEYSIGHT TECHNOLOGIES

- Integrated voltage/current 4-quadrant precision source and measurement capabilities for easy and accurate I/V measurement
- Wide coverage up to 210V, 3A DC / 10.5A pulse
- Up to 10fA / 100nV minimum measurement resolution (6½ digits)
- Up to 10fA / 100nV minimum sourcing resolution (6½ digits)
- 4.3" front panel color display supports both graphical and numerical view modes
- High resolution arbitrary waveform generation (AWG) and list sweep functions (10µs minimum interval)
- High speed digitizing capability (max. 10µs sample rate)
- Free application software to facilitate PC -based instrument control
- IVI-COM drivers and SCPI supporting conventional SMU command set for basic compatibility
- LXI class C, USB 2.0, GPIB, LAN and digital I/O interface

B2961A/B2962A 6.5 DIGIT LOW NOISE POWER SOURCE

NEW

KEYSIGHT TECHNOLOGIES

- The world's only 6.5 digit resolution power source with a bipolar sourcing range from 100 nV to 210 V and 10 fA to 3 A (DC)/10.5 A (pulsed)
- Optional ultra-low noise filters can reveal your device's true characteristics with low noise performance (10 uVrms from 10 Hz to 20 MHz, 1 nVrms/√Hz @10 kHz)
- Supports both pre-defined and user-defined arbitrary waveform generation (1 mHz to 10 kHz)
- Output voltage and current can be verified quickly using the built-in 4.5 digit voltage/current monitor
- Output voltage and current can be checked graphically on the B2900As 4.3 LCD front panel display using the time-domain voltage/current waveform viewer
- Programmable output resistance feature enables the emulation of a wide variety of DC voltage and current characteristics, such as driver ICs, regulators, energy generating devices, etc
- Free application software for easy PC-based instrument control
- LXI Core conformant, USB2.0, GPIB, LAN and digital I/O interface

Mfg. Part No.	Channels	Source/ Measure Digits Max.	Source/Measure Resolution Min.		Stock No.	Price Each

USB MODULAR SOURCE MEASURING UNITS

KEYSIGHT TECHNOLOGIES

Features:

- Three-channel SMU
- Four-quadrant operation (±20 V)
- Maximum current output of 120 mA per channel
- Embedded test script (able to support three channels with coherent source and measurement capabilities) (for U2723A)
- IV Curve application support in the Agilent Measurement Manager software (for U2723A)
- Faster rise/fall time (for U2723A)
- High measurement sensitivity of 100 pA with 16-bit resolution
- 0.1% basic accuracy
- Low current measurement capability down to nA levels
- Voltage and current programming/readback
- USB 2.0 and USBTMC-USB488 standards
- Command logger function
- Wide range of Application Development Environments (ADEs) compatibility

- Standalone and modular
- SCPI and IVI-COM supported

U2722A/U2723A USB modular source measure unit is more than just a power supply – it has fast response time, and has voltage and current programming/readback with high accuracy measurement capabilities. The U2722A and its enhanced version, the U2723A are capable of four-quadrant operation, acting as current source and also as current sink (load) with both polarities of the output voltage. The U2723A offers additional features such as embedded test scripts to simplify automated testing and faster rise time to help improve throughput during mass testing of semiconductor component.

Mfg. Part No.	Description	Stock No.	Price Each
U2722A	USB Modular Source Measure Unit, 3 Channel	05N1304	2446.00
U2723A	USB Modular Source Measure Unit with Embedded Test Script 3 Channel	15R7281	3989.00

SERIES 3700 SYSTEM SWITCH / MULTIMETER

KEITHLEY

- Six slot system switch mainframe with optional high performance multimeter
- Multi-processor architecture optimized for high throughput scanning and pattern switching applications
- Remote PC control via Ethernet, USB, and GPIB interfaces
- Up to 576 two-wire or 720 onewire multiplexer channels in one mainframe
- Up to 2,688 one-pole matrix crosspoints in one mainframe
- Capable of over 14,000 readings per second to memory with optional high performance multimeter
- LXI Class B with embedded Web browser interface for test setup, maintenance, and basic application control

Series 3700 offers scalable, instrument grade switching and multi-channel measurement solutions that are optimized for automated testing of electronic products and components. **Series 3700** includes four versions of the **Model 3706** system switch mainframe along with a growing family of plug-in switch and control cards. When the **Model 3706** mainframe is ordered with the high performance multimeter, you receive a tightly integrated switch and measurement system that can meet the demanding application requirements in a functional test system or provide the flexibility needed in stand-alone data acquisition and measurement applications. To see other models, *go online or call.*

USB MODULAR SWITCH MATRIX

KEYSIGHT TECHNOLOGIES

Features:

- 4x8 2-wire matrix configuration
- Max. 30V/2A
- -30dB crosstalk and <3dB insertion loss at 45MHz operation
- 4ms Max. switching time
- Command logger function
- DB25 connector
- High-speed USB 2.0 (480MBits/s) TMC488.2 compatible
- Standalone and Modular capabilities; Requires U2781A for modular capability

The U2751A USB Modular Switch offers a flexible connection path between the device under test and test equipment, thus allowing different instruments to be connected to multiple points on the device under test at the same time. This instrument offers measurement at a higher bandwidth up to 45MHz. It uses the common non-proprietary standard high-speed USB 2.0 interface that provides ease of connectivity – allowing users to set up and configure their tests swiftly with the plug and play feature. Certificate of calibration available on all models, *go online or call*.

USB MODULAR PRODUCTS CHASSIS

KEYSIGHT TECHNOLOGIES

Features:

- Six USB module slots
- High-speed USB 2.0 (480 Mbit/s)
- Hot-swappable and auto-detectable characteristic minimizes startup time/effort
- Allows expansion up to 384 channels
- Simultaneous synchronization between modules
- SSI/Star trigger bus synchronization between external trigger source and modules
- Dimensions: 250 mm (W) x 177 mm (H) x 271 mm (D)
- This chassis supports USB modular Data Acquisitions (**U2300, U2500, U2600 series**) and USB modular Instruments (**U2700 series**)

The **U2781A** USB modular instrument chassis is AC powered and compact. It has an external 10 MHz reference clock, external trigger in and trigger out functions. The **U2781A** is ideal for R&D, design validation and manufacturing engineers for data logging, measurement, and monitoring over a broad range of industries. *Please see products supported on [134266] and [134275] and [134276] and [134268], and [134273].*

USB MODULAR MULTIFUNCTION DATA ACQUISITION DEVICES

KEYSIGHT TECHNOLOGIES

- Up to 3 MSa/s sampling rate for a single channel
- Functions as a standalone or modular unit
- Easy-to-use plug-and-play and hot swappablewith Hi-Speed USB 2.0
- Up to 384 channels when incorporated into U2781A Agilent modular product chassis
- Easy-to-use bundled software for quick setup and data logging to PC
- 12-bit or 16-bit analog-to-digital (A/D) resolution
- 24-bit programmable digital input/output
- Self-calibration capability
- USB 2.0 and USBTMC-USB488 standards

U2300A series USB modular high-density multifunction data-acquisition (DAQ) devices offer a high-performance PC data-acquisition solution. **U2300A series** DAQ devices applications extend across industrial and education environments. The DAQ device is well suited for research and development, manufacturing, and design-validation engineers who require measurement devices with fast sampling rate. Both models include AC/DC power adapter, power cord, USB extension cable, L-mount kit (used with modular product chassis), USB modular products quick start guide and reference CD-ROM, automation-ready CD-ROM (contains the IO libraries suite) and certificate of calibration.

34980A MULTIFUNCTION SWITCH AND DATA ACQUISITION UNIT AND MODULES

KEYSIGHT TECHNOLOGIES

- 8-Slots With Integrated 6.5 Digit Multimeter
- 21 Plug-in Modules with LF/RF/uW Switch, DIO, D/A Converter, and Counter
- Up to 560 2-wire mux or 4096 matrix cross-points in one mainframe
- Scan rates up to 1,000 channels/sec.
- Standard LAN, USB, GPIB Connectivity to PC
- Standard Cables, Terminal Cards or Mass Interconnect
- Priced Up to 40% Less Than Comparable Module Solutions in VXI or PXI
- 34832A BenchLink Data Logger Pro allows for advanced data logging and decision making without programming

34980A with Modules

Mfg. part no. 34980A multifunction switch/measure unit is a compact, economical one-box solution for medium to high-density switch/measure applications in design verification, automated test and data acquisition. **Mfg. part no. 34980A** eight-slot mainframe, with built-in 6.5 digit DMM, holds your choice of 19 different plug-in modules. These include switching from DC to 26.5 GHz, digital I/O, D/A converters, and counter/totalizer functionality. One mainframe can accommodate up to 560 two-wire multiplexer channels or 4096 matrix cross points. **Mfg. part no. 34980A** also includes USB, Ethernet, and GPIB as standard interfaces to the PC. With Ethernet connections and the graphical web interface, you can access and control the unit remotely. Standard connectors on the modules also allow you to use standard, off-the-shelf 50- and 78-pin shielded cables to easily connect test signals from the instrument to the unit under test or other test points. Additional wiring options include detachable terminal blocks for discrete wiring needs and mass interconnect solutions. BenchLink Data Logger Pro Software available, *go online or call.*

34970A and 34972A DATA ACQUISITION SWITCH UNIT AND MODULES

KEYSIGHT TECHNOLOGIES

34970A

34972A

- 3-slot mainframe, 8 switch and control plug-in modules
- 6-1/2-Digit (22-Bit) Internal DMM
- Scan rates up to 250 channels/second
- Measures 11 Functions Without External Signal Conditioning
- Up to 60 2-wire mux or 96 2-wire matrix cross-points in one mainframe
- Benchlink Data Logger Software to configure and control tests, display results and transfer data
- Built-in GPIB and RS-232 Interfaces (**34970A**)
- Built-in LAN and USB Interfaces (**34972A**)
- 0.004% Basic DCV Accuracy
- 50K Readings of Non-Volatile Memory Holds Data When Power Is Removed

Modules

POWERFUL FLEXIBILITY TO GET YOUR JOB DONE

Whether you need to measure temperature, AC/DC volts, resistance, frequency or current - **mfg. part no. 34970A** can handle it. The internal autoranging DMM directly measures 11 different functions, eliminating the need for expensive external signal conditioning. Each channel can be configured for maximum flexibility.

34970A data acquisition/switch unit
Includes operating and service manuals, calibration certificate, Quick Start package (Benchlink Data Logger software, RS-232 cable, thermocouple, screwdriver) and power cord. Modules must be purchased separately.

34972A data acquisition/switch unit
Includes internal 6 1/2 digit DMM, operating and service manuals, test report, Quick Start package (Benchlink Data Logger software, thermocouple, screwdriver) and power cord. Modules must be purchased separately.

MODULES:

34901A 20-Channel Armature Multiplexer
60 ch/s scanning, 2- and 4-wire scanning, built-in thermocouple reference junction, 300V switching. 2 additional fused inputs (22 channel total) route up to 1A of current to the internal DMM, allowing current measurements without the need for an external shunt.

34902A 16-Channel High-Speed Multiplexer Module
250 channels/s scanning, 2- and 4-wire scanning, built-in thermocouple reference junction, 300V switching. User provided shunts required for current measurements.

34903A 20-Channel Actuator/General Purpose Switch Module
SPDT (Form C) latching relays, 300V, 1A, 50W actuation and control. Use to cycle power to test sample, actuate external power relays and solenoids.

34904A 4 x 8 2-Wire Matrix Switch Module
32 2-wire crosspoints, 300V, 1A switching. Rows or columns may be connected between multiple modules to build 8 x 8, 4 x 16 or larger matrices, with up to 96 crosspoints in a single frame.

34905A Dual 4-Channel RF Multiplexer 50 Ohms
2GHz bandwidth (1GHz with included BNC-to-SMB adapters). Route signals between your DUT and signal generator, oscilloscope, spectrum analyzer, or other instrumentation. Arranged as two independent 1 x 4 multiplexers.

34906A Dual 4-Channel RF Multiplexer 75 Ohms
2GHz bandwidth (1GHz with included BNC-to-SMB adapters). Route signals between your DUT and signal generator, oscilloscope, spectrum analyzer, or other instrumentation. Arranged as two independent 1 x 4 multiplexers.

34907A Multifunction Module
16 bits of digital input and output, 100kHz totalizer input. Two ±12V analog outputs.

34908A 40-Channel Single Ended Multiplexer Module
60 channels/s scanning, single-wire switching for common-low applications, built-in thermocouple reference junction, 300V switching. All two-wire internal measurements except current are supported.

SPECTRUM ANALYZERS • RF POWER METERS & SENSORS • POWER QUALITY ANALYZERS

GPIB & INSTRUMENT CONTROL PRODUCTS

NEW

KEYSIGHT TECHNOLOGIES

E5810A

82350B

82357B

- Simplified connectivity over GPIB, USB and LAN
- Easy access and control of GPIB instruments
- Support of industry standards – IEEE 488, USB and Ethernet
- VISA IO libraries provide industry-standard connectivity software
- High throughput solutions up to 900 kB/s

Agilent offers a full line of interface products to connect your instrumentation to your PC. These interface cards and converters make it easy for you to access and control instruments, exchange data, and create your own automated test applications. You can access your GPIB instruments using standard I/O such as LAN, USB, or if you prefer, with an IEEE 488 GPIB interface. **Mfg. part no. E5810A** LAN-to-GPIB gateway provides remote access and control of GPIB instruments via 10BASE-T or 100BASE-TX LAN networks, enabling resource sharing, global project communications and remote access to instruments. **Mfg. part no. 82350B** high-performance GPIB card plugs into the backplane of your computer and provides maximum system throughput. **Mfg. part no. 82357B** provides a direct connection from a USB port on your laptop or desktop PC to GPIB instruments.

GSP-730 3GHZ SPECTRUM ANALYZER & GRF-1300 RF AND COMMUNICATION TRAINER

RoHS Compliant Available

GW INSTEK Simply Reliable

CE

GSP-730

GRF-1300

GSP-730
- Frequency Range : 150kHz ~ 3GHz
- Autoset Function
- Noise Floor: ≤-100dBm
- RBW Range : 30kHz, 100kHz, 300kHz, 1MHz
- ACPR/CHPW/OCBW Measurement
- 3 Traces in Different Colors
- Split Window Function
- Limit Line Function
- Remote Control Software
- Presentation Material for Training Courses
- Support Interface : USB Device/Host, RS-232C
- 5.6" TFT LCD with VGA Output

GRF-1300
- Sine Wave: 0.1 ~ 3MHz
- Square Wave: 0.1 ~ 3MHz
- Triangle Wave: 0.1 ~ 3MHz
- RF Frequency : 870 ~ 920MHz
- AM Modulation & FM Modulation
- 5 On/Off Switches and 5 Test Points to Simulate 8 Failure Conditions for Trouble-Shooting Study
- USB Interface to Provide Remote Control

GW Instek **GSP-730** is a 3 GHz Spectrum Analyzer mainly developed to fulfill the demands of RF Communication educations. Budget constraint and insufficient teaching tools are normally the two hurdles for schools to provide high-quality courses for RF communication experiments. A moderate spectrum analyzer, **GSP-730**, featuring full functions should provide, along with **GRF-1300** training kit possesses a unique position in the field as an economic turn-key solution for 3GHz RF Communication Experiment courses. With its components, **GSP-730** Spectrum Analyzer, **GRF-1300** Trainer and a PC, properly connected, a tangible system is integrated for performing ongoing experiments while the lecture is given. Using a PC, the teacher can present teaching material with PowerPoint slide and simultaneously control **GSP-730** and **GRF-1300** to perform experiments and get spectrum displays and parameter readings on the PC screen. **GSP-730** and **GRF-1300** easily transferred the current teaching materials, including the PowerPoint slides, textbook, and a remote control software, into electronic-teaching system.

Mfg. Part No.	Description	Stock No.	Price Each
● GSP-730	3 GHz Spectrum Analyzer	44W8980	999.00
GRF-1300	RF and Communication System Trainer	44W8979	399.00

RF & MICROWAVE POWER SENSORS/METERS

Tektronix

Features:
- Max Hold and Relative Measurement Modes
- Offset, Frequency Response, and 75 Ω Minimum Loss Pad Correction
- Pass/Fail Limit Mode
- Compact Size
- Flexible Averaging Modes for Quick, Stable Measurements

PSM3000, PSM4000, & PSM5000 SERIES

Applications:
- Peak and Average Power Measurements on Modulated Signals such as GSM, CDMA, WCDMA, HSPA, WiMAX up to 10 MHz
- Level Control Feedback for Signal Sources
- Validation and Characterization of Power Amplifiers, Switches, and Other RF and Microwave Components

Mfg. Part No.	Frequency Range	Dynamic Range	Measurement Speed	Stock No.	Price Each

6800B SERIES AC POWER SOURCE / ANALYZERS

NEW

KEYSIGHT TECHNOLOGIES

- Provides a complete AC and DC power and measurement solution
- Protect valuable DUTs with extensive protection features
- Easy to use graphical user interface (GUI)

Keysight AC power source/analyzers provide a complete AC test solution. As AC sources, they combine the capabilities of a power amplifier and an arbitrary waveform generator. This allows you to simulate normal waveforms and many types of distorted power waveforms. The built in power analyzer combines the capabilities of a multimeter, oscilloscope, harmonic analyzer and power analyzer. These instruments may also be used to produce DC power, either alone or as a DC offset to an AC waveform.

Mfg. Part No.	Phases	Output Power	Stock No.	Price Each
6811B	1	375VA	95H9302	7625.00
6812B	1	750VA	95H9303	9309.00
6813B	1	1750VA	95H9304	12818.00

PA1000 POWER ANALYZER

NEW

Tektronix

- High Measurement Accuracy: 0.05% basic V & I accuracy
- 1MHz measurement bandwidth, 1MS/s sample rate
- Bright LCD color graphics display with waveform graphics & harmonics bar charts
- Dual internal current shunts: 20A shunt & 1A shunt for accurate low-current measurements
- Accurate measurements with high crest factors up to CF10
- Harmonics Analysis for 50th harmonic as a standard feature
- Application-specific Setup Modes for Lamp Ballast, Standby Power, Energy integration
- USB, LAN, and GPIB interfaces all standard
- Easy data export to flash drive or PC using front USB port
- PWRVIEW PC software features automated full compliance test for Standby Power
- Unmatched 5-year warranty

The Tektronix **PA1000** is your best choice for making precision power measurements on single-phase power supplies and all types of products connected to the AC line. Whether you need to test for compliance with energy-usage regulations such as Energy Star™, or simply need to characterize your product's overall power-conversion performance and efficiency, you will find the **PA1000** offers the most modern and complete test solution with performance and features unmatched by other single-phase analyzers.

Mfg. Part No.	Description	Stock No.	Price Each
PA1000	Single-Phase Power Analyzer	17X9725	2790.00

(211455)

PA4000 SERIES POWER ANALYZERS

Tektronix

- 1 to 4 Input Modules allows several configurations to match your application
- High measurement accuracy of 0.04% (basic voltage & current accuracy) for demanding test requirements
- Dual internal current shunts for each module maximize accuracy for high- and low-current measurements
- Unique Spiral Shunt design maintains stability over variations in current, temperature, etc. (patent applied for)
- Proprietary frequency detection algorithms ensure rock-solid frequency tracking even on noisy waveforms
- Application-specific test modes simplify instrument setup and reduce the likelihood of user error
- Easy data export to USB flash drive or remote PC software, for reporting and/or remote control
- Many standard features such as comm ports and harmonic analysis eliminate costly upgrade options

Tektronix **PA4000** Power Analyzers deliver highly accurate, multi-channel power, energy, and efficiency measurements. Precisely-matched inputs, unique Spiral Shunt™ technology, and advanced signal processing deliver high accuracy even with highly modulated waveforms and crest factors as high as 10. The versatile **PA4000** offers comprehensive power measurements. Dual current shunts provide optimal resolution from microwatts to kilowatts. Harmonics analysis up to the 100th harmonic, and motor analysis with torque and speed inputs are included in the standard instrument. Every **PA4000** comes with multiple PC interfaces, PC software, and USB flash drive support to help you collect and analyze data.

Mfg. Part No.	Description	Stock No.	Price Each
PA4000 1CH 15V	One Input Module Installed	67W2990	10725.00
PA4000 2CH 15V	Two Input Modules Installed	67W2991	13625.00
PA4000 3CH 15V	Three Input Modules Installed	67W2992	16425.00
PA4000 4CH 15V	Four Input Modules Installed	67W2993	19125.00

PULSED LASER DIODE TEST SYSTEM W/ REMOTE TEST HEAD

KEITHLEY

- Simplifies laser diode LIV testing prior to packaging or active temperature control
- Integrated solution for in-process LIV production testing of laser diodes at the chip or bar level
- Sweep can be programmed to stop on optical power limit
- Combines high accuracy source and measure capabilities for pulsed and DC testing
- Synchronized DSP based measurement channels ensure highly accurate light intensity and voltage measurements
- Programmable pulse on time from 500ns to 5ms up to 4% duty cycle
- Pulse capability up to 5A, DC capability up to 1A
- 14-bit measurement accuracy on three measurement channels (VF, front photodiode, back photodiode)
- Measurement algorithm increases the pulse measurement's signal-tonoise ratio
- Up to 1000-point sweep stored in buffer memory eliminates GPIB traffic during test, increasing throughput
- Digital I/O binning and handling operations
- IEEE-488 and RS-232 interfaces

Model 2520 Pulsed Laser Diode Test System is an integrated, synchronized system for testing laser diodes early in the manufacturing process, when proper temperature control cannot be easily achieved. The Model 2520 provides all sourcing and measurement capabilities needed for pulsed and continuous LIV (light-current-voltage) testing of laser diodes in one compact, half-rack instrument. The tight synchronization of source and measure capabilities ensures high measurement accuracy, even when testing with pulse widths as short as 500ns.

Mfg. Part No.	Current Range	Voltage Range	Stock No.	Price Each
2520	0A to 5A	0V to ± 20V	59T7743	21400.00

PULSED LASER DIODE MEASUREMENT KIT

Mfg. Part No.	Kit Contents	Stock No.	Price Each
2520/KIT1	Model 2520, Model 2520INT and 3 ft. triax cable	59T7747	27900.00
2520INT-1-GE	Integrating Sphere (1") w/ Germanium Detector	59T7748	6430.00

(197701)

LOW CURRENT FIBER ALIGNMENT PHOTODIODE METER

KEITHLEY

- Dual-channel instrument for optical power measurements, beam measurements, and nanoscale materials and device research
- ±100V source for bias requirements
- Measure photodetector current from 1fA to 20mA
- 1fA current measurement resolution
- Measure optical power directly when used with Model 2500INT Integrating Sphere
- 0–10V analog output for high resolution optical power feedback
- Provides a high accuracy, high speed fiber alignment solution
- Supports assembly process, final testing, parts binning, and specification
- Allows faster alignment of the fiber with the laser diode's optimum light emitting region
- Combines fiber alignment and device characterization processes
- User-programmable photodetector calibration coefficients
- 3000-point buffer memory on each channel allows data transfer after test completion
- Digital I/O and Trigger Link for binning and sweep test operations
- IEEE-488 and RS-232 interfaces

Model 2502 Dual-Channel Picoammeter provides two independent picoammeter-voltage source channels for a wide range of low level measurement applications including laser diode testing. It is also designed to increase the throughput of Keithley's LIV (lightcurrent- voltage) test system for production testing of laser diode modules (LDMs). Developed in close cooperation with leading manufacturers of LDMs for fiberoptic telecommunication networks, this dual-channel instrument has features that make it easy to synchronize with other system elements for tight control over optical power measurements. **Model 2502** features a high speed analog output that allows using the LIV test system at the fiber

➤CONTINUED➤

LOW CURRENT FIBER ALIGNMENT PHOTODIODE METER (CONT.)

alignment stage of the LDM manufacturing process. Through the use of buffer memory and a Trigger Link interface that's unique to Keithley instruments, **Model 2502** can offer the fastest throughput available today for LIV testing of laser diode modules. These instruments are ruggedly engineered to meet the reliability and repeatability demands of continuous operation in round-the-clock production environments.

Mfg. Part No.	Current Range	Stock No.	Price Each
2502	2nA to 20mA	59T7729	7530.00

ACCESSORIES

Mfg. Part No.	Description	Stock No.	Price Each
2500INT-2-GE	Integrating Sphere with Germanium Detector	59T7726	3730.00

TEMPERATURE CONTROLLERS

KEITHLEY

- 50W TEC Controller combined with DC measurement functions
- Fully digital P-I-D control
- Autotuning capability for the thermal control loop (**2510-AT**)
- Designed to control temperature during laser diode module testing
- Wide temperature setpoint range (–50°C to +225°C) and high setpoint resolution (±0.001°C) and stability (±0.005°C)
- Compatible with a variety of temperature sensor inputs—thermistors, RTDs, and IC sensors
- Maintains constant temperature, current, voltage, and sensor resistance
- AC Ohms measurement function verifies integrity of TEC
- Measures and displays TEC parameters during the control cycle
- 4-wire open/short lead detection for thermal feedback element
- IEEE-488 and RS-232 interfaces
- Compact, half-rack design

Models 2510 and **2510-AT** TEC SourceMeter instruments enhance Keithley's CW (Continuous Wave) test solution for high speed LIV (lightcurrent- voltage) testing of laser diode modules. These 50W bipolar instruments were developed in close cooperation with leading manufacturers of laser diode modules for fiberoptic telecommunications networks. Designed to ensure tight temperature control for the device under test, **Model 2510** was the first in a line of highly specialized instruments created for telecommunications laser diode testing. It brings together high speed DC sourcing and measurement with the ability to control the operation of a laser diode module's Thermo- Electric Cooler or TEC (sometimes called a Peltier device) accurately. **Model 2510-AT** offers autotuning capability. P, I, and D (proportional, integral, and derivative) values for closed loop temperature control are determined by the instrument using a modified Zeigler-Nichos algorithm. This eliminates the need for users to determine the optimal values for these coefficients experimentally. In all other respects, the **Model 2510** and **Model 2510-AT** provide exactly the same set of features and capabilities.

TF960 / TF930 / PFM3000 BENCH/PORTABLE UNIVERSAL COUNTERS WITH USB

Aim TTI

TF930

TF930 / TF960

- 0.001Hz to > 3000MHz frequency range
- Frequency, period, pulse width, duty cycle, frequency ratio and event counting modes
- High performance temperature compensated timebase
- Reciprocal measurement technique gives superior resolution
- High input sensitivity over the full frequency range
- High impedance DC coupled input up to 125MHz
- Variable trigger threshold and switchable attenuator
- Large 10 digit LCD display with annunciators
- Operation from built-in rechargeable batteries
- Low power consumption gives up to 24 hours operation
- Remote control and readback via USB interface

PFM3000

- 3 Hz to > 3000 MHz in two overlapping ranges
- High input sensitivity over the full frequency range
- High impedance measurement up to 125 MHz
- Reciprocal measurement technique gives superior resolution
- Period measurement from 3 Hz to 125 MHz
- Selectable measurement time; display hold function
- Noise filter for low frequency measurements
- Large 8.5 digit display with full range of annunciators
- Battery operation; handheld format with tilt-stand
- Push-to-measure function with auto power-down

UNIVERSAL FREQUENCY COUNTERS

BK PRECISION

Mfg. part no. 1823A benchtop universal counter measures frequency to 2.4GHz. 8-digit display provides up to 0.1Hz resolution. Large bright LED display. Includes period, period average, totalize, ratio, time interval, selectable gate time and min./max./avg. 8-digit LED. Sensitivity to 20mV rms. AC power: 100/120/220/240VAC, 50/60Hz. **Mfg. part no. 1856D** benchtop reciprocal frequency counter measures frequency to 3.5GHz based a 10 MHz TCO (Temperature Controlled Oscillator). 9-digit display provides up to 10 nHz resolution. Large bright LED display. Includes RPM (revolutions per minute) period, totalize functions. Sensitivity to 30mV rms.

Mfg. Part No.	Description	Stock No.	Price Each
1823A	2.4GHz Universal Frequency Counter with Ratio Function	57K8330	470.00
1856D	3.5GHz Reciprocal Frequency Counter with Totalize, Period Functions	97J8046	540.00

53200A SERIES RF AND UNIVERSAL FREQUENCY COUNTER/TIMERS

KEYSIGHT TECHNOLOGIES

- Optional 6 GHz or 15 GHz Input
- Single-shot resolution 20ps models
- 1M reading memory & datalogging
- LXI-C, LAN, USB, GPIB
- 1MSa continuous/gap-free measurement and timestamp capability (53230A)
- Optional pulse microwave measurements (53230A) and battery
- One year manufacturer's warranty

53200A series new generation of 350 MHz RF and Universal counter/timers with new performance and usability standards. Large color graphical display: Math, statistics, histogram, trend/stripchart, datalogging. The first frequency counters with LXI-C compliance, the combination of high speed measurements and new built-in analysis and graphing capabilities provide functionality not previously available. Counters include cert. of calibration, power cord, software, operating and programming guides.

Mfg. Part No.	Description	Stock No.	Price Each
53210A	350MHz RF Frequency Counter w/ GPIB Port, 10 digit/sec	86R9475	2169.00

ULTRA COMPACT RF FREQUENCY COUNTER

TENMA®

- Seven digit LCD display
- Input: BNC female, 50Ω
- 16 segment bargraph signal strength meter
- Rugged aluminum housing with black anodized finish
- Internal NiCad battery pack with included charger
- Removable telescopic antenna
- Dimensions (HxWxD): 3.25 x 2.8 x 1.25"

Rugged instrument is smaller than a deck of cards. **Mfg. part no. 72-7390** provides frequency measurement of digital, on/off keying and analog signals from 30MHz to 2.8GHz. It is perfect for displaying the output of two–way radio equipment, analog and digital cell phones, RF remote controls and many other items. Internal vibrator alert also makes this an outstanding device for detecting transmitters in counter–surveillance applications.

Mfg. Part No.	Frequency Measuring Range	Resolution	Stock No.	Price Each
72-7390	30MHz to 800MHz / 500MHz to 2.8GHz	10kHz (digital and on/off keying) 1kHz (analog)	80R7494	199.00

(191934)

MCA3000 SERIES MICROWAVE COUNTER / ANALYZERS & INTEGRATED POWER METER

CE Tektronix

Features
- Automated Measurements: Frequency, Period, Ratio, Time Interval, Time Interval Error, Pulse Width, Rise/Fall Time, Phase Angle, Duty Cycle, Max./Min. Voltage, Peak-to-Peak Voltage
- Integrated Power Meter
- Multi-parameter display
- Trend Plot mode
- Measurement Statistics and Histogram mode
- Allan deviation
- Zero dead-time frequency/period measurements

Specifications
- Microwave analyzer channel with CW or Burst
- Two 300 MHz general-purpose channels
- -35 dBm to +10 dBm power range
- 12 digit/s frequency resolution, 14 digit display
- 25 ms (Auto) or Zero (Manual) acquisition time
- Optional 1.5×10–8 ultra high-stability oven time base

Mfg. Part No.	Bandwidth	Time Resolution	Voltage Resolution	Stock No.	Price Each
MCA3027	27GHz	100ps	3mV	84R5911	8860.00

CPX SERIES POWERFLEX DC POWER SUPPLIES

NEW

Aim TTi

- High performance autoranging outputs
- Twin 175W or twin 420W (350W or 840W total)
- Compact half-rack case size

The TTi PowerFlex design of the **CPX series** enables higher currents to be generated at lower voltages within an overall power limit envelope. Each output can provide twice as much current as a conventional PSU of the same maximum voltage and power. The **CPX series** are dual output power supplies with two completely independent and isolated outputs. The outputs operate in constant voltage or constant current mode with automatic crossover and mode indication. Each output has its own on-off switch. The **CPX series** incorporates separate high resolution voltage and current meters for each output using large bright LED displays.

Mfg. Part No.	Outputs	Input Voltage	Output Voltage (V)	Output Current (A)	Stock No.	Price Each
CPX200	2	110V AC to 240V AC	35	10	06X4066	1025.60

(196560)

CPX400 SERIES POWERFLEX DC POWER SUPPLIES

NEW

- Single & dual output PowerFlex dc PSUs - 420 watts per output
- High performance autoranging outputs, 60V and 20A maximum
- True analog controls with digital functionality including S-Lock
- Isolated tracking for easy series/parallel use - up to 120V or 40A
- GPIB, RS-232, USB and LAN interfaces; LXI class C compliance

CPX400SP

CPX400DP

The **CPX series** is a different type of laboratory power supply designed to meet the need for flexibility in the choice of voltage and current. A conventional PSU has a fixed current limit giving a power capability that reduces directly with the output voltage. The TTi **PowerFlex** design of the **CPX series** enables higher currents to be generated at lower voltages within an overall power limit envelope. Each output can provide considerably higher current than a conventional PSU of the same maximum voltage and power (see power curve).

Mfg. Part No.	Outputs	Analogue	RS-232	USB	LAN (LXI)	GPIB	Stock No.	Price Each

QPX SERIES LAB POWER SUPPLIES

- 1200 watts PowerFlex/PowerFlex+
- Higher currents at lower voltages
- Up to 80 volts and up to 50 amps
- Analog, RS-232, USB & LAN (LXI)
- GPIB interface optional

Mfg. part no. QPX1200L offers flexibility that cannot be achieved with conventional laboratory power supplies. **Mfg. part no. QPX600D** can be operated as two entirely independent power supplies, each with its own display. Alternatively multiple tracking modes are available including ones intended for series and parallel operation which provide metering of total voltage or total current respectively. It uses PowerFlex+, which offers a much wider flexing range of more than 6 1/2:1. Both suited to bench-top and system applications **mfg. part no. QPX1200L** with front and rear terminals and a wide range of interfaces **mfg. part no. QPX600D** has a wide range of remote control interfaces.

Mfg. Part No.	Outputs	Voltage (V)	Current* (A)	Power (W)	Interfaces	Stock No.	Price Each
QPX1200SP-USA	1	0 to 60	0 to 50	1200	RS232/USB/LAN	71R6825	1849.42

(178355)

SINGLE OUTPUT DC POWER SUPPLIES

- Continuously monitor voltage and current output on two digital meters
- Connect two supplies in parallel to double the current output
- Connect two supplies in series to double the voltage output
- New compact style
- Reliable, Durable
- Operate continuously at full load without overheating
- Fully overload protected
- Coarse and fine voltage controls
- Great regulation
- Very low ripple
- Constant voltage or constant current operation

Mfg. Part No.	Output Voltage	Output Current	Output Power	Stock No.	Price Each
1621A	0 to 18V	0 to 5A	220W	01H7504	249.00

(209449)

SINGLE OUTPUT PROGRAMMABLE DC POWER SUPPLIES

- Excellent display resolution
- Low ripple and low noise due to linear regulation
- Outstanding temperature stability
- Fast transient response time (<120 us)
- SCPI compatible command set, programmable via USB and RS232
- Closed case calibration
- List mode operation for increased throughput.
- Download and execute command sequences from non-volatile memory
- For bench use or rack mountable
- Very quiet due to intelligent fan speed control, making the supply suitable for lab bench use
- Over voltage protection

1900

- Lightweight and compact
- Fixed Output (1680 & 1682A, 1692)
- Variable Output (1686A, 1688A, 1692, 1693, 1694, 190x Series)
- Low Ripple
- Rotary encoder control for precise voltage and current setting (190x Series)
- 3 user-defined voltage and current presets (190x Series)
- Remote control function (190x Series)
- Overvoltage, overtemperature, and overload protection
- Designed for continuous operation
- Ideal for substituting for car batteries

XLN SERIES PROGRAMMABLE DC POWER SUPPLIES

- Compact, high density, 1U package
- USB interface (standard), GPIB and LAN (optional)
- External analog programming interface
- List mode: execute test sequences with up to 150 steps from instrument memory
- Average command processing time <50 ms
- Programmable voltage and current slew rate allow for "soft starting" of loads
- Internal memory stores up to 10 instrument settings
- Control up to 30 power supplies from one
- PC via the RS485 interface
- Remote sense
- Timer-controlled output (1 s to 100 hr)
- Front to rear airflow allows for efficient cooling in high rack density environments
- Application software and LabVIEW™ drivers available
- SCPI-compliant command set
- Extensive protection features: OVP, OCP, OPP, OTP, foldback protection mode, and key-lock function
- Easy to configure master/slave mode for series or parallel connection of up to four units

The **XLN series** are programmable, single-output DC power supplies, that provide clean power up to 1560 watts in a compact 1U rackmountable package. Comparable supplies from other manufacturers primarily address the ATE market only, while the **XLN series** is designed for both benchtop users and system integrators. For benchtop applications, these power supplies offer built-in voltage and current meters displaying setting and output values concurrently, as well as an intuitive user interface with full keypad and rotary knob. Standard USB, RS485, and optional GPIB and LAN interfaces combined with fast average command processing times of less than 50 ms make the **XLN series** ideal for ATE applications. Free application software and a complete set of LabVIEW™ drivers are available to provide remote control capabilities, reduce programming time, and increase productivity. When greater output power is required, up to four **XLN** models can be connected in series (high current models only) or parallel and synchronized with the RS485 interface. Alternatively, the RS485 interface can be used to daisy chain up to 30 units and to remotely control them from one master PC via USB, GPIB, or LAN interface. These power supplies are perfectly suited for ATE systems integration, product design and development, product QC and burn-in testing, and other applications requiring excellent regulation, high power, low noise, and a wide range of voltage and current ratings.

SWITCHING DC POWER SUPPLIES

NEW

BK PRECISION

- Automatic CV/CC crossover operation
- Lightweight and compact
- Rotary encoder control for precise voltage and current setting
- Save up to 3 user-defined voltage and current presets for quick recall
- PC software for remote control and external timed programming
- Analog remote control function
- USB interface
- Front panel auxiliary output
- Overvoltage, overtemperature, and overload protection

B&K Precision models **1685B**, **1687B**, and **1688B** are laboratory grade switching mode DC power supplies with high current output in a small, lightweight form factor. These power supplies provide various configurations of output voltage and current, and feature rotary encoder control knobs, which make setting voltage and current levels fast and precise. Its dual action push button allows the user to easily set both coarse and fine, voltage and current levels. In addition to its constant voltage (CV) and constant current (CC) modes, these high efficiency DC power supplies offer preset and remote control modes. Save up to three different presets of voltage and current values for quick recall. For remote control, an analog remote control terminal is accessible on the rear, or use the USB interface to communicate with the power supply via PC software or remote commands. These features make the **1685B** Series suitable for a wide range of applications including production testing, telecommunications, R&D, electronic field service, and university labs.

LOW CURRENT HIGH RESOLUTION DC POWER SUPPLY

NEW

BK PRECISION

- Low 1 mA settable current limit with 0.1 mA resolution
- Output on/off button
- Exceptionally low current ripple and noise (<0.4 mArms)
- Excellent regulation
- Constant voltage (CV) and constant current (CC) operation
- Two large, easy-to-read LED displays provide good visibility in bright or low light conditions
- CV and CC mode indicator
- Automatic recall of saved voltage and current settings upon power-up
- RS-232 interface
- Isolated output
- Overload and reverse polarity protection
- Power-on self test

The model **1739** is a high resolution, low current DC power source with excellent load regulation and low noise characteristics. Two 4-digit LED displays continuously monitor the output voltage and current. The power supplies can be operated locally from the front panel or remotely through the RS-232 interface. The mechanical configuration conserves bench space and allows for easy portability. Using a MOSFET circuit design and high quality components with very low temperature coefficients, the power supply is extremely stable and capable of outputting current as low as 1 mA with a 100 uA settable resolution. This power supply was designed for electrical and electronics applications requiring precise levels of low current, including 4-20 mA current loop testing, calibration, or basic IC testing.

Mfg. Part No.	Output Voltage Max.	Output Current Max.	Stock No.	Price Each

PROGRAMMABLE DC POWER SUPPLIES

BK PRECISION

- Excellent display resolution
- Low ripple and low noise
- Outstanding temperature stability
- Fast transient resonse time (<20ms)
- SCPI Compatible
- Front and rear output terminals
- Closed case calibration

912XA series are laboratory grade programmable DC Power Supplies providing great performance and features not found in other supplies in this price category. These power supplies are designed to meet the needs of today's applications in R&D design verification, production testing or university labs that require clean and reliable power, high resolution/accuracy and fast transient response time.

9170 / 9180 SERIES PROGRAMMABLE DUAL-RANGE DC POWER SUPPLIES

CE

BK PRECISION

Single Output

Dual Output

- Single and dual output models with up to 210W output power
- Exceptionally low ripple and noise
- Front and rear panel output
- List mode for executing up to 10 stored test sequences with a maximum of 150 steps in total
- Overvoltage/overcurrent/overtemperature protection (OVP/OCP/OTP) and key-lock function
- Fast transient response time of < 50 us for most models
- Programmable voltage and current slew rates
- Standard USB interface
- 4 optional types of modular interface cards add LAN and GPIB, Digital I/O and Analog Control, RS485, or RS232 functionality
- LabVIEW (TM) drivers available

The **9170/9180 series** programmable DC power supplies deliver clean, stable and precise output power due to the supplies' exceptionally low ripple and noise, low temperature coefficient, excellent regulation and fast transient response time characteristics. These power supplies offer SCPI IEEE488.2 compliant USB (standard), RS232, RS485, GPIB and LAN interfaces, combined with front and rear panel output and remote sense terminals to facilitate test system development and integration. The LAN interface includes a built-in web server that allows users to configure, control, or monitor basic power supply settings. In addition to a full numerical keypad for convenient data entry, this series also provides unique features not typically found in comparable power sources, such as LED test modes, modular interface card slots, automatic range selection, and an optional 8-bit bidirectional digital I/O interface.

TENMA® AT NEWARK ELEMENT14

Affordable, reliable Test & Measurement equipment and accessories at newark.com/tenma

(212566)

9115 SERIES MULTI-RANGE PROGRAMMABLE DC POWER SUPPLIES

- Multi-ranging operation (output up to 1200 W with up to 150 V/60A rating)
- Compact, high density, 1U rackmount form factor
- Adjustable voltage slope (rise and fall time)
- List mode programming
- Save and recall up to 100 instrument settings
- Analog interface with control and monitoring functions
- Master/Slave mode for parallel and series operation
- Remote sense
- Overvoltage/overpower/overtemperature protection, and key-lock function
- Standard USB (USBTMC-compliant), RS-232, GPIB and RS-485 interfaces supporting SCPI commands for remote control
- Test functions compliant to automotive standards (**9115-AT** only)
- Includes calibration certificate and test report

Offering precise control and versatility for ATE and automotive test applications, the new **9115 Series** multi-range DC power supplies from B&K Precision offer high power up to 1200 W with output ratings up to 150 V and 60 A. The front panel features a bright VFD display and numeric keypad along with rotary knobs and cursors designed for quick and precise setting of output levels. Unlike conventional supplies with fixed output ratings, **9115 Series** models automatically recalculate voltage and current limits for each setting, providing any Volt/Amp combination within the power supply's output power rating. This flexible power range can free up valuable bench space by allowing users to replace multiple power supplies with a single unit. Additionally, model **9115-AT** adds a built-in automotive test function to simulate common test conditions for electronic devices installed in automobiles.

SINGLE AND TRIPLE OUTPUT DC LAB POWER SUPPLIES

1760A, 1761

1651A

1735A, 1715A

All power supplies are designed for continuous duty at maximum rated output. The designs include reverse polarity protection, thermal protection, short-circuit protection, and current limiting. Regulation is tight and ripple is low regardless of variations in the load or the input AC line voltage. All units have constant voltage and constant current modes.

DUAL RANGE DC POWER SUPPLIES

1737

1747

- Dual range to accommodate applications requiring either a higher voltage or a higher current
- Low ripple and noise
- Excellent regulation
- Constant voltage (CV) and constant current (CC) mode operation
- Two 4-digit LED displays provide good visibility in bright or low light
- LED indication for CV and CC modes
- Automatic recall of last settings on power up
- RS-232 interface
- Front panel emulation software available for download
- Isolated output
- Overload protection
- Reverse polarity protection

B&K Precision's models **1737** and **1747** are general purpose dual range DC power sources. These power supplies can output higher voltage at a lower current range or more current at a lower voltage range. Two 4-digit LED displays continuously monitor the output voltage and current. The power supplies can be operated locally from the front panel or remotely through the RS-232 interface. The **1737** and **1747** both exhibit excellent regulation and low ripple

MULTI-RANGE POWER SUPPLY

- Digitally controlled, mixed mode linear/ switching DC power supply
- 10mV/1mA resolution over full range
- High reliability due to over current/ voltage/temperature protection
- Store and recall 4x100 groups of preset volt/amp values
- Output On/Off control
- Compact design (1550 only)
- USB charging port (1550 only)

9110

1550

Mfg. No. 9110 automatically recalculates voltage/current for each setting, forming a constant hyperbolic-shaped boundary, providing 100W output power in any volt/amp combination within the rated voltage (60V) and current (5A). Includes line cord, manual. Mfg. No. 1550 has a USB charging port located on the front of the panel allowing the user to charge a cell phone or MP3 player. The 1550 is ideally used for any bench laboratoriees, work shops and schools where bench space is limited. Accessories available; *go online or call.*

VARIABLE DC OUTPUT PROGRAMMABLE SWITCHING POWER SUPPLIES

- RS-232 interface
- Low noise and ripple
- Tight line and load regulation
- Output disable
- Over voltage protection
- Constant voltage operation
- Constant current operation (current limiting)
- Large easy to read LCD display

Programmable switching DC power supplies are ideal for repetitive test routines and data logging. Units are supplied complete with software for programming and calibration.

PSW SERIES PROGRAMMABLE SWITCHING DC POWER SUPPLIES

RoHS Compliant Available

GW INSTEK Simply Reliable

- Voltage Rating: 30/80V/160V, Output Power: 360W ~ 1080W
- Constant Power Output for Multiple Range (V&I) Operation
- CV/CC Priority; Particularly Suitable for the Battery and LED Industry
- Adjustable Slew Rate
- Series and Parallel Operation (2 units in Series / 3 units in Parallel Maximum)
- High Efficiency and High Power Density
- ⅛ Rack Mount Size Design (EIA/JIS Standard)
- Standard Interface: LAN,USB,Analog Control Interface, GPIB-USB Adaptor(Optional)
- Labview Driver

The **PSW-Series** is a single output multi-range programmable switching DC Power Supply covering a power range up to 1080W. This series of products include six models with the combination of 30V,80V and 160V rated voltages and 360W, 720W and 1080W maximum output powers. The multi-range feature allows the flexible and efficient configuration of voltage and current within the rated power range. As the **PSW-Series** can be connected in series for maximum 2 units or in parallel for maximum 3 units, the capability of connecting multiple PSW units for higher voltage or higher current output provides a broad coverage of applications. With the flexibility of multi-range power utilization and series/parallel connection, the PSW Series significantly reduces the user's investment for various power supply products to accommodate the projects with different power requirements.

SINGLE-CHANNEL PROGRAMMABLE DC POWER SUPPLIES

KEITHLEY

- Five models ranging in power from 86W to 150W with voltage outputs from 20V to 72V address a wide range of power requirements
- 0.03% basic voltage output accuracy and 0.05% basic current accuracy provide quality test data
- High output and measurement resolution, 1mV and 0.1mA, for testing low power circuits and devices
- Remote sensing to ensure the programmed voltage is applied to the load
- Dual-line display shows both the programmed values and actual outputs for a continuous indication of the status of the power delivered to the load
- Repeatable test sequences of up to 80 output steps are easy to create with the built-in List mode
- GPIB and USB interfaces are standard for convenient automated control

Series 2200 Programmable DC Power Supplies provide a wide range of voltage outputs to address the testing and characterization of components, circuits, modules, and complete devices whether you are in a research laboratory, in design and development, or in production test. Single Channel Power Supplies consist of five models with output voltages from 20V to 72V that can deliver 86W, 96W, 100W, and 150W of power. In addition, these power supplies can act as constant current sources as well as constant voltage sources. Multi-Channel Power Supplies combine two and three channels of output power to cost-effectively characterize and test a wide range of devices, circuit boards, modules, and products that require more than one power source. **Series 2200** Power Supplies offer an excellent combination of performance, versatility, and ease of use to maximize the information from characterization or test as quickly and as easily as possible. They perform as effectively in automated test systems as they do in manual instrument configurations.

Mfg. Part No.	Output Voltage (V)	Output Current (A)	Power (W)	Stock No.	Price Each

MULTI-CHANNEL USB AND USB/GPIB PROGRAMMABLE DC POWER SUPPLIES

NEW

KEITHLEY

- Dual and triple output models with two 30V/1.5A (45W) channels and a 6V/5A (30W) channel on the triple output supply
- All channels are independently controlled and have isolated outputs for maximum flexibility
- All channels have remote sensing to ensure that programmed voltage is accurately applied to the load
- Two 30V channels can be combined either in series to double output voltage or in parallel to double output current
- 0.03% basic voltage output accuracy and 0.1% current accuracy ensure quality test data
- Low noise, linear regulation with <3mVpp ripple and noise
- Voltage and current outputs for all channels are displayed simultaneously for easy observation of each output state
- Keypad entry allows fast, precise entry of output values
- USB interface standard on all versions for remote control; "G" versions include USB and GPIB interfaces

The **Models 2220, 2220G, 2230, and 2230G** Multi-Channel Programmable DC Power Supplies combine two and three channels of output power to cost-effectively characterize and test a wide range of devices, circuit boards, modules, and products that require more than one power source. The **Models 2220-30-1** and **2220G-30-1** supplies provide two channels, with each channel capable of outputting up to 30V and up to 1.5A. The **Models 2230-30-1** and **2230G-30-1** include two 30V/1.5A channels and add a 6V channel with up to 5A output for powering digital circuits. These multi-channel power supplies offer an excellent combination of performance, versatility, and ease of use to maximize the information from characterization or test as quickly and as easily as possible. They perform as effectively in automated test systems as they do in manual instrument configurations. The USB interface is standard on all models; the "G" versions add a GPIB interface.

Mfg. Part No.	Output 1		Output 2		Output 3		Output Power (W)	Stock No.	Price Each

2260B SERIES 360W AND 720W PROGRAMMABLE DC POWER SUPPLIES

NEW

KEITHLEY

- 360W and 720W versions with voltage up to 80V and current up to 72A
- Combine power supplies in serial and parallel combinations to expand voltage and current outputs up to 160V and 216A
- Programmable voltage or current rise and fall times from 0.1V/s to 160V/s or 0.01A/s to 144A/s prevent damage from inrush current to low impedance loads
- Constant current priority setting reduces voltage and current overshoot when powering LEDs
- Simulate a battery's output characteristics with a programmable output resistance
- Display delivered power with either the output current or the output voltage
- Choose from analog control, USB, LAN, or an optional GPIB interface for automated control
- Save bench and test system space: six 71mm-wide 360W units or three 143mm-wide 720W units fit in a standard rack width

Source a wide range of voltages and currents with the 360W **Model 2260B-30-36** or the **Model 2260B-80-13** Programmable DC Power Supplies. For higher power requirements, output up to 720W with either the **Model 2260B-30-72** or the **Model 2260B-80-27** DC power supplies. All four instruments have constant power outputs to provide a flexible range of voltage and current output combinations. The 360W supplies can output as much as 30V or 80V or as much as 13.5A or 36A, while the 720W supplies can output twice as much current, 72A and 27A, with the same maximum voltage outputs. The wide range of output voltages and currents of the **Series 2260B** power supplies along with multiple interfaces, enable their use in numerous applications including research and design, quality control, and production test.

(212421)

2290 SERIES HIGH VOLTAGE POWER SUPPLIES

NEW

KEITHLEY

- Source voltages up to 5kV and 10kV
- 1uA current measurement resolution
- Low noise for precision sourcing and sensitive measurements; selectable filters reduce noise to less than 3mV RMS on the 5kV supply
- Safety interlock controls high voltage output
- IEEE-488 programmable
- Protection module prevents damage to low voltage instrumentation

Series 2290 High Voltage Power Supplies facilitate high voltage device and material testing, as well as high energy physics experimentation. The **Model 2290-5** 5kV Power Supply provides voltage outputs up to 5000V, and the **Model 2290-10** 10kV Power Supply offers up to 10,000V. The **Model 2290-5** has a 5mA current capacity, and the **Model 2290-10** has a 1mA current capacity. These supplies measure both output voltage with 1V resolution and output current with 1uA resolution. In addition to the voltage and current output displays, a third display shows one of four settings: output voltage, voltage limit, current limit, or current trip. These values can be set precisely with the front panel keypad. The settings can also be programmed over the IEEE-4888 interface, or the output voltage can be set with an analog control voltage.

Mfg. Part No.	Description	Stock No.	Price Each
2290-5	5kV Power Supply, 120VAC Nominal Input Voltage	**33X1234**	3890.00

N5700 SERIES SYSTEM DC POWER SUPPLIES

KEYSIGHT TECHNOLOGIES

- 750W and 1500W high-power single-output power supplies
- Easy Front Panel Operation
- Output Up to 600V and Up to 180A
- Built-In Voltage and Current Measurement
- Full Protection From Over-Voltage and Over-Current
- Parallel Up to 4 Units for Higher Power
- Universal AC Input 85 VAC to 265 VAC
- LAN, USB, and GPIB Interfaces Standard

The **N5700 series** system DC power supplies have just the right performance - at just the right price - in a compact (1 U) package. This family of affordable 750 W and 1500 W single output programmable DC power supplies are designed to simplify system development. Ideal for basic DC power applications, they provide stable output power, built-in voltage and current measurement, and output voltage and current from 6 V to 600 V and 1.3 A to 180 A. All models come standard with GPIB, LAN and USB 2.0 interfaces. Rack mount ears and handles are provided standard with every unit. An additional **N5740A** rack mount slide kit makes it easy to integrate an **N5700 series** into a test rack by providing all the necessary hardware to rack mount an **N5700 series** power supply in only 1 U of rack space.

DC POWER SUPPLIES

N6700 SERIES LOW-PROFILE MODULAR POWER SYSTEM

KEYSIGHT TECHNOLOGIES

- Choice of three power system mainframes: 400W, 600W or 1200W
- Up to four power modules housed in one mainframe: 50W, 100W, 300W or 500W
- Mix and match among basic DC, high performance, or precision power modules
- Low-profile mainframe design — takes up only 1U of rack space
- Stable, reliable DC output to 150V and 50A
- Fast command processing: <1ms improves throughput
- Connect via built-in GPIB, LAN, or USB

N6700B Mainframe (front view)

DC Power Modules
N6700B Mainframe (rear view)

N6700 series is a flexible modular power platform that gives you the ability to mix and match more than 30 different DC power modules to create a 1- to 4-channel DC power system optimized to meet specific test requirements. System engineers can invest in high-performance outputs where speed and accuracy are needed, or purchase basic performance outputs for simple DC power requirements. Plus it saves rack space for automatic test equipment (ATE) applications with the smallest, highest density modular power supply available at only one rack unit high.

To build a modular power system, select **mfg. part no. N6700B, N6701A** or **N6702A** mainframe. Order up to four modules per mainframe. When rack mounting mainframe, use only mfg. part no. N6709A rack mount kit; *ordered separately below.* **NOTE:** Do not use standard rack mounting hardware.

MODULAR POWER SYSTEM MAINFRAMES — 4-SLOTS
Small in size the **mfg. part nos. N6700B, N6701A** and **N6702A** mainframes come standard with built-in measurement of voltage and current, protection features against over-voltage, over-current, and over-temperature; GPIB, USB 2.0, and 10/100 Base-T Ethernet LAN interfaces for connectivity, and interfacing disabling for extra security. Also, all nonvolatile RAM data and settings can be cleared from the front panel.

N6702A	1200	60K0561	3949.00

N6730 SERIES BASIC DC POWER MODULES — 50W
N6730, N6740, and **N6770 series** of basic DC power modules provide programmable voltage and current, measurement and protection features at an economical price, making these modules suitable to power the device-under-test (DUT) or to provide power for ATE system resources, such as fixture control.

N6777A	150	2	76T8607	1469.00

N6750 SERIES HIGH-PERFORMANCE DC POWER MODULES — 50W, 100W
N6750 series power modules, for applications where the power supply plays a critical role, provide low-noise, high-accuracy and programming speeds that are up to 10 to 50 times faster than other programmable power supplies. High-speed test extensions offer an oscilloscope-like digitizer that simplifies system configuration and increases measurement accuracy when viewing high-speed transient or pulse events within the device-under-test (DUT). In addition, autoranging output capabilities enable one power supply to do the job of several traditional power supplies.

U8000 SERIES DC POWER SUPPLIES

KEYSIGHT TECHNOLOGIES

- 3A/90W or 5A/150W single-output, nonprogrammable models and 3A/375W or 6A/375W Triple-Output DC Power Supply
- Easy-to-use front panel operation
- Fast 50µsec transient response reduces test time
- Excellent load and line regulation — Constant Voltage: <0.01% +2mV, Constant Current: <0.02% +2mA
- Low output noise: 1mVrms, 3mArms (20Hz to 20MHz)
- Over-voltage and over-current protection prevents damage to DUT
- LCD display with backlight on/off option
- Standby output for safety
- Save-and-Recall memory function
- Keypad locking prevents accidental front panel usage
- Physical lock mechanism provides secure instrument storage
- CSA certified, CE complaint

U8000 Series non-programmable 30V and 60V DC power supplies includes the functionality and features typically found in costly programmable supplies. These benchtop units deliver excellent value by providing reliable DC power, efficient set-up capabilities and important security benefits. Ideal for a variety of applications in electronics manufacturing and in educational lab settings. Supplies can be easily integrate into a test rack with rack mount kits; *ordered separately below.* Both models come complete with product reference CD, power cord, and certificate of calibration . *Order test lead set and the comprehensive user's and service guide separately below.*

- Small, high density 2 U high, 19" wide package
- 3.3kW and 5kW power families
- Outputs up to 600V and up to 400A
- Parallel multiple units for higher power
- Built-in voltage and current measurement
- LAN, USB, and GPIB interfaces standard.
- Full protection from over-voltage and over-current
- Flexible AC input voltage options

N8700 series single-output programmable DC power supplies consists of 21 models for simple DC power applications. They provide stable output power, built-in voltage and current measurement, and output voltage and current from 8V to 600V and 5.5A to 400A. **N8700 series** offers many system-ready features like multiple standard I/O interfaces to simplify and accelerate test-system development. Its air vents are in the front and rear, so you can stack other instruments directly above or below to save valuable rack space.

66000 MODULAR POWER SYSTEM 1200W PER MAINFRAME GPIB FEATURES

KEYSIGHT TECHNOLOGIES

- Greater throughput in less space with the flexible modular power system
- Up to 8 modules in the required high density 1200W 66000A mainframe
- Stable, low ripple and noise power source
- Sequence up to 20 voltage and current setting per output
- Easy to reconfigure with front loading modules

The **66000 series** modular power system simplifies test-system assembly, cabling, programming, de-bugging, and operation. It is ideal for ATE and production test environments for supplying bias power and stimulus to subassemblies and final products.

Required mainframe: 66000A

Mfg. Part No.:	66101A	66102A	66103A	66104A	66105A	66106A
GPIB:	Yes	Yes	Yes	Yes	Yes	Yes
Output Voltage:	0-8V	0-20V	0-35V	0-60V	0-120V	0-200V
Output Current:	0-16A	0-7.5A	0-4.5A	0-2.5A	0-1.25A	0-0.75A
Ripple RMS:	2mV	3mV	5mV	9mV	18mV	30mV
Power:	128W	150W	150W	150W	150W	150W

Mfg. Part No.	Description	Stock No.	Price Each
66000A	Modular System Mainframe	95H9246	2699.00
66101A	Module Power Supply 8V, 16A	95H9249	2484.00

E3600 SERIES SINGLE, DUAL AND TRIPLE OUTPUT DC POWER SUPPLIES

KEYSIGHT TECHNOLOGIES

- Dual or triple output
- 30W to 60W output power
- Constant-Current (CC) and Constant-Voltage (CV) Modes
- Linear Power
- 10-Turn Voltage and Current Controls
- Digital Voltage and Current Meters
- Low Noise and Excellent Regulations
- Dual range models available

Mfg. part no. E3620A features: dual outputs isolated, 10-turn pots, and CV and CL modes. **Mfg. part no. E3630A** features: tracking, common outputs, and CV and CL modes. Transient response time: <50µs following change in output current from full load to half load for output to recover to within 15mV. Common mode current: <1µArms. Dual range models available, *go online or call.*

Mfg. Part No.	Output Volts	Output Amps	Ripple and Noise Voltage	Meter Resolution Volts	Meter Resolution Amps
E3620A	25V 25V	1A 1A	<350µVrms, <1.5mVp-p	10mV (0-20V), 100mV (>20V)	1mA
E3630A	+6V +20V −20V	2.5A 0.5A 0.5A	<350µVrms, <1.5mVp-p	10mV	10mA

E3630A	Triple-Output Power Supply	91F3057	657.00

(211774)

E3630A SERIES SINGLE- AND TRIPLE-OUTPUT PROGRAMMABLE DC POWER SUPPLIES

KEYSIGHT TECHNOLOGIES

- 80W to 200W output power
- Built-in RS-232 and GPIB interface
- 0.01% load and line regulation

E3631A:
- Triple-Output, 80 watts total
- Dual +/-25V, 1A outputs, one isolated 0–6V, 5A output
- Ripple and noise <350µ Vrms / 2mV p-p

E3632A:
- Single-Output 120 watts total
- 0–15V, 7A or 0–30V, 4A
- Ripple and noise <350µ Vrms / 2mV p-p

E3633A:
- Single-Output 200 watts total
- 0–8V, 20A or 0–20V, 10A
- Ripple and noise <350µ Vrms / 3m V p-p

E3634A:
- Single-Output 200 watts total
- 0–25V, 7A or 0–50V, 4A
- Ripple and noise <500µ Vrms / 3mV p-p

All models operate in both constant voltage and constant current modes. Single output models have overvoltage and overcurrent protection. Up to 3 complete power supply settings can be stored and recalled from the internal none volatile memory.

Mfg. Part No.	Description	Stock No.	Price Each
E3631A	80W Triple-Output Power Supply	91F3058	1386.00
E3632A	105/120W Single-Output Power Supply	91F3059	1211.00
E3633A	160/200W Single-Output Power Supply	95H9602	1464.00
E3634A	175/200W Single-Output Power Supply	95H9603	1464.00

(211775)

E3640A SERIES SINGLE AND DUAL-OUTPUT PROGRAMMABLE DC POWER SUPPLIES

KEYSIGHT TECHNOLOGIES

- Single- and Dual-Output
- 30W to 100W Output Power
- Front and Rear Output Terminals
- Over Voltage Protection
- Remote Senses
- GPIB and RS232 as Standard

The **E364XA series** of programmable DC power supplies provide great performance. CVCI mode. All types deliver clean power, dependable regulation, and fast transient response. Calibration with printed certification and data report is available on all models, *go online or call*.

PWS2000 SERIES DC BENCH POWER SUPPLIES

Tektronix

Key Features:
- Low noise, linear regulation
- Wide voltage and current ranges
- 10 mV/10 mA programming resolution
- Less than 3 mVp-p ripple and noise
- Bright vacuum fluorescent displays
- 20 user-defined setup memories
- 3-year warranty

PWS2000 series power supplies offer wide current and voltage ranges, plus 10 mV and 10 mA resolution. Numeric keypads make voltage and current selection fast and accurate. Bright vacuum fluorescent displays with large digits provide excellent readability. A max voltage setting and password-protected front panel lockout help prevent circuit damage. **PWS2000 series** power supplies satisfy a wide variety of applications. All models include: documentation CD, power cord, calibration certificates documenting traceability to National Metrology Institute(s) and quick start user manual.

PWS4000 SERIES PROGRAMMABLE DC BENCH POWER SUPPLIES

Tektronix

Key Features and Functions::
- Low-noise linear regulation
- Wide voltage and current ranges
- 0.03% basic voltage accuracy, 0.05% basic current accuracy
- Up to 40 user-defined setup memories
- USB interface for remote programming
- Bright display shows actual voltage, current, and limits simultaneously
- List mode for test sequencing
- Remote sense, rear outputs and trigger/status lines
- 3-year warranty

PWS4000 series provides excellent voltage and current accuracy, and remote sensing for precise output levels. Both numeric keys and a rotary knob provide the ability to enter parameters directly or make continuous adjustments. The four-parameter, bright vacuum fluorescent display shows meter readings and limits at a glance. Integrated setup memory and list functions help speed manual and remote control testing. Remote programming is through USB, and NI Signal Express PC software (included). A max voltage setting and password-protected front panel lockout help prevent unintentional circuit damage. All models also include: documentation CD, power cord, calibration certificates documenting traceability to National Metrology Institute(s) and quick start user manual.

SWITCH MODE LABORATORY DC POWER SUPPLIES

NEW TENMA®

- Backlit four digit LCD display
- Simultaneous display of voltage and current
- Auto selecting constant voltage (CV) and constant current (CC) modes
- Ultra quiet convection cooling
- Short circuit, overload, over voltage and thermal protection
- 84% efficiency at maximum output
- RoHs compliant

Precision adjustable supply is ideal for test, measurement and service applications where tight voltage and current regulation are critical. Highly efficient switch mode design delivers outstanding performance from an extremely compact footprint. Unique separate output ON/OFF control allows voltage and current setting, with the supply output turned off.

72-8XXXA SERIES DC POWER SUPPLIES

NEW TENMA®

72-8XXXA is a series of general DC power supplies suitable for laboratory use. Both CH1 and CH2 may work in CV or CC mode, and these two modes convert automatically according to the load. CH1 and CH2 have auto tracking function. In this condition, the output of CH2 tracks the output of CH1. This function is usually used when adjustable symmetrical and double polarity power is required. Both CH1 and CH2 display the output voltage or current with a 6-digit-LED meter. CH3 (in some models) is a 5V fixed output. Its maximum output current is 2A, and it is usually used in TTL circuits etc. CH1, CH2 and CH3 all have overload protection.

HIGH CURRENT SWITCH MODE POWER SUPPLIES

TENMA®

- Front panel 3/16" binding posts provide convenient access for loads up to 25A (**72-7670**)
- Front panel banana jacks provide convenient access for loads up to 5A (**72-7655**)
- Rear panel 3/8" posts accept banana plugs, ring terminals or spade lugs for loads up to 60A (**72-7655**)
- Remote voltage control and sensing (**72-7655**)
- Large 5/8" high LED digits
- Display resolution to 0.1V, 0.1A
- Excellent load and line regulation
- Low ripple and noise
- Over-voltage, overload, temperature and short circuit protection
- Detachable IEC power cord

5A HIGH CURRENT SWITCHING MODE POWER SUPPLY

CE TENMA®

- Adjustable 1 - 40V @ 5A
- 3½ Digit LED Display
- Coarse and Fine Voltage Adjustment
- Auto-Cross Over for CC and CV Modes
- Low Ripple and Noise
- Excellent Load and Line Regulation
- Thermostat Control Fan
- OVP, Overload, Short Circuit and Over Temperature Protection

Type 72-7295 is a 200W laboratory grade switching power supply. Features OVP (output overvoltage protection) that protects voltage sensitivity loads by shutting down the supply when the output voltage is in excess of the set voltage. *To order calibrated certificate add* **"C"** to the end of the type number. CE compliant.

PROGRAMMABLE DC POWER SUPPLY

TENMA®

72-8795

Features:

- Programmable power supply with a digital interface
- Three separately adjustable linear outputs
- The 192×64 LCD Display can display multiple settings and measurements simultaneously
- Windows-based interface for user-friendly operation
- High stability and low drift
- Over Voltage, Current, and Temperature protection
- Intelligent fan control adjusts with output power
- Built-in warning buzzer
- Accurate user calibration software
- Space-saving design
- Fine adjustment knob
- 90 setting memory
- Parallel, series, and independent operation modes
- 1-second timing resolution

72-8795 Programmable Power Supply is controlled by a Microprocessor Unit (MPU) that is designed for a communication interface by RS-232 or USB to computer to enable advanced testing and power delivery by programmable control. The voltage and current are controlled by a 12 bit D/A Converter with high resolution and accuracy. Also, the digital interface provides a speedy, precise and convenient input of information controlled by intuitive controls. The adjustment

PROGRAMMABLE DC POWER SUPPLY (CONT.)

of voltage/current is made by software calibration, eliminating potential manual fault, that increases the precision of the instrument. Over Voltage Protection (OVP) and Over Current Protection (OCP) can be set with the software and utilized by the hardware to achieve precise, instant protection to prevent damage and increase the users' safety.

MULTIPLE OUTLET DC POWER STRIP

TENMA®

- Isolated steel case
- Separate ground lug
- Attached 6' lead with color coded, gold plated spade lugs
- Mounting hole centers 12½"
- Dimensions: 2½" (H) x 3½" (W) x 13" (L) including binding posts

Section One:

- Two sets of heavy duty, individually fused binding posts
- Current capacity is 35A on either set
- Total max combined capacity 35A
- 0–35A analog ammeter
- LED status indicator

Section Two:

- Six sets of 10A binding posts, 15A max total capacity
- 15A fuse for entire set
- 0–15A analog ammeter
- Rocker switch with LED status indicator

This multiple outlet high-current terminal strip the perfect accessory to any bench top power supply, especially when a number of permanent items are connected, while others are routinely added and removed. Intended for the service bench, it is also great for use in ham radio and other communications environments. It is the perfect companion to the Tenma Model 72-7655 Switch Mode Power Supply. Attached 8AWG cable is terminated with gold plated, color–coded spade lugs, for easy connection to any benchtop power supply. Color coded binding posts accept spade terminals, bare wire, single or paired banana plugs. This unit is divided into two independent sections, with a combined total current capacity of 35A.

PRECISION REGULATED 13.8V DC POWER SUPPLIES

TRIPP-LITE POWER PROTECTION

PR-7

- Clean 13.8V DC output (±0.5V)
- 120V AC input voltage
- Tight line and load regulation
- Compact size
- Over-current protection
- Crowbar over-voltage protection on models over 15 Amps

These single-output DC power supplies are ideal for use as test bench supplies, laboratory supplies, mobile audio equipment, electronic design and quality control equipment, test bench equipment, point-of-sale displays, etc.. Designed for reliability and superior performance. All models have chassis mount fusing except **mfg. part nos. PR3, PR3UL** and **PR4.5**, which have internal fusing.

ISOLATED VARIABLE AC POWER SUPPLY

TENMA®

Features

- Provides isolation from the AC line when servicing "hot" chassis equipment
- Protects AC powered test equipment
- Variable 0-145VAC output
- Safely troubleshoot power supplies, regulators and output circuits
- Minimize damage to associated components
- Dual analog meters simultaneously display output voltage and current
- Independent line input and variable output fusesprotect variable supply and equipment under test
- Output fuse may be changed to a lower value
- Grounded 6' line cord and outlets.

Specifications

Mfg. Part No.	72-1097	72-1098
Input Voltage	100~127VAC	
Output Voltage	145VAC (with 110VAC input)	
Max Output Current	3.5A	7A
Line Fuse (included)	6A	10A
Output Fuse (included)	5A	9A
Output Outlets	One	Two
Dimensions (H x W x D)	5-3/4" x 9-1/8" x 9"	6-1/8" x 11-7/8" x 10-1/4"
Weight	13-1/4 lbs.	17-3/4 lbs

Variable AC supplies combine the safety benefits of an isolation transformer with the service advantages of a variable autotransformer.

MDL SERIES MODULAR PROGRAMMABLE DC ELECTRONIC LOADS

B&K PRECISION

Module

Mainframe Extension

Mainframe

- Modules offer wide voltage and current range, 0 to 500V, 0 to 120A
- Support for up to 8 or 16 channels with mainframe extension
- Transient mode up to 25kHz
- Synchronous Load on/off function
- Adjustable slew rate in CC mode
- Standard LAN, GPIB, USB, and RS-232 interfaces with USBTMC/SCPI protocol support
- Short circuit test
- Built-in 16-bit resolution voltage and current measurement (0.1mV, 0.01mA)
- Remote voltage sensing to compensate for the effect of voltage drop in wires
- Operate identical modules in parallel mode for high current applications
- OVP/OCP/OPP/OTP and reverse voltage protection

The **MDL Series** is a multi-channel modular programmable electronic load system. Six different modules of programmable DC loads ranging in power from 200W to 600W provide users the flexibility to test a wide range of power sources from multi-output AC/DC power supplies to batteries, fuel cells, and photovoltaic arrays. The mainframe has four slots that can be configured with any assortment of the modules up to 2400W (up to 4800W with mainframe extension). The high-performance electronic load modules of the **MDL Series** are capable of operating in constant current (CC), constant voltage (CV), constant resistance (CR), constant power (CW), and constant impedance (CZ) mode, which uses DSP technology to simulate non-linear loads and realistic loading behavior. **MDL252** is a dual-channel module supporting a unique flexible power configuration. The user can allocate 250W to either channel up to 300W total (e.g. 50W/250W, 250W/50W, 150W/150W).

8500 SERIES PROGRAMMABLE DC ELECTRONIC LOADS

BK PRECISION

300W

600W, 1200W

2400W

5000W

- Wide operating ranges up to 0 to 500V and 0 to 240A (5000W max.)
- Low minimum operating voltage <0.1V
- Built-in transient generator
- Short circuit test
- High-resolution 0.1mA/1mV voltage/current measurement (Models **8500** and **8502**)
- Bright, easy-to-read VFD display
- Constant current (CC), constant resistance (CR), constant voltage (CV) and constant power (CW) operation
- Over-current/over-voltage/over-power/over-temperature protection
- Stores up to 25 instrument set-ups
- Thermostatically-controlled fan operates quietly
- All rack mountable; 300 and 600W models for bench use

Affordable full-featured programmable electronic DC loads offer a high degree of accuracy and great display resolution. Ideal for testing and evaluating a variety of DC power sources: DC power supplies, DC-DC converters, batteries, fuel cells and solar cells. Because they are fully programmable via the RS 232 or optional USB interface they are ideal for automated test systems. The loads can operate in constant current, constant voltage, constant resistant and constant power mode while voltage/current or resistant/power values are measured and displayed in real time. Each unit is supplied with power cord, TTL-to-RS232 serial converter, user manual, installation CD with application software, and one year manufacturer's warranty. *Order* **mfg. part no. IT-E151** *rack mount kit and* **mfg. part no. IT-132** *TTL-to-USB serial adapter separately; go online or call.*

(84537)

MFG. PART NO. 8540 150W DC ELECTRONIC LOAD

BK PRECISION

- Operates between 0-60VDC, 1 mA-30A (150W maximum)
- Easy operation
- Bright, easy-to-read display
- Very compact and lightweight
- Two current ranges: 3A (1mA resolution) and 30A (10mA resolution)
- Constant current (CC), constant resistance (CR) and constant voltage (CV) operation
- Over-current and over-voltage protection
- Short mode to simulate shorts
- Save up to 400 instrument settings

Mfg. part no. 8540 DC electronic load is a very compact, economically-priced instrument that is perfect for use on both the bench and the production floor. Though small in size, it can reliably test a 5V power supply to 30A and do it continuously. The load can operate in CC, CV or CR mode while voltage/current or resistance/power values are measured and displayed in real time, making it well suited to test a variety of DC power sources. Its performance is comparable to most full-size bench DC loads, yet it does the job at half the price and takes up half the bench space. Unit is supplied with power cord, user manual, and one year manufacturer's warranty. Dimensions: 3.5 W x 6.9H x 11.1"D.

Mfg. Part No.	Power (W)	Voltage (V)	Current	Stock No.	Price Each
8540	150	60	1mA - 30A	**13P0414**	525.00

(143525)

SINGLE-INPUT DC ELECTRONIC LOADS

KEYSIGHT TECHNOLOGIES

- 250W to 300W
- Cost-effective for single input applications
- Convenient optional front panel input connection
- One year manufacturer's warranty

Mfg. part nos. 6060B and **6063B** each provide one load input. Entering commands manually using the front panel keypad is simpler because the channel does not need to be specified, as in a mainframe configuration. Includes overvoltage, overcurrent, overtemperature, overpower, and reverse polarity protection. These electronic loads are particularly suited for the lab bench.

Mfg. Part No.	Description	Stock No.	Price Each
6060B	Electronic Load, 3-60V, 0-60A, 300W	**95H9222**	3010.00
6063B	Electonic Load, 3-240V, 0-10A, 250W	**95H9223**	3413.00

(211788)

N3300 SERIES DC ELECTRONIC LOAD MAINFRAME

KEYSIGHT TECHNOLOGIES

Features:

- Stable operation down to zero volts
- GPIB and RS-232 control of current, voltage and resistance
- GPIB and RS-232 readback of current, voltage and power
- Built-in pulse waveform generation with programmable amplitude, frequency, duty cycle and slew rate
- Full protection from over-current, over-power, over-temperature and reverse polarity
- Electronic calibration
- Trigger for external synchronization
- Parallel units in constant current mode for higher power
- VXI *plug & play* drivers

Mfg. part no. N3301A and **mfg. part no. N3300A** electronic load mainframes accept user-installable load modules for easy system configuration and future reconfiguration. **Mfg. part no. N3301A** holds up to two **mfg. part no. N3302A, mfg. part no. N3303A**, and **mfg. part no. N3304A** load modules, or one **mfg. part no. N3305A** or **mfg. part no. N3306A** load module, allowing up to 600 watts of total maximum power. **Mfg. part no. N3300A** holds up to six **mfg. part no. N3302A, mfg. part no. N3303A, mfg. part no. N3304A** and **mfg. part no. N3307A** load modules, or three **mfg. part no. N3305A** and **mfg. part no. N3306A** load modules, allowing up to 1800 watts of total maximum power. One GPIB address is all you need for complete control and readback of all load modules within a single mainframe. This series of dc electronic loads provides the fast operation and accurate programming and readback need for high-volume dc power supply test systems.

BENCH LCR/ESR METER WITH COMPONENT TEST

BK PRECISION

Features:

- Measurement parameters: Z, L, C, DCR, ESR, D, Q, ACV, DCV, ACA, DCA and ∅
- Test conditions: 100 Hz, 120 Hz, 1 kHz, 10 kHz, 100 KHz, 200 kHz, 1 Vrms, 0.25 Vrms, 0.05 Vrms
- 0.1% basic accuracy
- Dual LCD display
- Very quick response, user friendly
- Fully auto/manual selection
- DC resistance measurement
- USB interface
- One year warranty

Mfg. part no. 889B synthesized in-circuit LCR/ESR Meter is a high accuracy test instrument used for measuring inductors, capacitors and resistors with a basic accuracy of 0.1%. Also, with the built-in functions of DC/AC Voltage/Current measurements and Diode/Audible continuity checks, the 889B can help engineers and students understand the characteristics of electronic components. Accessories included: instruction manual, kelvin probe and line cord.

SPECIFICATIONS

Mfg. Part No.	889B
Operating Temperature	32°F to 104°F (0°c to 40°C)
Storage Temperature	-4°F to 158°F (-20°C to 70°C)
Relative Humidity	Up to 85%
AC Operation	110V/220V AC, 60/50Hz
Low Power Warning	Under 2.2V
Dimensions (LxWxH)	11.8 x 8.7 x 5.9" (300 x 220 x 150mm)

IC TESTERS

BK PRECISION

570A Features:

- 16-Pin ZIF Socket
- Tests All Common Analog ICs
- Auto Identification of Unmarked/ House Coded Devices Listing Possible Replacements
- Conditional/Unconditional Loop Testing Mode

575A Features:

- 40-Pin Wide Entry ZIF Sockets (Type 575)
- Large Built-In Library
- Tests TTL, CMOS, Memory, LSI

Mfg. part no. 570A tests all common analog ICs. Autoidentifies unmarked devices. Has conditional/unconditional loop testing mode; functional test eliminates passive circuitry; display diagnostic information. High-quality 16-pin ZIP socket. **Mfg. part no. 575A** is a digital IC tester that tests up to 40-pin ICs.

E4980A PRECISION LCR METER

NEW

KEYSIGHT TECHNOLOGIES

- 20 Hz to 2 MHz, with 4-digit resolution in any range
- 0.05% basic accuracy with superior measurement repeatability at low and high impedance
- Built-in 40V DC Bias (**Option 001**)
- 40 A DC support with the **option 002** and the **42841A** Bias Current Source
- Rdc measurements (**Option 200**)
- 20 Vrms test signal (**Option 001**)
- High-speed measurements: 5.6 ms
- 201 points list sweep
- Versatile PC connectivity (LAN, USB and GPIB)

The **E4980A** precision LCR meter provides the best combination of accuracy, speed, and versatility for a wide range of component measurements. Offering fast measurement speed and outstanding performance at both low and high impedance ranges, the **E4980A** is the ultimate tool for general R&D and manufacturing test of components and materials. LAN, USB and GPIB PC connectivity enhances your design and test productivity.

Mfg. Part No.	Frequency Range	Stock No.	Price Each
E4980A	20 Hz to 2 MHz	78K5118	17666.00

(212536)

E4980AL SERIES PRECISION LCR METERS

NEW

KEYSIGHT TECHNOLOGIES

- Exceptionally low noise at both low and high impedance to improve test quality
- 0.05% basic impedance accuracy
- Open/Short/Load compensation
- Test cable extension (1/2/4 m)
- Fast speed with an affordable price contributes to reduce cost of tests
- 12 ms (SHORT), 118 ms (MED), 343 ms (LONG) @1 MHz
- 20 Hz to 300 kHz/500 kHz/1 MHz test frequency with 4-digit resolution
- 16 impedance parameters
- 100 uV to 2 Vrms, 1 uA to 20 mA variable test signal
- DC bias 1.5/2 V
- Auto-level control
- 201 points of programmable list sweep
- DC resistance

E4980AL precision LCR meter is an industry standard of basic LCR meters which provides the best combination of accuracy, speed and versatility with the frequency selections. Along with the widest variety of accessories, a broad range of component and material measurement applications in general R&D and production environments can be addressed. Frequency upgrades are also available to maximize the ROI.

Mfg. Part No.	Description	Stock No.	Price Each
E4980AL-030	20 Hz to 300 kHz with DCR Measurement	97W1121	4275.00
E4980AL-050	20 Hz to 500 kHz with DCR Measurement	97W1122	6412.00
E4980AL-100	20 Hz to 1 MHz with DCR Measurement	97W1123	8549.00

E4982A SERIES 1MHZ TO 3GHZ LCR METER

KEYSIGHT TECHNOLOGIES

- 3 measurement time modes: 0.9msec, 2.1msec, 3.7msec
- Low variation for repeatability
- 11 parameters: Z, Y, L, C, R, X, G, B, D, Q, θ
- Measurement range from 0.14Ω to 4.8kΩ (within 10% accuracy)
- 0.8% basic accuracy
- Sophisticated calibration/compensation method with calibration wizard function
- SCPI commands
- GPIB, LAN, USB, Handler interface
- Cable extension and small test head (the same size as the **4287A**)
- Multi-function comparator
- Contact check using DCR measurement function
- List measurement up to 201 points/table, Table & plot format
- User defined function keys/parameters
- Undo recall/preset
- Context sensitive embedded help

E4982A LCR meter provides the best performance for the passive component manufacturing such as SMD inductors and EMI filters, where impedance testing at high frequencies is required. The **E4982A** is compatible to **4287A** for drop-in replacement.

Mfg. Part No.	Description	Stock No.	Price Each
E4982A	LCR Meter, 1MHz to 3GHz	**82T3467**	33453.00

(211764)

E5100A HIGH-SPEED NETWORK ANALYZER

NEW

KEYSIGHT TECHNOLOGIES

- High speed filter and resonator evaluation using waveform analysis commands
- IBASIC for easy automation
- Phase tracking function for high speed evaluation of resonator
- Evaporation monitoring function
- **E5100A/400** -300MHz, 4 Receivers, Ports R, A, B and C
- **E5100A/600** -300MHz X'tal resonator test to use w/PI-network

Mfg. Part No.	Frequency Range	Stock No.	Price Each
E5100A-400	10 KHz to 300 MHz	**39M5999**	16306.00
E5100A-600	10 KHz to 300 MHz	**50M8474**	16344.00

(212521)

4285A PRECISION LCR METER

NEW

KEYSIGHT TECHNOLOGIES

- 75 kHz to 30 MHz in 100 Hz steps
- 0.1% basic accuracy
- High-speed measurements: 30 ms/meas.
- Constant V or I test signal level
- 10 A DC bias with the 42841A
- List sweep measurement capability

The **4285A** precision LCR meter provides a precise, reliable, high-speed solution for component and material measurement. For demanding RF component tests, the **4285A** offers a higher test-frequency range, from 75 kHz to 30 MHz. Whether in research and development, production, quality assurance, or incoming inspection, the **4285A** will meet all of your LCR meter test and measurement requirements.

Mfg. Part No.	Frequency Range	Stock No.	Price Each
4285A	75 kHz to 30 MHz	**09J9882**	19610.00

GPT-9800 SERIES SAFETY TESTERS

CE

GW INSTEK Simply Reliable

- 200VA AC Test Capacity
- 240x64 Ice Blue Dot matrix LCD
- Manual/Auto Mode
- Function Key for quick selecting
- High intensity flash for Caution & Status indication
- Safety INTERLOCK function
- Zero Crossing Turn-on Operation
- Controllable Ramp-up Time
- True RMS Current Measurement
- High resolution: 1uA for measuring current, 2V for setting voltage
- PWM amplifier to enhance the power efficiency and reliable testing
- Max. 100 memory block for test condition (step) setting. And each step can be named individually.
- Remote terminal on the front panel for "start" and "stop" control
- Interface : RS-232C, USB device, Signal I/O and GPIB (optional)

The **GPT-9800 Series** look to meet a variety of safety standards such as IEC, EN, UL, CSA, GB, JIS and other safety-related requirements for the safety tests of electronic products and components. A total of 4 safety testers are available for various applications. The **GPT-9804** is a 4-in-1 model capable of performing AC withstanding, DC withstanding, insulation resistance and ground bond tests. The **GPT-9803** is a 3-in-1 model capable of performing AC withstanding, DC withstanding as well as insulation resistance tests. The **GPT-9802** is capable of performing both AC and DC withstanding tests, whereas the **GPT-9801** is able to perform AC withstanding test. The series of safety testers is built upon a high-efficiency PWM amplifier platform with AC 200VA maximum output capacity to impede the influence from the voltage fluctuation of the input AC source. This ensures a stable voltage supply for all the tests of the **GPT-9800 Series**.

Mfg. Part No.	Description	Stock No.	Price Each
GPT-9801	AC 200VA AC Withstanding Voltage Tester	**79T9564**	1128.00
GPT-9802	AC 200VA AC/DC Withstanding Voltage Tester	**79T9565**	1300.00
GPT-9803	AC 200VA AC/DC Withstanding Voltage/ Insulation Resistance Tester	**79T9566**	1584.00
GPT-9804	AC 200VA AC/DC Withstanding Voltage/ Insulation Resistance / Ground Bond Tester	**79T9567**	2376.00

3130 SERIES PORTABLE PNEUMATIC PRESSURE CALIBRATOR

NEW

CE

FLUKE. Calibration

- Measure and generate pressures from vacuum to 2 MPa (300 psi, 20 bar)
- Internal pump can generate vacuum to -80 kPa (-12 psi, -0.8 bar) or pressure to 2 MPa (300 psi, 20 bar)
- Supply pressure connection allowing the use of external gas supply up to 2 MPa (300 psi, 20 bar)
- Includes variable volume for fine adjustment of pressures
- Pressure measurement accuracy of 0.025 % reading ± 0.01 % FS
- Electrical measurement and 24 volt supply for close looped calibrations
- Measure or generate 4 to 20 mA
- Measure 0 to 30 V dc
- Powered by internal, rechargeable, high capacity NiMH battery or universal ac mains adapter
- Compatible with **Fluke 700P** Pressure Modules

The **3130** Portable Pneumatic Pressure Calibrator is ideal for calibrating pressure transmitters, transducers, gauges and similar devices. The **3130** contains everything you need to generate, control and measure pressure, as well as read the output of the device under test (DUT).

Mfg. Part No.	Range	Stock No.	Price Each
3130-G2M	Portable Pressure Calibrator with US, EUR, UK, and China/ Australia line cords (standard calibration)	**96W2007**	5700.00

(211401)

525B TEMPERATURE / PRESSURE CALIBRATOR

NEW

FLUKE. Calibration

- Simulates and measures all ANSI thermocouples, as well as L and U types, and provides cold junction compensation to enable calibration of a wide variety of thermocouple instrumentation.
- Direct input for storage of ITS-90 RTD constants.
- RTD source uncertainties to 0.03 °C.
- Direct measurement of all Fluke 700 Series and 525A-P Series Pressure Modules covering the most common pressure ranges from 1″ H20 to 10,000 PSI.
- Converts easily to any pressure unit directly from the front panel or through remote communications.
- Sources dc voltage and current for multifunction workload coverage, enabling calibration of data loggers, strip chart recorders, multimeters, and other industrial instruments.
- Supports automation using Fluke Calibration's MET/CAL® Plus Calibration Management Software or custom automated programs with standard RS-232-C and IEEE-488 interface.
- Eight user programmable setpoints allow quick recall of values for Zero, Span and linearity checks during calibration.
- Programmable setpoint dwell times for automated calibration and troubleshooting.

The Fluke Calibration **525B** Temperature/ Pressure Calibrator gives you a workhorse combination of high accuracy and broad functionality for temperature and pressure instrument calibration. Compact and economical, the **525B** has an interface for automated calibration, providing wide workload coverage in instrument shops and calibration labs, as well as in ATE applications. The **525B** is the most accurate Fluke Calibration temperature calibrator, sourcing and measuring a complete range of RTDs, thermocouples, and the YSI 400 thermistor. It also measures pressure covering common ranges from 1 inch (6900 Pa) of water up to 10,000 PSI (69 MPa) using the Fluke **700 Series** and **525A-P Series** Pressure Modules. Plus, the dc voltage and current specifications of the **525B** enable you to calibrate other process calibrators and a wide variety of other instruments with accuracy that rivals any calibrator in its price range.

UNIVERSAL DEVICE PROGRAMMERS

BK PRECISION

- Extensive device libraries
- Fast and high performance
- Powerful program software
- Supports Windows® XP/ Vista/7

844USB 866C

Universal device programmers are powerful, versatile, and simple to use. Theseprogrammers are the ideal solution for programming new chips as well as copying chips for backup or repair purposes. On-going program software updates extend device libraries and provide continuous improvements for both models **844USB** and **866C** programmers. Whether you are working with PLCC, SOIC, TSOP, DIP, TQFP, SSOP, PSOP or QFP packaging, an extensive line of socket adapters are available that will work in conjunction with our programmer; *go online or call.*

Mfg. Part No.	844USB	866C
Devices Supported	EPROM, EEPROM/Flash, Serial EPROM, Microcontroller, PLD and BPROM (BPROMs **866C**)	
Devices Libraries	>29000	>70000
Interface	USB 2.0 / USB 1.1 Compatible	
Programming Socket	DIL40 pin ZIF socket, ISP for in-circuit programming	DIL48 pin ZIF socket, ISP for in-circuit programming
Buffer Features	Erase, Random Data Fill, Fill Block, Copy Block, Move Block, Swap Block, Buffer Print, Find Text, Replace Text, GoTo Address, Checksum Calculator, 8 bit & 16 bit View Modes

HPRS SERIES RESISTANCE DECADE BOXES

IET

Features
- High Performance
- High Power

Specifications
- Resistance Range: 0.001Ω to 10 MΩ
- Power Rating: 225 W/decade, 250 W max.
- Voltage Rating: 1000V
- Accuracy: 0.5%

Mfg. Part No.	Resistance Max. (Ω)	Resolution (Ω)	No. of Decades	Accuracy	Stock No.	Price Each
HPRS-F-6-1	1M	1ohm	6	1	35K8002	1780.00

(103591)

GenRad 1433 HIGH PRECISION DECADE BOX

IET

Features
- Accepted Industry Standard
- Ranges from 0.01ohm to 111Megohm available
- 0.01% +/- 2milliohm Accuracy
- TC as low as 3ppm/°C
- Stability as high as 5ppm/yr
- May be used for RTD Simulation

1433 Series decade resistors are primarily intended for precision measurement applications where their excellent accuracy, stability, and low zero resistance are important. They are convenient resistance standards for checking the accuracy of resistance measuring devices and are used as components in dc and audio frequency impedance bridges. Many of the models can be used into the radio-frequency range.

Mfg. Part No.	Total Resistance (Ohms)	Resolution (Ohms)	Decades	Stock No.	Price Each
1433-10	1,111.10	0.01	5	71C9272	2295.00

OS SERIES DIGITAL RESISTANCE DECADE BOXES

IET

Features
- Uses Real Resistors
- Ideal For PT-100 and PT-1000 RTD Simulations
- Microprocessor Controlled
- Resistance Values Stored in Up to 10 mem locations
- Current Limiter to Prevent Possible Damage
- Automatic Residual Resistance w/ No Zero Subtraction Required

Specifications
- Power Rating: 1W
- Power Supply: 4 AA Batteries
- RS-232 Interface

Mfg. Part No.	Resistance Max. (MΩ)	Resolution (Ω)	Accuracy under 1kΩ (Ω)	Accuracy over 1kΩ (Ω)	Stock No.	Price Each

RESISTANCE DECADE BOX

TENMA®

- Pocket Sized
- Ideal for Service, Prototype and Experimental Use
- 1~11, 111, 110 Ohms, in One Ohm Increments
- 28 Individual Slide Switches

This useful tool may be set at any resistance value from 1 ~ 11,111,110Ω, in 1Ω increments. 28 individual slide switches allow the user to quickly and easily select resistor values. Wave soldered, two layer PC board utilizes high quality 1% tolerance 1/3W resistors. Maximum stray internal resistance is 1/3Ω. Color-coded binding posts provide resistor and ground connections. Passive device requires no power source. Dimensions: 5¾ (H) x 4½ (W) x 1¼" (D).

Mfg. Part No.	Description	Stock No.	Price Each
72-7270	Resistance Decade Box	22H6397	73.62

CAPACITANCE DECADE BOX

TENMA®

- Pocket Sized
- Ideal for Service, Prototype and Experimental Use
- 100pF~11,111μF, in 100pF Increments
- 20 Individual Slide Switches

This useful tool may be set at any non-polarized capacitor value from 100pF ~ 11,111μF, in 100pF increments. 20 individual slide switches allow the user to quickly and easily select capacitance values. Wave soldered, two-layer PC board utilizes high quality 5% tolerance mylar capacitors. Maximum internal residual capacitance is 50pF. Color-coded binding posts provide capacitor and ground connections. Passive device requires no power source. Dimensions: 5-3/4(H) x 4½ (W) x 1¼" (D).

Mfg. Part No.	Description	Stock No.	Price Each
72-7265	Capacitance Decade Box	22H6398	85.13

SWITCH PROBES

A Switch Probe is a spring contact probe and receptacle combination that is normally open, and after a designated travel the switch probe closes. The most common use for switch probes is in the cable harness testing industry. The switch probe is used to verify the correct location of a terminal in a connector while checking the retention force as well. Switch probes also verify the presence of nonconductive components such as caps for connectors or devices on a circuitboard. There are two separate current paths in a switch probe. From the plunger tip to the tail is normally open and closes only after the probe deflects to the designated travel. The second path, from the plunger tip to the outside of the receptacle, is always closed. **Sold in packages of 10.**

REPLACEABLE SPRING-LOADED POGO® CONTACTS AND SOCKETS

RoHS Compliant Available

OSTBY BARTON • PYLON
EVERETT CHARLES TECHNOLOGIES

Fig. 1 Point | Fig. 2 Radius | Fig. 3 Cup | Fig. 4 Waffle

Fig. 5 Pyramid | Fig. 6 Quadrifid | Fig. 7 Tulip | Fig. 8 Reduced Quadrifid

Pylon replaceable spring-loaded POGO® contacts provide high performance in testing and interconnect applications utilizing spring probe technology. Biasing-Ball construction maximizes wiping contact of plunger to inner diameter of probe body. Gold-plated contact body provides superior surface conditioning for consistently low contact resistance over life (typically 1,000,000 cycles). Gold-plated plunger and socket. Stroke full/working: 0.125″. **Sold in packages of 10.**

2510 SERIES HANDHELD DIGITAL STORAGE OSCILLOSCOPES

NEW

BK PRECISION

- 60 MHz (**2511/2515**) and 100 MHz (**2512/2516**) bandwidth
- 1 GSa/s sample rate
- Deep waveform memory up to 2 Mpts
- 2 fully isolated and floating 1,000 V CAT II, 600 V CAT III rated inputs (isolated models **2515** and **2516**)
- 300 V CAT II rated inputs (non-isolated models **2511** and **2512**)
- Built-in 6000-count DMM with dedicated terminals for current measurement
- Scope and meter trend plot functions for data logging
- Bright 5.7" color display
- Compact and lightweight – 3.4 lbs (1.54 kg)
- FFT including four additional math functions - Add, Subtract, Multiply, and Divide
- 32 automatic measurements
- USB host port for saving and recalling waveform setups, data, and screenshots on a USB flash drive
- Software provided for remote PC control
- Advanced tools include digital filters with adjustable limits, scope and waveform recorder mode
- Multi-language user interface
- Up to four hours of continuous battery operation

The **2510 Series** handheld digital storage oscilloscopes provide floating measurement and recorder capabilities with a built-in digital multimeter (DMM), all in one portable and lightweight package. These versatile 60 MHz and 100 MHz bandwidth scopes offer 1 GSa/s sample rates, 2 Mpts waveform memory, 32 automatic measurements, and multiple recording functions to capture transient or long-term signal behavior.

Mfg. Part No.	Bandwidth	Channels	Stock No.	Price Each
2511	60MHz	2 Non-Isolated	**08X6501**	935.00
2512	100MHz	2 Non-Isolated	**08X6502**	1125.00
2515	60MHz	2 Fully Isolated	**08X6503**	2165.00
2516	100MHz	2 Fully Isolated	**08X6504**	2395.00

2-CHANNEL DIGITAL OSCILLOSCOPES

EXTECH INSTRUMENTS
A FLIR COMPANY

Features:

- One-touch automatic setup optimizes the position, range, timebase, and triggering to assure a stable display of virtually any waveform
- Easy-to-use pop-up menu with built-in multi-language help system
- 22 Automatic Measurements
- Waveform Math: Add, Subtract, Multiply, and Divide
- Store and recall up to 50 waveform screens and setups
- Automatic cursor tracking measurements
- XY Mode
- Built-in FFT function converts a time-domain signal into its frequency components to measure harmonic content and distortion in systems
- Waveform Recorder to capture/replay input waveforms from CH1 and CH2 with a maximum record length of 1000 frames
- Pass-Fail function compares a stored waveform to an unknown input
- Average Mode for smoothing waveforms
- Square Wave Output (2V, 1kHz) for probe adjustment
- 6,000 count MultiMeter with analog bargraph
- USB interface and software for transferring waveforms and data
- Complete with two 1X/10X oscilloscope probes, test leads, Windows® compatible software and USB cable, universal AC adaptor/charger, and case

SCOPEMETER® 190 SERIES II HANDHELD OSCILLOSCOPES

IEC 1010-1 600V CAT

FLUKE®

2-Channel

4-Channel

- Up to four independent floating isolated inputs, up to 1000 V
- High-speed sampling: Up to 5 GS/sec on 2 channels simultaneously
- Deep memory: 10,000 points per trace waveform capture (scope mode)
- CAT III 1000 V/CAT IV 600 V safety rated for industrial environments
- Up to seven hours of battery operation using **BP291**
- Isolated USB host port for direct data storage to a USB memory device; USB device port for easy PC communication
- Easy access battery door for quick battery swaps in the field
- Compact and only 2.2 kg (4.8 lb)
- Security slot: lock down oscilloscope with Kensington® lock while unattended
- IP 51 rating, dust- and drip-proof
- Connect-and-View™ triggering for intelligent, automatic triggering on fast, slow and even complex signals
- Frequency Spectrum using FFT-analysis
- Automatic capture and REPLAY of 100 screens
- ScopeRecord™ Roll mode gives 30,000 points per input channel for low frequency signal analysis
- TrendPlot™ paperless recorder mode with deep memory for long-term automatic measurements
- 5,000 count DMM included in the 2-channel models

For the more demanding applications, **ScopeMeter® 190 Series II** high-performance oscilloscopes are ideal for engineers who need the capabilities of a high-performance oscilloscope in a hand-held, battery powered instrument. All models come complete with battery charger/line voltage adapter, battery pack, hard point test lead set, Getting-Started guide, and user manual on CD. In addition, models with **SCC290** kit includes: hardside carrying case, serial interface cable and FlukeView® ScopeMeter® software for Windows®. Available calibrated with printed certification and data report; *go online or call.*

HAND HELD OSCILLOSCOPES

FLUKE-120 SERIES THREE-IN-ONE SIMPLICITY SCOPEMETER® HAND-HELD OSCILLOSCOPES

FLUKE®

- Dual-Input 40MHz or 20MHz Digital Oscilloscope
- 5,000 Count True-RMS Digital Multimeters
- Dual-Channel TrendPlot™ Recorder
- Connect-and-View™ Trigger Simplicity for Hands-Off Operation
- 10:1 Voltage Probe Included for Reduced Circuit Loading
- Optically-Isolated RS-232 Interface
- Meets 600V CAT III Safety Standards (IEC 1010-1)
- UL listed, CSA certified
- Recommended accessories - C125 Case, TL220 Test Lead Set, i200s Current Clamp

Compact **FLUKE-120 series** Scopemeter® is the rugged solution for industrial troubleshooting and installation jobs in machinery, instrumentation, control and power systems. It's an integrated test tool with oscilloscope, paperless data recorder and DMM functions. You can use one and the same set to test leads for waveform display, multiple meter readings, capacitance and resistance measurements, and continuity checking. There is no need to swap leads.

Mfg. part no. FLUKE-125 has all of the features of **mfg. part no. FLUKE-124** plus network bus health test, power and harmonics measurement, RPM reading and low resistance readings.

U1600 SERIES HAND-HELD DIGITAL OSCILLOSCOPES

KEYSIGHT TECHNOLOGIES

U1610A

U1620A

- Three-in-one solution: dual channel oscilloscope, true RMS DMM, and real-time data logger
- Large 4.5" color LCD display
- Up to 40 MHz bandwidth with advanced triggering
- Up to 200 MSa/s sampling rate
- Up to 125 000 points recording length
- 22 automatic scope measurement functions
- Full remote control and data transfer via PC Link application software
- USB 2.0 full-speed interface connectivity

U1600 series hand-held digital oscilloscope has a 4.5-inch LCD color display, which helps to clearly distinguish waveforms between two channels. Users can use the Dual Waveform Math (DWM) and Fast Fourier Transform (FFT) functions in the U1604B model to perform quick waveform analysis in both time and frequency domains. Not only do these instruments provide fully featured oscilloscope functions, but also a 6,000- count true RMS DMM with real-time data logger. The DMM measurement functions include a voltmeter (for DC voltage, AC voltage and true RMS AC + DC voltage measurements), an ohmmeter (for 2-wire resistance, capacitance, diode and continuity tests), and an auxiliary meter (for temperature, ampere measurement)*.

THS3000 SERIES HANDHELD OSCILLOSCOPES

Tektronix

Key Performance Specifications
- 100MHz or 200MHz bandwidth models
- Max sample rates up to 5GS/s and 200ps resolution
- 4 fully isolated and floating channels
- 600VRMS CAT III, 1000VRMS CAT II rated inputs (BNC to earth ground)

Measurement and Analysis
- 21 automatic measurements
- Waveform math and FFT spectral analysis
- Volts, time, frequency, watts cursor measurements

Application Functions
- Measurement data logging with TrendPlot
- Waveform pass/fail limit testing
- Automatic 100 display screens recorder

Ease of Use Features
- 6" (153mm) bright color display
- USB device and host support
- 7 hours of continuous battery operation

The optional travel kit (**-TK suffix**) version includes a hard-sided carry case for your instrument, accessories, and storage space for a laptop PC.

COMPACT MULTIMETERS WITH MAGNE-GRIP™ HOLSTER AND VOLTECT™

AMPROBE®

Features:
- 2000-Count (**Mfg. part nos. 15XP-B** and **35XP-A**) 4000-Count Display (**35XP-A**)
- Voltect™, Non-Contact Voltage Detection, 70 to 600VAC, 50Hz ~ 60Hz
- AC/DC Voltage Measurements
- AC/DC Current Measurements
- Resistance, Continuity, Diode Test
- Capacitance, Temperature and Frequency (**Mfg. part no. 35XP-A**)
- Range Lock, Data Hold, Input Jack Warning Tone (**Mfg. part no. 35XP-A**)
- Logic Test (**Mfg. part no. 15XP-B**)
- One-Year Warranty

35XP-A

Includes MagneGrip™ Holster and Voltect™. The exclusive Magne-Grip™ holster wih magnetic hanging strap frees both your hands for work, and Voltect™ , a non-contact voltage dector, allows the quick detection of dangerous AC voltages without probing.

SPECIFICATIONS

Mfg. Part No.	5XP-A	15XP-B	35XP-A
DC Voltage	200mV - 1000V (5 Ranges)		400mV - 1000V (5 Ranges)

TEST BENCH® HIGH-PERFORMANCE DIGITAL MULTIMETERS

BK PRECISION

Features:
- Resistance measurement
- Frequency measurement
- Diode check
- Audible continuity
- All current ranges fused
- Auto power off
- Ruggedized case
- CATIII 1000 V, (all models)
- CATIV 600 V, (392 & 393)

389A

High performance and value priced, the **Test Bench® Series** offers more features for the dollar than other multimeters. In addition to measuring voltage and current, the meters also measure capacitance, frequency and temperature, and include component test, diode test and logic indicator capabilities. A double injection molded case provides improved grip and protection for the meters.

FLUKE CONNECT 3000 FC SERIES TEST TOOLS

FLUKE®

- Communicate with your iOS (4s and later) and Android™ (4.3 and up) devices with the new Fluke Connect mobile app
- Wireless technology allows connectivity between your phone, PC, and all Fluke Connect enabled test tools
- Let your team see what you see in an instant with ShareLive™ video call
- Save money and time by taking multiple measurements simultaneously
- Isolate intermittent events or record signal fluctuations without even being there using the log function on the modules
- View results on your computer with the PC Adapter
- Work with fewer interruptions by recording multiple sessions before downloading. Data is saved to a PC in .csv format (comma separated variable) file format for easy viewing at your convenience
- Capture readings at different intervals, with user-set recording intervals from one second to one hour
- Future proof your investment by adding functionality to the 3000 FC DMM when you need it
- Send and communicate test data to your manager and coworkers to assess abnormal system response in seconds
- Have all asset test results at your fingertips after downloading to your PC for future asset performance tracking and reliability programs
- See multiple measurements on one screen at one time (DMM and three modules, Ti200/300/400 and five modules)
- No more writing data down. Capture up to 65000 sets of min/max/avg readings over single or multiple logging sessions using the recording capability. Each reading and session is time stamped
- Avoid awkward or uncomfortable measurement positions. Set up the measurement once, step back and read it as many times as you want, when you want
- View up to 6 live readings at once on the Fluke Connect mobile app or a PC to get a complete understanding of the situation
- Easily see backlit displays in dark or dimly lit work environments
- Choose auto or manual ranging
- Use the optional TPak Magnetic Hanger for even more hands-free working
- Integrated holster protects the meters, while probe holders keep accessories organized
- Be in multiple places at once, reducing the risk of arc flash by separating yourself from hazardous measurement situations
- Fluke 3000 FC meets Measurement Category 1000 V CAT III and Category IV 600 V safety standards: AC Current Clamp module and AC/DC Current Clamp module 600 V CAT III; AC Voltage Module, DC Voltage Module, and iFlex Clamp Meters 600 V CAT IV/1000 CAT III

The new **Fluke Connect** system of test tools communicates with the new Fluke Connect mobile app on your Android™ or iOS smart device, allowing you to share live measurements, monitor readings from safe distances, and get your job done easier than ever before. The wireless digital multimeter functions as the mobile hub, displaying readings from up to three module tools simultaneously from up to 20 meters away. The **Fluke Connect** modules also give you the flexibility to build your wireless test tool system how you want when you want. **Now compatible with Fluke Connect™ Mobile App.**

FLUKE-233 TRUE-RMS, WIRELESS REMOTE DISPLAY DIGITAL MULTIMETER

Measures:
- True-rms AC voltage and current
- Measure up to 1000V AC and DC
- Measure up to 10A (20A for 30 seconds)
- 10,000µF capacitance range
- Frequency to 50kHz
- Built-in thermometer conveniently takes temperature readings without having to carry a separate instrument
- Resistance, continuity and diode test
- Min/Max and average recording to capture variations automatically

Made in the U.S.A. of U.S. and non U.S. parts

Features:
- Wireless technology allows display to be carried up to 30-ft. away from point of measurement
- Removable magnetic display can be conveniently mounted where it is easily seen
- No need to hold meter to make or read measurements, improving visual focus on probes
- Low-power 802.15.4 wireless technology does not interfere with measurement accuracy
- Use as a conventional multimeter when display is connected
- Auto power off maximizes battery life
- Radio transmitter automatically turns off when display is connected to meter
- Test continuity and diodes
- Easy-to-read display with large digits and bright backlight
- Battery life approximately 200-hours
- Three-year manufacturer's warranty
- Made in the U.S.A.
- CSA certified, CE compliant

FLUKE-233 TRUE-RMS, WIRELESS REMOTE DISPLAY DIGITAL MULTIMETER (CONT.)

SPECIFICATIONS AT A GLANCE

Mfg. Part No.	FLUKE-233
Counts:	6000
Voltage:	0.1mV to 1000V AC/DC
Current:	0.1mA to 10A AC/DC
Resistance:	0.1Ω to 40MΩ
Capacitance:	1nF to 9999µF
Frequency:	0.1Hz to 50kHz
Functions:	Min/Max/Average, Hold, Auto, Manual Range, Continuity/Diode
Temperature:	-40°C to +400°C
Power:	5 AA Batteries for 200-Hrs. of Battery Life
Wireless Frequency:	2.4GHz
Safety Rating:	CAT III 1000V, CAT IV 600V

FLUKE-233 true-rms, remote display digital multimeter allows the operator to be in two places at once. The removable display solves the problems of holding both the meter and the test leads to make a measurement. Designed for making measurements in hard-to-reach places, and in machines or panels that are physically separated from a limit switch or an isolator switch. Ideal for working in areas where the operator can't be close to the active measurement point, like clean-rooms or hazardous areas. Comes complete with test leads, alligator clips, temperature probe, batteries, user's manual and three-year manufacturer's warranty.

Mfg. Part No.	Description	Stock No.	Price Each

FLUKE-27-II AND FLUKE-28-II RUGGED, WATERPROOF, FULLY-SUBMERSIBLE DIGITAL MULTIMETERS

Measures:
- Measure up to 1000V AC and DC (Ex zones require reduced measurements)
- Measure up to 10A (**27-II & 28-II** 20A for 30 seconds)
- 10,000µF capacitance range
- Frequency to 200kHz
- Extended AC voltage bandwidth – 15Hz to 20khz (**28 II**),40 Hz to 30 kHz (**27 II**)
- Built-in thermometer conveniently takes temperature readings without having to carry a separate instrument (**28 II**)
- Resistance, continuity and diode test
- Min/Max/AVG and Peak recording to capture variations automatically

FLUKE-27-II

FLUKE-28-II

Made in the U.S.A. of U.S. and non U.S. parts

Features:
- IP67 waterproof and dustproof protection, impervious to the harsh environments
- Designed to withstand 3 meter drop
- Hi-resolution, easy-to-read display with large digits and bright, two-level backlight for increased visibility
- Backlit keypad buttons allows for easy visibility in low-lit areas
- Reversible holster for added protection when not in use
- Improved sleep mode for long battery life
- Relative mode to remove test lead resistance from low ohms measurements
- Auto and manual ranging for maximum flexibility
- MSHA approved for hazardous areas (**27-II & 28-II**)
- Limited lifetime manufacturer's warranty (**27-II & 28-II**)
- Made in the U.S.A.(**27-II & 28-II**)
- CSA certified, CE compliant

FLUKE-27-II AND FLUKE-28-II RUGGED, WATERPROOF, FULLY-SUBMERSIBLE DIGITAL MULTIMETERS (CONT.)

FLUKE-27-II and **FLUKE-28-II** fully-submersible digital multimeters are ruggedly built to work in the toughest environments. These two industrial multimeters define a new standard for operating in harsh conditions with the features and accuracy to troubleshoot most electrical problems. Both meters have IP-67 (waterproof and dustproof) rating, MSHA approvals, an extended operating temperature range of -15° C to + 55°C (5°F to 131°F) and 95% humidity, and are shock/vibration-resistant to withstand a 3-meter (10-ft.) drop to concrete. Both meters can withstand hazardous 8000 volt spikes caused by load switching and faults on industrial circuits and comply with second edition IEC and ANSI electrical safety standards. **Mfg. part no. FLUKE-28-II** also features hi-resolution 20,000 count display mode and true-rms AC voltage and current for accurate measurements on non linear signals. Plus it has a unique function for accurate voltage and frequency measurements on adjustable speed motor drives and other electrically noisy equipment. Both models come complete with holster, test leads, alligator clips, batteries and user's manual. **Mfg. part no. FLUKE-28-IIEx** can be used in IC (gas) Zone 1 and 2 and IIIC (dust) Zone 21 and 22 areas.

FLUKE 287, 289 DIGITAL DATA LOGGING MULTIMETERS

FLUKE®

Capabilites

- Measures up to 1000V AC and DC
- Current measurement 20A (30 seconds momentary; 10A continuous)
- 10,000µF capacitance range
- Frequency to 999.99kHz
- Build in thermometer -200°C to +1350°C (-328°F to +2462°F)
- Continuity/Conductance/Capacitance
- Resistance and continuity

FLUKE 289

Made in the U.S.A. of U.S. and non U.S. parts

Features:

- 50,000 count 1/4 VGA dot matrix display with white backlight
- True-RMS for accurate measurements on non-linear loads
- Trendcapture plots measurements as single line to help detect anomalies
- LoZ: low input impedance prevents false readings due to "ghost voltage" (Model 289)
- 50 Ohm Range for motor winding and low ohm measurements (Model 289)
- Soft keys and navigation control provide access to secondary functions
- Saved measurements allows the user to name and recall measurements made in the field
- Field upgradeable and expandable meter as new capabilities added
- Record events and trends, and display as a graph on the meter without downloading to a PC
- Multi lingual interface
- Internal memory allows stand-alone logging up to 200 hours
- Min/Max/Average with Time Stamp to record signal fluctuations
- Compatible with optional magnetic hanger (ToolPak) for hands free operation
- Optical RS232, USB communication interface
- CAT III 1000 V / CAT IV 600 V safety rated

ELECTRONICS AND INDUSTRIAL MASTER TEST LEAD KITS

FLUKE®

TLK287

TLK289

These master test lead kits are ideal for today's electrical and electronics testing and design. Perfect to complement **mfg. part nos. Fluke-287** and **Fluke-289** logging digital multimeters; *ordered separately on this page.*

ELECTRONICS MASTER TEST LEAD KIT

Mfg. part no. TLK287 Electronics Master test lead kit includes precision electronic probes with multiple spring-loaded sharp tips to maximize contact with SMD test points, micro-grabbers and leads to enable fine SMD testing plus mini-alligator clips, grabbers and probes for virtually every electronics need. All packaged in a handy storage case.

Mfg. Part No.	Description	Stock No.	Price Each
TLK287	Electronics Master Test Lead Kit	70M8699	142.46

INDUSTRIAL MASTER TEST LEAD KIT

Mfg. part no.TLK289 Industrial Master test lead kit contains SureGrip™ alligator clips, grabbers, hook clips and industrial test probes for dependable contact with a variety of test points. Also includes a temperature adapter with K-Type thermocouple for direct temperature measurement with user's own DMM's temperature measurement functions, a convenient, magnetic DMM hanger and a protective, softside carrying case.

Mfg. Part No.	Description	Stock No.	Price Each
TLK289	Industrial Master Test Lead Kit	70M8700	149.95

INDUSTRIAL MULTIMETER SERVICE COMBO KITS

FLUKE®

Fluke-289/IMSK Kit Includes:

- Fluke-289V advanced data logging multimeter
  Trendcapture: record, graph and review measurements in the field
  Precise performance: solve problems with speed and accuracy
  Large 50,000 count, 1/4 VGA display with white backlight
  Unique function for accurate voltage and frequency measurements
  LoZ volts low impedance voltage function
  50 ohm range
- Fluke-i400 AC 400A current clamp
  Companion to your DMM to measure up to 400A AC
  1mA/Amp output
  CAT IV 600V / CAT III 1000V safety rating
  Designed to offer maximum utility in a very compact shape
  22 of the most useful accessories
- TL71 Silicone test leads
- AC72 alligator clips
- Limited lifetime manufacturer's warranty on **Fluke-289** and 1-year manufacturer's warranty on accessories

Fluke-289/IMSK

Fluke-87V/IMSK Kit Includes:

- Fluke-87V multimeter with temperature frequency, capacitance 250µs peak min-max
  6000 counts, 3¾ digits
  Unique function for accurate voltage and frequency measurements on electrically noisy equipment
- Fluke-i400 AC 400A current clamp
  Companion to your DMM to measure up to 400A AC
  1mA/Amp output
  CAT IV 600V / CAT III 1000V safety rating
  Designed to offer maximum utility in a very compact shape
  22 of the most useful accessories
- 80BK-A thermocouple bead probe
- TL75 test leads
- AC72 alligator clips
- Limited lifetime manufacturer's warranty on **Fluke-87V** and 1-year manufacturer's warranty on accessories

FLUKE-87V/IMSK

Mfg. part no. FLUKE-289/IMSK combo kit combines the advanced data logging multimeter with Trendcapture with the i400 AC current clamp. Together they provide the ability to troubleshoot most industrial problems.

DIGITAL MULTIMETERS

MULTIMETER ACCESSORIES

FLUKE®

IV series accessories allows easy storage of multimeters. **TPAK** ToolPak™ allows you to hang your meter by a magnet or strap hanger. The magnet allows you to hang your multimeter just about anywhere. For use with **Fluke 233, 77 IV, 1587 & 1577, 280, 170, 110, 80 series IV & V, 70 series III, 20 series II**, DMMs, **780 series, 720 series, 710 series** calibrators, **50 series** digital therermometers and the **922** airflow meter.

Mfg. part no. FVF-SC2 FlukeView® Forms version 3.0 software allows you to document, store and analyze readings or measurements from **mfg. part nos. 280** and **180 series , 789, 1550B** or **1653** test tools. **Mfg. part no. FVF-SC4** version 4.0 software supports **8808A, 8845A** and **8846A** multimeters. Creation of custom forms, reports, graphs and tables. Includes interface cable, full user documentation and manual. **Mfg. part no. FVF-Basic** works with **mfg. part nos. 280** and **180 series, 789, 1550B** and **1653**.

Mfg. part no. BP189 high capacity battery pack for **Fluke-180 series** DMMs. **Mfg. part no. IR189USB** changes the RS232 serial cable in the **mfg. part no. FVF-SC2** to a USB cable.

FLUKE-80 SERIES V INDUSTRIAL MULTIMETERS

FLUKE®

Made in the U.S.A. of U.S. and non U.S. parts

IEC 1010-1 1000V CAT III

Capabilities:
- Measure up to 1000V AC and DC
- Measure up to 10A (20A for 30 seconds)
- 10,000uF Capacitance Range
- Frequency to 200kHz and % Duty Cycle
- True-rms AC Voltage and Current for Accurate Measurements on Non Linear Signals (**FLUKE-87-5**)
- Built-in Thermometer (**FLUKE-87-5**); Thermocouple Included
- Peak Capture to Record Transients as Fast as 250 µs (**FLUKE-87-5**)
- 4½ Digit Mode (**FLUKE-87-5**)

Features:
- Unique Function for Accurate Voltage and Frequency Measurements on Adjustable Speed Motor Drives and Other Electrically Noisy Equipment (**FLUKE-87-V**)
- Optional Magnetic Hanger for Hands-Free Setup and Viewing
- Large Display Digits and 2-Level Bright White Backlight for Increased Visibility
- Withstands Hazardous 8,000 Volt Spikes Caused by Load Switching and Faults on Industrial Circuits
- Complies with Second Edition IEC and ANSI Electrical Safety Standards
- Improved Sleep Mode for Long Battery Life
- Relative Mode to Remove Test Lead Resistance for Low Ohms Measurements
- Auto and Manual Ranging for Maximum Flexibility
- Meets 1000V CAT III and 600V CAT IV Safety Standards (IEC 1010-1)
- UL listed, CSA certified, CE compliant, VDE approved, TUV approved
- Recommended accessories: C35 Case, TLK-220 Test Lead Set, i400 Current Clamp

FLUKE-80 series V has improved measurement functions, troubleshooting features, resolution and accuracy to solve more problems in electronics, plant automation, power distribution, and electro-mechanical equipment.

FLUKE-170 SERIES DIGITAL MULTIMETERS

FLUKE®

FLUKE-179

IEC 1010-1 1000V CAT III IEC 1010-1 600V CAT IV

Made in the U.S.A. of U.S. and non U.S. parts

- Wide 1000 V measurement range
- True-rms voltage and current measurements
- 6000 count resolution
- Digital display with analog bargraph and backlight (177, 179)
- Manual and automatic ranging
- Display Hold and Auto Hold
- Frequency and capacitance measurements
- Resistance, continuity and diode measurements
- Temperature measurements (179)
- Min/Max/Avg recording
- Easy battery exchange without opening the case
- Closed case calibration through front panel
- Ergonomic case with integrated protective holster
- EN61010-1 CAT III 1000 V, CAT IV 600 V
- Recommended accessories: C25 Case, TL71 Test Lead Kit, i410 Current Clamp

AC amps: 3mA to 10.00A (20A overload for 30 seconds). DC amps: 0.01mA to 10.00A (20A overload for 30 seconds). AC voltage: 30mV to 1000V. DC voltage: 0.1mV to 1000V. Resistance: 0.1Ω to 50.00MΩ. Capacitance: 1nF to 9999µF. Frequency voltage input: 2Hz to 100kHz; current input: 2Hz to 30kHz. Temperature range: -40°F to +752°F (-40°C to +400°C). Includes test leads, battery and manual. **FLUKE-179** also includes 80BK-A temperature probe. Certificate of calibration available on all models, *go online or call*.

ELECTRONICS COMBO KIT

FLUKE®

Combo Kit Includes:
- Fluke 179 True-rms Digital Multimeter with Backlight
- Fluke TL224 Silicone Test Leads
- Fluke TL910 Electronic Fine Point Test Probes with Replacement Tips
- Fluke AC280 Hook Clips
- Fluke 80BK-A Integrated Temperature Probe
- Fluke C35 lightweight soft case to provide optimal protection and storage
- TPAK One Piece Magnetic Hanger

Full-featured DMM with advanced electronic troubleshooting functions plus probes and hooks for delicate electronic measurements all packed in a sleek, durable carrying case. Designed to meet the demands of the electronics professional.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-179/EDA2	Electronics Combo Kit	31M7868	349.95

(74088)

ELECTRICIAN'S COMBO KIT

FLUKE®

Combo Kit Includes:
- Fluke 179 True-rms Digital Multimeter with Backlight
- Fluke 1AC-II Non-Contact Voltage Tester
- Fluke TL224 Silicone Test Leads
- Fluke TP220 Industrial Test Probes
- Fluke AC220 Heavy Duty Alligator Clips
- Fluke 80BK-A Integrated Temperature Probe
- Fluke 35 Soft Carrying Case
- TPAK One Piece Magnetic Hanger

Multimeter and accessory combination designed specifically for today's electrician. Rugged 1000V CAT III meter, and industrial strength test lead set, and a non-contact voltage detector all in a durable carrying case.

FLUKE-116/62MAX+ TECHNICIAN'S COMBO KIT

Fluke116 Digital Multimeter
- Fluke 116 HVAC Multimeter with Temperature and Microamps
- TL175 Hard Point Test Lead Set
- TPak ToolPak Magnetic Meter Hanging Strap
- Flexible Cuff Pipe Clamp Thermocouple
- 80BK Integrated Temperature Probe
- 80AK-A Thermocouple Adapter
- C115 Deluxe Soft Carrying Case with Shoulder Strap

Fluke 62 MAX+ Infrared Thermometer
- Dust and water-resistant: IP54 rated
- Rugged: 3-meter (9.8-foot) drop tested
- Ergonomically designed: Completely redesigned for a more natural hand fit
- Distance to spot: 12:1
- Dual lasers: Identifies area to be measured
- Large, backlit display: Makes data easier to read, even in dark areas

116 62 MAX+

For the complete solution to HVAC troubleshooting the extra value-packed HVAC Technician's Combo Kit, provides the ability to troubleshoot and solve problems more efficiently by providing all the needed accessories an HVAC professional would need in a compact carry case.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-116/62 MAX+	True-RMS Digital Multimeter/Infrared Thermometer Combo Kit	66W5427	274.95

INDUSTRIAL MULTIMETER AND INFRARED THERMOMETER COMBO KIT

Combo Kit Includes:
- Fluke 179 Features - True-Rms Digital Multimeter With Backlight
- Fluke 61 - Infrared Thermometer
- 80BK-A Thermocouple
- C800 Carry Case

Created for industrial electricians, HVAC and facility maintenance. Rugged true-rms multimeter with a built-in thermometer to troubleshoot electrical and electromechanical problems plus a laser guided, non-contact infrared thermometer for measuring rotating or energized equipment. Includes temperature probe and a durable carrying case.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-179/61 KIT	Industrial Multimeter and IR Thermometer Combo Kit	02J7893	399.95

(79145)

87V/E INDUSTRIAL COMBO KIT

Kit Contents:
- 87V Industrial Multimeter
- 1.5m Silicone Leads Resist Heat
- Removable Probes with 4mm of Exposed Metal for Use on Industrial Circuits
- Retractable Long Reach Alligator Clips
- Magnetic Hanger to Position and Hold Meter to Steel Surfaces
- K-Type Temperature Probe
- Lightweight soft case to provide optimal protection and storage
- Kit Offers a Solution for Maximum Productivity of Industrial Electricians

Mfg. Part No.	Description	Stock No.	Price Each

CALIBRATION SERVICES

From pre-calibration to re-calibration, we bring you competitive pricing with quick delivery.

(207664)

FLUKE 88 SERIES V DELUXE AUTOMOTIVE MULTIMETER

- 0.1% DC accuracy
- Current measurements up to 10A, 20A for up to 30 sec
- Millisecond pulse width measurements for fuel injectors
- Optional magnetic hanger allows meter to attach to the vehicle
- Min/Max/Avg recording with Min/Max Alert to capture variations automatically
- Peak Min/Max to record transients as fast as 250µs
- Relative mode to remove test lead resistance from low ohms measurements
- Auto and manual ranging
- Autohold™ to capture stable readings with only one touch of the leads
- Large display digits and two-level bright white backlight
- Analog bargraph to track changing or unstable signals
- Input Alert provides audible warning against wrong use of input jacks
- Access door for fast battery changes without opening up the case
- "Classic" design that fits your hand with new removable holster, built-in test lead and probe storage
- 10Mohm input impedance won't damage computer circuits
- Limited lifetime warranty

Kit

Kit Includes:
- 88V Multimeter
- TL224 silicone test leads
- AC285 long reach alligator clips
- TP220 test probes
- RPM 80 inductive RPM
- TPAK ToolPak™ Magnetic Meter Hanging Kit
- 80BK temperature probe two automotive backprobe pins insulation piercing probe
- C800 durable carrying case holster
- 9V battery (installed)
- Getting Started Manual
- CD with detailed manual

FLUKE INFRARED THERMOMETER KITS

Fluke 62MAX+ Infrared Thermometer
- Dust and water-resistant: IP54 rated
- Rugged: 3-meter (9.8-foot) drop tested
- Ergonomically designed: Completely redesigned for a more natural hand fit
- Distance to spot: 12:1
- Dual lasers: Identifies area to be measured
- Large, backlit display: Makes data easier to read, even in dark areas

Fluke T+PRO Voltage and Continuity Tester
- 3 forms of ac/dc voltage detection: light, sound, and vibration
- Extra heavy-duty, replaceable test leads
- CAT IV 600, CAT III 1000 V safety rated
- Continuity beeper

FL62MAX+/323/1AC

Fluke 1AC VoltAlert™ Voltage Detector
- Fits in a shirt pocket for convenience
- All outer surfaces are non-conductive for safety
- Detects voltage without metallic contact
- Manufactured, printed and packaged in the US
- Quickly locates the hot, neutral and ground terminals in any receptacle

Fluke 323 Clamp Meter
- 400 A ac current measurement
- 600 V ac and dc voltage measurement
- True-rms ac voltage and current for accurate measurements on non-linear signals
- Resistance measurement up to 40 kΩ with continuity detection
- Slim, ergonomic design
- CAT IV 300V/CAT III 600 V safety rating

FLUKE-414D/62MAX+

Fluke 414D Laser Distance Meter
- The most advanced laser technology for distance measurement
- Measures up to 50 m (165 ft) with accuracy of 2 mm (0.08 in)
- Quick calculation of area (square feet/meters) and volume
- Pythagoras function indirectly measures height via two other measurements
- Stores up to five measurement results
- Battery life of 3000 measurements with automatic shut-off feature

DIGITAL MULTIMETERS

FLUKE 179 MULTIMETER AND TOOLPAK™ COMBO KIT

FLUKE ®

Combo Kit Includes:
- Fluke 179 Meter (w/ Temperature)
- One Piece Magnatic Hanging Strap

FLUKE 179 multimeter includes (TPak) one piece magnetic hanger for hands free viewing. The strong magnet accessory will attach to an electrical panel, a metal door jamb or any other ferrous-type metal.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-179/TPAK	True-RMS Digital Multimeter w/Magnetic Hanging Kit	74C6496	324.95

(74091)

FLUKE 110 SERIES DIGITAL MULTIMETERS

FLUKE ®

FLUKE-117

- VoltAlert™ technology non-contact voltage detection
- AutoVolt automatic AC/DC voltage selection
- LoZ: low input impedance prevents false readings due to "ghost voltage"
- Large display and white LED backlight to work in poorly lit areas more effectively
- CAT III 600V safety rated
- UL listed, CSA certified, CE compliant, VDE approved, TUV approved

110 series digital multimeters have features and functions professional electricians need to get their job done. **Mfg. part no. Fluke-117** is the ideal DMM for demanding settings like commercial buildings, hospitals and schools. The compact design makes it easy to hold and use one-handed. **Mfg. part no. Fluke-116** has a built-in thermometer and is specialized for HVAC applications including temperature and microamp measurements to quickly troubleshoot problems with HVAC equipment and flame sensors. **Mfg. part no. Fluke-115** is designed for a wide variety of electrical and electronic testing applications. **Mfg. part no. Fluke-113** is simple-to-use and has the features needed to repair most electrical problems Using the Fluke VCHEK™ LoZ low impedance measurement function, users can simultaneously test for voltage or continuity. All models compatible with **mfg. part no. TPAK** ToolPak™ magnetic hanger for hands-free operation; ordered separately below. These DMMs include **mfg. part no. TL75** hard point test lead set, registration and manual.

TLK-220 US INDUSTRIAL TEST LEAD KIT

FLUKE ®

Included With Set:
- AC220 Plunger Style Alligator Clips
- AC285 Large Jaw Alligator Clips
- TP220 Sharp Test Probes
- TL224 Right-to-Straight Test Leads
- Zippered Vinyl Carrying Case With Moveable Divider

Special value SureGrip Set for industrial applications. Includes two sizes of alligator clips and sharp test probes for reliable connections, test leads and a roomy carrying case to hold and protect your meter and all your accessories. All 1000V CAT III, 600V CAT IV related.

AC/DC CURRENT CLAMP KITS

FLUKE ®

- For use with your Fluke DMM to extend the current ranges
- Choice of noncalibrated or calibrated models

These special-value current clamp kits are ideal for electrical professionals looking to add on DC and AC current measurement capabilities to their DMM. Each kit includes a zippered, vinyl carry case with moveable divider. Case is roomy enough to hold and protect current clamp (included) along with your own digital multimeter and accessories

NON-CALIBRATED KITS

METER AND ACCESSORY CASES

Made in the U.S.A. of U.S. and non U.S. parts

FLUKE®

CXT80 C510 C550 C1600

CXT80, 170, 280 EXTREME CASES
- Unbreakable, watertight, airtight, dustproof, chemical resistant and corrosion proof
- Buoyancy allows case to float in salt water with 7.94 lb load
- Includes an automatic purge valve for quick equalization
- Features an exclusive neoprene O-ring and ABS latches for excellent seal
- **CXT80**: for use with with the following test tools: multimeters: 27, 83 V, 85 V, 87 V, 187, 189, process tools: 724, 725, 726, 789
- **CXT170**: for use with with the following test tools: air quality: 922, multimeters: 77 III, 77 IV, 114, 115, 116, 117, 177, 179, process tools 712, 714, 715, 717, 718, 787
- **CXT280**: for use with with the following test tools: multimeters: 287, 289, earth ground testers: 1621

U1230 SERIES HANDHELD DIGITAL MULTIMETERS

KEYSIGHT TECHNOLOGIES

U1230 U1177A

- True RMS, 6000 count display
- Built-in LED flashlight to illuminate test area
- Flashing backlight as additional visual alert during continuity tests in noisy environments
- Vsense to perform non-contact voltage detection (**mfg. part no. U1233A**)
- Data logging capability (stores up to 10 readings)
- IR-to-USB connectivity to transfer data to PC for record

Built for handheld users working in a poorly lit environment, the **U1230 Series** allows you to single-handedly illuminate your test area while making measurements with its easily activated built-in flashlight. Its ergonomic shape fits your hand, while the easily accessible rotary dial allows selection of measurement functions. The **U1230 Series** is built for continuity detection in dark and noisy environments. Its audible beep and flashing backlight display provides increased visual and audio alert to indicate continuity. The Vsense, a unique feature found in the **U1233A** model performs non-contact voltage detection. It delivers more safety while making measurements in dangerous working environments by avoiding any contact with hot or live wires. Upon detection of voltage, it produces a unique combination of beeping alert and blinking LED light to make measurements more efficiently – especially in a dark or noisy environment.

	U1231A	U1232A	U1233A
Voltage Measuring Range (AC/DC):	600mV to 600V

DIGITAL MULTIMETERS

U1240 SERIES HAND-HELD DIGITAL MULTIMETERS

KEYSIGHT TECHNOLOGIES

Both Models:
- 10,000 count display
- 0.09% basic DCV accuracy
- True RMS AC measurement
- Built-in switch counter, harmonic ratio
- Basic functions: ACV, DCV, ACI, DCI, resistance, frequency, diode, continuity test
- Advanced functions: capacitance, temperature, MINMAX recording
- Adjustable backlight with 2 intensity levels

Mfg. Part No. U1242B Only:
- Manual data logging
- Dual/differential temperatures capabilities

U1240 Series handheld digital multimeters enable you to check more with wider measurement ranges. They feature true RMS readings on their 10,000-count displays. The adjustable backlighting allows you to complete your jobs even in subdued lighting conditions, or to simply prolong battery life. Your maintenance tasks are greatly simplified due to the built-in switch counter, harmonic ratio, dual and differential temperature capabilities, with just a press of the button. CAT III 1000 V and CAT IV 600 V safety protection and are certified to CE and CSA standards. Both DMM models come complete with test probe leads (19mm and 4mm tips), quick-start guide, certificate of calibration, and four 1.5V AAA alkaline batteries.

DIGITAL MULTIMETERS

Mfg. Part No.	Description	Stock No.	Price Each
U1241B	Hand-held Digital Multimeter	55R2335	206.00
U1242B	Hand-held Digital Multimeter with Data Logging	55R2336	226.00

ACCESSORIES

Mfg. part no. U1181A immersion probe measures temperature of food, oil, and other liquids within -50° to +700° range. **Mfg. part no. U1182A** industrial surface probe measures still surface temperature within -50° to +400° range. **Mfg. part no. U1183A** air probe measures dryer, transport pipe and surrounding air temperature within -50° to +800° range. **Mfg. part no. U1583A** AC current clamp extends current measurement range up to 400A.

Mfg. Part No.	Description	Stock No.	Price Each
U1162A	Alligator Clip	53M4043	10.49
U1163A	SMT Grabber	53M4044	10.49
U1164A	Fine Tip Test Probe	53M4045	10.49
U1169A	Test Probe Leads (with 19-mm tips and 4-mm tips)	15R4086	31.34
U1171A	Magnetic Hanging Kit	09P8809	20.88
U1181A	Immersion Temperature Probe	53M4046	61.91
U1182A	Surface Temperature Probe	53M4047	188.00
U1183A	Air Temperature Probe	53M4048	72.41
U1184A	Temperature Probe Adapter	53M4049	10.49
U1186A	Thermocouple (K-type, 1m) and Adaptor	53M4051	20.88
U1187A	Thermocouple (K-type, 3.5m) and Adaptor	77R3366	31.29
U1583B	AC Current Clamp, Dual Range 40A and 400A	55R2341	146.00

(211850)

U1250 SERIES HAND-HELD DIGITAL MULTIMETERS

KEYSIGHT TECHNOLOGIES

All Models:
- 50,000-count dual display
- Up to 0.025% basic DCV accuracy
- Manual and automated (interval) data logging; internally to DMM and externally to PC
- CAT III 1000 V and CAT IV 600 V safety protection

Mfg. Part Nos. U1252B & U1253B:
- True-RMS AC and AC+DC measurements
- K-type and J-type temperature measurements
- Built-in 20MHz frequency counter
- Built-in programmable square-wave generator

Mfg. Part No. U1253B Only:
- Superior contrast from organic LED (OLED) display

U1251B

U1253B

U1250 Series DMM's are housed in robust overmold enclosures and operate over a wide temperature range of –20°C to +55°C. **Mfg. part no. U1251B** expands your capabilities beyond typical DMM measurements to include data logging. Record readings manually or at specified intervals when you connect to a PC with the optional IR-to-USB cable. **Mfg. part no. U1252B** starts with the same foundation, and then adds a 20- MHz frequency counter and programmable square-wave generator to perform more tests conveniently with one tool. Offering the same functionality as the **U1252B**, the **U1253B** provides organic LED display for crystal-clear viewing indoors, even in dark or off-angle situations. Each DMM also includes a 30 kA high energy fuse to further protect you against violent fuse failures during high-current measurements.

Mfg. Part No.	Description	Stock No.	Price Each
U1251B	Data Logging Digital Multimeter	55R2337	390.00
U1252B	Data Logging Digital Multimeter w/ Frequency Counter and Square Wave Output	55R2338	419.00
U1253B	Data Logging Digital Multimeter w/OLED Display	55R2339	460.00

ACCESSORIES

Mfg. part no. U1161A extended test lead kit includes: extended test leads and extension test probes both rated 1000V/15A, medium alligator clips and 4mm banana plugs both rated 600V/10A. **Mfg. part no. U1180A** temperature probe thermocouple accessory kit (limits the temperature range to -20° to +200°C) includes: non-compensation transfer adapter, yellow K-type tip thermocouple and black J-type tip thermocouple.

U1270 SERIES INDUSTRIAL HANDHELD DIGITAL MULTIMETERS

NEW

KEYSIGHT TECHNOLOGIES

- 30,000 count resolution with 0.05% DCV accuracy
- Fuse accessible through battery door
- Practical features to increase efficiency
- LPF, ZLow, Peak Detect, Qik-V and Smart Ω
- Flashing display alert and loud beep for continuity checks
- IR-to-USB connectivity for unlimited data logging
- Water and dust resistance IP54 compliance
- Superior contrast from OLED display (U1273A) with 160 degrees viewing angle
- U1273AX operates in below freezing temps down to –40°C

U1271A / U1272A

U1273A / U1273AX

U1270 series handheld DMM's are water and dust resistant, which provide better protection against the harsh working conditions. The DMMs' ergonomic design fit better in hands, ideal for engineers or technicians on the move.

PROFESSIONAL DIGITAL MULTIMETERS

NEW TENMA®

- Auto ranging
- Features Continuity, Duty Cycle, and Diode testing
- Backlit LCD (**72-10405** and **72-10410**)
- Low battery indication
- USB connectivity
- Analog bar graph
- Data hold
- Input protection
- Relative mode
- Auto power off
- Max/Min value (**72-10405** and **72-10410**)
- Peak value (**72-10415**)
- Includes battery, test leads, multi-purpose socket, USB interface cable, PC software CD
- Temperature probe included with **72-10405** only

This meter is feature rich, impeccably accurate, and competitively priced to meet the needs of any technician or tradesman.

POCKET DIGITAL MULTIMETERS

NEW TENMA®

- Auto ranging
- 3999 count display
- Data hold
- Auto power off
- Low battery indicator
- Relative mode
- Features duty cycle, diode, and continuity testing

Pocket-sized multimeter is rich in features, and comes in a self-contained folding case.

MINI DIGITAL MULTIMETER

NEW TENMA®

- Test diodes and continuity
- 1999 count display
- Low battery indicator
- Data hold
- Backlit LCD
- Includes battery, test leads, holster, and temperature probe

Small digital multimeter fits easily in your palm, desk drawer, tool box, or anywhere you need to keep a DMM. Measures AC/DC voltage, DC current, Resistance, and temperature.

72-10405

SPECIFICATIONS	
DC Voltage	200mV/2000mV/20V/200V/500V
AC Voltage	200V/500V
DC Current	2000mA/20mA/200mA/10A

LARGE DISPLAY DIGITAL MULTIMETERS

TENMA® CE

- Diode test, continuity buzzer, data hold
- 59 x 25mm backlit LCD display
- Sleep mode, low battery display
- DC input impedance approx. 10MΩ
- Max display count 1999
- Include test leads, manual, test clips

New digital multimeters' advanced designs use high-resolution A/D converters and microcontrollers. Performance, versatility, and safety are optimized for the most demanding applications.

Mfg. Part No.	72-7720	72-7725
Ranging	Auto	Manual

HANDHELD DIGITAL MULTIMETER WITH TRANSISTOR TEST AND TEMPERATURE

NEW TENMA®

- Manual ranging
- Easy to read 1999 count LCD display
- Includes Diode, Transistor, and continuity testing
- Low battery indicator
- Data hold
- Includes battery, test leads, multi-purpose socket, and temperature probe

A reliable, no-nonsense multimeter in a palm-sized design. Measures AC/DC voltage, DC current, resistance, and temperature.

AC VOLTAGE DETECTORS

AMPROBE®

TIC 300 PRO TIC 410A

Mfg. Part No. TIC 300 PRO Features:
- Lower voltage setting for checking voltage presence in breaker panels, breakers, power outlets and wiring
- Verifies presence of voltage from 30VAC to 122,000VAC (122kV)
- Non-contact AC voltage detection
- Visual and audible voltage indication
- Self-test verifies that tester works properly
- Ergonomic design with a convenient handle
- Drop-proof to 6ft.

Mfg. Part No. TIC 410A Features:
- Up to 121kV
- 48" long

Mfg. part no. TIC 300 PRO warns against dangerous voltages in low and medium voltage applications up to 122kV without contacting the energized conductor. Rugged and reliable utility tool for checking transmission lines, power distribution equipment, down power lines, fuses, and load break connectors. Used with hot stick **mfg. part no.Tic 410A** for voltage higher than 1500VAC.

Mfg. Part No.	Description	Stock No.	Price Each
TIC 300 PRO	High Energy Tic Tracer - Non Contact AC Voltage Detector	54R8818	249.95
TIC 410A	Hot Stick	72M4735	149.95

AC CIRCUIT LOAD TESTER

EXTECH INSTRUMENTS A FLIR COMPANY

AC Load Tester
- Selectable loads of 12, 15 and 20 Amps
- Measures loaded and unloaded AC line voltage
- Calculates and displays % voltage drop and line impedance
- Displays peak line voltage and frequency

Outlet Tester Functions
- Neutral to ground voltage
- Hot, neutral and ground impedance
- GFCI trip time
- GFCI trip current
- Open or reversed wiring

Complete with AC test cord (standard North American 3-prong plug).

Mfg. Part No.	Voltage (VAC)	Stock No.	Price Each
CT70	90 to 240V	41T2014	239.99

T+ AND T+PRO ELECTRICAL TESTERS

FLUKE®

T+PRO T+PRO-1AC KIT

- Uses 3 forms of AC/DC voltage detection: light, sound and vibration
- AC/DC voltage: 12 to 600V on LED bar, 10.2 to 600V on LCD (**T+PRO** only)
- Replaceable, heavy-duty test leads
- Continuity beeper
- Bright LED flashlight
- GFCI trip
- On/Off switchable beeper
- Compliant with NFPA 70E recommendations
- UL listed, CSA certified, CE compliant

Safer than traditional solenoid testers, T+ and T+PRO electrical testers use all three voltage detection methods: light, sound and vibration, to work more efficiently in noisy environments, dimly lit areas or tight spaces. T+PRO is the perfect choice for demanding commercial and industrial applications, with its voltage and continuity measurement, a Rotary Field indicator, resistance to 9.99kΩ and a LCD digital display with 0.1V resolution and "hold" feature for easier viewing in hard-to-test areas. Basic electrical tester, T+ is ideal for residential electricians and HVAC techs who need a durable, reliable tool for testing voltage and continuity. All models include test leads and probes, test lead strap for managing leads, two AAA batteries and 2-year manufacturer's warranty. **Mfg. part no. T+PRO-1AC KIT** also includes **mfg. part no. FLUKE-1AC-II** VoltAlert™ pocket-sized, non-contact AC voltage detector. **Mfg. part no. T5-Kit** is a starter kit for use with the Fluke T5 electrical tester. Includes **mfg. part no. TP220** SureGrip test probes with removable comfort grips, **mfg. part no. AC285** SureGrip large jaw alligator clips and **mfg. part no. C33** zippered soft case. SureGrip™ alligator clips are designed to improve steadiness in slippery hands. Blunt tip grabs round screw heads up to 9.5 mm. Includes one pair (red, black) of small, insulated, nickel plated jaws. **Mfg. part no. TP1** flat blade design holds securely in blade type electrical wall sockets. Includes one pair (red, black) of slender probe bodies.

VOLTALERT NON-CONTACT VOLTAGE DETECTORS

FLUKE®

TÜV Rheinland

FLK2AC/90-1000V

1AC-II/1LAC-II Voltage Detectors:
- Continually tests its battery and its circuit integrity using Voltbeat™ technology
- Voltage detection of 90 to 1000 VAC90 V to 1000 V AC or 200 V to 1000 V AC depending on model

All Voltage Detectors:
- Category IV – 1000 V overvoltage rated
- Rugged, reliable, and have two-year warranty
- 2 AAA batteries (included)

AC voltage detectors, with VoltAlert™ non-contact voltage detection, are easy to use - just touch the tip to a terminal strip, outlet, or cord. When tip glows red and unit beeps (1AC-II only), there's voltage in the line. Allow users to quickly test for energized circuits and defective grounds on the factory floor, in the shop, or at home.

NON-CONTACT AC VOLTAGE DETECTOR

FLUKE®

- Built-in flashlight
- Detector glows blue when AC voltage is present
- Detector glows red when it is at the source
- 40V to 300VAC

Mfg. part no. LVD1 non-contact AC voltage detector and LED flashlight is combined in one convenient, compact design. With exclusive dual-sensitivity. The voltage detector glows blue when it's 1-5" or 2.5-12.5cm away from the source AC voltage, and glows red when it's at the source. Detects voltages from 40 V AC to 300 V AC. Voltage detector glows blue 50 Hz - 60 Hz or 2.5 - 38 cm (1 - 5") away from source. Operating temperature 0 °C to 50 °C. Ultra-bright white LED with 100,000 hour bulb life. AAA battery included.

Mfg. Part No.	Description	Stock No.	Price Each
LVD1	Volt Light	11J3453	24.95

(84888)

LVD2 VOLT LIGHT NON-CONTACT AC VOLTAGE DETECTOR AND LED FLASHLIGHT

FLUKE®

- Dual Sensitivity
- Ultra-bright LED light with 100,000 hour-life
- Detects from 90 to 600V AC

Mfg. part no. LVD2 non-contact AC voltage detector and LED flashlight are combined into one easy-to-use, pen-style design. Suitable for commercial and industrial applications. Dual levels of detection — blue indicates proximity (1" to 5") to AC voltage source and red indicates when at the source. CAT IV 600V rated. Includes one AAA battery.

Mfg. Part No.	Description	Stock No.	Price Each
LVD2	Volt Light	30M9568	39.95

(90367)

FLUKE-T5-600 AND -1000 VOLTAGE/ CONTINUITY/CURRENT TESTERS

FLUKE®

- Compact Design with Probe Storage
- Automatically Measures Volts AC and Volts DC with Precise Digital Resolution
- Resistance and Continuity Beeper
- Easy and Accurate OpenJaw™ Current Measurement to 100 A ac
- Available in 600V and 1000V Models
- **Mfg. part no. T5-600** meets 600 V CAT III safety standards (IEC 1010-1)
- **Mfg. part no. T5-1000** meets 1000 V CAT III, 600 V CAT IV safety standards (IEC 1010-1)
- UL listed, CSA certified, CE compliant

T5-1000 FLUKE-62/T+PRO/1AC

Troubleshoots a wider range of problems safer and faster than a traditional solenoid tester. **T5 series** voltage/continuity/current testers provide a variety of measurements in one compact testing unit. Measure up to 100A AC current and 1000 ohm resistance. **Mfg. part no. T5-600** measures AC or DC voltage to 600V. **Mfg. part no. T5-1000** measures AC or DC voltage to 1000V. Includes 4mm detachable probes, instruction sheet, and 2-year manufacturer's warranty. *Order leather carrying case*, holster, or starter kit , *that attaches to a belt and neatly stows test leads, separately below.* **Mfg. part no. FLUKE-62MAX+/T+PRO/1AC** electrical/HVAC combo kit includes compact Fluke 62MAX+ IR thermometer teamed with the full featured T+PRO voltage tester and the easy-to-use 1-AC-II non-contact voltage detector. Use the IR thermometer to test for overheating in electrical devices, then use the electrical test tools to find more about the problem. Comes complete with soft case.

FLUKE-T5-600 AND -1000 VOLTAGE/CONTINUITY/CURRENT TESTERS (CONT.)

ACCESSORIES

Fluke 62MAX+ Mini Infrared Thermometer
- Dust and water-resistant: IP54 rated
- Rugged: 3-meter (9.8-foot) drop tested
- Ergonomically designed: Completely redesigned for a more natural hand fit
- Distance to spot: 12:1
- Dual lasers: Identifies area to be measured
- Large, backlit display: Makes data easier to read, even in dark areas

Fluke T+PRO Voltage and Continuity Tester
- Three forms of ac/dc voltage detection: light, sound, and vibration
- Extra heavy-duty, replacement test leads
- Safety rated CAT IV 600, CAT III 1000 V
- Continuity beeper

Fluke 1AC-II VoltAlert™ Non-Contact Voltage Detector
- Voltbeat technology continually tests its battery and circuitry
- Upon detection of voltage, tip glows and beeper sounds
- Voltage detection of 90 to 1000 VAC
- CAT IV 1000V

Mfg. part no. TLK-225 SUREGRIP™ MASTER ACCESSORY SET

FLUKE®

SureGrip™ Set Includes:
- AC220 Plunger Style Alligator Clips
- AC280 Plunger Style Hook Clips
- AC283 Plunger Style Pincer Clips
- AC285 Large Jaw Alligator Clips
- TP220 Sharp Test Probes
- TL224 Right-to-Straight Test Leads
- 6-Pocket Storage Pouch

Special value SureGrip™ Master Set is a complete selection of test tool accessories for any industrial application. Includes a convenient toll-up pouch that neatly stores each accessory. 1000V CAR III, 600V CAT IV rated.

400 & 600 SERIES GENERAL PURPOSE & POWER CLAMP-ON METERS

IP54 CE AEMC® INSTRUMENTS

- 1000V CAT IV Rated
- UL 94 IV flame retardant self-extinguishing
- IP54 Rated
- 10,000 count blue electroluminescent backlit display
- Measures up to 1000Vac (1400V peak); (1000Vdc and AC+DC with resolution to 10mV model dependent)
- Measures up to 2000Aac and 3000Adc (model dependent)
- Measures single- and three-phase power (real, reactive and apparent) up to 3MW with resolution to 1W (model dependent)
- Auto selects AC or DC measurement
- True InRush® current measurement with 1mS capture
- Measures harmonics up to the 25th (Models 407 & 607)
- Records up to 1000 measurements (Models 407 & 607)
- Leads are constructed with a flexible silicone material

Includes set of color-coded silicone insulated test leads, test probes and alligator clips, K-thermocouple with 4mm integrated adapter, soft carrying case, four 1.5V AA batteries and user manual.

FLUKE 320 SERIES CLAMP METERS

FLUKE®

Fluke-321 / Fluke-322

- Smaller size fits easily into tight places
- Precise measurements with 1.8% basic accuracy
- Resolution up to 0.01A and 0.1 V
- Measures AC current to 400A
- Measures AC volts to 600V
- Measures DC volts to 600V (**Fluke-322** only)
- Resistance measurement to 400Ω
- Continuity for quick checking of shorts
- IEC 1010-2-031, 600V CAT III
- Automatic low battery indicator
- Display hold function
- Two year warranty

Fluke-323 / Fluke-324 / Fluke-325

- 400A AC current measurement (AC and DC current, **Fluke-325** only)
- 600V AC and DC voltage measurement
- Resistance measurement up to 40kΩ
- Temperature and capacitance measurement (**Fluke-324** and **Fluke-325** only)
- Frequency measurement (**Fluke-325** only)
- CAT IV 300V / CAT III 600V
- Slim, ergonomic design
- Large, easy to read backlight display (**Fluke-324** and **Fluke-325** only)

Fluke-321 Fluke-323

The **Fluke 320 Series** True-rms Clamp Meters are designed to perform in the toughest environments and provide accurate, reliable results users can trust to confidently diagnose problems. Certificate of calibration available; *go online or call .*

FLUKE CLAMP METERS

FLUKE®

FLUKE-381

FLUKE-365

Fluke 365 Detachable Jaw Clamp Meter:

Fluke 365 is a new, innovative Fluke clamp meter, offering a thin, small jaw design that makes it easy to get around tightly packed wires. The detachable jaw on a flexible lead makes access to wires and viewing the display easier than ever. The Fluke 365 measures DC and AC current up to 200A with basic DMM features (volt, ohms and continuity measurement) and true-rms measurement.

Fluke 370 Series Clamp Meters:

Fluke 370 series clamp meters offer improved performance perfect for a wide range of current measurement situations. All offer true-rms ac voltage and current measurements, and can measure up to up to 600V and 600A; the Fluke 376 can read up to 1000V and 1000A. New iFLEX flexible current probe (included with Fluke 376, optional with 374 and 375) expand the measurement range to 2500 A AC while providing increased display flexibility, flexibility to measure awkward sized conductors and improved wire access. Additionally, all 370 series clamp meters are CAT IV safety rated.

Fluke 381 Clamp Meter:

Fluke 381 does everything you would expect from a clamp meter, and then lets you remove the display for even more flexibility. Now one technician can do jobs that used to require two people; clamp the Fluke 381 around a conductor, remove the display and walk across the room to operate controls or remove protective equipment, all while watching real-time readings. Also, new iFLEX flexible current probe (included) expand the measurement range to 2500 A AC while providing increased display flexibility, flexibility to measure awkward sized conductors and improved wire access.

Fluke I2500-18 and I2500-10 iFlex Flexible Current Probes:

Fluke iFLEX flexible current probes expand the measurement range of the select Fluke meters to 2500 A AC while providing the ultimate measurement flexibility. The iFLEX probes connect directly to the clamp meter, displaying current measurements without error prone scaling factors. The large loop size and thin cross section allow measurement of awkward sized conductors and improved access in crowded spaces. Available in 10 in. and 18 in. sizes.

CLAMP METERS

FLUKE 350 SERIES TRUE-RMS 2000A CLAMP METERS

- Reliably handle a wide range of high-current applications with 2000A ac + dc true-rms, 1400A ac, and 2000A dc
- 2.3 in. jaw capacity is suitable for large, or multiple conductors
- In-rush current measurement captures 'power-on' surge current with accuracy and repeatability high voltage measurement of 1000V ac + dc true-rms, 600V ac, and 1000V dc allows users to perform multiple tests with only one tool (355 only)
- Resistance to 400kΩ coupled with a continuity beeper, provide the convenience of a multimeter (355 only)
- Accurately measure frequency up to 1kHz for optimum troubleshooting
- Quickly analyze readings using the MIN, MAX, and AVG functions
- Large backlit display allows for easy visibility in low-lit areas
- Use display hold feature to capture readings even when the display cannot be viewed
- Use the low-pass filter to smooth out noisy loads and stabilize readings
- CAT IV 600 V, CAT III 1000 V rating for added user protection

Fluke 350 series clamp meters address the need for accurate high current measurements up to 2000A. Meters come complete with C43 soft carrying case, 6 AA batteries, and users manual. **Mfg. part no. Fluke-355** also includes TL224 1.5 m silicone rubber test leads, TP2 test probes and AC285 alligator clips. Perfect for electrical contractors and industrial service technicians.

FLUKE-360 AC LEAKAGE CURRENT CLAMP METER

- Measures current from from 1mA to 60A with 1mA of resolution
- Durable clamp withstands over 50,000 operations — wide 1.5" jaw size
- Dual display — 3200-count digital, 32-segments LCD bargraph
- "Display-Hold" button to capture readings in hard-to-reach places
- Auto power-Off with warning buzzer
- Conforms to IEC1010 and EMC standards
- Meets safety standard VDE0404-4 and VDE0702 requirements

Mfg. part no. FLUKE-360 AC leakage current clamp meter, designed for noninvasive checks of insulation condition, allows user to perform tests without powering down the installation or disconnecting equipment — saving time, without compromising on quality or safety. Unique jaw design eliminates the influence of adjacent current conductors, and minimizes the effects of external magnetic fields, even at low currents — perfect for performing accurate and reliable tests in todays crowded electrical environments. Uses one 3V Lithium button-cell battery. Meter comes complete with soft carrying pouch and multi-language user's manual. Overall dimensions: 6.9L x 2.8W x 1"H.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-360	AC Leakage Current Clamp Meter	30M2188	749.95

FLUKE 902 TRUE RMS HVAC CLAMP METER

- Designed for HVAC applications with capacitance, DC Current (µA), and temperature measurements
- Small body and jaws fit perfectly in your hand and into tight places
- Handy 'Display Hold' button keeps measurements on the display
- Meter controls are positioned so current measurements can be done with one hand (index finger on clamp opening lever and thumb on rotary switch)
- Large, backlit display is easy-to-see in less than ideal conditions
- Auto shut-off maximizes battery life so the meter works when you need it
- Three year warranty

True-rms HVAC clamp meter includes two AA alkaline batteries, one pair TL75 test leads, one 80BK integrated DMM temperature probe, soft carrying case and a users manual with safety information.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-902	True-rms HVAC Clamp Meter	05M4770	299.95

i5s SERIES LOW-LEVEL 5A AC CURRENT CLAMP

i5sPQ3

- Ideal for use with **Fluke 433** and **434 series** 3-Phase Power Quality Analyzers
- Measures 10mA to 5A AC
- Accuracy 10mA to 1A: 1% ±5mA (48 to 65Hz)
- Accuracy 1A to 5A: 1% (48 to 65Hz)
- Bandwidth from 40Hz to 5kHz
- Output level: 400mV/A
- Buy the 3-Pack and Save

Specially configured to provide low-current accuracy while taking measurements on secondary current transformers. **Mfg. part no. i5s** AC current clamp accommodates conductors up to 0.6" (15mm). Compact shape makes transporting and storing convenient; the clamp measures only 4. 6 x 1.7 x .9" (116 x 43 x 23mm) . Takes accurate readings without breaking the circuit. Output cable is 2.5 meters long with BNC connector termination. Rated CAT III 600V (insulated conductors only). One-year manufacturers warranty.

Mfg. Part No.	Description	Stock No.	Price Each
I5S	Low-Level 5A AC Current Clamp	43K8757	549.95
I5SPQ3	5A AC Current Clamp	43K8758	1199.95

U1190 SERIES CLAMP METERS

- Unique wire separator separates wires from a bundle
- Vsense performs non-contact voltage detection (except **U1191A**)
- Built-in LED flashlight illuminates test area (except **U1191A**)
- Current measurement up to 600A (**U1193A** and **U1194A** only)
- Digital multimeter (DMM) with Resistance, Capacitance (except **U1191A**), DCV, ACV, DCuA (**U1194A** only), ACuA (**U1194A** only)
- Continuity and Diode test measurements
- CAT III 600V / CAT IV 300V safety rating

U1191A

With the **U1190 Series** handheld clamp meters are packed with a wealth of features to help you work more efficiently and more safely. Housed in robust cases, each model comes with an innovative wire separator that helps you isolate and measure individual wires in a bundle. The built-in LED flashlight illuminates your test area and Vsense performs non-contact voltage detection. The clamp meters are also certified with both CAT III 600 V and CAT IV 300 V ratings to cover wider measurement categories.

Mfg. Part No.	Current Measuring Range AC	Current Measuring Range DC	Voltage Measuring Range AC/DC	Resistance Measuring Range	Stock No.	Price Each
U1191A	400A	...	600V	600ohm to 6kohm	55T1122	100.00
U1192A	60A to 400A	...	60V to 600V	600ohm to 60kohm	55T1123	138.00
U1193A	60A to 600A	...	60V to 600V	600ohm to 60kohm	55T1124	174.00
U1194A	60A to 600A, 60µA to 600µA		60V to 600V	600ohm to 60kohm	55T1125	223.00

(211845)

U1210 SERIES HAND-HELD CLAMP METERS

- 1000A True RMS AC current measurement
- Small body and large jaw size up to 52mm
- One-hand operation
- Peak-hold with in-rush current measurement
- Large backlight dual display
- Temperature and capacitance measurement
- Manual and auto-ranging for all measurements
- CAT III 1000V and CAT IV 600V safety protection

Measurements of electrical distribution cables can be challenging and risky. For cables up to two inches in diameter, the **U1210 series** handheld clamp meters enable high-current measurements without breaking the circuit up to 1000A for AC, DC or AC + DC. Unlike most clamp meters, they also include DMM capabilities resistance, capacitance, frequency and temperature to simplify troubleshooting during installation and maintenance. **U1210 series** handheld clamp meters provide convenience, versatility and the ability to handle big currents safely. Includes test leads, 19mm and 4mm probes, quick-start guide, certificate of calibration and soft carrying case.

DIGITAL CLAMP MULTIMETER WITH FREQUENCY

RoHS Compliant Available

TENMA®

Features:
- 3999 count autoranging display
- 1" Clamp diameter
- Diode test
- Continuity buzzer
- Data hold
- Sleep mode
- Full icon display
- Low battery indicator

Specifications: Range
- DC voltage: 400mV, 4V, 40V, 400V, 600V
- AC voltage: 4V, 40V, 40V, 600V
- DC current: 40A, 400A
- AC current: 40A, 400A
- Resistance: 400Ω, 4KΩ, 40KΩ, 400KΩ, 4MΩ, 40MΩ
- Frequency: 10Hz - 100MHz
- Duty cycle: 0.1 - 99.9%
- *TRMS AC voltage frequency: 40Hz - 400Hz
- *TRMS AC current frequency: 50Hz - 60Hz

72-7226

Digital Clamp Multimeter with Frequency Measurement is perfect for general purpose applications. Comes complete with zipper case, test leads, 9V battery and owners manual.

260 SERIES ANALOG VOLTMETERS

Simpson

260-8 and 260-8XI

Based on the famous **260**, the **260-6XLPM** has extra features and extra ranges. The large viewing area with color-coded scales minimizes measurement mistakes and visual confusion. The **260-6XLPM** allows accurate in-circuit tests without risk to components or without causing digital circuits to switch states. The durable ABS plastic case provides high-impact resistance and increased drop protection in the toughest environments. The **260-8** features more attributes than its predecessors. Standard and high- energy fusing in conjunction with diode network meter movement protection makes the **260-8** the best combination of quality and affordability. The **260-8P** has an additional relay overload protection circuit that is resettable and also provides audible continuity checking. **-RT suffix** indicates roll top case. The **260-8Xi** has all of the circuit protection features and advantages for which the **260 Series** is famous and even more features than its predecessors. The yellow case color for enhanced visibility and user safety awareness is the trademark of the **260-8Xi**. The durable ABS plastic case also provides high-impact resistance and increased drop protection in the toughest environments. Safety is the major design feature of the **260-9S/9SP** and the reputation, advantages and reliability of Simpson test equipment is guaranteed. It is suitable for testing most commercial and industrial installations and is rated for Category III-600V applications. **-SP suffix** indicates protected with case. *Carrying cases and other accessories ordered separately; on this page*.

DELUXE ANALOG DISPLAY VOM

TENMA®

Features:
- Large three-color mirrored scale
- Carry handle doubles as a stand
- Continuity buzzer

Specifications: Range
- DC voltage: 600mV, 3V, 12V, 60V, 300V, 1000V
- AC Voltage: 600mV, 3V, 12V, 60V, 300V, 1000V
- DC Current: 120uA, 3mA, 30mA, 300mA, 10A
- Resistance: x1Ω, x100Ω, x1KΩ, x10KΩ
- Battery Test: 1.5V @ 300mA, 9V @ 30mA
- Continuity: Audible indication, less than 100Ω
- Input Impedance: 20KΩ/V (DC), 9KΩ/V (AC)
- Dimensions: 6.7" x 4.9" x 1.9" (H x W x D)

Deluxe Analog Display VOM is perfect for educational purposes or in applications where unstable readings make digital displays inconvenient. Comes complete with test leads, instruction manual, one 9V battery and two AA batteries.

VOLTAGE, CURRENT, AND EVENT USB DATA LOGGERS

RoHS Compliant Available

LASCAR

- USB interface for setup and download
- 32,510 reading capacity
- Programmable sample rates from 1 sec. to 12 hrs. (**-3 & -4 suffix**)
- Logging rate of up to 5/sec for events, 2/sec for state changes and 100/sec when counting (**-5 suffix**)
- Two progammable alarm threshholds with LED indication (**-3 & -4 suffix**)
- Replaceable internal battery (included)
- Connection via screw terminals in cap
- Includes free Windows® data logging configuration and graphing software

The **EL-USB-3** permits the recording of measurements from a wide range of sensors. **EL-USB-4** enables quick and easy monitoring of manufacturing processes. EL-USB-5 can record events, state changes and count events. Connection to the circuit is via screw terminals housed in the cap.

Mfg. Part No.	Function	Measuring Range	Stock No.	Price Each 1-24	Price Each 25+
EL-USB-3	Voltage	0 to 30VDC	80K5461	98.09	88.28

AC/DC MILLIVOLT DATA LOGGER WITH CURRENT CLAMP

LASCAR

- Compatible with AC and DC current clamps
- Energy monitoring mode (to calculate power, cumulative energy and cost)
- AC and DC millivolt measurement mode
- Logging rates between 1 sec and 12 hrs
- Stores 127,000 readings
- USB interface for set-up and data download
- High contrast 4 digit LCD screen with measurement functions, battery status, alarm indicators and measurement units
- Immediate, delayed and push-to-start logging
- Supplied with user replacable batteries and Windows control software

When used with a current clamp, this stand alone data logger measures and stores up to 127,000 readings over a 0 to 1000A measurement range (0 to 723A for AC). In energy monitoring mode, this data is converted into power, energy (using a user defined voltage value) and cost (using a user supplied energy cost). User replaceable batteries typically allow logging up to 6 months.

BLUETOOTH TEMP AND RH DATA LOGGER WITH ANDROID COMPATIBILITY

NEW

LASCAR

- Compatible with Android (Bluetooth)
- Stores over 1 million temp/humidity readings
- IP67 sealed unit
- LCD screen for Bluetooth status, current reading, min/max readings, and battery levels
- Pushbutton for Bluetooth connection and reset of max/min recorded temperature
- Rechargeable battery via micro USB
- Red and green LEDs indicate logger status

The **EL-BT-2** data logger measures and stores over 1 million temperature and humidity readings. The user can easily set up the logger and view downloaded data by using a suitable Android phone via Bluetooth remotely. The LCD screen indicates Bluetooth connection status as well as logger operation. The pushbutton allows cycling of current, minimum and maximum recorded values. Comes with rechargeable battery or can be used with USB wall charger.

Mfg. Part No.	Description	Stock No.	Price Each 1-9
EL-BT-2	Bluetooth Temp/RH Data Logger with Android Compatibility	54X7623	389.03

(212400)

WIFI DATA LOGGERS WITH OPTIONAL CLOUD STORAGE

LASCAR

- Easy Set-Up Using Free PC Software and supplied USB Cable
- Sensors Store Data Even if Temporarily Disconnected from the WiFi Network
- Rechargeable Internal Lithium Polymer Battery
- On-Board Screen Shows Current Reading Min & Max, Alarm and Battery Status
- Change Sensor Settings Remotely via PC or the Cloud
- EL-WiFi-ALERT produces immediate sound and light alarms when used with any sensor

The **EL-WiFi-TH** (temp/RH), **EL-WiFi-TP** (temp via external thermistor probe), **EL-WiFi-T** (temp) and **EL-WiFi-TC** (temp via external thermocouple probe) data loggers can measure temperature and humidity or simply temperature. During set-up, the user can choose the required WiFi network, name the logger, select the sample and transmission rate and set high and low alarms. Once programmed, the data loggers can be placed within range of the WiFi network to wirelessly stream data to PC or Cloud. The Cloud service allows monitoring of data loggers from any internet enabled device and use of email and text alerts in the event of alarm breach.

Mfg. Part No.	Description	Stock No.	Price Each 1-24

700 SERIES FILTER AND PUMPS

FLUKE

FLUKE-700PTP-1

700-PMP

FLUKE-700PTP-1 PNEUMATIC PRESSURE PUMP

Mfg. Part No. 700PTP-1 For use with 700 series pressure modules or test gauges. Can be directly connected to the reference port consolidating two separate pieces when performing pressure calibration and testing. Can also be used with 717 pressure calibrators. Ideal for calibrating pressure transmitters, pressure switches and pressure gauges up to 600 PSI/40 bar.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-700PTP-1	Hand-Held Pressure Pump	55M0610	699.95

FLUKE-700PMP PRESSURE PUMP

700PMP is a hand-operated pressure pump to provide pressures up to 150 psi/1000 kPa. Output fitting: 1/8 FNPT.

FLUKE-700PMP	Pressure Measuring Pump	31C1618	474.95

FLUKE 700G SERIES PRECISION PRESSURE TEST GAUGES

FLUKE

- Precision pressure measurement from ±10 inH2O/20 mbar to 10,000 psi/690 bar
- Absolute pressure measurement ranges 15, 30, 100, 300 psia
- Accuracy to 0.05 % of full scale
- Reference class gauge accuracies to 0.04 % of reading
- Easy to use, rugged construction for reliable performance
- CSA; Class 1, Div 2, Groups A-D rating
- ATEX rating: II 3 G Ex nA IIB T6
- Combine with the **700PTPK** or **700HTPK** pump kits for a complete pressure testing solution for up to 600 psi (40 bar) with the PTP-1 pneumatic pump and up to 10,000 psi (690 bar) with the **HTP-2** hydraulic pump
- Log up to 8,493 pressure measurements to memory (requires **700G/TRACK** software)
- Three-year warranty

HAND-HELD LOOP CALIBRATORS

IEC 1010-1 1000V CAT III

FLUKE®

FLUKE-705 FLUKE-707 FLUKE-709 FLUKE-715 FLUKE-787

These powerful loop calibrators are ideal for loop calibration, maintenance and repair applications. **Mfg. part no. 707** features a one-handed user interface with "Quick-Click" detented knob making it extremely fast and easy to use. Its intrinsically-safe version, **mfg. part no. 707EX**, is for use in explosion endangered areas and is certified in accordance with the ATEX directive (Ex II 2 G Eex ia IIC T4) in Zones 1 and 2, ZELM 02 ATEX 0120 X. **Mfg. part no. 709** has HART communication and support. All models come complete with alligator test clips, safety-designed test lead set, carrying case, one 9V battery (**mfg. part no. 709** has six AAA batteries and **mfg. part no. 789** has four AA batteries), instructions and a three-year manufacturer's warranty (**mfg. part no.707EX** has a one-year manufacturer's warranty and includes Instruction manual on CD-ROM). **Mfg. part nos. 787** and **789** ProcessMeter™ also include Quick-Reference guide and users manual. Recommended accessories: **Mfg. part no. C50** Case, **Mfg. part no. TL71** Test Leads, **Mfg. part no. TPAK** Meter Hanger (for 705 and 707), **Mfg. part no. C25** Case, **Mfg. part no. T71** Test Leads, **Mfg. part no. AC72** Alligator Clips (for 715) **Mfg. part no. C116** Case, **Mfg. part no. TLK225** Accessory Set, **Mfg. part no. Mfg. part no.** Meter Hanger (for 787 and 789).

PROCESS METERS & CALIBRATORS

FLUKE 712B AND 714B TEMPERATURE CALIBRATORS

NEW

FLUKE®

- The **712B** can measure and simulate (13) different RTD types and resistance
- The **714B** can measure and simulate (17) different thermocouple types and millivolts
- Measure 4 to 20 mA signals while simultaneously sourcing a temperature signal
- Hanging tool designed in and included with every unit
- Configurable 0% and 100% source settings for quick 25% linearity checks
- Linear ramp and 25% step auto ramp based on 0% and 100% settings
- Dual inputs and backlit display for easy interpretation of measurements
- Power down settings remembered at power up for easy restart of tests
- 1-year and 2-year specifications and traceable certificate of calibration

For the temperature calibration professional that wants a highly accurate, easy-to-use, single function temperature calibrator the 712B and 714B are ideal test tools.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-712B	RTD Input and Output	36X3064	1195.00
FLUKE-714B	Thermocouple Input and Output	36X3065	1195.00

FLUKE-718 AND FLUKE-717 SERIES PRESSURE CALIBRATORS

CE

FLUKE®

FLUKE-718 AND -717 SERIES MODELS

- DC current measurement: 0 to 24mA
- Loop supply: 24VDC
- Min./Max. and Hold Functions
- Clear, 5-digit display
- EMI tolerant, dust- and splash-resistant
- CSA certified, CE compliant
- Recommended accessories - TL220 Test Lead Set, 700PTP Pneumatic Test Pump

FLUKE-718 SERIES MODELS ONLY

- Built-in hand pump — sources -11psig to full scale

FLUKE-718 Series

FLUKE-717 Series

FLUKE-718 and **FLUKE-717 series** pressure calibrators include: protective yellow holster, test leads, alligator clips, single 9V alkaline battery (two with **FLUKE-718 series** models), instructions and three-year manufacturer's warranty. **NOTE:** Pressure may also be measured using 1 of 29 **mfg. part no. 700Pxx** pressure modules ordered separately; go online or call.

FLUKE 719 ELECTRIC PRESSURE CALIBRATORS

FLUKE®

Features:

- Electric pump for one handed pressure calibration
- Best in class pressure measurement uncertainty of 0.025%
- Measure and source mA with best in class 0.015% accuracy
- Precision pressure adjust vernier
- Variable release rate bleed valve for easy pressure adjustment
- Ideal performance for high accuracy transmitter calibration
- Programmable pump limit allows:
  Protection from damage due to over-pressurization
  The user to program target pressures for pumping
- Extended measurement range with any of twenty nine (29) 700Pxx Pressure Modules
- Source mA with simultaneous pressure measurement to test valves and I/Ps
- Simulate mA signals to troubleshoot 4-20 mA loops
- Test pressure switches with built in switch test function
- Power transmitters during test using 24 V loop supply with simultaneous mA measurement
- Proven cleanout ports reduce pump failures

FLUKE 719

With built-in electric pump, the Fluke 719 provides pressure calibrator makes it possible to calibrate and test pressure devices quickly and easily with one hand saving valuable time. Use the programmable pump limit settings to avoid over-pressurization, and to set 'pump to' pressure values. The unique cleanout port design reduces pump failures, and makes the 719 easy to clean without repair. The compact, lightweight form, combine with one-handed use, makes this pressure calibrator the ideal tool for process professionals.

Function Measure or Source	Range	Resolution	Accuracy	Notes
Pressure 719-30G	-12 to 36 psi, -850 mbar to 2.4 bar	0.001 psi, 0.1 mbar	0.025 % Range	6 month spec., 0.035% of Range for 1 year
Pressure 719-100G	-12 to 120 psi, -850 mbar to 8 bar	0.01 psi, mbar		
mA	0 to 24 mA	0.001 mA	0.015% Rdg + 2 counts	Max load, 1000 Ω 750 Ω in HART mode
Loop Supply	24 V dc	N/A	10%	...

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-719 30G	Electric Pressure Calibrator, 30 PSI	08P4409	3199.95
FLUKE-719 100G	Electric Pressure Calibrator, 100 PSI	08P4408	3199.95

(134285)

FLUKE 719PRO ELECTRIC PRESSURE CALIBRATORS

NEW

FLUKE®

- Unique integrated electric pump for one handed pressure calibration
- Test pressure switches easily with easy-to-use switch test function
- Precision pressure adjust vernier for easy and accurate pressure calibration
- Ideal accuracy and performance (0.025%) for reference class transmitter calibration
- 30PSI, 150PSI and the new 300PSI pressure ranges
- Programmable pressure calibrator pump limit eliminates over-pressurization and allows the user to program target pressures for pumping
- Extended pressure measurement range with any of 29 **700Pxx** Pressure Modules
- Pump cleanout ports reduce pump failures from moisture and fluid damage
- Fluid trap included with the unit to mitigate chance of fluid damage in at-risk applications
- Precision temperature measurement with optional RTD probe

The **719Pro** Electric Pressure Calibrator is the ideal test tool for calibrating high accuracy transmitters, pressure switches and pressure gauges. The **719Pro** includes a full functioning loop calibrator that sources, simulates and measures mA signals and more.

Mfg. Part No.	Range	Resolution	Stock No.	Price Each
FLUKE-719PRO 30G	-12 to 30 PSI / -0.8 to 2 bar	0.001 PSI, 0.0001 bar	08X5427	3195.00
FLUKE-719PRO 150G	-12 to 150 PSI / -0.8 to 10 bar	0.01 PSI, 0.001 bar	08X5426	3195.00
FLUKE-719PRO 300G	-12 to 300 PSI / -0.8 to 20 bar	0.01 PSI, 0.001 bar	08X5428	3395.00

FLUKE 721 PRECISION PRESSURE CALIBRATORS

NEW

FLUKE®

- Ideal for gas flow calibration (custody transfer) applications
- Two isolated, stainless steel, pressure sensors with 0.025 % accuracy
- Pt100 RTD input for temperature measurement, (probe optional)
- Measures 4 to 20 mA signals
- Internal 24 V loop power supply can power a transmitter under test
- Measure up to 30 V dc, check 24 V loop power supplies
- Extend pressure measurement range with connection to external 700 series pressure modules (29 ranges)
- Large backlit graphic display can display up to three inputs simultaneously
- Store five instrument setups for recall and use

The **Fluke 721** Precision Pressure Calibrator with dual isolated pressure sensors is the ideal tool for gas custody transfer applications allowing you to take simultaneous static and differential pressure measurements with a single tool. The **721** can be configured by selecting either a 16 PSI (1.1 bar) or 36 psi (2.48 bar) low pressure sensor then add any of 7 high pressure ranges including 100, 300, 500, 1000, 1500, 3000 or 5000 psi (6.9, 20, 24.5, 69, 103.4, 200, 345 bar).

Mfg. Part No.	Description	Stock No.	Price Each

FLUKE-725 AND FLUKE-726 MULTIFUNCTION PROCESS CALIBRATORS

FLUKE®

All Models:

- Streamlined, hand-held design
- Reliably-built to stand up to tough field use
- Two-channel, measure/source screen, for viewing input and output simultaneously
- Easy-to-read display with backlight for poorly lit areas
- Measures volts, mA, RTDs, thermocouples, frequency, resistance to test sensors and transmitters
- Source/simulate volts, mA, RTDs, thermocouples, frequency, resistance, pressure to calibrate transmitters
- Supports flow meter testing with frequency function
- Auto-Step and Auto-Ramp for fast linearity testing
- Power transmitters during test using 24V loop power supply with simultaneous mA measurement
- Stores frequently-used test setups for later use
- Three-year manufacturer's warranty
- CSA certified, CE compliant
- Recommended accessories - C280 Case, TL220 Test Leads, TPAK Meter Hanger (for 725) C115 Case, TL220 Test Leads, TPAK Meter Hanger (for 726)

FLUKE-725

FLUKE-726 Only:

- Precise measuring and calibrating — accuracies of 0.01%
- Transmitter error % calculation — no calculator needed
- Memory storage for later analysis
- Enhanced flow meter testing with frequency pulse train source mode
- HART mode inserts 250Ω resistor in mA measure
- Integrated pressure switch test
- Custom RTD curves for enhanced temperature measurement
- Voltage input protection for improved reliability

FLUKE-726

+Measure or source* pressure (*pressure pump required) using any of the **FLUKE-700P series** pressure modules; *order separately, go online or call*.

Mfg. part no. FLUKE-725 multifunction process calibrator is a powerful, yet easy-to-use field calibrator for the maintenance and troubleshooting of process control instrumentations. **Mfg. part no. FLUKE-725EX**, its intrinsically-safe version, is able to calibrate almost any process instrument likely to need service in an area where explosive gasses may be present and is in compliance with safety specfications ATEX II 1 G EEx ia IIB 171°C KEMA 04ATEX 1303X; I.S. Class I, Division 1 Groups B-D, 171°C. **Mfg. part no. FLUKE-726** precision multifunction process calibrator is designed specifically for broader workload coverage, calibration power and unsurpassed accuracy. It interprets results without the help of a calculator and stores measurement data for later analysis. All models operate on 4 AA batteries and come complete with one-set each of **mfg. part no. TL75** test leads, **mfg. part no. AC72** alligator clips, and stackable test leads, plus a product manual and a users guide on CD.

FLUKE 750 SERIES DOCUMENTING PROCESS CALIBRATORS

FLUKE®

- Calibrate temperature, pressure, voltage, current, resistance, and frequency
- Programmable calibration routines enable you to create and run automated as-found/as-left procedures to ensure fast, consistent, calibrations
- Records and documents results to support your ISO-9000 or regulatory standards
- USB interface lets you transfer the results to a PC
- Supports Fluke DPC/TRACK™ software as well as popular programs from Honeywell Meridium, Emerson, Cornerstone, Yokogawa, Prime Technologies, Intergraph and others
- Create procedures, instructions, and action lists to deliver fast, easy documentation
- Runs an entire shift on a rechargeable Li-ion battery pack
- Overmolded urethane case stands up to rough handling in industrial environments
- Calibrators offer one- or two-year calibration cycles and three-year warranty
- Bright white display lets you read your results in any kind of light
- Soft keys provide one-touch access to enhanced functions such as task lists, automated procedures, scaling, min/max, stepping and ramping, and review memory
- Measure, Source, or simultaneous Measure/Source modes enable technicians to troubleshoot, calibrate, or maintain instrumentation with just one tool
- Integrated HART communication capability lets you program and control HART instrumentation (**Fluke-754** only)

FLUKE 750P SERIES PRESSURE MODULES

NEW

FLUKE®

- 0.025 % reference uncertainty
- 6-month and 1-year specifications
- Temperature compensated 0 °C to 50 °C
- Digital communication to calibrators, no analog losses or errors
- Broad selection of ranges
- Gage, differential, dual range, absolute and vacuum measurement models

The **750P Series** Pressure Modules are the ideal pressure modules to enable gage, differential and absolute pressure measurement with Fluke **750** and **740** series DPCs and **725**, **726** MPCs to measure pressure.

FLUKE 770 SERIES MILLIAMP PROCESS CLAMP METER

FLUKE®

771 Milliamp Process Clamp Meter:

- Measures 4-20mA output signals from transmitters without breaking the loop
- Measures 10 to 50mA signals in older control systems using the 99.9mA range
- Accuracy: 0.2%
- Resolution and sensitivity to 0.01mA
- Hold function captures and displays changing measurements
- Dual backlit display with both mA measurement and percent of 4 to 20mA span

772 and 773 Milliamp Process Clamp Meters:

- DC voltage measurement to verify 24 V power supplies or voltage I/O signals
- Source dc voltage to test input devices that accept a 1 to 5 volt or 0 to 10 volt signal
- Scaled mA output provides a continuous mA signal that corresponds to a 4 to mA signal measured by the mA clamp Output signal enables a logging DMM or other device to record the 4 to 20 mA signal without breaking the loop
- mA in/out: simultaneously measure the mA signal Apply a mA input signal to a device and measure its' 4 to 20 mA output on devices such as valves or mA isolators
- Voltage output linear ramp of 25% step output Automatically change the voltage output for remote testing

Mfg. part no. FLUKE-771 compact process clamp meter measures mA signal for PLC and control systems analog I/O. Detachable clamp with extension cable allows user to take measurements in tight locations, and the built-in spotlight illuminates hard to see wires in dark enclosures. Features automatic power-off after 15 minutes and 2 minute automatic-off for backlight and spotlight. Uses two AA 1.5V alkaline batteries. Meter includes soft carrying case, user's manual and manufacturer's warranty: 3-years for electronics, 1-year for clamp cable assembly.

FLUKE 789 PROCESSMETER AND TEMPERATURE KIT

NEW

FLUKE®

- Unique new wireless measurement logging capability
- Temperature measurement from -200°C to 1372°C using the t3000 FC
- 24 V Loop power supply
- HART mode setting with loop power (adds 250 ohm resistor)
- 100% larger dual display
- 1200 ohm drive capability on mA source
- Enhanced backlight with two brightness settings
- 0% to 100% mA Span Check buttons to toggle between 4 and 20 mA
- Infrared I/O serial port compatible with FlukeView® Forms Software Version 2.1
- Externally accessible fuses for easy replacement

The Fluke **789 ProcessMeter™** is the ultimate troubleshooting tool for electricians and instrumentation professionals, combining the functionality of a loop calibrator with the power of a digital multimeter. By equipping the 789 with a temperature measurement module and the wireless data logging capabilities of Fluke Connect™ with ShareLive™ video call, process technicians can now do a lot more while carrying a lot less. And with its built-in, selectable 250 ohm HART® resistor, it eliminates the need to carry a separate resistor with you. Use the included FC Connector with the Fluke **789** and get the full benefits of the Fluke Connect™ mobile app. Download it now and get started.

MICRO-BATH THERMOMETER CALIBRATORS

FLUKE. Calibration

6102 7102 7103

Each model is stable to ±0.03°C or better, depending on the fluid you use. Uniformity is ±0.02°C or better for low uncertainties using a reference thermometer. Display accuracy has been improved to ±0.25°C for quick calibrations without a reference thermometer. In short, you get the stability and precision of a liquid bath in a dry-well-sized package. With a 48mm (1.9") diameter, 140mm (5.5") deep tank, a **Micro-Bath** can calibrate any type of sensor including short, square, or odd-shaped sensors. The problems of fit and immersion are virtually eliminated by using a fluid medium rather than a dry-block calibrator. Micro-Baths are perfect for liquid-in-glass and bimetal thermometers. **Micro-Baths** have RS-232 ports, come with our Interface-it software, and can be used with MET/TEMP II software. Also included are contacts to calibrate a thermal switch, eight set-point memory storage, ramp-rate adjust, and over-temperature safety cutout.

2700G SERIES REFERENCE PRESSURE GAUGES

NEW

FLUKE Calibration

- Precision pressure measurement from 100 kPa (15 psi) to 70 MPa (10 000 psi)
- Accuracy to 0.02% of full scale
- Easy-to-use, rugged construction for reliable performance
- Combine with the 700PTPK or 700HTPK pump kits for a complete portable pressure testing solution for up to 4 MPa (600 psi) with the PTP-1 pneumatic pump and up to 70 MPa (10 000 psi) with the HTP-2 hydraulic pump
- Combine with the P5510, P5513, P5514, or P5515 Comparison Test Pumps for a complete bench top pressure calibration solution
- Test port is ¼ NPT Male. ¼ BSP and M20 X 1.5 adaptors are included standard
- USB communications cable and universal power supply included standard

The **2700G** Reference Pressure Gauges provide best-in-class measurement performance in a rugged, easy-to-use, economical package. Improved measurement accuracy allows it to be used for a wide variety of applications. It is ideal for calibrating pressure measurement devices such as pressure gauges, transmitters, transducers, and switches. In addition, it can be used as a check standard or to provide process measurements with data logging. The **2700G** has an easy-to-use interface that allows you to configure the sampling rate, tare value, damping, and auto-off time interval as well as reset the min/max pressure. You can also view the remaining battery life. Select from 21 different standard engineering units, including bar, in H2O, kPa, MPa, and psi. In addition, the supervisor menu can be used to set one custom engineering unit. To ensure against incorrect measurements, each of the above functions can be locked from use through the supervisor menu. The **2700G** Reference Pressure Gauge can be combined with the Fluke Calibration **P5500** series of comparison test pumps to make a complete pressure calibration system. The unique test port design of the P5500 series allows for hand tight connection of the **2700G** without the use of PTFE tape.

U1401B HAND-HELD MULTI-FUNCTION CALIBRATOR/METER

KEYSIGHT TECHNOLOGIES

- Dual display with bright LCD backlight
- Simultaneous source and measure
- Bipolar voltage and current, square-wave, auto scan and ramp outputs
- Full-span DMM capability, including temperature and frequency measurements
- Hold and Min/Max/Average recordings
- Data logging to PC with optional
- IR-to-USB cable
- Built-in charging capability

Mfg. part no. U1401B hand-held multi-function calibrator/meter incorporates complete DMM performance into a process calibration tool, with the unique ability to both source and measure simultaneously. DMM measurement functions include AC+DC voltage and current, resistance, temperature, frequency, diode and continuity tests. Includes calibrator and meter standard test lead kit, certificate of calibration, protective holster, rechargeable battery pack, AC power adapter and cord, yellow test lead for mA simulation, and quick start guide. Three-year manufacturer's warranty

EXTECH INSTRUMENTS A FLIR COMPANY

Features:
- Built-in IR thermometer with laser measures remote surface temperature on motors and rotating parts
- Provides wide RPM (photo and contact) and linear surface speed (contact) measurements
- Non-contact photo tachometer uses a laser for greater measuring distance up to 6.5 ft (2m) from target
- Memory stores last, max. and min. readings
- Characters on display reverse direction depending on mode
- Large 5-digit LCD display
- Double molded housing

RPM10 461923

Mfg. part no. RPM10 photo/contact tachometer combines a non-contact tachometer for RPM measurements using a narrow beam of laser light source and a contact tachmometer for RPM and surface speed measurements. Plus, a non-contact IR thermometer for quick and accurate surface temperature measurements. Temperature range: -20° to 300°C (-4° to 572°F). Accurate to 0.05% with maximum resolution of 0.1rpm in either photo or contact mode. Fixed 0.95 emissivity covers 90% of surface applications. Includes tips and wheel for rpm or linear surface speed, four 1.5V AA batteries, reflective tape, rubber boot and carrying case. 1-year manufacturer's warranty. CE compliant.

TACHOMETERS

SHIMPO

DT-105A DT-107A

The **DT-100** and **DT-200 series** tachometers provide accuracy and capabilities for measuring and recording rotational, linear, surface speeds and total length. **Mfg. part no. DT-105A** and **DT-107A** battery operated tachometers feature expanded memory storage, added length functions, free N.I.S.T. certificate and many standard accessories. **Mfg. part no. DT-105A-S12** and **DT-107A-S12** tachometers measure speed and direct linear length with accuracy via a 12" wheel. All **DT-200 series** models perform non-contact and contact applications via the included contact adapter. **Mfg. part no. DT-209X** is equipped with data collection capabilities, featuring simultaneous storage of data in three different measuring modes (USB, Standard and Average). **Mfg. part no. DT-209X** offers contact and non-contact applications. USB and Analog output included.

PHASE ROTATION INDICATOR

FLUKE®

Features:
- Three phase indication
- Indication of phase rotation
- Large LCD display
- Voltage range: 40 to 700V
- Frequency range: 15-400Hz
- No battery required — power supplied by unit under test
- Rated CAT III 600V to ground
- Two-year manufacturer's warranty

Mfg. part no. FLUKE-9040 phase rotation indicator is a portable, handheld instrument designed to detect and measure the phase rotation in all areas where three phase supplies are used to feed motors, drives and electrical systems. Provides clear indication of the three phase via an LCD display and the phase rotation direction (clockwise or counterclockwise) to determine correct connections. It allows rapid determination of phase sequence and has a voltage and frequency range suitable for commercial and industrial applications. Meets IEC 61010/EN 61010, IEC 61557-7/EN 61557-7 electrical safety specifications. Comes complete with three self-retaining test leads, probes, alligator clips and users manual.

5100 GAUSS METER & PROBES

RoHS Compliant Available

F.W. BELL

- Auto Zero, Min/Max./Peak Hold
- Auto Range and Relative Mode
- Gauss, Tesla or Ampere/Meter readings
- 5180 features a corrected analog output (+/- 3V FS) and a USB communication port

The 5100 Series Hall effect portable gaussmeters incorporates the use of digital signal processing technology making it the world's first hand-held gaussmeter to have a digital signal processor (DSP) on board. F.W. Bell's exclusive Dynamic Probe Correction allows measurements from 0 to 30 kG with a basic accuracy of 1%. Built-in software eliminates the need for complex calibration procedures. User prompts on the custom formatted LCD allow fast, simple push button operation. **Mfg. part nos. 5170 and 5180** come equipped with a detachable transverse probe, zero gauss chamber, instruction manual, hard carrying case, and four AA batteries. Axial, ultra thin transverse and low-field probes are available as options.

BATTERY CAPACITY ANALYZERS

BK PRECISION

600 601

These battery capacity analyzers are ideal for testing lead acid batteries used in UPS devices, emergency lighting, sprinkler systems, communications equipment and alarm systems. All testers display stored charge capacity along with loaded and unloaded voltage. **Mfg. part no. 601** also displays batteries internal resistance.

SPECIFICATIONS	600	601
Battery Test Voltages	12	6, 12
Selectable Amp-Hours	7, 12, 24, 42, 65, 100	1-100 Amp-Hrs. in 1 Amp-Hr. Steps

875B 3½-DIGIT LCD LCR METER

BK PRECISION

- 8 Capacitance Ranges: 200pF to 20mF
- 7 Resistance Ranges: 2Ω to 20MΩ
- 7 Inductance Ranges: 200μH to 200H

Rotary switch allows easy function/range selection. Measure dissipation factor of capacitors and 1/Q of inductors. Low battery and overload indicator. Overload: fuse protected 250VAC, 100mA. Measurement rate: 2.5 per second, nominal. Includes test clips, 9V battery, spare fuse, instructions.

40,000 COUNT DUAL DISPLAY HANDHELD LCR METERS

BK PRECISION

- 0.5% basic accuracy
- Dual LCD Display
- Two Selectable test frequencies of 120 Hz & 1 kHz (**878B**)
- Four Selectable test frequencies of 100 Hz, 120 Hz, 1 kHz & 10 kHz (**879B**)
- Auto Ranging
- LCD with bright backlight (**879B**)
- Mini USB interface
- 3 Year warranty

Mfg. part nos. 878B and **879B** perform quick, fully auto-ranging capacitance, resistance and inductance measurements. Components can be measured with selectable test frequencies in series or parallel modes as desired. The 40,000 count main LCD displays the measured component value, and the secondary 10,000 count display reads D or Q on **mfg. part no. 878B** and D, Q, phase angle and ESR measurements on **mfg. part no. 879B**.

Mfg. Part No.	Description	Stock No.	Price Each

(5294)

IN-CIRCUIT ESR TESTER

BK PRECISION

- Measures ESR with a range of 0.1 to 30 ohms
- Three color front panel chart shows ESR readings of Good, Fair, and Bad
- Measures DC Resistance with a range of 0.1 to 30 ohms
- Automatically calibrates internal signal
- 15mVp-p Output test voltage (will not turn on any solid-state devices)
- Includes a one-handed tweezers test probe
- Uses a standard 9VDC battery as power source

This in-circuit ESR & DC Resistance capacitor tester is specially designed to measure ESR (Equivalent Series Resistance) on capacitors in the range of 0.47uF to 2200uF, in or out of circuit. The ability to trouble shoot in-circuit saves time and makes the 881 a must for anyone that tests or trouble shoots printed circuit boards.

SPECIFICATIONS	
Open circuit probe voltage	15mV pp
Output test frequency	100 KHz sine wave
ESR range Ω	0.1 – 30 (25 segment LED bar scale) Beeps from 1 to 5 beeps depending on ESR of capacitor
DC Resistance range Ω	0.5 – 30 flashing the LED
Power	One 9V battery or an external AC adapter (9V DC 100mA 5.5mm x 2.1mm center pin+)
Power drain	10mA typical
Dimensions	1.5" x 3.8" x 5.7"

11,000-COUNT DUAL-DISPLAY HANDHELD CAPACITANCE METERS

BK PRECISION

- 9 Automatic Ranges
- 4 xxx Digit, 11,000 Count, Dual LCD Display
- Auto Ranging
- Backlit Display
- Sort on preset tolerance of 1, 5, 10%
- USB PC Interface for Data Logging included
- AC Adapter Included (**830C**)
- Free Software available on B&K Precision Website
- 3 Year Warranty

The model **830C** and **890C** are handheld capacitance meters ideal for performing quick and precise measurements including measuring values, inspection, sorting capacitors and testing capacitors against standard tolerances.

Mfg. Part No.	Capacitance Measuring Range	Stock No.	Price Each
830C	1pF to 199.99mF	41T5663	289.00

U1700 SERIES HAND-HELD CAPACITANCE/LCR METERS

NEW

KEYSIGHT TECHNOLOGIES

- Visible and audible tolerance mode for easy capacitor sorting
- Relative mode
- Hold and Min/Max/Average values recordings
- Dual display with backlight

Mfg. part no. U1701B features 11,000 counts resolution and compare mode with up to 25 sets of high/low limit settings. PC data logging is optional via IR-to-USB cable. Each unit includes certificate of calibration, alligator clip leads, 9V alkaline battery, and quick start guide. Three-year manufacturer's warranty.

(211847)

U1730C SERIES HANDHELD LCR METERS

KEYSIGHT TECHNOLOGIES

- 20,000 counts resolution
- 0.2% basic accuracy
- Wide LCR ranges with three to five selectable test frequencies (up to 100 kHz for **U1733C**)
- Auto identification (Ai) automatically determines and displays component type and measurements
- Detailed component analysis with DCR, ESR, Z, D, Q, and θ functions
- Battery life of 16 hours/AC-powered
- IR-to-USB connectivity for data logging to PC

U1730C Series handheld LCR meters allow you to measure at frequencies as high as 100 kHz—a capability typically found only in benchtop meters—providing more flexibility to test a wider range of components. With auto identification (Ai) the testing and measuring experience is easy; eliminating unnecessary trial and error time—with just a single push of a button. This unique feature automatically specifies L, C, or R with parallel and series mode, without the need to manually change buttons. The handheld LCR meters allow you to test various component types, including secondary components of Dissipation Factor (D), Quality Factor (Q), and Angle Indication of Impedance (θ). This new handheld series also includes other functions that result in a more detailed component analysis. For example, the built-in Equivalent Series Resistance (ESR) function helps you better understand the inherent resistance behavior typically found in capacitors across selected frequencies. DCR is a built-in DC resistance measurement that eliminates the use of a separate digital multimeter (DMM) for component test. Ideal for testing on the go, these LCR meters operate on a battery that lasts up to 16 hours.

Mfg. Part No.	Measurements	Test Frequencies	Back-light	Stock No.	Price Each
U1731C	Z/L/C/R/D/Q/θ/ESR	100Hz, 120Hz, 1kHz	No	47T6069	316.00

PSA SERIES II 1.3GHZ AND 2.7GHZ PORTABLE RF SPECTRUM ANALYZERS

NEW

Aim TT

- 1MHz to 1300MHz or 2700MHz frequency range
- Resolution bandwidths of 1MHz, 280kHz or 15kHz
- -96dBm typical noise floor at -20dBm reference level
- Measurement in dBm or dBuV, mV or uW
- Zero span mode with AM and FM audio demodulation
- Trace modes of normal, peak hold and trace average
- Live, View and Reference traces in contrasting colours
- Twin markers with readout of absolute & difference values
- Smart marker movement with selectable peak tracking
- Frequency presets and independent state storage
- Auto-find automatically sets sweep parameters for the highest signal found
- Unlimited storage for waveforms, set-ups and screens
- User assignable file names, file stamping from real-time clock
- USB interfaces for Flash drives and PC connection
- Comprehensive status and context sensitive help screens
- More than 8 hours continuous operation from a charge
- Smaller and lighter than other spectrum analyzers (weight only 0.56 kg)

H500 / SA2500 SPECTRUM ANALYZER

NEW

Tektronix

SA2500

- Revolutionary DPX™ Live RF spectrum display technology with DPX Spectrum Mask provides intuitive understanding of live RF signals using colors based on frequency of occurrence, processing up to 10,000 spectrums/sec with a 100% Probability of Intercept (POI) to capture pulsed signals, radar emissions, hopping signals, and any other intermittent signals with a minimum duration as brief as 125 us
- Benchtop spectrum analyzer performance in a ruggedized handheld battery-operated field unit offers better than 70 dB spurious free dynamic range (SFDR), guaranteed ≤-95 dBc/Hz at 10 kHz offset phase noise specifications from 10kHz to 6.2GHz
- Excellent sensitivity for detecting very low-level signals with -153 dBm DANL at 10 Hz RBW (equivalent to -163 dBm/Hz) such as RF bugs and unauthorized transmitters
- LAN interface for remote control and unattended monitoring stations for spectrum awareness
- Built-in classification capability for WLAN, GSM, W-CDMA, CDMA, ATSC signals makes quick and simple identification of legitimate signals
- Flexibility to edit, upgrade, and share signal databases and signal classification database using CSV file formats
- Ability to export I/Q data into CSV, MATLAB®, and IQT format for additional post-analysis
- Rapid targeting of signals with field-proven signal hunting, mapping, and documentation tools
- Hunt outdoor signals with built-in GPS receiver by plotting measurements directly into GPS geo-referenced maps such as Pitney Bowes Map info, Google™ Earth, Microsoft® MapPoint®, Bitmap, and many others
- Improved spectrum awareness with high-accuracy measurement synchronization and time stamping
- Hunt in-building signals with a single-touch Tap-and-Walk-and-Tap interface
- Backlit display, viewable in direct sunlight, and extended battery performance with hot-swappable dual batteries
- Rugged design per MIL-PRF-28800F

The **H500** and **SA2500** will quickly scan the RF environment, classify the known signals, and help you locate the unknown signals with their field-proven signal hunting tools. Featuring real-time DPX™ Live RF spectrum display technology, the **H500** and **SA2500** offer practical solutions for discovering transient events that slip past conventional spectrum analyzers. With field-ready, rugged hardware featuring outstanding displayed average noise level (DANL), spurious free dynamic range (SFDR), phase noise, and easy LAN networking capability in a handheld unit, the **H500** and **SA2500** are a great choice for general-purpose spectrum measurements and ideal signal-hunting tools.

ONETOUCH AT NETWORK ASSISTANT

FLUKE networks

- Combined copper, fiber and Wi-Fi troubleshooting resolves a broad range of problems with one tool
- Automated testing with pass/fail analysis speeds identification of the most common problems in about a minute
- Standardized network troubleshooting and performance validation empowers technicians of various skill levels to solve more problems with confidence
- A comprehensive client view of performance isolates the problem root cause starting from the physical layer, through the network and to server-hosted applications
- Wired and Wi-Fi discovery and analysis provides visibility into connected devices, key device properties and problems
- End-to-end path performance measurement to a peer or a reflector validates and documents link readiness and SLA compliance
- Inline VoIP analysis simplifies troubleshooting of desktop VoIP problems in real-time without TAPs or switch mirror ports
- Wired and Wi-Fi packet capture streamlines collaboration and escalation of the most complex issues
- Versiv™ test platform expands testing capabilities through the addition of new modules as testing needs evolve

The **OneTouch™ AT** Network Assistant is an all-in-one Gigabit Ethernet troubleshooter for copper, fiber optic and Wi-Fi networks. It provides a client view of network performance so you can resolve problems fast and complete deployment projects on time.

AIRCHECK WI-FI TESTER AND ACCESSORIES

FLUKE networks

Wi-Fi Troubleshooting Made Simple

- Dedicated, hand-held 802.11 a/b/g/n tester with instant-on technology
- Fully supports 2.4 and 5.0GHz frequency bands
- Rapidly performs Wi-Fi discovery to fully access current wireless security settings and network availability
- Intuitive interface allows quick checking of WiFi network usage by channel — identifies if it's 802.11 traffic or non-WiFi interference
- Robust and in-depth WLAN connection tests — from probing to DHCP request to ping
- Quickly identifies and locates access points, whether authorized or rogue
- Fully documents troubleshooting session, creates professional-quality reports
- Enables fast trouble ticket resolution or problem escalation to quickly solve frontline WiFi problems

Mfg. part no. AIRCHECK AirCheck™ Wi-Fi tester comes complete with USB cable, soft storage case, CD with AirCheck™ Manager software, Getting Started guide, and user manual.

CERTIFIBER PRO OPTICAL LOSS TEST SET

NEW FLUKE networks

- Versiv enables users to accomplish more than ever with a cable tester, accelerating every step of the testing process
- ProjX management system eases tasks from initial set-up of a job to system acceptance. It eliminates redundant steps, and ensures that all tests are completed correctly the first time, and every time
- Taptive user interface puts advanced data analysis and easy set-up and operation at the fingertips of technicians of all skill levels
- LinkWare management software provides unmatched analysis of test results and professional test reports
- Three-second Autotest optical loss measurement of two fibers at two wavelengths with distance measurement and optical loss budget calculation
- Provides automatic Pass/Fail analysis to industry standards or custom test limits
- Identifies incorrect test procedures resulting in negative loss readings
- Onboard (USB) inspection camera documents images of fiber optic end-faces
- Interchangeable power meter adapters available for all typical connector types (SC, ST, LC and FC) to enable the most accurate 1-jumper reference method
- Built-in visual fault locator for basic troubleshooting and polarity determination
- Dual wavelength measurement capability on a single fiber allows the tester to be used in applications that require only one fiber link
- Compliant with TIA-526-14-B and IEC 61280-4-1 Encircled Flux requirements with no additional equipment or procedures

The **CertiFiber Pro** Optical Loss Test Set (OLTS) helps cabling professionals accomplish more than ever. It's all about accurate, error-free certification, making jobs easier to manage and certifying fiber optic cabling to industry standards, faster. **CertiFiber Pro** OLTS complies with all applicable cabling standards, which call out the new Encircled Flux launch condition requirements for optical sources. It's not just for the expert technicians and Project Managers. Individuals of various skill levels can improve the set-up, operation, test reporting, and simultaneously manage diverse projects.

Mfg. Part No.	Description	Stock No.	Price Each
CFP-100-M 120	CertiFiber Pro Multimode OLTS Kit	96W1991	7950.00
CFP-100-S 120	CertiFiber Pro Singlemode OLTS Kit (Configured for testing LC Style)	96W1993	9950.00

DTX SERIES CableAnalyzer™ AND ACCESSORIES

FLUKE networks

- Exceeds Cat 5e/6/7 requirements
- Fast 9-second Cat 6 Autotest
- Fast diagnostics pinpoint faults and suggest fixes
- 900MHz capability for 10 Gig Ethernet, Class F, CATV
- Resident fiber modules allow one-button switching from copper to fiber
- Fast, reliable, and rugged
- Color display
- 12-hour batttery life
- Reduces certification costs by as much as 33% a year
- All models are upgradable to the top model

DTX series CableAnalyzers™ significantly reduces total time to certify by improving every aspect of testing. Three times faster and more accurate than other testers.

DTX SERIES MAINFRAMES AND PACKAGES

Mfg. part no. DTX-1800 CableAnalyzer™ includes DTX-1800 main unit and smart remote, LinkWare PC software, 128MB MMC card, Cat 6/Class E permanent link and channel adapters (2), Headsets (2), AC chargers (2), USB interface cable (mini-B), serial RS-232 cable (DB9 to IEEE 1394), user's manual and carrying case. **Mfg. part no. DTX-1200** CableAnalyzer™ includes DTX-1200 main unit and smart remote, LinkWare PC software, Cat 6/Class E permanent link adapters (2) Cat 6/Class E channel adapters (2), headsets for talk (2), AC chargers (2), carrying case, USB interface cable (mini-B), and a user manual.

Mfg. Part No.	Description	Stock No.	Price Each
DTX-1800 120	DTX-1800 CableAnalyzer	36J9968	10950.00
DTX-1800 120/GLD	DTX-1800 CableAnalyzer with 1 Yr of Gold Support	24W4892	11887.00
DTX-1200 120	DTX-1200 CableAnalyzer	62K4096	8730.00
KITS			
DTX-1800-MS 120	DTX-1800 with Multimode and Singlemode Fiber Modules	85K0633	23280.00
DTX-1800-MS120/GLD	DTX-1800 with Multimode and Singlemode Fiber Modules and 1 Yr of Gold Support	24W4894	25580.00
DTX-1800-M 120/GLD	DTX-1800 with Multimode Fiber Modules and 1 Yr of Gold Support	24W4893	16770.00
DTX-1800MS0120/GLD	DTX 1800 Copper/Fiber/OTDR Kit and 1 Yr of Gold Support	24W4895	36940.00
DTX-1800-E	DTX-1800 and Set of two DTX Encircled Flux Multimode Fiber Modules	72W1313	16050.00
DTX-1800-E 120/GLD	DTX-1800 and Set of two DTX Encircled Flux Multimode Fiber Modules and 1 Yr of Gold Support	72W1314	17610.00

FIBER MODULES

Mfg. Part No.	Description	Stock No.	Price Each
DTX-SFM2	Set of 2 DTX Gigabit Multimode Fiber Modules--850nm VCSEL and 1310nm Laser Sources	18M6085	7735.00

DTX SERIES NETWORK SERVICE MODULE

Mfg. part no. DTX-NSM network service module certifies cabling, verifies network service availability and link connectivity, and documents findings in one LinkWare report. Documentation provides clear evidence that the job was done right. Module plugs into the back of the **DTX series** CableAnalyzer main unit; *order separately above.*

Mfg. Part No.	Description	Stock No.	Price Each
DTX-NSM	Network Service Module	76K2751	1385.00

DTX SERIES OTDR MODULES

DTX-QUAD-OTDR 120	DTX 1800 Compact OTDR Kit	50M3542	12360.00

DTX SERIES ACCESSORIES

Mfg. part no. DTX-10GKIT enables testing and certification of twisted pair cabling for 10 Gigabit Ethernet deployments – whether it is an existing Cat 6 or newly installed Augmented Cat 6 cabling system. Includes two **mfg. part no. DTX-AXTLK1** communication modules, AxTalk Analyzer™ software, **mfg. part nos. DTX-PLA002S** and **DTX-CHA01AS**, and a total of 8 terminators (2 sets of **mfg. part no. DTX-AXTERM**).

Mfg. Part No.	Description	Stock No.	Price Each
DTX-10GKIT	DTX-1800 Alien Crosstalk Analyzer Kit	18M6086	3150.00
DTX-CHA002S	Set of two Cat 6A/Class E Channel Adapters	60R4045	345.00
DTX-COAX	DTX Series Coax Cable Adapter Kit	73J6920	810.00
DTX-TERA	TERA Adapter Kit	73J6927	1505.00
DTX-CHA011	TERA Channel Adapter	73J6918	295.00
DTX-PLA011	TERA Permanent Link Adapter	73J6926	580.00

CABLE TESTERS (FIBER)

VISIFAULT™ VISUAL FAULT LOCATOR

FLUKE networks

- Accelerates end-to-end fiber continuity checks
- Speeds fiber tracing and identification
- Simplifies fiber polarity verification
- Aids in location of fiber faults including tight bends, breaks and bad connectors
- Features continuous and flashing modes
- Connects to 2.5mm standard and 1.25mm SFF connectors
- Over 80 hours of battery life with two AA batteries

VisiFault™ Visual Fault Locator (VFL) traces optical fibers, verifies continuity and fiber polarity, and helps find breaks in cables, connectors and splices. The bright red laser light is easily visible from a distance. Continuous and flashing output modes makes identification easier. Ruggedly constructed with an energy-absorbing, impact-resistant case to ensure years of trouble-free use. A handy lanyard attachment and a carrying case make it easy to attach the VisiFault™ to your belt where it is readily available.

Mfg. Part No.	Description	Stock No.	Price Each
VISIFAULT	Visual Fault Locator	56J8969	341.00
NF380	1.25 VisiFault Adapter	56J8967	100.00

(83018)

CableIQ™ QUALIFICATION TESTER, KITS AND ACCESSORIES

FLUKE networks

- Qualifies — sees if existing cabling has the bandwidth to support voice, 10/100, VoIP or gigabit Ethernet
- Troubleshoots — shows why existing cabling cannot support the network's bandwidth requirement (e.g. crosstalk at 11 meters)
- Discovers — detects what's at the end of any cable and displays device configuration (Speed/Duplex/Pairing)
- Identifies unused switch ports that can be reallocated
- Graphically maps wiring configuration and shows distance to faults with intelligent wiremap
- Tests all copper cabling media: twisted-pair, coax, and audio cable

Mfg. part no. CIQ-100 CableIQ™ qualification tester is designed to meet the emerging needs of network technicians who need to upgrade to higher network speeds and troubleshoot connectivity problems. It allows network technicians to perform a series of troubleshooting steps to better isolate cabling from network problems and identifies whether insufficient cabling bandwidth is the cause of the problem. Supports UTP, STP, FTP, SSTP, RG6, RG59, audio and security type cable. Supported tests include wiremap, length, cable signal performance, digital and analog toner, Ethernet port detection and ID, analog phone and video signal detection, continuity, and cable fault finding. Measures crosstalk and impedance and compares against appropriate limits based on qualification test selected. Tester stores up to 250 qualification test results.

CableIQ™ TESTER AND KITS

Mfg. part no. CIQ-100 CableIQ™ qualification tester comes complete with remote adapter, CableIQ™ Reporter software CD, two RJ-45-RJ45 patch cords, USB cable, coax "F" push-on adapter, CD and user guides, softside carrying case and four AA batteries.

Mfg. Part No.	Description	Stock No.	Price Each
CIQ-100	CableIQ Qualification Tester	73J6912	1350.00

Mfg. part no. CIQ-Kit advanced IT kit includes CableIQ™ qualification tester with remote adapter, CableIQ™ Reporter software CD, Intellitone 200 digital probe, 6 remote office ID's, (2) RJ-45-RJ45 patch cords, USB cable, coax "F" push-on adapter, 75-ohm coax patch cord, RJ45/11 universal coupler, CD and user guides, test accessory soft pouch, hardside carrying case, and (4) AA batteries.

CIQ-KIT	CableIQ Advanced IT Kit	73J6909	1895.00

Mfg. part no. CIQ-KRQ residential qualifier kit includes CableIQ™ qualification tester, (2) RJ-45 patch cords, (2) RJ11 patch cords, USB and coax cable, bare wire and speaker wire adapters, coax BNC and RCA adapters, pack of 50 "Qualified" labels, CD and user guides, softside carrying case, and (4) AA batteries.

CIQ-KRQ	CableIQ Residential Qualifier Kit	44K0059	1360.00

Mfg. part no. CIQ-SVC service kit includes CableIQ qualification tester with remote adapter, LinkRunner Network Multimeter, IntelliTone 200 Probe, six remote office IDs, rugged carrying case and all needed batteries.

CIQ-SVC	CableIQ Service Kit	17M9683	2310.00

CableIQ™ ACCESSORIES

Mfg. part no. CIQ-Coax CableIQ™ coax adapter kit includes F, BNC, and RCA connectors.

CIQ-IDK24	CableIQ Remote Identifier Kit, Numbers 2-4	73J6907	275.00
CIQ-IDK57	CableIQ Remote Identifier Kit, Numbers 5-7	73J6908	275.00
CIQ-COAX	CableIQ Coax Adapter Kit	73J6906	25.00
CIQ-SPKR	CableIQ Speaker Wire Adapter	73J6911	65.00
CIQ-RJA	CableIQ RJ45/11 Modular Adapter	73J6910	50.00
CIQ-CIT	CableIQ Hardside Carrying Case	73J6905	90.00

SIMPLIFIBER PRO OPTICAL POWER METER AND FIBER TEST KITS

FLUKE networks

FTK1450

- Dual-wavelength testing – complete testing in half the time
- Additional wavelengths to include 1490 and 1625 – calibrated to extend from typical enterprise wavelengths for broader applications
- Min/Max – automated precision tracking of intermittent power fluctuations
- FindFiber – quick end-to-end cable routing identification
- CheckActive – audible tone and display icon alerts you to a live wire
- Saves 1000 results – large internal memory enables continuous testing and recording; fully compatible with our popular **LinkWare™** Cable Test Management Software
- Quickly locate cable fault, polarity, and connector problems with **VisiFault™ VFL***
- Inspect end-faces at 200x magnification with the **FT120 FiberViewer** or **FT500 FiberInspector Mini***

With new advanced capabilities that make testing simple, SimpliFiber® Pro Optical Power Meter and Fiber Test Kits are the best "go-to" kits for anyone involved in first-line optical fiber cabling installation and verification. Whether you are a fiber technician or contractor, our expertly configured kits contain all the tools necessary to quickly measure loss and power levels, locate faults and polarity issues, and inspect and clean connector end-faces. Industry-leading features such as single-port dual-wavelength testing and auto-wavelength detection, combined with time-saving capabilities such as CheckActive™, FindFiber™, and Min/Max make SimpliFiber Pro the best fiber test kit on the market.

OPTIFIBER® PRO OTDR

FLUKE networks

- Accelerate fiber certification with trace times as short as two seconds in Quick Test mode
- Maximize efficiency with a smartphone user interface that allows anyone to perform expert fiber troubleshooting and certification
- Quickly test datacenter fiber with pre-programmed settings
- Troubleshoot datacenter fiber links with short patch cables and many connectors
- Easily characterize all connectors, splices and areas of high loss with graphical EventMap™ view
- Increase return on investment by enabling OTDR project sharing among users and different jobs
- Reduce network downtime by quickly and precisely identifying faults on all fiber types
- Facilitate results reporting and management with integrated LinkWare™ software to generate detailed and standards compliant reports

OFP-100-S

As enterprises consume more storage resources and adopt higher bandwidth (40G, 100G) datacenter architectures, the resilience of the cabling infrastructure becomes highly dependent upon maintenance tools to ensure fiber reliability. **OptiFiber Pro** is the industry's first purpose-built OTDR that meets the unique challenges of an enterprise fiber infrastructure. With its simple smartphone user interface and powerful feature set, the **OptiFiber Pro** turns anyone into an efficient and expert premise fiber troubleshooter or installer.

FIBER QUICKMAP™ ONE-BUTTON MULTIMODE FIBER TROUBLESHOOTER

FLUKE networks

- One-button testing – can be used straight out of the box with no user-setup required
- Six-second test time, eliminating blind troubleshooting that can last hours
- Locate multiple incidents in the channel to provide full visibility of any potentially problematic links and connections
- Locate high loss incidents or breaks, the most common causes of multimode fiber failure
- Locate and measure high reflective incidents, which cause poor network performance with bit error rates
- Various kit configurations include additional diagnostics tools such as power meters, sources, and fiber inspection microscopes to facilitate Fiber Best Practices and to boost the troubleshooting capability of technicians

Fluke Networks' **Fiber QuickMap™** is an enterprise fiber troubleshooter that quickly and efficiently locates connections and breaks in multimode fiber. By instantly providing distances to failures such as high loss and high reflectance incidents, **Fiber QuickMap™** is the must-have troubleshooter for any technician who works with fiber.

DSX-5000 CABLEANALYZER

FLUKE networks

- Versiv enables users to accomplish more than ever with a cable tester, by accelerating every step of the testing process
- ProjX management system eases tasks from initial set-up of a job to system acceptance. It eliminates redundant steps, and ensures that all tests are completed correctly the first time, and every time.
- Taptive user interface puts advanced data analysis and easy set-up and operation at the fingertips of of technicians of all skill levels.
- LinkWare management software provides unmatched analysis of test results and professional test reports
- The **DSX** reduces the time required to fix cabling faults with Dedicated Diagnostics, a simple test that locates the problem
- Ten second Cat 6A test time contributes to the fastest way to gain certification
- Graphically displays the source of failures including crosstalk and distance to shield faults for faster troubleshooting
- Manage up to 12,000 test results with full graphics
- Capacitive touchscreen allows quick tester setup with easily selectable cable types, standards and testing parameters
- 1 billion links reported on LinkWare management software

The **DSX CableAnalyzer** copper test solution enables testing and certification of twisted pair cabling for up to 10 Gigabit Ethernet deployments and will handle any cabling system whether it is a Cat 5e, 6, 6A or Class FA. Certifying a cable is one part of a process that starts with system design and ends with system acceptance. The faster that process goes, the more profitable you'll be. Unfortunately, there are a lot of things that slow the process down - setting up the tester incorrectly, testing to the wrong limits, waiting for skilled technicians to analyze and troubleshoot failures, misinterpretation of results, and producing test reports that customers can not understand. As part of the Versiv cabling certification product family, the **DSX CableAnalyzer** provides accurate, error-free certification. In the installation business there are multiple teams, varying media types and multiple testing requirements. The difference between profitability is just a few percentage points. The **DSX** certifies copper cabling, complies with all standards including Level V accuracy, making jobs easier to manage, and getting to system acceptance faster. It's not just for the expert technicians and Project Managers. Individuals of various skill levels can improve the set-up, operation, test reporting, and simultaneously manage diverse projects.

MICROMAPPER™

FLUKE networks

- Tests twisted pair cable for open circuits, shorts, crossed pairs, reversed pairs and split pairs
- Easy-to-read fault display
- Tone generator for use with IntelliTone™ Probe
- Shield integrity testing
- Remote unit enables 1-person testing of installed cable
- Small remote unit slides into master unit for convenient and safe storage
- Automatic Sleep Mode and power switch decreases power consumption
- Low-battery LED
- 1-year manufacturer's warranty

MicroMapper™ is a compact, handheld cable tester and toner designed to allow network professionals to quickly and easily verify the integrity of an Ethernet twisted-pair cabling installation. **Mfg. part no. MT-8200-49A** includes MicroMapper™, MicroMapper™ remote, patch cord, carrying case, 6V battery and user guide.

MICROSCANNER2 CABLE VERIFIER

FLUKE networks

- Length meter shows distance to termination, open or short
- PoE detection rules out insufficient power
- Detail mode gives additional test status information
- Intuitive icons show what's at the end of any cable
- Modular port accepts RJ45 and RJ11 plugs
- Coax connector for video and audio testing

MS2-KIT

MS2-100

MicroScanner2 displays all key test results -- wiremap, pair lengths, distance to fault, cable ID and far-end devices -- on one screen. Both the main unit and the far-end identifiers can be used to test telephone jacks, Ethernet jacks, and CATV outlets right out of the box. Built-in Intellitone digital and analog toning to precisely locate virtually any wire pair. **Mfg. part no. MS2-KIT** Microscanner2 kit includes: Cable Verifier, remote identifiers #2-7, Intellitone Pro 200 probe, shielded twisted pair RJ45 patch cord, RJ11 patch cord, clip-set RJ45 to8 alligator clip bare wire adapter, F coax push-on patch cord, accessory soft pouch, batteries and operator guides, all packaged in a deluxe carry case.

INTELLITONE™ PRO KITS WITH TONER AND PROBE

FLUKE networks

- InteliTone digital processing eliminates noise and false signals
- New SmartTone™ analog toning precisely isolates individual wire pairs
- Locates cables safely and effectively on active networks
- Verifies twisted-pair installation with visual end-to-end continuity test
- Identifies, diagnoses, and troubleshoots datacom/telecom services

INTELLITONE™ Pro 200 also features:

- Identifies and diagnoses 10/100/1Gb Ethernet link connectivity with NIC/Hub indication
- Identifies and diagnoses POTS with Line 2 service and polarity
- Validates twisted pair installation with Cablemap capability, which identifies common cable miswires

IntelliTone™ Pro's breakthrough digital and analog toning finds cables other toners/probes can't. **Mfg. part no. MT-8200-50A** IntelliTone Pro 100 toner and probe kit includes: toner and probe, coax F connector adapter, RJ-11 and RJ-45 patch cable, test leads with alligator clips, lanyards, owner's CD, quick-start guide and two 9V batteries. **Mfg. part no. MT-8200-60A** IntelliTone Pro 200 toner and probe kit includes: toner and probe, coax F connector adapter, two RJ-11 and two RJ-45 patch cable, test leads with alligator clips, lanyards, owner's CD, quick-start guide and two 9V batteries.

POCKET TONER®

FLUKE networks

- Low voltage protection for both the main body and detachable toner unit
- Dual audible indicators
- Bi-gender adaptable toner section
- Removable push-on connector
- Removable Speed 81™ connector
- Lightweight, durable anodized aluminum
- Auto shut off
- Replaceable parts
- Uses one AAA battery
- One-year warranty

PTNX1

PTNX2

PTNX8

Pocket Toner® NX1 is ideal for identifying and testing low voltage, singular coax cables for continuity, opens and shorts. Low voltage protection and verification up to 52V. **Pocket Toner® NX2** offers all the features of the **NX1** plus more. The **PTNX2** tests VDV cables for continuity, AC and DC voltage (low voltage protection and verification up to 52V), opens, shorts, 50-75Ω termination and polarity with the optional Dial Tone Detective™ adapter. The **Pocket Toner® NX2** easily confirms if there is AC or DC voltage, an open circuit on the line, if a short exists or if continuity is achieved. **Pocket Toner® NX2's** key feature is the ability to know if the cable being tested is connected to any device with a voltage output of up to 52V. **Pocket Toner® NX8** advanced and versatile **Pocket Toner** tool tests VDV cables 8 times faster. It has all the features of the **NX1** and **NX2** including the ability to test eight outlets at once. The eight segment LED display shows if a short exists, if there is an open circuit, AC or DC voltage (up to 52V), simple, direct continuity or which of the eight ID caps matches the line being tested.

TS PROFESSIONAL SERIES VOICE, DATA AND VIDEO TEST SETS

FLUKE networks

TS23-P-01

TS53-P-01

TS54-A-09-TDR

TS23 PRO gives voice, data and video professionals and communication service provider technicians all the functionality needed in a telephone test set. **TS23 PRO** performs four essential tests and includes our patented RainSafe™, DropSafe™ and DataSafe™ technology all in our newly-designed, ruggedly-built case. **TS53 PRO** delivers voice, data and video professionals and communication service provider technicians the seven-essential testing functions needed in one telephone test set. **TS53 PRO** contains all the latest advancements to our patented RainSafe™, DropSafe™ and DataSafe™ technology all in our newly-designed, ruggedly-built case. **TS54 TDR** is perfect for voice, data and video professionals and communication service provider technicians who need a best-in-class test set combined with a powerful TDR and toner. Buying the **TS54 TDR** means you no longer need to carry a separate TDR, toner, pair identifier and test set. **TS54** not only delivers 10-testing functions but also delivers 20 percent more extreme weather protection with the latest advancements to our patented RainSafe™, DropSafe™ and DataSafe™ technology. This means the **TS54** is weatherproof and rugged and able to butt-in on live DSL lines to test POTS quality without crashing data service. **TS54 TDR** gives you the power and functionality you need to keep up with an ever-changing network.

TS®30 SERIES TELECOM TEST SET

FLUKE networks

TS®30 series telecom test set provides superior quality at an affordable price. With its high-impedance monitor for DataSafe™ operation, technicians can clip onto a line in monitor mode without disrupting data. Unsurpassed RainSafe™ protection standards and DropSafe™ durability enables these test sets to keep working even in the toughest environments. New weatherproofing provides enhanced resistance to severe weather conditions.

PRO3000 ANALOG TONE AND PROBE KIT

FLUKE networks

Tone Generator features:

- SmartTone technology
- Send tone signal up to 10 miles on most cables
- Line cord features angled bed-of-nails clips and ruggedized RJ-11 plug
- External switch allows selection of solid or alternating tone options
- Continuity testing
- Line polarity confirmation

Probe features:

- Loud large speaker amplifies tone through walls, enclosure, wood or plaster
- Easy-to-use adjustable volume control dial
- "Quick-twist" tip for easy replacement
- Includes spare tip inside Pro3000 Tone and Probe Kit

Pro3000 Analog Tone and Probe Kit is used for toning and tracing bare wire on non-active networks, and specifically for identifying individual pairs with SmartTone™ technology. SmartTone™ provides five distinct tones for exact pair identification.

PEL 100 SERIES POWER AND ENERGY LOGGERS

CE

AEMC® INSTRUMENTS

- Simple to use, single-, dual- (split-phase) and three-phase (Y, Δ) power & energy loggers
- Provides all the necessary functions for Power and Energy data logging for 50Hz, 60Hz, 400Hz and DC distribution systems
- Current measurements from 200mA up to 10,000A using flexible current sensors
- Automatic recognition of the connected current sensors/probes
- Power measurements: VA, W and var
- Energy measurements VAh, Wh (source/load indication) and varh (including quadrant indication)
- Record cost of energy usage
- Power Factor (PF), Cos (φ), Tan (Φ) and DPF
- Total Harmonic Distortion (THD) for voltages and currents
- Harmonics up to the 50th order for 50/60Hz voltages and currents and 7th order for 400Hz
- Simultaneous RMS measurements of each phase @ 128 samples/cycle and DC
- Bright blue, four line LCD on **Model PEL 103** (3 phases shown simultaneously)
- Storage of measured and calculated values on a SD-Card or SDHC-Card
- Configuration of current and voltage ratios to external PT and CT ratios
- USB, LAN, and Bluetooth communication
- Includes DataView® software for data storage, real-time display, analysis and report generation with supplied pre-defined or custom templates

POWER QUALITY ANALYZERS

FLUKE-345 POWER QUALITY CLAMP METER

FLUKE®

- Clamp-on measurement without breaking the circuit
- Accurate in noisy environments even with distorted waveforms
- Datalogging power parameters for minutes or months
- Troubleshoot, analyze and log harmonics digitally or graphically
- Capture and analyze nuisance tripping, from 3 to 300 seconds
- 3-Phase power — built-in capability for balanced loads
- View graphs and generate reports with Power Log software
- 600V CAT IV safety rating, CSA certified, CE compliant

Mfg. part no. FLUKE-345 power quality clamp meter features a bright, color LCD display with 2-level backlight to analyze the harmonic spectrum, a low-pass filter to remove high frequency noise, and a high EMC immunity design. Ideal for commissioning, trouble-shooting and measuring modern electrical switching loads, such as variable frequency drives, electronic lighting and UPS systems. Additionally, the Hall Effect measurement system makes measurement of DC current possible without the need to break the circuit, and the internal memory enables long-term datalogging for analysis of trends or intermittent problems. Meter comes complete with Power Log software, test leads and probes, alligator clips, USB cable, international AC adapter/battery eliminator, soft carrying case, printed user manual and multi-language manual on CD.

SPECIFICATIONS

Current Measuring Range	0 to 2000A DC or 1400 AC rms
Voltage Measuring Range	0 to 825V DC or AC rms
Watts Measuring Range (Single- and Three-Phase)	0 to 1650kW DC or 1200kW AC
VA Measuring Range (Single- and Three-Phase)	0 to 1650kVA DC or 1200kVA AC
VAR Measuring Range (Single- and Three-Phase)	0 to 1250kVAR
Frequency (From Current or Voltage Sources)	15Hz to 1kHz
Jaw Opening/Capacity	2.36"/2.28" Dia.
Overall Size	12L x 3.75W x 2"H

FLUKE VR1710 VOLTAGE QUALITY RECORDER

FLUKE®

- Fast and easy recording of voltage trends, dropouts, and power quality
- Easy to use
- Continuous recording of all values with no gaps
- Clear graphical summary of data and quick overview of key power quality parameters
- Min, Max, Average RMS values (1/4 cycle) with time stamps
- Actual transient display (>100 µs) with time stamp
- Flicker according to EN 61000-4-15, individual harmonic and THD values with trends
- Statistical analysis of voltage event
- Includes PowerLog software package for quick download, analysis, and automatic reporting

Mfg. part no. Fluke VR1710 is a single-phase, plug-in voltage quality recorder for detecting and recording voltage quality problems. Voltage quality parameters including RMS average, transients, flicker, and harmonics up to the 32nd are recorded using a user-selected average period from 3 seconds to 10 minutes. The Fluke VR1710 satisfies the needs of maintenance and facilities management personnel in industrial, utilities, and large service organizations where reliable voltage quality is essential.

Specifications	Fluke VR1710
Operating Volage	70V to 300V
MIN/MAX/AVG RMS value	Resolution 0.125
Number of Events	175,000
Voltage Resolution	0.125V
Harmonics Measurement	EN 610000-4-7 (up to 32nd)
Number of Recording Channels	1 Phase to Neutral 2 Phase/Neutral to Ground
Frequency Range	50 Hz ± 1 Hz and 60 Hz ± 1 Hz
Harmonics Measurement	Cat II 300V

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-VR1710	Plug-In Voltage Quality Recorder	71M3716	999.95

FLUKE 430 SERIES II THREE-PHASE POWER QUALITY & ENERGY ANALYZERS

FLUKE®

FLUKE-434-II/BASIC

430 Series II Power Quality and Energy Analyzers offer the best in power quality analysis and introduce, for the first time ever, the ability to monetarily quantify energy losses. The new **Fluke 434, 435 and 437 Series II** models help locate, predict, prevent, and troubleshoot power quality problems in three-phase and single-phase power distribution systems. Additionally, the Fluke-patented energy loss algorithm, Unified Power Measurement, measures and quantifies energy losses due to harmonics and unbalance issues, allowing the user to pinpoint the origin of energy waste within a system.

FLUKE-43B POWER QUALITY ANALYZER

FLUKE®

Mfg. part no. FLUKE-43B power quality analyzer performs the measurements you need to maintain power systems, troubleshoot power problems and diagnose equipment failures. Combines capabilities of a power quality analyzer, multimeter and scope. Calculates 3-phase power on balanced loads, from a single-phase measurement. Measures power harmonics, captures voltage sags, transients and inrush current. Monitoring functions help track intermittent problems. Single keystroke toggle for most commonly-used power quality modes. Records 2 selectable parameters for up to 16 days. Flukeview software provides a complete harmonic profile up to 51st harmonic. Measures resistance, diode voltage drop, continuity, and capacitance. Includes voltage probes, 500A current clamp, Flukeview™ software and optically isolated interface cable. 3-year manufacturer's warranty on the **FLUKE-43B** analyzer, 1-year manufacturer's warranty on accessories. *Order* **mfg. part no. 1400S** *AC current clamp separately below.*

FLUKE 1730 THREE-PHASE ELECTRICAL ENERGY LOGGER

NEW

FLUKE®

- Voltage, current, power, power factor and associated values enable energy saving strategies to be implemented
- Perform convenient in-the-field analysis and data checks with full graphical display
- All measured values are automatically logged and can be reviewed during logging and before downloading for on-the-go analysis (more than 20 separate logging sessions can be stored on the instrument)
- Quick, guided, graphical setup ensures you're capturing the right data every time, and the intelligent verification function indicates correct connections have been made, reducing user uncertainty
- Complete "in-the-field" setup through the front panel means there's no need to return to the workshop for download and setup or to take a computer to the electrical panel
- Power instrument directly from the measured circuit eliminating the need to find a power outlet while allowing the instrument to be secured safely inside electrical panels
- One USB port for PC connection and another for fast, simple download to standard USB thumb drives, or other USB devices
- Designed to fit in tight spaces and panels
- 600 V CAT IV/1000 V CAT III rated for use at the service entrance and downstream
- Flat voltage cable and thin flexible current probes ensure easy installation even in tight spaces
- Four-hour operating time (backup time) per charge on lithium-ion battery
- Safeguard against theft with a Kensington lock
- Download, analyze and automate reporting for a complete picture of energy saving potential

The new **Fluke 1730** Three-Phase Electrical Energy Logger introduces a new simplicity to discovering sources of electrical energy waste. Discover when and where energy in your facility is being consumed; from the service entrance to individual circuits. Profiling energy usage across your facility helps you identify opportunities for energy savings, and provides you with the data you need to act on them. The new Energy Analyze software package allows you to compare multiple data points over time to build a complete picture of energy usage, which is the first step to reduce the cost of your energy bill.

FLUKE-1735 POWER LOGGER-ANALYST

IEC 1010-1 600V CAT IV

FLUKE®

- Record loading according to NEC 30-day load study requirement
- Monitor demand at 15 minute or user-defined averaging periods
- Prove the benefit of efficiency improvements with energy consumption tests
- Measure harmonic distortion caused by electronic loads
- Improve reliability by capturing voltage dips and swells from load switching
- Easily confirm instrument setup with color display of waveforms and trends
- Measure all three phases and neutral with included 4 flexible current probes
- View graphs and generate reports with included Power Log software
- Compact, rugged design with IP65 case
- Rated 600V CAT III
- 2-year manufacturer's warranty

Fluke 1735 Power Logger-Analyst is the ideal electrician's tool for conducting load studies according to National Electric Code 220.65. Sets up in seconds with the included flexible current probes and color display. Logs most electrical parameters and harmonics as well as capturing voltage events. Includes soft carrying case, 4 flexible current probes (15A/150A/3000A), Power Log software, voltage leads and clips, color localization set, PC interface cable , universal AC adapter, printed English manual, and multi-language manual CD.

DIGITAL INSULATION RESISTANCE TESTERS

AMPROBE®

AMB-45

AMB-50

AMB-55

Cut unscheduled downtime and reduce shock hazards by testing wires, cables, transformers or entire electrical systems. Amprobe Industrial High-Voltage Insulation Testers have all necessary features for advanced professional insulation diagnostics. Automated calculation of PI, DD and DAR, combined with a possibility to perform a step voltage test make these instruments suitable for the most demanding customers and applications. Large LCD display allows real time R(t) graphs to be displayed. Windows compatible PC Software and either RS232 or USB communications ports serve for connecting the instrument to the PC and management of the recorded test data.

1503 AND 1507 INSULATION TESTERS

FLUKE®

- Automatic calculation of Polarization Index and Dielectric Absorption Ratio saves both time and money (**mfg. part no. 1507** only)
- Compare (Pass/Fail) function makes repetitive tests simple and easy (**mfg. part no. 1507** only)
- Remote test probe makes repetitive or hard-to-reach testing easier
- Live circuit detection prevents insulation test if voltage >30V is detected for added user protection
- Auto-discharge of capacitive voltage for added user protection
- AC/DC voltage: 0.1V to 600V
- 200mA continuity
- Resistance: 0.010hm to 20.00KOhms
- Large, backlit digital display for easy readability
- CAT III – 1000V, CAT IV – 600V overvoltage category rating for added user protection
- One-year manufacturer's warranty
- Recommended accessories - TL225 Test Leads, C25 Case, TPAK Meter Hanger

1503 and 1507

Mfg. part nos. 1503 and **1507** insulation testers are compact, rugged, reliable, and easy to use. Multiple test voltages make them ideal for troubleshooting, commissioning, and preventative maintenance. Additional features save both time and money. Included accessories: remote probe, test leads and probes, alligator clips. Four AA alkaline batteries (NEDA 15A or IEC LR6) for at least 1000 insulation tests. These insulation testers accept **mfg. part no. TPAK** ToolPak magnetic tool hanger to free your hands for other work. *Order magnetic tool hanger and carrying cases separately below.*

INSULATION TESTERS

Mfg. Part No.	Insulation Test Range	Insulation Test Voltages	Stock No.	Price Each
1503	0.1Ω-2000MΩ	50V, 100V, 250V, 500V, 1kV	57K0680	474.96
1507	0.01MΩ-10GΩ	50V, 100V, 250V, 500V, 1kV	57K0681	494.96

INSULATION & GROUND RESISTANCE TESTERS

1550C/1555 INSULATION RESISTANCE TESTERS

FLUKE®

- Test voltages to up 10 kV and save time by trending on the spot only with Fluke Connect
- CAT III 1000 V, CAT IV 600 V safety rating
- Warning function alerts the user that line voltage is present and gives the voltage reading up to 600V ac or dc for increased user safety
- Selectable test voltages in 50 V steps from 250 V to 1000 V, and 100 V steps above 1000 V
- Measurements can be stored in up to 99 memory locations, with each location assigned a unique, user defined, label for easy recall
- Long battery life gives the user over 750 tests between charges
- Automatic calculation of Dielectric Absorption (DAR) and Polarization Index (PI) with no additional setup
- Guard system eliminates the effect of surface leakage current on high-resistance measurements
- Large digital/analog LCD for easy viewing
- Capacitance and leakage current measurement
- Ramp function for breakdown testing
- Resistance measurements up to 2TΩ
- Timer settings up to 99 minutes for timed tests
- 3-year warranty

The Fluke **1555** and Fluke **1550C** insulation resistance testers, offer digital insulation testing up to 10 kV, making them ideal for testing a wide range of high voltage equipment including switchgear, motors, generators and cables. Fluke insulation testers can now conduct the entire range of test voltages specified in IEEE 43-2000 with a best in class, 3 year warranty and CAT IV 600 V safety rating. With measurement storage and PC interface, the **1555** and **1550C** are perfect tools for preventative or predictive maintenance programs designed to identify potential equipment failures before they occur. The Fluke Connect mobile app is an easy to use, advanced wireless system for capturing and trending anomalies for troubleshooting, commissioning and preventative maintenance of insulation resistance applications. **Now compatible with Fluke Connect™ Mobile App.**

FLUKE 1577 AND 1587 INSULATION MULTIMETERS

FLUKE®

All models:
- A multimeter and insulation resistance tester all in one meter!
- Large backlit display
- Auto-discharge of capacitive voltage
- Auto power off
- Live circuit detection to prevent insulation test when voltage is >30V
- CAT III-1000V, CAT IV-600V measurement category
- 3-year warranty
- Recommended accessories: C25 Case, TLK-225 Accessory Set, i1010 Current Clamp

FLUKE 1587 Only:
- Filter for motor drive measurements
- Capacitance, Diode Test, Temperature, Min/Max, Frequency (Hz)
- Also includes K-type thermocouple

FLUKE 1587

FLUKE 1577 and **1587** insulation multimeters combine a digital insulation tester with a full-featured digital multimeter in a single, compact handheld unit. Provides maximum versatility for both troubleshooting and preventative maintenance. Rugged, reliable and easy to use. Ideal for work on motors, cables and switch gear. Included accessories: Remote probe, test leads and probes, alligator clips, and rugged utility hard case.

Mfg. Part No.	FLUKE 1577	FLUKE 1587
DMM functions:	AC/DC voltage, DC mV, AC/DC mA, Resistance (0.1Ω-50MΩ), Continuity	
Insulation test:	0.1MΩ to 600MΩ	0.01MΩ to 2GΩ
Insulation test voltages:	500V, 1000V	50V, 100V, 250V, 500V, 1000V

FLUKE-1623-2 AND 1625-2 SERIES GEO EARTH GROUND TESTERS

FLUKE®

- 3- and 4-pole Fall of Potential, earth resistance loop testing
- 4-pole Soil Resistivity testing
- Selective earth ground rod testing using 1 clamp
- Stakeless earth ground rod testing using 2 clamps
- IP56 rated for outdoor use
- Professional carrying case
- USB data storage and transfer
- Automatic Frequency Control (**1625-2**)
- R° measurement (**1625-2**)
- Adjustable limits - for quicker testing (**1625-2**)

The new Fluke **1623-2** and **1625-2** GEO Earth Ground Testers offer data storage and download capabilities via USB port. World class accessories will simplify and speed up testing time. Includes tester, user's manual, batteries, quick reference guide, 2 test keads and USB cable. Kits contain the following additional accessories: 2 clamps (1 source, 1 sensing), **C1620** professional carrying case, 4 earth ground stakes and 3 color coded cable reels.

Mfg. Part No.	Description	Stock No.	Price Each
FLUKE-1623-2 KIT	Basic GEO Earth Ground Tester Kit	29X1564	2699.95

U1450A/U1460A SERIES INSULATION RESISTANCE TESTERS

NEW

KEYSIGHT TECHNOLOGIES

- Remote testing coupled with report generation capability
- 50 V/100 V/250 V/500 V/1000 V test voltages (1)
- Adjustable test voltages from 10 V up to 1.1 kV (2) **
- Up to 260 GΩ insulation resistance range
- Full-featured 4.5 digit OLED DMM (66,000 counts) (3) *
- Timed/PI/DAR test (4)
- IP 67 certified – waterproof and dust proof (5)
- Tested to withstand a 3 meter (10-ft) drop
- (–40 °C to +55 °C) operating temperature range **
- * **U1461A** only
- ** **U1453A** and **U1461A** only

5kV AND 10kV INSULATION RESISTANCE TESTERS

Megger.

- Industry best guard terminal accuracy
- Compact and lightweight for easy transport and use
- PI, DAR, DD, SV and ramp test
- Unique dual case design provides additional user protection
- Lithium-ion battery - extended capacity, rapid charge
- Advanced memory with time/date stamp
- CATIV 600 V safety rating on all terminals

The **MIT515** (5 kV), **MIT525** (5 kV) and **MIT1025** (10 kV) are designed based on Megger's extensive knowledge of insulation testing (100+ years of experience) and significant feedback from actual end users. Megger has taken the best insulation testers in the world and improved them to add functionality, make them easier to use and easier to transport. They include Megger's patented digital/analog display (real-time pointer movement), a CATIV safety rating at all terminals and a unique dual case design.

10A MICRO-OHMMETER

AEMC® INSTRUMENTS

- Test currents from 1mA to 10A
- RTD temperature probe to check tested sample (optional)
- Selectable metal types
- Automatic and manual temperature correction
- Two programmable alarm set points
- Selectable inductive or resistive test modes
- Automatic multiple test mode
- Large multi-line display
- Local or remote test setup and control
- Direct printout
- Internal rechargeable batteries
- Rugged double-insulated waterproof case
- Software included for data storage, real-time display, analysis, and report generation

Mfg. Part No.	6240	6250
Range:	1μΩ to 400Ω range dependent	0.1μΩ to 2500Ω range dependent
Accuracy:	0.25% ± 2cts	0.05% + 1 to 300μΩ range dependent

TWISTGUARD™ PREMIUM TEST LEADS AND PROBES

Genuine Fluke Accessory

FLUKE®

TP175 TL175

- Extendable tip sheath provides correct tip exposure for most measurements
- New WearGuard™ lead wire wear indication. Inner contrasting color exposed when leads are worn **mfg. part no. TL175**
- Heavy duty strain relief tested to over 30,000 cycles for unmatched reliability
- Threaded probe tip accepts premium alligator clips and other specialty probes
- Double insulated silicone leads, withstands high temperatures and remain flexible in cold temperatures **mfg. part no. TL175**
- Probes always show correct category rating for tip being used
- TL175E includes removable 4 mm lantern tips for versatility
- Compatible with all instruments that accept standard 4 mm shrouded banana plugs
- Test lead length 48"/1.2m **mfg. part no. TL175**
- Ratings: CAT III 1000 V, CAT IV 600 V, CAT II 1000 V, 10 A max., Pollution Degree 2
- Conforms to EN61010-031

Patented extendable tip sheath meets new electrical safety requirements to reduce tip exposure while providing the flexibility you need for most measurements. Just twist the top of the probe body to extend or reduce tip exposure.

TEST LEAD SETS AND PROBE LIGHT KIT

FLUKE®

TLK287 ELECTRONIC TEST LEAD SET

- The TLK287 is TLK287 Electronics Master Test Lead Set
- Precision electronic probes with multiple spring-loaded sharp tips to maximize contact with SMD test points
- Micro-grabbers and leads to enable fin SMD test
- Mini-alligator clips, grabbers, and probes for virtually every electronics need

Mfg. Part No.	Description	Stock No.	Price Each
TLK287	Electronics Master Test Lead Set	70M8699	142.46

TLK 289 INDUSTRIAL MASTER TEST LEAD SET

- SureGrip™ alligator clips, grabbers, hook clips and industrial test probes for dependable contact with a variety of test points
- Magnetic hanger for convenient suspension of your DMM from a metal surface
- Temperature adapter with K-Type thermocouple for direct temperature measurement with your DMM's temperature measurement functions
- Protective soft case for your DMM and all its accessories

Mfg. Part No.	Description	Stock No.	Price Each
TLK289	Industrial Master Test Lead Set	70M8700	149.95

TL75 HARD POINT™ TEST LEAD SET

- Set Includes: One Pair (Red, Black) Comfort Grip Probes with PVC Insulated, Leads with Right-Angle, Shrouded Banana Plugs
- Recommended for General-Purpose Measurements
- Rating: Dual Safety Rated CAT III 1000V and CAT IV 600V
- UL listed

Mfg. Part No.	Description	Stock No.	Price Each
TL75	Hard Point™ Test Lead Set	44F622	22.45

TL71 PREMIUM TEST LEAD SET

- Set Includes: One Pair (Red, Black) Comfort Grip Probes with Silicone Insulated, Right-Angle Test Leads
- Replacement Test Leads for Series 80 IV DMMS, 280 series
- Recommended for μV Measurements
- Rating: Category III, 1000V, 10A
- UL listed

FLUKE TEST LEADS AND CLIPS

FLUKE ®

AC175 AC89

AC175 ALLIGATOR CLIPS
- One Pair (Red, Black) Safety Grip, Spring Loaded Hook Clips
- Hook Opening is 10mm x 2mm
- Rating: Category III, 1000V, 3A
- Used with types TL22 and TL24 Test Leads

Mfg. Part No.	Description	Stock No.	Price Each
AC175	Alligator Clip Set	05W4571	24.71

AC89 HEAVY DUTY INSULATION PIERCING TEST CLIP
- One Pair (Red, Black) Slender Probe Bodies for Probing Closely Spaced or Recessed Terminals
- Hard, Stainless Steel Probe Tips
- Rating: Category III, 1000V, 10A
- Type TP1 Has a Flat Blade Design to Hold Securely in Electrical Wall Sockets (Not for Europe)
- Type TP2 Has 2mm Diameter Tip for Electronics Work
- Type 38 has Insulated Probe Tip (Designed to Meet GS38 Specification for United Kingdom). For Use with Types TL22 and TL24 Test Leads

Mfg. Part No.	Description	Stock No.	Price Each

SUREGRIP FUSED TEST PROBE

FLUKE ®

Features:
- Built in fuses for additional measurement protection
- 2mm threaded probe tips include removable 4 mm spring contacts and removable insulated caps for probing closely spaced leads
- CAT III 1000 V, CAT IV 600 V, 10 A rating
- Operating temperature -20 °C to 50 °C (-5 °F to 120 °F)

SureGrip Fused Test Probes with built-in replaceable fuses for additional measurement protection. If the probe fuse does blow, these fused test probes will still allow the meter to indicate live voltage, helping to prevent a possible misreading of no voltage present. These modular probes mount onto any standard modular test leads, for instance the Fluke TL221, TL222, or TL224. Rated to CAT III 1000V, these probes have removable tip guards for reduced probe tip exposure.

SUREGRIP FUSED TEST PROBE & TEST LEAD SET

FLUKE ®

Features:
- Built in fuses for additional measurement protection, 1000 V, 11 A with 20 kA interrupt rating
- Probes allow indication of live voltage even with blown fuse
- 2 mm threaded probe tips include removable 4 mm spring contacts and removable insulated caps for probing closely spaced leads
- TL224 leads are right angle connector on one end and straight connector on the other with reinforced strain reliefs, 1.5 meter silicone – insulated wire resists heat and cold
- Operating temperature – 20 °C to 50 °C (-5 °F to 120 °F)
- CAT III 1000 V, CAT IV 600 V, 10 A rating

SureGrip Fused Test Probe and Test Lead set with built-in replaceable fuses for additional measurement protection. If the probe fuse does blow, these fused test probes will still allow the meter to indicate live voltage, helping to prevent a possible misreading of no voltage present. These modular probes ship with the Fluke TL224 silicone test leads. Rated to CAT III 1000 V, these probes have removable tip guards for reduced probe tip exposure.

DELUXE DMM TEST MAXI KIT

Pomona®

Mfg. part no. 5677 is ideal for Test and Measurement Scenarios using DMM's. Includes silicone insulated 4ft (1.2m) leads with right angle plug, modular probe set with replaceable tips, replacement tips set, Retractable tip test probe set, test lead coupler set, medium alligator clip set, large alligator clip set, spade lugs, IC probe tip adapter, Minigrabber® test clip leads, Minipincer® test clip leads, and Nylon storage pouch.

Mfg. Part No.	Description	Stock No.	Price Each
5677B	Deluxe DMM Kit	30C4814	132.50

(5328)

BASIC ELECTRONIC DMM TEST LEAD KIT

RoHS Compliant Available

Pomona®

Nickel plated brass tip offers high conductivity for precision measurements. Contains 2 each test probe leads and alligator clips, one black, one red. Also includes two pieces of dogleg micro tips. Supplied in a reusable plastic pouch.

MAXIGRABBER® TEST CLIP SETS

RoHS Compliant Available

Pomona®

5910B 5911B

5912B 5913

Rated to IEC 1010-2-031 CATIII 1000V, 10A (except **mfg. part no. 5913**, IEC 1010-2-031 CAT III 1000V 5A). Each set contains one black and one red clip.

Mfg. part nos. 5910B, 5911B and **5912B** feature a long shaft that is ideal for electronic, electrical and industrial applications where access to hard to reach high voltage test points is a requirement. Safety sheathed jack mates to Pomona's **5907A, 5908A** and **5909A** flexible test leads for digital multi-meter interfacing. **Mfg. part no. 5910B** pincer can securely grab a 0.16″ (4mm) max. O.D. terminal post. **Mfg. part no. 5912B** clip jaws securely grip wires and test points for solid contact with conductors.

Mfg. part no. 5913 pierces wire up to 0.14″ diameter and is for use with 23-16 AWG wire. Compatible with all Pomona banana plug leads. Sheathed 4mm receptacle accepts shrouded and unshrouded banana plugs.

Mfg. Part No.	Description	Stock No.	Price Each
5910B	Test Clip Set with Pincer	73K9952	25.80

LOW EMF PATCH CORDS

RoHS Compliant Available

Pomona®

1693-36-0

5291A-12-2

5295-36-0

All products have 12 AWG wire. Spade Lug are gold plated Electrolytic Tough Pitch (ETP) 110 Copper Alloy, ½ hard. Banana plug bodies are gold plated tellurium copper; Spring are gold-plated beryllium copper. Rated up to 1000V per IEC1010-2-031, 7A, +131°F (+55°C). The **1693** and **1756 series** Rating: Hands free testing in controlled voltage environment: 2000 Vdc; Not intended for hand held use at voltages above 33 Vrms/70 Vdc, 20A, +131°F (+55°C) max. The **5291 series** Rating: up to 1000V per IEC1010-2-031, 7A, +131°F (+55°C). The **5295 series** Rating: Hands free testing in controlled voltage environment up to 1000V; Not intended for hand held use at voltages above 33 Vrms/70 Vdc, 7A, +131°F (+55°C) max.

29 SERIES BINDING POSTS AND PUSH POSTS

RoHS Compliant Available — Grayhill

29-1

29-100 29-110

29-104

Mfg. part no. 29-1 straight-skirt binding posts fit 0.375" (9.53) dia. hole for close spacing. Rated 120VDC, 15A continuously. Insulation resistance between stud and mounting panel: 120,000 megohms. Voltage breakdown: 1500VAC. Panel thicknesses to 0.187" (4.75). Insulated per MIL-M-14, type CFG. **Mfg. part nos. 29-100** and **29-110** are standard push posts. **Mfg. part no. 29-104** insulated push post features black phenolic washers. All push posts are rated 120VDC, 20A continuously. **NOTE:** With push posts, simply press button top, put lead in slot, and release button. Spring pressure provides positive contact. Extends 0.875" (22.23) above mounting board.

Hex Nut

Double Assembly

Single- and double-assembly binding posts available in standard sizes rated 30A and miniature versions rated 15A, 1000V working. All fit panels 0.06-0.25" (1.52-6.35) thick. Standard types fit 0.50" (12.70) diameter panel hole; miniature posts fit 0.375" (9.52) diameter. Captive thumbnuts with positive stop. Insulating parts are nylon. Current-carrying parts are gold-, nickel- or tin-plated brass. Some binding posts meet MIL-P-20693A, Type IV specifications; *see tables below.* Mfg. part no. **suffix** indicates color: **R** = red, **B** = black, **BL** = blue, **GN** = green, **WT** = white, **Y** = yellow. UL recognized. ***Series BP21 and BP30 meet MIL-P-20693A Type IV Specifications.*** Custom color ring and all-metal grounding styles also available; *go online or call.*

MINIATURE INSULATED SOLDER BANANA PLUGS

For miniature 0.104″ (2.64mm) diameter banana jacks. Insulated nylon handle. Nickel-plated brass body with beryllium copper plug spring. Current: 10A. Resistance 0.010 ohms max. Breakdown voltage: 3500 Vrms min.

108-1002-001	Red	94F3887	2.26
108-1003-001	Black	96F9769	2.26

STACKING DUAL BANANA PLUGS—SET SCREW TO 14 AWG

For standard banana jack: 0.175″ (4.45) across flats. Molded body incorporates polarity indication and strain relief for wire leads. Machined brass studs extend length of pins. Voltage: 3500Vrms. Current: 15A.

108-0252-001	Red	90F1996	12.15
108-0253-001	Black	90F2009	12.15

BANANA JACKS/PLUGS

NYLON INSULATED BANANA JACKS

RoHS Compliant Available

EMERSON. Network Power

Johnson Connectivity Solutions

For standard 0.175″ banana plug. Formed brass contact, bright-tinned finished. Come with nickel-plated nut. Panel thickness: to 0.343″. Current: 15A. Contact resistance: 0.010 ohms.

SUPERCON® ELECTRICAL CONNECTORS

RoHS Compliant Available

Superior Electric

Pin Plug PP Series | Socket Plug PS Series | Socket Receptacle RS Series | Pin Receptacle RP Series

SUPERCON® connectors provide rapid and positive panelboard connections. They feature a functional plug design for handling ease and comfort. 25-, 50- and 100-amp versions are rated 125-250VAC/VDC current interrupting, 600V unenergized connect or disconnect use only; 250-amp types are rated 600V unenergized connect or disconnect use only. Wiring to the same plug can be soldered or solderless. Cable fastening screws permit a wide range of cable sizes. Mfg. part no. **suffix** indicates color: **B** = black, **Y** = yellow, **R** = red, **BL** = blue, **GN** = green, **WT** = white. Wiring connections to threaded stud by wire wrap-around, lug or bus bar. 25-, 50- and 100-ampere types are CSA certified.

COLOR-KEYED PC TEST POINTS

RoHS Compliant Available

KEYSTONE ELECTRONICS CORP.

Fig. 1 Fig. 2 Fig. 3

Color-keyed PC test point terminations for high visibility and quick identification. Snap-fit mounting for positive retention for wave soldering. Wireform loop for safe, non-slip testing. Suitable for high-density packaging on 0.062″ and 0.093″ PC boards. Terminal material: Miniature (0.010 x 0.020″) is phosphor bronze wire, silver plated; Compact (0.015 x 0.032″) is phosphor bronze wire, silver plated; multipurpose (0.015 x 0.032″) is phosphor bronze wire, silver plated. Base material:Valox, meets UL94V-0.

SURFACE MOUNT TEST POINTS

RoHS Compliant Available

KEYSTONE ELECTRONICS CORP.

5015
- Manufactured using flat wire to provide a large mounting surface area
- Ideal for use with miniature probes, clips, and hooks
- Efficient, safe, board level testing
- Ultra low profile, ideally suited for advanced surface mount printed circuit board applications
- Designed for long life and durability

5016
- Ideal for use with standard probes, clips and hooks
- Efficient, safe, board level testing
- Unique design provides exceptional strength and durability
- Simplifies testing on dense SMT circuit boards

IR THERMOMETERS

FLUKE-560 SERIES INFRARED AND CONTACT THERMOMETERS

Fluke-561 IR Thermometer:

- IR thermometer for quick measurements up close or at a distance
- Single-point laser sighting
- Contact thermometer for use with mini-connector K-type thermocouples (not included)
- Temperature range, -40 °C to 550 °C (-40 °F to 1022 °F)
- Easy emissivity adjustment for measuring pipes and ducts more accurately
- Efficient — no need to shut down equipment when making IR measurements
- MIN/MAX and DIF functions help identify problems quickly
- Scan large areas or small objects quickly and efficiently
- Recommended accessories – H6 Holster, 80PK-27 Temperature Probe, 80PK-8 Temperature Probe

Fluke-566 and Fluke-568:

- Measure -40 °C to 800 °C /-40 °F to 1472 °F **Fluke-568** or -40 °C to 650 °C/-40 °F to 1202 °F **Fluke-566**
- Easily access advanced features with the soft-key buttons and graphical display
- Measure objects from further away, with a distance-to-spot ratio of 50:1 **Fluke-568** or 30:1 **Fluke-566**
- Compatibility with all standard miniconnector K-type thermocouples
- Measure a wide variety of surfaces with adjustable emissivity feature, including a built-in material table
- Capture up to 99 points **Fluke-568** or 20 point **Fluke-566** of data, for downloading and recalling later
- Easily trend and analyze data with included FlukeView® Forms software **Fluke-568**
- Use USB **Fluke-568** and your laptop for"Hands-free" datalogging
- **Fluke-568E X** meets intrinsically safe certifications in Class I Div 1 and Div 2 or Zone 1 and 2 hazardous environments
- Troubleshoot equipment with 1% measurement accuracy
- Versatile interface six languages from which to choose
- Two-year manufacturer's warranty

Fluke-561

Fluke-568

With the easy-to-use, lightweight **mfg. part no. Fluke-561** HVACPro IR thermometer, take contact and ambient temperatures in the way that's best for you. Use the IR thermometer to measure hot, moving, electrically energized and hard-to-reach objects instantly. Check motors, insulation, breakers, radiant heating, pipes, corroded connections and wires. Plus, scan ducts from the floor — leave the ladder in the truck! Includes Velcro® pipe probe for superheat/sub-cooling and other contact and ambient measurements and a users manual. Can be plugged in any industry-standard K-type mini-connector thermocouple probes, ordered separately; *go online or call.*

(88092)

FLUKE VT02 / VT04 / VT04A VISUAL IR THERMOMETERS

- Built-in digital camera
- Exclusive thermal heat map blending overlay can blend digital and thermal images to instantly show the exact location of the issue (blend between 0%, 25%, 50%, 75%, and full thermal with one button)
- Fully automatic with built-in intelligence (no training required)
- True pocket size design
- SmartView® reporting software can store up to 10,000 images per Gb on included SD card and make professional reports on included professional software
- Hot and cold spot trackers automatically identify hottest and coldest spots within field of view
- Utilizes hyper-thin pyroelectric array technology
- **VT04/VT04A** has additional alarm and time lapse features (Hi/Lo temperature alarm, Time lapse image capture, Auto-monitor™ alarm)

Fluke Visual IR Thermometers combine the convenience of a spot thermometer with the visual advantage of an infrared camera creating a brand new tool category. Every Fluke Visual IR Thermometer has a built-in digital camera with a thermal heat map overlay to instantly identify the exact location of the problem. Now you can detect and capture issues instantaneously with digital and thermal blended images, pinpoint hot and cold spots with temperature markers, and document problems efficiently with SmartView® professional reporting software. Included accessories: Hard Case, hand strap, mini SD card and adapter, SmartView® software on CD, Lithium Ion batteries and Micro USB Charger/Power Supply (including mains adapters) (**VT04/VT04A**) or 4 AA batteries (**VT02**), printed Quick Start Guide in English, Spanish, German, French and Simplified Chinese, others on CD. Users' manual on CD (21 languages).

SPECIFICATIONS

	VT02	VT04/VT04A
Built in digital camera	Yes	
Thermal heat map overlay	Yes (five blending modes)	
Image optics system	PyroBlend™ optic	PyroBlend™ Plus optic, 4 x sharper image
Center point temperature measurement	Yes	
Field of view	20° x 20°	28° x 28°
Battery	4 AA batteries	VT04: Li-ion rechargeable; VT04A: Four (4) AA batteries
Automated monitoring with temperature alarms	-	Yes

FLUKE-60 SERIES INFRARED THERMOMETERS

All Models:

- Fast response
- Backlit LCD display for poorly lit areas

FLUKE-59 MAX Only:

- Precise laser technology for more accurate and repeatable measurements
- Small and lightweight design fits easily fits into your tool box
- IP40 rated for extra protection
- 10:1 Distance to Spot ratio, **59 MAX+** (8:1 Distance to Spot ratio, **59 MAX**)
- Displays the minimum, maximum or average temperature, or the difference between two measurements
- Hi and Lo alarms for rapid display of measurements outside the limits
- Powered by one (1) AA battery
- One year warranty

FLUKE-61 Only:

- Bright laser beam provides easy targeting
- Shock-absorbing holster increases ruggedness
- 0.2 °C (0. 5 °F) resolution up to 275 °C (525 °F)
- Automatic sleep mode after 7 seconds extends battery life
- Alkaline batteries provide 4000 typical measurements
- Includes 9V battery and operator's guide

FLUKE-62 MAX Only:

- IP54 rated for dust and water resistance
- 3-meter (9.8-foot) drop tested
- Dual rotating lasers to help identify area to be measured (measurement area is the spot between the dots)
- Powered by a single, standard AA battery

FLUKE-59 MAX NA

FLUKE-61

FLUKE-62 MAX

Fluke has built the **59 MAX** and **59 MAX+** IR thermometers with the precision you need to do your job accurately and within your budget. Designed to withstand a 1 meter drop, you can count on these lightweight, compact IR thermometers to work when you need them. **FLUKE-60 series** non contact, infrared thermometers are ideal diagnostic tools for quick and accurate temperature readings at all distances. These handheld portable tools enable professionals to research heating and ventilation problems and monitor the status of electrical motors and electrical panels. **Mfg. part no. FLUKE-62 MAX** is small in size, extremely accurate and very easy to use. They are ergonomically designed for a more comfortable hand fit. Precise laser technology makes for more accurate and repeatable measurements.

Mfg. Part No.	Description	Temperature Range	Stock No.	Price Each
FLUKE-59 MAX NA	MAX IR Thermometer	-30°C to +350°C	08X5408	75.96
FLUKE-59 MAX+ NA	MAX+ IR Thermometer	-30°C to +500°C	08X5409	89.95

FLUKE 572-2 INFRARED THERMOMETER

NEW

FLUKE®

- Measure -30 °C to 900 °C (-22 °F to 1652 °F)
- 60:1 distance to spot ratio with dual laser sighting for fast, accurate targeting
- Multi-language interface (user select)
- Current Temperature plus MAX, MIN, DIF, AVG temperature displays
- Compatible with standard mini-connector K-type thermocouples, including ones you already own and have installed.
- Adjustable emissivity and pre-defined emissivity table
- Infrared and thermocouple temperature on backlit display
- Last reading Hold (20 seconds)
- High and low temperature alarm
- Data storage and review (99 data sets)
- Tripod mount
- 12 or 24 hour clock
- USB 2.0 computer interface cable
- FlukeView® Forms Documenting Software
- Two-year warranty

The Fluke **572-2** Infrared Thermometer is the one product you can use in high-temperature industrial environments all around the world. Whether you work in power utility, metal refining and smelting, glass, cement or petrochemical environments, the new **572-2** allows you to carry the most trusted name in test tools anywhere you need accurate, high-temperature and high distance-to-spot measurements. With a straight-forward user interface and soft-key menus, the Fluke **572-2** makes even complex measurements easy. Quickly navigate and adjust emissivity, start data logging, or turn on and off alarms, with just a few pushes of a button. **Includes:** Infrared thermometer with contact thermometer capabilities, K-type thermocouple bead probe, USB2.0 computer interface cable, FlukeView® Forms Documenting Software, hard carrying case, getting started guide (print) and user's manual (CD).

Mfg. Part No.	IR Temperature Range	Stock No.	Price Each

FLUKE 568 EX INTRINSICALLY SAFE INFRARED THERMOMETER

NEW

FLUKE®

- Meets intrinsically safe certifications in Class I Div 1 and Div 2 or Zone 1 and 2 hazardous environments from recognized safety agencies around the world
- Measure -40 °C to 800 °C /-40 °F to 1472 °F
- Conductive Case for carrying the IR thermometer safely into hazardous area
- Easily access advanced features with the soft-key buttons and graphical display
- Measure small objects from further away, with a distance-to-spot ratio of 50:1
- Compatible with mini-connector K-type thermocouple (KTC) probe
- Confidently measure a wide variety of surfaces with the adjustable emissivity feature, including a built-in material table
- Capture up to 99 points of data
- Confidently troubleshoot equipment with ± 1 % measurement accuracy
- Versatile interface with five languages from which to choose
- Two-year warranty

The **Fluke 568 Ex** Intrinsically Safe Infrared Thermometer is the one product you can use in Class I Div 1 and Div 2 or Zone 1 and 2 hazardous environments anywhere in the world. Whether you work in petroleum, chemical, oil and gas, or pharmaceutical environments, the **568 Ex** allows you to carry the most trusted name in test tools into most Ex rated areas all around the globe. With a straight-forward user interface and soft-key menus, the Fluke 568 Ex makes even complex measurements easy. Quickly navigate and adjust emissivity, save data or turn on and off alarms, with just a few pushes of a button. All in a single intrinsically safe tool certified by major rating bodies from around the world.

TI400, TI300 AND TI200 ADVANCED PERFORMANCE THERMAL IMAGERS

NEW

FLUKE®

- Quick transfer of images from imager directly to PC, iPhone® or iPad® with WIFI® connectivity
- Easy analysis and quick reporting in the field with the new quick SmartView® mobile software app for iPhone® and iPad®
- Easily communicate problems or prove repairs were made with SmartView® Analysis and Reporting Software, included
- Fast and convenient operation using either rugged touch screen or optimized tactile button menu navigation
- High-temperature measurement (up to 1200 °C on the Ti400)
- Discover and report problems faster and easier with IR-Fusion® Technology with AutoBlend™ mode
- Work in the most demanding environments with Torture tested™ legendary Fluke ruggedness and reliability
- See infrared images live, in real time, with streaming HDMI video
- No need to carry pen and paper any more with voice recording IR-PhotoNotes™ photo annotation system
- Be ready for any situation with optional wide angle and telephoto interchangeable lenses
- Convenience of patented field-changeable, rechargeable smart batteries with charge level indicators

SPECIFICATIONS:

Mfg. Part Nos.	Ti10	TiS
Temp. Measurement Range	-20°C to +250°C (-4°F to +482°F)	-20°C to +100°C (-4°F to + 212°F)
Accuracy	±2°C or 2% (@25°C nom. whichever is >)	±5°C or 5% (@25°C nom. whichever is >)
Detector Type	160 x 120	120 x 120
Thermal Sensitivity (NETD)	≤0.13°C at 30°C (130mK)	≤0.1°C at 30°C (100mK)
Field of View (FOV)	23° horizontal x 17° vertical	17° x 17°
Spatial Resolution (IFOV)	2.5mRad	
Min. focus distance	Thermal lens: 15cm (approx. 6"), Visible (visual) light lens: 46cm (approx. 18")	
Digital display	9.1cm (3.7") diagonal landscape color VGA (640 x 480) LCD w/ backlight and clear cover	
Storage medium	2GB SD Card Stores up to 3000 .bmp image files or 1200 .IS2 full data files	
Voice annotation	No	
Battery type	Internal rechargeable battery (included)	
Battery time	Thermal lens: 15cm (approx. 6"), Visible (visual) light lens: 46cm (approx. 18")	

High-performance, fully radiometric imagers are ideal for troubleshooting electrical installations, electro-mechanical equipment, process equipment, HVAC/R equipment and other applications. Palettes for ***mfg. part nos. Ti10 and Ti***: ironbow, blue-red, high contrast, grey .

INDUSTRIAL-COMMERCIAL INFRARED CAMERAS

- The combination of great resolution with an optimized field of view provides brilliant detail and ensures quality images captured from a safe distance
- Exclusive IR-OptiFlex™ focus system – ensures that images are in good focus from 1.2 meters (4 feet) and beyond for optimum image clarity and scanning convenience
- For shorter distances change to manual mode with the touch of a finger (**Ti110** and **Ti125**)
- Entire line up of infrared cameras is compatible to Fluke Connect™ – the largest network for wirelessly enabled tools
- Find problems faster and easier with Fluke IR-Fusion® technology (**Ti125, Ti110, Ti105**)
- Accurately identify potential issues by combining digital and IR images
- Get further clarification with AutoBlend™ mode – the blending of a digital and partially transparent IR image into a single information-filled image
- Multi-mode video recording – focus-free video in visible light and infrared with full IR-Fusion (**Ti110** and **Ti125**)

A Fluke infrared camera can save you time and money by finding potential problems before they become costly failures. Industrial professionals bring Fluke infrared cameras to the job because they do the job. Over 65 years of industrial experience give Fluke infrared tools the level of performance needed to keep you up and running. With the innovative features and functionality in the Fluke **Ti125, Ti110, Ti105, Ti100, Ti95** and **Ti90** infrared cameras, you can perform infrared inspections faster and more efficiently. Enjoy the industry's only point-and-shoot IR-Fusion camera. Fluke patented technology provides the user with both a digital and an infrared image in one to precisely document problem areas. Scan for issues significantly faster than before with Fluke's revolutionary, ultra-rugged focus system. The IR-OptiFlex focus system gives you optimum focus by combining focus-free, ease-of-use with the flexibility of manual focus on the same camera. **Now compatible with Fluke Connect™ Mobile App.**

Model	Ti125	Ti110	Ti105	Ti100	Ti95	Ti90
Accuracy	±2°C or 2% (at 25°C nominal, whichever is greater)					
Detector Type	160x120 uncooled microbolometer				80x80 uncooled microbolometer	80x60 uncooled microbolometer
Thermal Sensitivity	≤ 0.10°C at 30°C target temp (100 mK); Filtered mode to get to 80 mK		≤ 0.10°C at 30°C target temp (100 mK)			
FOV	22.5°H x 31°V				26°H x 26°V	19.5°H x 26°V
IFOV	3.39 mRad				5.6 mRad	
Min. IR Focus Distance	15.25cm (6")		122cm (48")			
Focus Mechanism	IR-OptiFlex™ focus system		Focus-free 1.2m (4ft) and beyond		Focus-free 0.6m (2ft) and beyond	
Digital Display	3.5" diagonal LCD (portrait format)					
Visual Camera	2 MP industrial-grade			None - IR Only	2 MP industrial-grade

BUILDING DIAGNOSTIC THERMAL IMAGERS

NEW

FLUKE®

- Exclusive IR-OptiFlex™ focus system—ensures that images are in good focus from 1.2 m (4 ft) and beyond for optimum image clarity and scanning convenience
- For shorter distances change to manual mode with the touch of a finger (**TiR110** and **TiR125**)
- Always have references handy—IR-PhotoNotes™ annotation system—Quickly identify and keep track of inspection locations by adding digital images of important information and surrounding areas (**TiR110** and **TiR125**)
- Find problems faster and easier with Fluke IR-Fusion® technology (**TiR125, TiR110, TiR105**)
- Accurately identify potential issues by combining digital and IR images
- Get further clarification with AutoBlend™ mode - the blending of a digital and partially transparent IR image into a single information-filled image (**TiR125**)
- Multi-mode video recording—focus-free video in visible light and infrared with full IR-Fusion (**TiR110** and **TiR125**)
- Easily communicate the location of problems with the Electronic 8-Point Cardinal Compass (**TiR125** and **TiR110**)

Whether you're searching for air leaks, hidden moisture, construction defects, or other building issues, a Fluke thermal imager delivers a huge competitive advantage—it allows you to work faster and more efficiently, and document your findings. Spend less time in the field and more time growing your business with these new Fluke thermal imagers.

Model	TiR125	TiR110	TiR105

FLUKE CV SERIES CLIRVU INFRARED WINDOWS

NEW

FLUKE®

Hand Turn

Security Key

Superior arc blast protection

- High temperature silicon gaskets
- Mounting and door latches provide high pressure gasket compression
- Die cast components are manufactured with the highest strength alloys (ZA-27 and EZAC)
- Jam nut screws are made from 4037 steel, heat treated to 160,000 psi tensile

Torture Tested to the highest test ratings

- IEEE C37.20.7 63 kA Arc tested at KEMA, UL 50/50E/50V, UL1558, IEC60529-1: IP67, IEC 60068, NEMA 4½, CSA C22.2 NO. 14-13:2012, and CE

Quick and easy installation

- Installation takes 5 minutes with one technician
- Only one hole necessary with standard Greenlee® punch. Rear access required for punch connection only (Easily accomplished with one technician)
- Installs from front; no template needed; no rear access required
- Grounds instantly to metal enclosure with patent pending AutoGround™ process
- Sharp teeth on jam nuts assure four gas-tight ground connections
- All components have electrically conductive finishes for optimum grounding

Corrosion and UV resistance for challenging outdoor environments

- All hardware is made from stainless steel or zinc plated steel
- Die cast components are plated with black chromium over high phosphorous Electroless nickel

Easy to use

- Quarter turn latch easily opens hinged cover
- Three sizes 50 mm, 75 mm and 95 mm (2 in , 3 in and 4 in) with the option of hand turn or security key door latches

Increase the safety and speed of electrical thermal imaging inspections with the new Fluke **ClirVu®** IR Windows. Reduce the risk of arc-flash and electrocution, increase the safety of your personnel and reduce the time and cost of preventive maintenance. No more removing the panel door for installation. Work permit requirements and NFPA 70E processes are significantly reduced. Full PPE is often not required so inspections are done faster and more comfortable.

IW3000/4000 SERIES INTELLIGENT IR WINDOWS

CorDEX INSTRUMENTS
SAFER | FASTER | BETTER

- Fully certified and tested to the following standards: UL50, UL50V, UL1558
- Manufactured from industrial grade materials proven to withstand electric arcs
- Efficient ¼ turn locking system
- Intelligent multiple identification system for each individual window

The **IW Series** infrared window operates with any thermal imager, helping take electrical inspection and predictive maintenance to a new level of safety, efficiency and accuracy. The **IW Series** is manufactured from industrial grade materials designed to withstand electrical arcs and certified by Underwriters Laboratories (UL) to follow the very latest IR window standards. Install the certified, **IW Series** Intelligent IR Windows to help comply with NFPA70E electrical safety guidelines and reduce the need to wear large and bulky PPE. Through intelligent design and special features the **IW Series** reduces the time it takes to perform inspections. With the ¼ turn locking system and spring loaded cover it reduces your time per inspection. The **IW Series** crystal lens is also protected with HydroGARD™ advanced formula to stop environmental moisture damage allowing the windows to be used both indoor and outdoor.

FLUKE-971 TEMPERATURE HUMIDITY METER

FLUKE®

- Use as part of a regular HVAC maintenance plan
- Ideal for checking environmental conditions in response to building occupant complaints
- Calculates wet bulb and dewpoint temperatures instantly
- Temperature range: -20°C to 60°C (-4°F to 140°F)
- Humidity range: 5% to 95% RH
- Rugged construction
- Bright, backlit dual display
- Simple to use, accurate results

Mfg. part no. Fluke-971 meter comes complete with integral holster and belt clip, four AAA batteries and operation manual.

TEMPERATURE & HUMIDITY

FLUKE 50 SERIES II THERMOMETERS

FLUKE

- Rugged Design with Holster
- K, J, T, E-Type Thermocouple Compatibility
- Hold / MIN / MAX / AVG Recording
- Relative Time Stamp
- Electronic Offset Minimizes Thermocouple Error
- Dual Display with Backlight
- User Friendly Front Panel Set-Up
- Readout in °C, °F or Kelvin (K)
- 3-Year Warranty
- Recommended accessories - C50 Case, TPAK Meter Hanger, 80PK-27 Temperature Probe

Fluke 53B and 54B Additional Features

- Data Logging Up to 500 Points with User Adjustable Intervals
- Additional Thermocouple Type Inputs
- Real Time Clock
- IR Communication Port Allows Data to Be Exported to Optional FlukeView® Software

51-2 54-2B

The rugged, hand-held, **Fluke 50 Series II** thermometers have extra large dual displays with bright backlights. They offer fast response and a basic accuracy of ±0.05% +0.5°F, and a wide measurement range from -418°F to 3212°F (depending on thermocouple type). Readings can be displayed in °C, °F or Kelvin. **Mfg. part no. FVF-SC1** Flukeview Forms Software allows you to document, store and analyze measurements from **Fluke 53-2B and 54-2B**. Download data. Real-time logging. Create custom forms, reports, graphs and tables.

1523/1524 REFERENCE THERMOMETERS

FLUKE Calibration

- High accuracy
- PRTs: up to ± 0.011 °C
- Thermocouples: up to ± 0.24 °C
- Precision thermistors: ± 0.002 °C

1523 1524

The new **1523/24** Reference Thermometers from Fluke Calibration measure, graph, and record PRTs, thermocouples, and thermistors. These new thermometer readouts deliver high accuracy, wide measurement range, logging, and trending, all in a handheld tool you can take anywhere. The **1523/24** lets you handle field applications, laboratory measurements, and data logging with ease. And with the dual channel measurement capabilities of the model **1524**, you can do twice the work in half the time.

1551A EX / 1552A EX INTRINSICALLY SAFE "STIK" THERMOMETERS

FLUKE Calibration

- ± 0.05 °C accuracy over full range
- Intrinsically safe (ATEX compliant)
- Display temperature in °C or °F
- Optional data logging to internal memory
- Temperature trend indicator
- User selectable resolution (0.1, 0.01, 0.001)
- 300 hour battery life
- Percent battery-life and low battery indicator
- NVLAP accredited calibration (NIST traceable)

Whether working outdoors in environments where potentially explosive gases may be present or on the fl oor of a processing plant, the intrinsically safe, battery-operated, portable reference thermometer is designed to go where you work. The RTD sensor of the "Stik" Thermometer is housed in a rugged stainless steel sheath—you no longer have to worry about breaking a mercury-in-glass thermometer and the subsequent cleanup. The probe and digital readout are fixed together, calibrated as a system, and accurate to ± 0.05 °C over the full temperature range. The large backlit LCD display rotates 90° making it easy to read from any position. Minimize measurement errors with the userconfigurable temperature trend/stability indicator which tells you when your temperature source is stable or if your temperature is trending up or down.

STAND-ALONE DATA LOGGER WITH LARGE MEMORY CAPACITY

IP67 LASCAR

- Stores up to 256,000 readings with on-screen programming, data download and graphing independent of the computer
- Logging rates between 1 sec and 12 hrs.
- User programmable alarms, audible alarms, confidence LEDs and user replaceable batteries

These stand alone data loggers measure and store up to 256,000 temperature readings. The high contrast LCD allows on-screen programming and data download in realtime and retrospective values. User-replaceable batteries typically allow logging up to 6 months or can be used with a USB power adapter. Variants include a temperature logger (**EL-GFX-1**), a temp/RH logger (**EL-GFX-2**), a higher accuracy temp/rh logger (**EL-GFX-2+**), a dual and single channel thermocouple logger (**EL-GFX-DTC/EL-GFX-TC**) and a dual and single channel thermistor based temp logger (**EL-GFX-DTP/EL-GFX-TP**).

Mfg. Part No.	Description	Stock No.	Price Each 1-24
EL-GFX-1	Temperature Data Logger	89T2069	165.06
EL-GFX-2	Temperature and Relative Humidity Data Logger	56W5209	175.50
EL-GFX-2+	Higher Accuracy Temperature and Relative Humidity Data Logger	54X7624	204.75
EL-GFX-DTC	Dual Channel Thermocouple Data Logger	56W5208	226.19

REAL-TIME TEMPERATURE/ RH/ DEW POINT USB DATA LOGGER

LASCAR

- Data displayed on PC monitor as it happens — real-time
- -20° to +70°C (-4° to +158°F) measurement range
- 0 to 100% RH measurement range
- Dew point indication via Windows® control software (included)
- USB interface for set-up and data download
- User-programmable alarm thresholds
- Powered by the USB

Mfg. part no. EL-USB-RT real-time data logger is easy to install and use. The user can measure temperature and relative humidity and view downloaded data by plugging the logger into a PC's USB port and using the supplied Windows® control software (runs under 2000, XP and Vista). The PC displays the temperature, RH and dew point in real-time and saves it to a file which can store up to seven day's worth of data. This data file is overwritten at the beginning of each new logging session. The supplied software provides the option for the user to save the data file permanently to the hard-drive. Temperature, relative humidity and dew point can be graphed, printed and exported to other applications.

Mfg. Part No.	Description	Stock No.	Price Each 1-24	Price Each 25+
EL-USB-RT	Real-Time Temperature/RH/Dew Point USB Data Logger	39P9593	91.96	82.77

(137189)

4180 PRECISION INFRARED CALIBRATORS

- Calibrated radiometrically for meaningful, consistent results
- Accredited calibration included
- Accurate, reliable performance from -15°C to +120°C
- Large target size of 152 mm (6 in) is required for calibrating most thermometers
- Light instrument weight of 8.6 kg (19 lbs) makes it easy to lift and carry
- Intuitive, easy-to-read display that indicates when temperature is stable

The **4180 Series** of Precision Infrared Calibrators for infrared thermometers and thermal imagers is fast, accurate, and easy to use. It comes with an accredited calibration from one of the world's most trusted temperature calibration laboratories, sample calibration procedures for Fluke thermometers built right in and everything you need to get started making high-quality infrared thermometer calibrations. This is the perfect solution for any infrared thermometer or thermal imager within its temperature range. The **4180** Infrared Temperature Calibrator reaches temperatures from -15°C to +120°C. Uniformity is important in infrared temperature calibration work because an infrared thermometer will "see" as much as the entire target when placed at the appropriate calibration distance. In addition, with accuracies as good as ± 0.35°C the **4180 Series** can meet its specifications without additional emissivity-related corrections, leading to legitimate test uncertainty ratios (TUR) as good as 4:1.

Mfg. Part No.	Description	Stock No.	Price Each
4180-156	IR Calibrator, 152 mm (6 in), -15°C to +120°C	16R0673	7640.00

(209902)

7526A PRECISION PROCESS CALIBRATOR

- Sources and measures dc voltage, current, resistance, RTDs and thermocouples
- Precision pressure measurement using Fluke **700** or **525A-P** series pressure modules
- Includes 24Vdc transmitter loop power supply
- Measures 4-20 mA loop current
- Isolated pressure module input (accuracy determined by the pressure modules)
- Primary input/output controls and cursor controls
- Isolated input terminals for dc voltage/current measurement, switch-test input and 24Vdc loop power supply
- Isolated input controls
- Includes automated switch-test function
- Accepts ITS-90 coefficients for accurate SPRT measurements
- Compatible with MET/CAL® Calibration Software

The Fluke Calibration **7526A** Precision Process Calibrator offers the best balance of economy and accuracy for benchtop calibration of temperature and pressure process instrumentation. Easily calibrate RTD and thermocouple readouts, pressure gauges, temperature transmitters, digital process simulators, data loggers, multimeters and more.

SPECIFICATIONS	
DC voltage output terminals	0 mV to 100 V Accuracy: 30 ppm (+3 uV*), 1-year
DC current output terminals	0 mA to 100 mA Accuracy: 50 ppm, 1-year
RTD/Ω output terminals (two-wire)	5 Ω to 4 kΩ Accuracy: ± 0.05 °C, –200 °C to 630 °C, (Pt 385, 100 Ω), 1-year
Thermocouple input/output terminal	Accuracy: ± 0.1 °C, –100 °C to 800 °C (type K), 1-year
Four-wire RTD/Ω input terminals	Accuracy: ± 0.02 °C, –80 °C to 100 °C (Pt 385, 100 Ω), 1-year

- Lightweight, portable, and fast
- Cool to -25°C in 15 minutes and heat to 660°C in 15 minutes
- Built-in two-channel readout for PRT, RTD, thermocouple, 4-20 mA current
- True reference thermometry with accuracy to ±0.01°C
- On-board automation and documentation
- Metrology performance in accuracy, stability, uniformity, and loading

The new **914X Series** Field Metrology Wells extend high performance to the industrial process environment by maximizing portability, speed, and functionality with little compromise to metrology performance. Field Metrology Wells are packed with functionality and are remarkably easy to use. They are lightweight, small, and quick to reach temperature set points, yet they are stable, uniform, and accurate. These industrial temperature loop calibrators are perfect for performing transmitter loop calibrations, comparison calibrations, or simple checks of thermocouple sensors. With the "process" option, there is no need to carry additional tools into the field. This optional built-in two-channel readout reads resistance, voltage, and 4–20 mA current with 24 volt loop power. It also has on-board documentation. Combined, the three models (9142, 9143, and 9144—each with a "process" option) cover the wide range of -25°C to 660°C.

Mfg. Part No.	Temperature Range	Stock No.	Price Each
9142-DW-156	–25°C to +150°C (-13°F to +302°F)	43W4496	5550.00
9143-DW-156	+33°C to +350°C (+91°F to +662°F)	43W4497	4120.00
9144-DW-156	+50°C to +660°C (+122°F to +1220°F)	43W4498	4960.00

DRY-WELL & DRY BLOCK CALIBRATORS

9103 9140 9141

- Lightweight and very portable
- Accuracy to ±0.25 °C
- RS-232 and Interface-it software included
- Easy to recalibrate

If you've been using a dry well calibrator or dry block calibrator for field work, you know there's a lot more to them than temperature range and stability. Size, weight, speed, convenience, and software are also significant. A field dry well needs to be portable, flexible, and suitable for high-volume calibrations or certifications. At Fluke Calibration, we use dry well calibrators every day in our manufacturing and calibration work, and we know what makes a dry well easy and productive to use—which is exactly how users describe our series of field dry wells. These dry wells work for you instead of the other way around. In addition, the heating and cooling rate of each of these dry-well calibrators is adjustable from the front panel, thermal switches can be checked for actuation testing, and multiple-hole inserts are available for a variety of probe sizes. Fluke Calibration dry wells are easy to calibrate. You don't even have to open the case. This means less maintenance costs and less down time when a dry well does need calibration. Our Interface-it software lets you adjust set-points and ramp rates, log dry-well readings to a file, create an electronic strip chart, and perform thermal switch testing with data collection. The software is written for Windows and has a great graphical interface. Regardless of whether you want basic software or a completely automated calibration system, we've got what you want.

Mfg. Part No.	Temperature Range	Stock No.	Price Each
9103-DW-156	-25°C to +140°C (-13°F to +284°F)	43W4493	4860.00
9140-DW-156	+35°C to +350°C (+95°F to +662°F)	43W4494	3270.00
9141-DW-156	+50°C to +650°C (+122°F to +1202°F)	43W4495	4430.00

(209288)

TEMPERATURE CALIBRATION • CHART RECORDERS & DATA LOGGERS

9009 INDUSTRIAL DUAL-BLOCK THERMOMETER CALIBRATOR

FLUKE. Calibration

- Temperatures from –15 °C to 350 °C in one unit
- Two wells in each block for simultaneous comparison calibrations
- Rugged, lightweight, water-resistant enclosure
- Includes two ¼ in (6.4 mm) and two 3⁄16 in (4.8 mm) inserts

The **Model 9009** includes two independently controlled temperature blocks. The hot block provides temperatures from 50°C to 350°C, while the cold block covers the range –15°C to 110°C. Each block is controlled by a precision Fluke Calibration temperature controller. Each temperature block includes two wells with removable inserts. You can calibrate four probes at once, or you can calibrate two probes at the same time with an external reference like Fluke Calibration's **Model 1523** Reference Thermometer, or you can use the two temperature wells to get quick "zero" and "span" references for transmitter calibrations. The **9009** is housed in a tough Pelican™ case that is both airtight and watertight. It's a small package weighing only 10 pounds, yet it fits everything you need, including a power cord and four extra inserts. Inserts are available to accommodate sensors of any size from 1⁄16″ (1.6 mm) to 7⁄16″ (11.1 mm). The cold block is calibrated to within ±0.2°C with stability of ±0.05°C. The hot block's display is accurate to ±0.6°C with stability of ±0.05°C. A NIST-traceable calibration is included for each of the two test blocks. For use with automated systems, the **9009** comes with an RS-232 connection and our **Model 9930** Interface-it software, which allows you to control and monitor temperatures from your PC. For completely automated calibrations, Fluke Calibration's MET/TEMP II software also integrates with the **9009**.

Mfg. Part No.	Description	Stock No.	Price Each
9009-B-156	Industrial Dual-Block Dry-Well, Black	09K7152	5520.00

(209542)

9100S/9102S HANDHELD DRY-WELLS

FLUKE. Calibration

- Smallest dry-wells in the world
- Ranges from -10°C to +375°C
- Accuracy to ±0.25°C, stability of ±0.05°C at 0°C
- RS-232 interface with 9930 Interface-it v3.81 software

9100S

9102S

Despite its small size (2!!! inches high and 5 inches wide) and light weight, the **9100S** outperforms every dry-well in its class in the world. It has a range to +375°C (+707°F) and is perfect for checking RTDs, thermocouples, and small bimetal thermometers in the field. Plug it in, switch it on (Note, these wells are fixed and not interchangeable), set the temperature with the front-panel buttons, and insert your probe into the properly sized well. Compare the reading of your device to the display temperature or to an external reference, and the difference is the error in your device. With a proprietary Fluke Calibration temperature controller, the **9100S** has a display resolution of 0.1 degrees, an accuracy of ±0.5°C, a stability of ±0.1°C, and a stabilization time of just five minutes. For work in the temperature range of -10°C to +122°C, our Model **9102S** dry-well is another first in the industry, featuring stability to ±0.05°C. This dry-well is only four inches high and six inches wide, achieves temperatures as low as -10°C, includes a NIST-traceable calibration, and is stable to ±0.05°C. The Model **9102S** is excellent for dial gauges, digital thermometers, bulb switches, and other sensors that need calibration below ambient. The **9102S** has two wells so you can use one for a reference thermometer to increase accuracy. Both wells are ½ inch in diameter, and each has inserts available for almost any sensor size. The **9102S** also has a battery pack option that gives you approximately four hours of field use when AC power is unavailable.

HUMIDITY AND TEMPERATURE CHART RECORDER

CE EXTECH INSTRUMENTS A FLIR COMPANY

- Simultaneous numerical and graphical display of Humidity and Temperature readings, plus Time and Date
- Measures Humidity (10 to 95%RH) and Temperature (-20.0°F to 140.0°F) plus included LabVIEW™-based software calculates and graphs Dew Point, Wet Bulb, and GPP (grains per pound)
- Large dual graphical LCD displays with adjustable vertical and horizontal TAC resolution
- Internal memory records up to 49,000 data points and can be transferred to a PC via RS-232 serial port
- Detachable probe extends up to 1 meter for measurements in closed environments

Mfg. part no. RH520A is easy to use, set up and operate. LCD indicates percentage of memory remaining. Audible and visual alarm with Hi/Low setpoints. Replaceable probe does not require recalibration. Desk or wall mount. Includes built-in stand, detachable probe with 3ft. (1m) cable, RS232 cable, RS-232 To USB adaptor, LabView-based PC software, adaptor, and 3 AA batteries.

1620A "DewK" THERMO-HYGROMETER

FLUKE. Calibration

- Superior accuracy
- Network enabled
- Powerful logging and analysis tools
- Two interchangeable calibrated sensors
- Huge memory
- Upgraded software

The DewK thermo hygrometer and humidity monitor measures temperature to ± 0.125°C and humidity to ± 1.5% on two channels, and displays it on a big, clear screen. Ethernet, wireless (optional), or RS-232 will allow you to network as many DewKs as you'd like. And the LogWare III software will allow real-time logging of multiple DewKs, data storage to your computer and seamless integration with MET/CAL® software. **Mfg. part no. 1620A** includes one standard-accuracy sensor, wall mount bracket and RS-232 cable. **Mfg. part no. 1621A** includes two standard-accuracy sensors, wall mount bracket, RS-232 cable, 7.6 m [25 ft] sensor extension cable, sensor wall mount bracket, sensor case, **9936A** LogWare III single-PC license (required for use with MET/CAL software). **Mfg. part no. 1622A** includes **1621A** value kit, **2633-RF** wireless option (requires wireless modem), wireless Modem and USB to wireless.

SPECIFICATIONS	
Operating Range	0°C to +50°C (+32°F to +122°F); 0% RH to 100% RH
Calibrated Temp. Accuracy ("S" Model")	± 0.25°C from +15°C to +35°C (± 0.45°F from +59°F to +95°F)
Calibrated Temp. Accuracy ("H" Model")	± 0.125°C from +16°C to +24°C (± 0.225°F from +60.8°F to +75.2°F)

THERMOCOUPLE TEMPERATURE USB DATA LOGGERS

LASCAR

- K-type: -200°C to +1350°C measurement range
- J-type: -200°C to +1190°C measurement range
- T-type: -200°C to +390°C measurement range
- USB interface for set-up and data download
- Stores over 32000 temperature readings
- Programmable sample rates: 1 sec., 10 sec., 1min., 5min., 30min., 1hr., 6 hr., 12 hr.
- User-programmable alarm thresholds
- Red and green LED status indication
- Supplied with 1.5m basic K-type thermocouple
- Replaceable lithium battery (included)
- High contrast LCD shows last, high and low stored readings (EL-USB-TC-LCD)
- Immediate, delayed and push-to-start mode (EL-USB-TC-LCD)

EL-USB-TC

EL-USB-TC-LCD

EL-USB-TP-LCD

Thermocouple data loggers with USB interface are easy to set up, install and use. A thermocouple is attached via the thermocouple socket at the base of the unit. The user can easily set up the thermocouple type, logging rate, start-time, logging mode, and download the stored data by plugging the logger straight into a PC's USB port and running the supplied Windows® control software (runs under 2000, XP and Vista). Data can then be graphed, printed and exported to other applications.

Mfg. Part No.	Description	Stock No.	Price Each 1-24	Price Each 25+

TEMPERATURE/RH USB DATA LOGGERS

LASCAR

- -35 to +80°C (-31° to +176°F) and 0-100% RH
- More than 16,000 reading capacity per parameter
- Programmable sample rates from 10 sec to 12 hrs
- **EL-USB-2-LCD** and **EL-USB-2-LCD+** also include LCD display showing latest log and max/min log
- **EL-USB-2+** and **EL-USB-2-LCD+** have higher accuracy sensor

EL-USB-2-LCD and EL-USB-2-LCD+

EL-USB-2

These temp/RH data loggers use simple configuration and graphing software supplied at no cost. Plugging directly into the USB port, users can quickly program and download data from these loggers in a variety of temp/RH environments.

MICROPROCESSOR-BASED PORTABLE UNIVERSAL CIRCULAR CHART SUPERECORDER™

CE RoHS Compliant Available

NEWPORT

CTXL-TRH is a temperature / relative humidity chart recorder with a temperature range of -17 to 49°C (2 to 120°F), and a humidity range of 2 to 98%. The **CTXL-DTC** is a dual thermocouple input chart recorder that accepts J, K, or T Type thermocouple probes. The **CTXL-DPR** is a dual-process input chart recorder that accepts 0 to 1Vdc, 0 to 5Vdc, 0 to 10Vdc, 0 to 20mA, and 4 to 20mA inputs. Models have dual backlit LCDs that display two inputs in real-time. Charted data is stored in the nonvolatile memory that can be downloaded to a PC at a later time. This provides an electronic copy of the charted data. In addition, the **CTXL series** provides many powerful functions such as audible and visual alarms with two built-in relay contacts; real time clock to monitor and store data vs. time; monitoring of the Minimum, Maximum, and Average values; 1, 7, or 32-day recording; chart re-scaling, and more.

FLUKE-985 PARTICLE COUNTER AND FLUKE CO-220 CARBON MONOXIDE METER

FLUKE®

The particle counter is an essential tool in the facility maintenance, HVAC and IAQ professional's toolbox. From filter testing to indoor air quality investigations, the particle counter equips the user with valuable data concerning the concentration and source of particulates in the tested environment. **Fluke 985** has a large 3.5" color display with backlight and user friendly intuitive icons plus a large font option for easy navigation and viewing. It features configurable settings for the display, sample methods and sample size alarm. Data can be presented in traditional tabular or as a trend graph and exported to a USB memory stick or directly to a PC via a USB or Ethernet cable. It meets ISO 21501, JIS B9921 and CE standards. **Fluke 985** is ultra-lightweight with an ergonomic design for easy single-hand operation. Includes: cradle for charging and USB and Ethernet communications, ENET CAT5E cable, USB-A to MINI-B cable, 12VDC power supply, zero count inlet-filter, filter adapter, sample inlet protective cap, hard case, getting started manual and user manual CD.

985

	Fluke 985
Six Size Channels	0.3µm, 0.5µm, 1.0µm, 2.0µm, 5.0µm, 10.0µm

FLUKE CO-220 CARBON MONOXIDE METER AND ACCESSORIES

Mfg. part no. FLUKE CO-220 carbon monoxide meter measures CO levels from 0 to 1000ppm, with an audible signal triggered more frequently as CO levels rise. Used to detect dangerous CO leaks. It responds very quickly to ambient changes in carbon monoxide concentration without the use of a pump. Perfect for professionals who need to measure CO levels where the accumulation of combustion gas is possible. **Mfg. part no. FLUKE CO-205** aspirator kit contains all the components necessary for providing a clean sample for the Fluke® family of gas measuring devices.

AIR QUALITY • VIBRATION METERS • ANEMOMETERS

FLUKE-975 AIRMETER™ AIR QUALITY ANALYZER KITS

FLUKE®

Features:

- Simultaneously measures, logs and displays temperature, air velocity, humidity, CO_2 and CO
- Bright, backlit LCD display
- Wet bulb and dew point temperature
- % of outside air calculation
- Automatically compensates for barometric pressure changes
- Min/Max/Average on all measured and calculated readings
- Multi-language user interface
- Metric and standard units
- Audible and visual threshold alarms
- Extensive discrete or continuous data logging capacity, downloaded to PC via USB interface
- Keypad lock for security
- Two-year manufacturer's warranty

FLUKE-975V

Use the Fluke-975 AirMeter™ to:

- Maximize comfort conditions for building occupants
- Quickly respond to indoor air quality concerns
- Verify the operation of HVAC control systems
- Monitor air flow and velocity to provide proper ventilation
- Optimize HVAC ventilation settings for ASHRAE 62 recommendations
- Monitor temperature and humidity to meet ASHRAE 55 guidelines
- Actively monitor conditions that promote a productive environment

Mfg. part no. Fluke-975 AirMeter™ is ideal for testing and monitoring HVAC output and indoor air quality. This rugged and easy-to-use hand-held device combines five tools in one — measures temperature, humidity, air velocity, CO_2, and CO, enabling users to quickly generate detailed reports for further analysis. **Mfg. part no. Fluke-975** kit includes: AirMeter™, calibration cap, FlukeView Forms® software, international power plugs, rechargeable Li-ion battery pack, three back-Up AA batteries, AC power adapter, users manual with safety information and hardside carrying case. **Mfg. part no. Fluke-975V** AirMeter™ kit also includes **mfg. part no. Fluke-975VP** AirMeter™ air velocity probe. **Mfg. part no. Fluke-975CK** AirMeter™ calibration kit includes: CO/CO2 calibration gas, nitrogen zeroing gas, regulator, tubing and hardside carrying case.

FLUKE 810 HANDHELD VIBRATION TESTER W/ DIAGNOSTIC TECHNOLOGY

FLUKE®

- On-board identification and location of the most common mechanical faults (bearings, misalignment, unbalance, looseness) focus maintenance efforts on root cause, reducing unplanned downtime
- Fault severity scale with four severity levels help you prioritize maintenance work
- Repair recommendations advise technicians on corrective action
- Self-test function ensures optimal performance and more time on the job
- Share the results of your diagnostic tests with the machine expert, your manager, the planner and others using Fluke Connect ShareLive™ video call
- Survey equipment before and after planned maintenance and confirm the repair
- Commission new equipment and ensure proper installation
- Provide quantifiable proof of equipment condition and drive investment in repair or replacement
- Prioritize and plan repair activities and operate more efficiently
- Anticipate equipment failures before they happen and take control of spare parts inventories
- Diagnose, document and take action on alignment, imbalance, looseness and bearing fault issues with Fluke Connect enabled **810** vibration tester

The most advanced troubleshooting tool for mechanical maintenance teams who need an answer now. The unique diagnostic technology of the **Fluke 810** Vibration Tester helps you quickly identify and prioritize mechanical problems, putting the expertise of a vibration analyst in your hands. The **Fluke 810** Vibration Tester takes you from vibrations to answers in minutes by using a simple step-by-step process to report on machine faults the first time measurements are taken, without prior measurement history. The combination of diagnoses, severity and repair recommendations help you make informed maintenance decisions and address critical problems first. **Now Compatible with Fluke Connect™ Mobile App.**

SPECIFICATIONS	
Machine rotational speed range	200rpm to 12000rpm
Ranging	Automatic
A/D converter	4 channel, 24 bit
Usable bandwidth	5Hz to 20kHz
Dimensions (HxDxW)	18.56 cm x 7.00 cm x 26.72 cm (7.30 in x 2.76 in x 10.52 in)
Weight (with battery)	1.9 kg (4.2 lb)
Display	1/4 VGA, 320×240 Color (5.7" diagonal) TFT LCD w/ LED backlight

FLUKE 805 VIBRATION METER

FLUKE®

- Innovative sensor design minimizes measurement variations caused by device angle or contact pressure
- Consistent data quality at both low and high frequency ranges
- Four-level severity scale assesses urgency of problems for overall vibration and bearing condition
- Exportable data via USB
- Trending in Microsoft® Excel using built-in templates
- Overall vibration measurement (10 Hz to 1,000 Hz) for acceleration, velocity and displacement units of measurement for a wide variety of machines
- Crest Factor+ technology provides reliable bearing assessment using direct sensor tip measurements between 4,000 Hz and 20,000 Hz
- Colored lighting system (green, red) and on-screen comments indicate how much pressure needs to be applied to take measurements
- Temperature measurement with Spot IR Sensor increases diagnostic capabilities
- On-board memory holds and saves up to 3,500 measurements
- Audio output for listening to bearing tones directly
- External accelerometer support for hard to reach locations
- Flashlight for viewing measurement locations in dark areas
- Large screen with high resolution for easy navigation and viewing

Make go or no-go maintenance decisions with confidence. The **Fluke 805** Vibration Meter is the most reliable vibration screening device available for frontline mechanical troubleshooting teams that need repeatable, severity-scaled readings of overall vibration and bearing condition. **Now compatible with Fluke Connect™ Mobile App.**

Mfg. Part No.	Frequency Range		Stock No.	Price Each

CFM/CMM THERMO-ANEMOMETER + IR THERMOMETER

CE EXTECH INSTRUMENTS A FLIR COMPANY

- Measures remote surface temperatures to 500°F (260°C) with 8.1 distance to spot ratio and Laser Pointer (**mfg. part no. AN200**)
- Simultaneous display of Ambient Temperature and Air Flow or Air Velocity
- 3% velocity accuracy via low friction2.83"D (72mm) ball-bearing vane wheel on 3.9ft (120cm) cable
- Data Hold and MIN/MAX
- One year warranty

Complete with vane sensor with 3.9 ft (120cm) cable 9V battery, protective rubber holster and carrying case.

SPECIFICATIONS

Specifications	Range	Resolution	Basic Accuracy
Air Velocity	0.4 to 30.00 m/s	0.01 m/s	±3% m/s
	1.4 to 108.0 km/h	0.1 km/h	±3% km/h
	80 to 5906 ft/min	1 ft/min	±3% ft/min
	0.9 to 67.2 mph	0.1 mph	±3% mph
	0.8 to 58.3 knots	0.1 knots	±3% knots
Air Temperature	14 to 140°F (-10 to 60°C)	0.1°F/°C	±4.0°F(2.0°C)
InfraRed Temperature (Mfg. Part No. AN200 only)	-58 to -4°F (-50 to 20°C)	0.1°F/°C	±9.0°F(5°C)
	-4 to -500°F (-20 to 260°C)	1°F/°C	±2% reading or ±2°F(°C) whichever is greater
Airflow	0 to 9999 CMM (m^3/min)	0.1	
	0 to 9999 CFM (ft^3/min)	0.1

ULTRASONIC LEAK DETECTOR KITS

AMPROBE

Mfg. Part No. TMULD-300 Features:
- UT-300 transmits an ultrasonic signal for non pressurized applications
- Tests the "air-tightness" of weather seals, tanks, ovens, refrigerators, etc.
- Locating leaks in duct work
- Finds the ends of buried PVC pipes

Mfg. Part No. ULD-300 Features:
- Identifies failing solenoids, valves and bearings
- Battery, audible and visual leak indicators

Mfg. part no. TMULD-300 detects any pressurized gas leak regardless of type CFC's, HFC's, Nitrogen, etc. and is unaffected by contaminants. **Mfg. part no. TMULD-300** kit includes UT-300 ultrasonic transmitter, flexible tubing adapter, extension tube, parabola (reflector) and headphones. **Mfg. part no. ULD-300** kit includes headphones, extension tube and parabola (reflector).

Mfg. Part No.	Description	Stock No.	Price Each
TMULD-300	Ultrasonic Leak Detector Kit	15B4483	524.95
ULD-300	Ultrasonic Leak Detector Kit	15B4498	374.95

FLUKE RLD2 HVAC/ REFRIGERANT FLASHLIGHT

FLUKE®

- Compact, easy-to-use
- 100,000 hours of life
- Four operating modes

RLD2 UV flashlight uncovers refrigerant leaks instantly. Use the UV light to find the leakage area, then, use the laser pointer to pinpoint the exact leak location. Ideal for HVAC technicians.

Mfg. Part No.	Description	Stock No.	Price Each
RLD2	Leak Detector Flashlight	09R2354	54.95

LED LIGHT METER

CE AMPROBE

- Lux or Foot-candle user selectable measurement units
- Measuring Range to 200,000 Lux or 20,000 Foot candles
- Data Hold to freeze reading on the digital display
- MAX recording to capture highest light measurement
- Measuring lights source include all visible ranges
- Spectral response close to CIE luminous spectral efficiency
- Angled light cosine correction
- Extended length of wire for light sensor approximately 5 feet (1.5m)
- Measurements according to JISC1609:1993 and CNS 5119 general A class specifications
- Includes protective sensor cap
- Large, 3½ digit display

A professional tester specifically designed to accurately measure light output of the LED light sources. Included accessories: Users manual, 9 volt battery, carrying case.

Mfg. Part No.	LED Light Measurement	Stock No.	Price Each
LM-200LED	200 lux, 2,000 lux, 20,000 lux, 200,000 lux 20, 200, 2,000, 20,000 foot-candle	77R5077	104.46

EASYVIEW™ LIGHT METERS

EXTECH INSTRUMENTS A FLIR COMPANY

EA30 / EA31 (Light Meter)
- Compact and rugged design features large display
- Data hold freezes reading on display
- MIN/MAX readings
- Zero function
- Cosine and color corrected measurements
- Low battery and overrange indication
- Auto power off to save battery life
- Utilizes precision silicon photodiode sensor with 3ft coiled cable for easy storage
- Complete with built-in stand, remote sensor with protective cover, protective rubber holster, and 6 AAA batteries

EA30 / EA31

EA33 (Light Meter w/ Memory)
- Store and recall up to 50 measurements with realtive or real time clock stamp
- Luminous intensity (candela) calculations
- Ripple function excludes the effect of stray light from the primary light source measurement
- Auto Power off with disable feature
- Multiple point average function
- Timed-Hold, Relative in absolute value or % deviation, and Comparator function with high low alarms
- Cosine and color corrected, CNS 5119 Class II
- Complete with built-in stand, light sensor and protective cover with 36" (0.9m) cable, protective holster, 6 AAA batteries, and carrying case

ToughPIX II EXPLOSION PROOF DIGITAL CAMERA FOR HAZARDOUS (VAPOR) AREAS

NEW

CorDEX INSTRUMENTS
SAFER | FASTER | BETTER

Ex IP54

- ATEX and IECEx Certified for Zone 1 IIB+H2 T6 explosive (vapor) atmospheres
- 16 megapixel SLR style with armoured 2.7" LCD screen
- 16GB memory and High Definition video
- Macro, Auto-focus, Anti-shake, 3x Optical and 4x digital zoom
- Reporting capability through CorDEX CONNECT

The **ToughPIX II** explosion proof digital camera is designed and certified with the professional inspector in mind. **ToughPIX II** is ATEX certified Ex d IIB+H2 T6 Gb / II2G Gb T6, for use in hazardous areas. Weighing in at 900g* ToughPIX II is lightest in class making it easier than ever to carry and transport. With an IP54 industrial protection rating **ToughPIX II** has the ability to capture still images and high definition video in the most demanding industrial environments. **ToughPIX II** makes close up and wide area photography possible with crisp and clear images using the built in macro feature, anti-shake technology, 3x optical and 4x digital zoom.

Certification information	
ATEX/IECEx Certificate No:	TRAC13ATEX0046X / IECEx TRC 13.0016x
ATEX/IECEx Certificate Type:	Ex d IIB+H2 T6 Gb / II2G Gb T6
Ambient Temperature:	Tamb -20C to +50C
General Information	
Image download	High Speed USB (safe area only)
Image storage	16GB
Standard image capture resolution	16 Megapixel
Zoom	3 x optical, 4 x digital zoom
Screen size	2.7 inches
Additional Features	Anti shake, auto focus, macro, face recognition
Tripod mount	1/4 inch 20 TPI
Detailed information	
Body Material	Anodised aluminium with anti-static over mould
Lens & LCD Material	Armoured Glass
Weight	900g
IP	54
Electrical information	
Battery type	Removable & Rechargeable
Capacity	1100mAh
Cell type	NiMH

CD-AX/APX SERIES AOS ABSOLUTE DIGIMATIC CALIPERS

NEW

Mitutoyo

- Resolution: 0.01mm
- Repeatability: 0.01mm
- Power supply: Button-type silver oxide battery
- SR44 (No. 938882), 1 piece supplied as standard (The standard supplied battery is for the monitor)
- Battery life: Approx. 3.5 years under normal use
- Maximum response speed: Unlimited
- A battery life of approximately 3.5 years has been achieved under normal use through the adoption of Mitutoyo's ABSOLUTE scale
- The slider configuration features an ergonomic, thumb-friendly shape
- Step-measurement capable
- Font height: 9mm,alleviation of fatigue with the high-contrast LCD
- Carbide-tipped jaw models are ideally suited to the measurement of rough-machined workpieces, castings, grindstones, etc.
- The data output function allows integration into statistical process control and measurement systems

SLIDE CALIPERS

Starrett

120 and 1202 series offer clear dial graduations of .001″ per revolution, sharp black graduations on the satin finished bar every .100″, knife-edge contacts and thumb operated fine adjustment. **120 series** is manufactured in the USA. The **799 series** electronic calipers have large easy-to-read displays, fine adjustment to precision, zero at any position, .0005″ resolution, lock to hold position and hardened stainless steel body for long life.The **798 series** features IP67 level of protection against coolant, water, chips, dirt, dust, and other contaminants. The **799 series** provides a lightweight, ergonomic design.

FORCE GAUGES • GAUGES

DIGITAL FORCE GAUGES

EXTECH INSTRUMENTS A FLIR COMPANY

Features:
- 5-digit 0.4" (10mm) LCD with reversible display feature to match viewing angle
- Exclusive load cell measurement transducer
- Overrange, low battery, and advanced function indication
- Zero Adjust pushbutton and Peak Hold switch
- Selectable fast/slow response
- One-year manufacturer's warranty
- CE compliant

Push/pull measurements in kg, lbs., oz., and Newton units. Choice of noncalibrated, calibrated and high-capacity models. All three gauges come complete with hook adapter for tension, compression adapters (flat, cone and chisel head), 5" (127mm) extension rod, six AA batteries and carrying case. *Order AC-to-DC adapters separately below.*

LARGE CAPACITY DIGITAL FORCE GAUGES

SHIMPO

The microprocessor-controlled, digital **FGV-HX** and **FGE-HX series** offers the same features of the **FGV-X** and **FGE-X series** 89394, but in an extremely heavy-duty case, allowing the gauges to handle larger capacities from 0 to 500 pounds. Two "knurled" steel handles are provided for hand operation and a hanger is included which enables each gauge to be used as a scale. The **FGV-HX series** includes all **FGE-HX series** features plus RS232C and analog outputs and an overload output signal. One year warranty

FGE-50X

With an internal update rate of 1000HZ, ability to read and display both Peak Tension and Peak Compression as a push pull gauge, the **FGE-X** and **FGV-X series** gauges are still ergonomically designed to fit in the palm of your hand. The rugged, all metal construction of the microprocessor-controlled **FGE-X** and **FGV-X series** permits accurate measurement of compression and tension forces up to 100 pounds. The **FGE-X** and **FGV-X series** feature a unique, push-button inverted digital display, permitting the user to read the display in a right side-up fashion. The **FGV series** includes all **FGE series** features plus RS232C and analog outputs and an overload output signal. Additionally, each gauge possesses three types of signal outputs for data collection and function analysis.

UT5000 INTRINSICALLY SAFE THICKNESS GAUGE

CorDEX INSTRUMENTS SAFER | FASTER | BETTER

- ATEX and IECEx Certified for Zone 1 IIC T4 hazardous vapour areas
- ATEX and IECEx Certified for ibD IIIB T200°C Db hazardous dust areas
- EchoEcho technology measure thicknesses through painted surfaces
- With Corrosion Mode, continuous real time measurements are logged with Min-Max- Average thickness readings
- MultiECHO technology brackets four echoes before providing a reading, reducing intermittent readings caused by irregular echoes
- Drop-down menus to select the correct material velocity
- Features CorDEX CONNECT
- Full Colour, Backlit Screen

CorDEX Instruments **UT5000** Intrinsically Safe thickness gauge with CorDEX CONNECT™ measures metal thickness for Non-Destructive Testing (NDT) and Predictive Maintenance (Pdm) on pipelines and fixed equipment within hazardous locations. **UT5000** is a next generation thickness gauge packed with proven technologies: CorDEX CONNECT™ uses RFID + Software to tag measurements with their location then organises the data, giving the engineer a view of the pipeline at any specific location; the unique corrosion mode feature helps identify spots of thinning; whilst MultiECHO™ technology helps to improve accuracy on uneven surfaces. Also incorporating Echo-Echo functionality, the **UT5000** is able to take thickness readings through protective paints without having to remove the coating. Designed for rugged environments, the shock resistant skin protects a 3.1 inch (8cm) colour screen and has easy-to-feel raised buttons. The intrinsically safe dual-element, 4MHz transducer is adjustable up to 8Hz with accuracy of +/- 0.05mm (0.01inch).

ULTRASONIC THICKNESS GAUGES

NEW

EXTECH INSTRUMENTS A FLIR COMPANY

Common Features
- 5MHz probe: 0.040" to 20" of steel
- 10MHz probe: 0.020" to 20" of steel (optional)
- Sunlight readable dot-matrix display with backlight
- Multiple transducer options for high temperature and difficult to measure materials
- Fast minimum feature to capture minimum thicknesses
- On screen display of 8 languages
- Splash-proof (IP54), high impact, compact housing

Model TKG100 & TK150 Additional Feature
- Sun light readable

Model TKG150 & TKG250 Additional Features
- Echo to Echo option to reduce coating errors
- 100K internal datalogger with export to Excel
- B-scan (visual cross section of test piece)
- Vibrate on alarm

Model TKG250 Additional Features
- Color LCD display shows red, yellow and green visual alarm indication
- Live Waveform (A-scan for thickness verification)
- File compare feature as a real time corrosion monitor
- Dynamic change of waveform color on alarm
- Grid review of saved readings

LASERMETER 3000XP EXPLOSION PROOF LASER DISTANCE METER

CorDEX INSTRUMENTS
SAFER | FASTER | BETTER

- ATEX and IECEx certified for Mining and Zone 1 IIC T4 explosive areas (vapour) atmospheres
- CSA Certified for Class I Div.1 B,C,D hazardous areas
- Single or continuous measurement option with onboard mathematics
- Interchangeable, rechargeable battery pack for continued operation

LaserMETER 3000XP explosion proof, laser distance meter is ATEX, IECEX and CSA certified for use within Zone 1 IIC T4 and Class I Div.1 B,C,D hazardous (explosive) areas. The robust IP65 design incorporates shock resistant, anti-static over mould to protect against accidental knocks and impacts. The **LaserMETER 3000XP** also includes a removable/rechargeable battery pack that is interchangeable with your ToughPIX XP Series digital camera (check operations maintenance manual for compatibility). With a backlit LCD screen and capable of measuring distances of 30m with a typical accuracy of 3mm the **LaserMETER 3000XP** reduces time and the need for excess personnel with an easy to use, point, click and measure system. LaserMETER 3000XP is packed with features including: Pythagoras, Area and Volume calculations allowing you to get round any obstacles and reduce errors found in traditional measurement methods. With this in mind the **LaserMETER 3000XP** is the ultimate hazardous area distance measurement tool.

Mfg. Part No.	Range	Stock No.	Price Each
LM3000XP	0.5m to 30m (1.6ft to 118ft)	53W3066	1049.00

(202223)

FLUKE 424D, 419D AND 414D LASER DISTANCE METERS

FLUKE®

All models offer:

- Reduction of estimation errors
- Instant measurement with one-button operation
- Easy targeting with bright laser
- Quick calculation of area (square footage) and volume
- Easy addition and subtraction of measurements
- Minimum/maximum function
- Improved battery life from automatic shut-off feature
- Pythagoras calculation for determining distance indirectly from two other measurements
- Pouch with Fluke logo
- Three-year warranty

414D 419D 424D

424D and 419D additionally offers:

- Improved visibility with backlit screen
- Ability to measure up to 80m (260ft) for **419D**, 100m (330ft) for **424D**
- Tripod mode allows you to mount to a tripod for measuring long distances
- Stake out function
- Enhanced Pythagoras calculation for determining distance indirectly from three other measurements
- Audible keypad feedback
- Storage of the last twenty measurements for quick recall of distance
- Strong environmental protection with IP54 (water spray and dust proof) sealing

424D additionally offers:

- Inclination sensor for taking measurements in hard to reach areas
- Compass provides a "heading" for distance measurement
- Automated endpiece correction: when measuring from an edge or corner, a built-in sensor detects the position of this bracket and automatically changes the reference point

The compact and handy Fluke laser distance meters were designed for indoor and limited outdoor applications. All three models are simple to operate, with the Fluke durability and quality you expect. And, with specific function buttons, different tasks can be completed quickly and easily. The extra bright laser is clearly visible so you can always see your targeting point even if the target object is in a hard-to-reach spot, or a long distance away. These units have a large LCD screen and buttons positioned for one-handed measurements.

CBK BENCH SCALES

ADAM

- Non-slip adjustable feet
- Large backlit LCD display
- Overload protection
- Easy to use keypad
- Rechargeable battery with up to 90 hours operation
- Tare function
- Large stainless steel pan
- Memory accumulation
- Pre-set weighing with alarm
- Check weighing LED bar graph
- Capacity tracker

CBK includes basic weighing, check weighing with LED limit indicators and parts counting. CBK features RS232 interface, date and time, a built in rechargeable battery pack and AC adapter. Ideal for production, warehousing or even in the field.

Mfg. Part No.	Capacity (lbs.)	Readability (lbs.)	Platform Size (in.)	Stock No.	Price Each

LBK WEIGHING SCALES

ADAM®

- Rechargeable battery or AC adapter operation (adapter included)
- Stainless steel pan
- 5 weighing units
- Pre-set tare
- Auto power off
- Overload alarm
- Adjustable level feet

Compact LBK scales offer quick and easy weighing. Simple to use with only 5 keys, which are color coded to highlight the most used keys for faster operation.

Mfg. Part No.	Capacity (lbs.)	Readability (lbs.)	Platform Size (in.)	Stock No.	Price Each

HIGHLAND™ PORTABLE PRECISION BALANCES

ADAM®

- RS-232 and USB interfaces
- Can be stacked for storage and transportation
- ShockProtect™ overload protection
- Audible overload indicator
- HandiCal™ internal calibration for fast accurate readings
- Lock down mounting slot for Kensington™ type lock and cable
- Dual tare keys, color coded for easy recognition
- Internal rechargeable battery with auto power off and low-battery indicator
- Capacity tracker
- Removable draft shield

Highland balances feature multiple weighing units, RS-232 and USB interfaces, rechargeable battery pack and AC operation, capacity tracker, adjustable feet and level and lock down.

CORE™ COMPACT PORTABLE BALANCE

ADAM®

- Stainless steel pan
- Three-point ShockProtect™ overload protection
- Built in security slot for Kensington™ type lock
- Dual tare keys, color-coded for easy recognition
- Battery powered with 6 x AA batteries or AC adapter
- Auto power off to save battery life
- Low-battery indicator
- Large backlit display is clear and quick to read
- Removable draft shield on 4.7" / 120mm ø pans
- Stacking storage (CQT202, 251, 601 and 1501 models)

Core series durable ABS housing is designed to withstand field and laboratory environments, while being easy to clean and protected from accidental spills.

Mfg. Part No.	Capacity (g.)	Readability (g.)	Platform Size (in.)	Stock No.	Price Each

PGW PRECISION BALANCES

ADAM®

- Metal casing
- Force restoration mechanism
- RS-232 bi-directional interface
- Accessories interface
- Security locking station
- External calibration
- Internal calibration models
- GLP print outs
- Date and time
- Colour coded keys
- Backlit LCD with dual display
- Up to 18 weighing units (including one custom unit)
- Draft shield supplied as standard with models with 0.001g readability
- Capacity tracker
- Multilingual display

PGW precision balances are designed to deliver the ultimate in speed and accuracy in an easy- to-use and reliable model.

CBC BENCH COUNTING SCALES

ADAM®

- Non-slip adjustable feet
- Large backlit LCD displays
- Overload protection
- Easy to use keypad
- Rechargeable battery with up to 90 hours operation
- Preset tare function
- Large stainless steel pan
- Memory accumulation

Durable CBC scales offer speed and simplicity for counting applications. With three displays to show weight, unit weight and number of parts simultaneously its analysis is quick and complete. CBC scales provide reliable performance.

Mfg. Part No.	Capacity (lbs.)	Readability (lbs.)	Platform Size (in.)	Stock No.	Price Each

NEMA, UL, IEC WATERTIGHT PLASTIC BOXES

NEMA · RoHS Compliant Available · Bud Industries, Inc. · IP65 · UL

- Gasketed enclosures meet NEMA 1, 2, 4, 4X, 12, 13 IEC 529, IP65 and UL-508-4X specifications
- May be used in wet, dirty, and corrosive environments
- ABS/PC blended plastic with UL94-5VB flammability rating
- Suggested service temperature -40°C to +70°C
- Non-metallic hinges with snap-action latches; swing-frame panel
- Optional clear doors are polycarbonate with UL94V-0
- Modifications available online
- Order accessories separately *on pages 2288-2289*

UL / NEMA / IEC WATERTIGHT PLASTIC BOXES

IP66 NEMA RoHS Compliant Available BUD Industries, Inc.

- IP66 of IEC 529 and NEMA 1, 2, 4, 4X, 12, and 13 specifications
- Style A has two or three plastic latches
- Style B has two plastic latches and one stainless steel padlockable latch
- ABS plastic enclosures molded out of light gray material with UL94-HB flammability rating
- ABS/PC blended plastic enclosures molded out of light gray material with UL94-5VA flammability rating
- PC/PBT blended plastic enclosures molded out of light gray material with UL94-5VA flammability rating and UV stabilized
- Clear doors molded out of polycarbonate material with UL94-V0 flammability rating
- Includes stainless steel wall mounting brackets and hardware

WATERTIGHT SHEET METAL BOX WITH MOUNTING BRACKET

IP65 NEMA

RoHS Compliant Available

Bud Industries, Inc.

- NEMA 1, 2, 4, 4X, 12, 13 and IP65 and UL508-4X ratings
- Durable 14 gauge steel
- Smooth continuous welded seams
- Hinged cover clamps to base to allow watertight seal
- Stainless steel screws and brackets included
- Weld nut for inner panel mounting
- Bonding studs for grounding on base and door
- 14 ga. steel removable powder-coated panel included for easy component mounting
- Modifications available; *go online or call.*

NEMA 1 JUNCTION BOXES

UL NEMA

Bud Industries, Inc.

- Heavy duty 16 GA welded steel construction
- Screwed on flat cover with key holes on mfr. part nos. with prefix **JB**
- Hinged cover withslotted head cam lock mfr. part nos. with prefix **JBH**
- Easily removable concentric knockouts on all four sides for industry standard conduit sizes
- Four wall mounting holes in black
- Embossed grounding hole in bottom allows flush wall mounting
- Durable ANSI 65 grey powder coating
- Complies with NEMA and UL-50 Type 1 rating
- UL listing pending

NEMA SEALED DUAL-COMPARTMENT ENCLOSURES

IP65 UL RoHS Compliant Available BUD Bud Industries, Inc.

- Body made of high impact ABS
- Cover made of blue tinted Polycarbonate (UL 94-HB)
- Easy to remove knockouts provided on bottom side to accommodate conduit fittings or cable glands
- Both compartment sealed with durable and oil resistant silicone sponge gasket
- Built-in DIN-Rail mounting clips
- PCB guides provided in upper compartment

(DCH prefix) Hinged Cover

(DCS prefix) with Screw-On Cover

Sealed dual-compartment enclosures have a separate compartment for housing terminals, power supplies, batteries or other equipment. Boxes available in two styles: with screw-on cover (DCS prefix) or hinged cover (DCH prefix) designed for frequent access.

STEEL WATERTIGHT NEMA ENCLOSURES

IP65 NEMA RoHS Compliant Available BUD Bud Industries, Inc.

- Meets NEMA 1, 2, 4, 4X, 12, and 13 ratings
- Meets IP65 rating and UL508-4X requirements
- Key lock cover provided
- Bounding studs for grounding provided on base and door
- Smooth gray powder finish

SNB series NEMA sheet metal boxes are constructed of a continuous seam welded 16 gauge steel. Their unique stainless steel hinges allow for easy disassembly of cover. Wall mounting holes are located on the inside for security. A Zinc plated 14 gauge steel removable inner panel is also included.

NEMA 3R ENCLOSURES

RoHS Compliant Available BUD Bud Industries, Inc.

- Heavy duty 16 GA galvanized steel spot welded construction
- Drip-shielded top and seam-free sides, back and front
- Easily removable concentric knockouts on bottom
- Two external wall mounting brackets in back
- Durable ASA-70 gray powder coating
- Complies with NEMA and UL-50 Type 3R rating
- UL 50 and 50E listed - File E238062

NEMA 3R enclosures provide excellent corrosion protection and are well suited for a variety of outdoor applications. Features hinged cover with weather resistant neoprene gasket and zinc plated and powder coated pad-lockable draw latch. External mounting brackets allow installation on vertical surfaces without the need to open the cover and expose internal components. Includes internal zinc plated steel panel.

DIE CAST ALUMINUM NEMA BOXES

IP67 NEMA RoHS Compliant Available

Bud Industries, Inc.

- Rugged #ADC-12 die cast aluminum alloy
- Thick wall (0.098 inch, 2.5 mm) construction for heavy duty applications
- One-piece molded outer Silicone gasket provides reliable sealing meets NEMA 4X and IP67 requirements
- Captive cover assembly screws (M4) are located outside the sealing area
- Recessed area on cover surface for decals
- Easily machined and modified to your particular requirements
- Finish: Natural

Die cast external mounting brackets are also available, *go online or call.*

DIECAST ALUMINUM NEMA 4X BOX W/ MOLDED MTG. BRACKETS

UL NEMA RoHS Compliant Available

Bud Industries, Inc.

IP65

- Designed to IP65 of IEC529 and NEMA 1, 2, 4, 4x, 12, and 13 specifications
- Cover incorporates a recessed gasket (included but not installed on black finish boxes)
- Internal bosses for mounting PCBs horizontally or for connecting terminals, ground, etc.
- Most models have internal guide slots for mounting PCB assemblies vertically
- Excellent screening properties
- Mounts to wall or panel with #10 size screws (not furnished)
- UL Listed
- Finish: Natural or Black powdercoat (add suffix -B)

These boxes allow for the mounting of the box without having to remove the cover, thereby possibly compromising the NEMA 4X rating.

DIE-CAST WATERTIGHT ALUMINUM BOXES

NEMA RoHS Compliant Available

Bud Industries, Inc.

IP65 cULus

- NEMA 1, 2, 3, 4, 12, 13; IP65, IEC
- UL listed to UL508-4 requirements (file# E194432)
- Body and cover constructed of aluminum alloy
- Cover incorporates a recessed silicon gasket
- Internal PC board mounting bosses
- Wall mount holes (style A) and cover attaching screws are outside the sealing area (style B) does not have wall mounting holes

DIE-CAST WATERTIGHT ALUMINUM BOXES WITH MOUNTING BRACKETS

NEMA · RoHS Compliant Available · Bud Industries, Inc.

- NEMA 1, 2, 4, 4X, 12, 13; IP66 of IEC529
- UL listed to UL508-4 requirements (file# E194432)
- ADC-12 aluminum alloy construction
- Excellent screening properties
- Covers incorporate a recessed silicon gasket (included but not installed on black finish boxes) and attach with M4 stainless steel screws
- Internal bosses for mounting PC boards horizontally (most models have internal guides for mounting PCB assemblies vertically)
- Heavy-duty external wall mounting bracket allows for mounting without removal of cover

DIE-CAST WATERTIGHT ALUMINUM NEMA BOXES

IP65 · NEMA · RoHS Compliant Available · Bud Industries, Inc.

Without Molded-in Flanges

With Molded-in Flanges

- Rugged #ADC-12 alloy die cast aluminum box with NEMA 1, 2, 4, 4X, 12, 13 and IP65 ratings
- Self-adhesive gasket easily attaches to cover
- Cover attaches with 4 or 6 screws for a secure and tight seal
- Many sizes have internal card guides for PC board mounting or partitioning

Available in natural finish, other finishes available. Easily machined and modified for customization, *go online or call.*

MOLDED-IN MOUNTING FLANGES

Mounting flanges are molded-in, onto the short side of the base for one-piece construction, eliminating separate welded-on plates that could trap fluids. Allows wall or panel mounting without having to remove the cover and expose internal components to the environment.

NEMA ENCLOSURES

DIE-CAST WATERTIGHT ALUMINUM BOX WITH HINGED COVER

IP65 NEMA RoHS Compliant Available Bud Industries, Inc.

- Hinged cover
- External mounting brackets
- NEMA 1, 2, 4, 4X, 12, 13 and IP65
- Available in smooth black powder coat finish
- Offers EMC protection

Hinged cover allows for easy access without risk of damage to cover. External mounting brackets allow the box to be mounted on a wall or panel without having to remove the cover and exposing internal components to the environment. Gasketed cover attaches with screws. Easily machined and modified to your particular requirements. Modifications available; *go online or call.*

IP66 NEMA RoHS Compliant Available Bud Industries, Inc.

- One-piece molded outer silicone gasket meets NEMA 4X and IP66 requirements
- Rugged #ADC-12 die cast aluminum alloy
- Thick wall (0.098", 2.5 mm) construction
- Second wire-mesh with sponge rubber gasket provides EMI/RFI protection
- Recessed area on cover surface for decals

ENCLOSURES

Mfg. Part No.	Dimensions (in.) H x W x D	Color	Stock No.	Price Each 1-9	10-99	100-199
● ANS-3803	2.64 x 3.79 x 3.79	Unfinished	89M4545	19.44	16.37	14.61
● ANS-3811	6.81 x 3.94 x 10.79	Unfinished	89M4553	68.26	57.48	51.27

NON-METALLIC WATERTIGHT BOXES

IP65 NEMA c UL us RoHS Compliant Available Bud Industries, Inc.

- Designed to IP65 of IEC 529 and NEMA 1, 2, 4, 4X, 12, 13
- **PN series** boxes feature a smooth, flush top cover
- **PNR series** boxes feature a recessed area in the top cover for labels, nameplates, keypads, etc.
- Polycarbonate bodies and covers have a UL stabilized UL94V2 flammability rating; suggested service temperature: -40°C to +120°C
- ABS bodies and covers have a UL94-HB flammability rating; suggested service temperature: -40°C to +80°C
- All have wall-mounting holes
- Cable glands available; *go online or call*
- Modifications available; *go online or call*

EXTERNAL MOUNTING BRACKETS

External mounting brackets mount to **PN Series** non-metallic NEMA boxes. Allow box to be mounted to a wall or panel without removing the sealed cover. 4 molded brackets attach to the bottom of the box. Includes nylon ¼ attachment screws. **Sold in packages of 4.**

Mfg. Part No.	Description	Stock No.	Price per Pkg. 1-4	5-9	10-24
● MB-1390-LG	Mounting brackets, light gray	91F3923	2.16	1.78	1.62
● MB-1390-DG	Mounting brackets, dark gray	91F3924	2.16	1.78	1.62

ABS PLASTIC NEMA 4X BOX W/ EXTERNAL MTG. BRACKET

UL NEMA RoHS Compliant Available Bud Industries, Inc. IP66

Light Gray

Clear Lid

Dark Gray

- Designed to IP66 of IEC 529 and NEMA 1, 2, 4, 4x, 12, and 13 specifications
- Integrally molded external mounting brackets allow the box to be wall or panel mounted
- Cover attaching screws are outside the sealing area thus preventing ingress of moisture and dust
- Most models have internal guide slots for mounting PCB assemblies vertically
- Internal bosses allow moutning of PCBs horizontally (except PN-1320 and PN-1330)
- Cover screws are M-4 stainless steel, non-magnetic
- Gasket material: silicon sponge

NEMA 4X PLASTIBOXES™ STYLE J

IP65 NEMA RoHS Compliant Available Bud Industries, Inc.

PT-11800

PT-11801

- Meets NEMA 4X and IP65 specifications
- Made from flame retardant black ABS plastic with UL94-5VA flammability rating
- Easily removable cover screws into threaded brass inserts in base
- 8 PC board mounting bosses in base (**PT-11801** has 6 extra mounting bosses inside elevated cover)
- Molded in flanges allow easy wall or panel mounting
- Finish is textured matte black

POLYCARBONATE WATERTIGHT NEMA ENCLOSURES

IP65 NEMA RoHS Compliant Available Bud Industries, Inc.

- Meets NEMA 1, 2, 4, 4X, 12, and 13, IEC52/IP65 and UL508-4X
- UL94-V2 flammability rating
- Suitable for wet, dry, and/or corrosive environments
- Cover sealed with silicon gasket
- Transparent blue finish

Suitable as PC board enclosures, junction boxes, and other applications that require monitoring of internal components without the need for removing the cover. Wall mounting holes and cover attaching screws are outside the sealing area, thus preventing ingress of moisture and dust.

CABLE GLANDS

RoHS Compliant Available Bud Industries, Inc.

Assembly consists of black molded nylon body, hex nut, cable nut and a rubber gasket and cable seal. Cable seal maintains NEMA rating for cable entry or exit. Nylon material has UL94V-2 flammability rating and -40°C to +100°C suggested service temperature. Use cable glands with any Bud NEMA boxes.

SMALL ENCLOSURES (CLAMPED HINGED COVER)

NEMA · RoHS Compliant Available · HAMMOND MANUFACTURING · IP65 · UL · CSA

- NEMA 12 & 13; IP65
- Rugged enclosures feature external screw clamps on 3 sides and continuous hinged cover
- Includes inner panel (except where noted); white powder paint
- Protection against dirt and dust
- Watertight, oil- and petroleum-resistant protection
- Finished in ANSI 61 gray recoatable powder paint

Suitable for transformer or instrument housings. Use as electrical junction and terminal boxes, to mount pneumatic or hydraulic instruments, or as control tubing junction point.

SMALL NEMA 4, 12 & 13 ENCLOSURES (QUARTER TURN LATCH HINGED COVER)

NEMA · RoHS Compliant Available · HAMMOND MANUFACTURING · UL · CSA

- 16-gauge steel body and door
- Unpainted, galvanized steel inner panel included
- Continuously welded seams, formed lip on door and enclosure to exclude flowing liquids
- Continuously hinged door has 304 stainless steel hinges and provides 180° opening
- Bonding stud on door and ground stud in enclosure
- Permanently secured oil-resistant gasket with retainers
- Door features quarter turn latch formed from black zinc diecast
- Finished in recoatable ANSI/ASA61 gray powder paint

MILD STEEL TYPE 4 AND 12 JUNCTION BOXES

NEW · RoHS Compliant Available · HAMMOND MANUFACTURING · IP66 · UL · CSA · CE

- Body 16 or 14 gauge steel. Covers are 14 gauge steel.
- Smooth, continuously welded seams without knockouts, cutouts or holes
- Welded brackets provide for enclosure mounting
- Continuous hinged cover is secured with stainless steel clamps and screws
- Stainless steel continuous hinge on door may be removed by pulling the stainless steel hinge pin
- Seamless poured-in place gasket
- Internal threaded weld studs are provided for mounting inner panels
- A bonding stud is provided on the door and a grounding stud is provided in the enclosure
- Finish: recoatable smooth ANSI 61 gray powder coating

Designed for use as instrument enclosures, electric, hydraulic or pneumatic control housings, electrical junction boxes or terminal wiring enclosures. Provides protection where equipment may be hosed down or otherwise be very wet, or in outdoor applications for full weather protection.

EXTRUDED ALUMINUM ENCLOSURES WITH METAL END PANELS

NEW

RoHS Compliant Available

HAMMOND MANUFACTURING

Features:

- Designed to house PC boards or for equipment interfacing
- Sized for standard Eurocards
- PC boards mount horizontally by sliding into internal slots extruded into the enclosure body.
- Rugged body constructed from extruded aluminum with a minimum thickness of .06" (1.5 mm).
- Extruded body includes a slide removable "belly" plate - except in smaller "C" & "D" sizes (ie..1455D601, 1455D801, 1455C801 & 1455C1201 sizes)

Blue Anodized

Includes:

- Two aluminum end panels - finish matched to extruded aluminum body
- Two black ABS plastic bezels (your option to install)
- Extruded aluminum body - choice of clear, black or blue anodized finish
- Self adhesive rubber feet
- All hardware - end panel screws are #6 x ⅜" TTT - thread rolling, steel screws with a #4 flat head phillips drive. Zinc plate finish - either clear or black (black screws are used on the both the black & blue models).
- For black replacement screws (quantity 100) *order* **mfg. part no. 1455MS100BK**; *go online or call*
- For clear replacement screws (quantity 100) *order* **mfg. part no. 1455MS100**; *go online or call*
- NOTE: Recommended screw torque is 5 lbf/in

SMALL STAINLESS STEEL NEMA ENCLOSURES (HINGED COVER)

RoHS Compliant Available

HAMMOND MANUFACTURING

- NEMA 3R, 4, 4X, 12 & 13 rated
- Rugged enclosures feature external screw clamps on 3 sides and continuous hinged cover
- Includes inner panel; white powder paint
- Protection against dirt and dust
- Watertight, oil- and petroleum-resistant protection

Suitable for transformer or instrument housings. Use as electrical junction and terminal boxes, to mount pneumatic or hydraulic instruments, or as control tubing junction point.

TYPE 4X POLYCARBONATE JUNCTION BOXES

NEMA · RoHS Compliant Available · HAMMOND MANUFACTURING

- Injection moulded polycarbonate thermoplastic enclosure
- Enhanced UV inhibitors protect against outdoor weathering
- Threaded brass inserts are provided for optional inner panel or terminal kit mounting
- Stainless steel 316 screw fasteners
- Door fasteners include a provision for padlocking on snap latches
- Captive oil resistant gasket provides a positive seal
- Operating temperatures between +130°C and -35 °C (+266°F to -31°F)
- UL 508 Type 1, 2, 3, 4, 4X, 12 and 13
- CSA Type 1, 2, 3, 4, 4X, 12 and 13
- Mounting hardware is included
- Light gray finish

Designed to insulate and protect controls and componets in both indoor and outdoor conditions. Ideal for industrial pump controls, waste water, irrigation control along with solar/wind and chemical plants.

STEEL HOLE PLUGS

RoHS Compliant Available

HAMMOND MANUFACTURING

HP series steel hole plugs are designed to seal unused pushbutton holes, conduit openings and knockout holes against dust, oil and water. Plugs have oil-resistant gasket and are secured with an 8-32 x ¾" threaded stud and plated wing nut. Steel hole plugs are finished in gray. Stainless steel in a brushed natural stainless finish.

WATERTIGHT ABS PLASTIC AND POLYCARBONATE NEMA ENCLOSURES

NEMA

RoHS Compliant Available

HAMMOND MANUFACTURING

IP66

ABS Plastic w/ Solid Lid — Polycarbonate w/ Solid Lid — Polycarbonte w/ Clear Lid

- Suited for mounting PC boards or DIN rail mounted components
- Designed to meet IP66 and NEMA 4, 4X, 12 and 13 ratings
- Molded-in internal DIN rail mounting tabs (except **1554C series**)
- Molded-in vertical PC card guides (except **1554B series**)
- Light gray (RAL 7035) color

1554 series watertight NEMA enclosures feature gasketed lid with two-piece "tongue and groove" construction to provide protection against access of oil, dust and water. Gasket is factory-poured using a high-temperature, UL listed silicon material. Lid is secured with self-captivating M4 stainless steel machine screws (included), threaded into integral stainless steel bushings. Internal threaded (M3) integral brass inserts and standoffs (designed for M3.5 or #6 self-tapping screws) for PC board or inner panel mounting in all versions except **mfg. part no. 1554B** sizes. **Mfg. part no. 1554xGY** general-purpose ABS plastic enclosures carry a UL94HB flammability rating and not recommended for outdoor use. Polycarbonate enclosures carry a UL945V flammability rating and are recommended for outdoor use. **Mfg. part no. 1554x2GYCL** polycarbonate enclosures feature a clear lid that allows for maximum visibility of protected internal components.

HAMMOND MANUFACTURING

IP66 NEMA

- Designed to meet IP66 and NEMA 4, 4X, 12 & 13 ratings
- Ideal for mounting PC boards or DIN rail mounted components
- Smoked transparent polycarbonate lid
- Constructed of light gray polycarbonate (UL94 5V flammability rating)
- Gasketed lid with two-piece "tongue and groove" construction
- Integral stainless steel bushings (for repetitive assembly & disassembly)
- All stainless steel hardware to avoid corrosion caused by dissimilar metals

Includes self-captivating M4 stainless steel machine screws to secure lid. Internal DIN rail mounting tabs are molded in (except **mfg. part no. 1554C2GYSL**). Threaded M3 integral brass inserts and/or standoffs (#6 self tapping screws) for PC board or inner panel mounting in all but the smallest size (**mfg. part no. 1554B2GYSL**). Vertical PC card guides (for 1.5 mm thick PC boards) are molded in all but the smallest size enclosure (**mfg. part no. 1554B2GYSL**).

- Ideal for mounting PC boards, panels or DIN rail mounted components
- Designed for wall mounting (interior is secure as lid screws are behind the lid)
- Light gray (RAL 7035) satin texture finish with smooth recessed surface on lid for a membrane keypad or label
- Standoffs molded in the interior of the lid and enclosure designed for #6 x ¼" self-tapping screws
- ABS plastic (UL flammability rating of UL94 HB) not recommended for outdoor use
- Polycarbonate (UL flammability rating of UL94 VO / 5VA @ 3mm) recommended for outdoor use
- Gasketed lid with two piece "tongue and groove" construction
- Flanged lid secured with self-captivating M4 stainless steel machine screws (included), threaded into integral stainless steel bushings
- Internal DIN rail mounting tabs molded into lid (except **mfg. part nos. 1555CF22 & 1555CF42**)

ROLEC® MODULAR DIE-CAST ALUMINUM ENCLOSURES

NEMA

RoHS Compliant Available

HAMMOND MANUFACTURING

- Meets NEMA 1, 2, 3, 3R, 4, 4X, 5, 12, 13
- Aluminum die-cast G Al Si 12/DIN 1775
- Captive stainless steel screws are standard
- Neoprene oil- and petrol-resistant gasket standard (–30°C to +100°C)
- Meets IEC enclosure IP65 classification
- Single-channel fastening system
- Trouble-free turning 90° to 90° with square enclosure by synchronous arrangement of channels
- External mounting feet can be turned through 90°
- Enclosures have inner blind holes
- RAL 7032 gray powder paint finish

NEMA ENCLOSURES

WATERTIGHT NEMA DIECAST ALUMINUM ENCLOSURES

NEMA · RoHS Compliant Available · HAMMOND MANUFACTURING · IP65

Mfg. part no. 1590Z watertight aluminum diecast enclosures are designed to meet IP65 (dust and hose proof). These enclosures are perfect for housing sensitive electrical, pneumatic, hydraulic and electronic assemblies. They feature natural finish, a recessed silicon rubber gasket and captive, recessed stainless steel lid screws. Wall mountable using "through-box-blind hole" construction outside of gasket protection. North America Mark of Safety - cUL and UL listed. Certified to NEMA 4X standards (UL508)-file# E65324.

THERMOELECTRIC DEHUMIDIFIER & VENT DRAINS

RoHS Compliant Available · Hoffman · NEMA

- Removes 8 oz. of moisture in 24 hours
- Condenses moisture from internal enclosure air and standing liquids
- Built-in drain provision with plastic hose directs collected moisture to NEMA 4/4X vent drain
- Rotating side air vents direct recirculating air away from critical controls
- Mounts via DIN rail on internal panel or mounts directly onto the inside bottom of enclosure above the vent drain
- Vent drain installs in a ⅞-in. hole in the bottom of enclosure with provided nut or in a ½-in. NPT/NPS threaded conduit hub
- Vent drain has a one-way mechanical shut-off when pressure is equalized to prevent water and contaminants from entering the enclosure

For use with Hoffman enclosures beginning *on page 2308.*

WALL-MOUNT NEMA TYPE 12 AND 13 JUNCTION BOXES

NEMA · RoHS Compliant Available · Hoffman · IP65 · UL · CSA

Aluminum Box w/ Continuous Hinge

3 Point Latch Kit, Key Lock, CCW

- NEMA Type 12 and 13, IEC60529, IP65
- Designed for indoor use to protect electrical, electronics or pneumatic components from dust, dirt, oil and water
- **CHAL series** aluminum, continuous hinge boxes have smooth, brushed finish and feature stainless steel screws and clamps that secure cover and assure watertight seal
- Constructed of 14- or 16-gauge steel and coated with an ANSI 61 gray polyester powder finish inside and out
- All boxes have an oil-resistant gasket and feature continuously welded and ground smooth seams
- Weldnuts provided for mounting optional white 14-gauge steel panels, *order separately below*

WALL-MOUNT NEMA TYPE 4X STAINLESS STEEL & ALUMINUM ENCLOSURES

NEMA

RoHS Compliant Available

Hoffman®

IP66 UL SP

- Designed to provide protection in corrosive environments in both indoor and outdoor settings
- Gasketed with a continuous hinge
- Rolled flange around three sides of the door and all four sides of the enclosure opening to exclude liquids and other contaminants
- Include a data pocket and hasp and staple for padlocking
- NEMA 4X stainless steel enclosures manufactured from 14-gauge Type 304 stainless steel coated with a smooth #4 brushed natural finish; meet NEMA 3, 3R, 3RX, 4, 4X, 12 and 13 and IEC 60529 IP66
- NEMA 4X aluminum enclosures manufactured from Type 5052 H-32 aluminum with a smooth brushed natural finish; meet NEMA 3R, 4, 4X, 12 and 13 and IEC 60529 IP66
- *Order white steel panels separately online*

NEMA 4X Stainless Steel or Aluminum

Concept® wall-mount enclosures now offer a 90-degree body flange currently provided on stainless steel Concept® offerings. Benefits include larger gasket contact area for excellent seal, increased flange trough collar depth to divert liquid, internal hinge brackets have a gasket added similar to FUSION™ AND ZONEX™ and plastic sealing washer on hinge screws removed for improved and lower seating. The viewing area of window-door and deep-hinged window kits will be slightly reduced.

DOOR STOP KIT
Mfg. part no. ADSTOPK door stop kit for NEMA Type 4 and 12 enclosures secure door in the open position. Can be installed at the top or bottom of door that opens horizontally. Door opening angle can be adjusted by means of a wing nut. Stop arm slides neatly out of the way when door is closed. All parts are zinc-plated steel. Mounting hardware included. **NOTE:** door stop kit should not be installed on enclosures configured with a swing-out panel or swing-out rack frame. Maintains UL/CSA Type 4 and 12 rating if properly installed. **Mfg. part no. ADSTOPKSS6** Type 316 stainless steel for corrosion protection and maintains an enclosure's Type 4X rating.

DOOR STOP KIT

Door stop kit for NEMA Type 4 and 12 enclosures secure door in the open position. Can be installed at the top or bottom of door that opens horizontally. Door opening angle can be adjusted by means of a wing nut. Stop arm slides neatly out of the way when door is closed. All parts are zinc-plated steel. Mounting hardware included. **NOTE:** door stop kit should not be installed on enclosures configured with a swing-out panel or swing-out rack frame. Maintains UL/CSA Type 4 and 12 rating if properly installed.

CONCEPT® WALL-MOUNT NEMA ENCLOSURES

NEMA

RoHS Compliant Available

Hoffman®

IP66 UL CSA DVE

- Painted solid door enclosures: NEMA 4, 12 & 13, VDE & IP66
- Painted window door and stainless steel solid door enclosures also available; *go online or call*
- Can be direct mounted or mounted via included brackets
- Hardware kit with panel mounting nuts, panel grounding hardware and sealing washers
- 16-gauge steel with ANSI 61 gray polyester powder painted finish
- Handles, padlock, data pockets, door stop and mounting bracket kits available *on page 2307*

Concept® wall-mount enclosures now offer a 90-degree body flange currently provided on stainless steel Concept® offerings. Benefits include larger gasket contact area for excellent seal, increased flange trough collar depth to divert liquid, internal hinge brackets have a gasket added similar to FUSION™ AND ZONEX™ and plastic sealing washer on hinge screws removed for improved and lower seating. The viewing area of window-door and deep-hinged window kits will be slightly reduced.

Hoffman®

NEMA

Triangular 7-mm Insert with Key

CWHNL, CWHK and **CWHPTO** handles replace the standard slotted insert on all Concept® wall-mount enclosures. A die-cast zinc keylock handle provides easy access and security. The zinc-plated padlock handle accommodates a padlock up to a 5/16" locking bar. All three latch systems feature black plastic handles and can be converted from clockwise to counter-clockwise opening. **ADP1** and **ADP2** data pockets provide convenient storage for documentation inside solid-door enclosures. Constructed of dark-gray, high-impact thermoplastic with cutout areas for easy access and visibility to contents. Each data pocket includes mounting hardware. **CMFK** and **CMFKSS** mounting bracket kits are field installable. Stainless steel brackets are rated to NEMA Type 4X. Each kit includes 4 brackets and hardware. **ADSTOPK** door stop kit for NEMA Type 12 enclosures secure door in the open position. Can be installed at the top or bottom of door that opens horizontally. Door opening angle can be adjusted by means of a wing nut. Stop arm slides neatly out of the way when door is closed. All parts are zinc-plated steel. Mounting hardware included. **NOTE:** door stop kit should not be installed on enclosures configured with a swing-out panel or swing-out rack frame.

Hoffman®

IP66 UL

- Manufactured from Type 304 stainless steel
- Minimum-width body flange provides maximum body opening
- External formed 90-degree body flange
- Panel mounting studs fit optional CONCEPT panels and other accessories
- Mounting holes in back of body for direct mounting or for optional external mounting brackets
- Corner formed doors are interchangeable and easily removed by pulling clip-style hinge pins
- Quarter-turn latches furnished with flush slotted insert
- Seamless foam-in-place gasket
- Bonding provision on door; grounding stud on body
- Window doors have a clear polycarbonate window
- Door and body have smooth #4 brushed finish

For indoor or outdoor applications that require corrosion protection from chemicals and water. Furnished hardware kit consists of panel-mounting nuts, panelgrounding hardware and sealing washers for wall-mounting holes. Available in solid door models; *go online or call.*

POLYPRO® NEMA 4X POLYESTER ENCLOSURES

NEMA | RoHS Compliant Available | Hoffman® | IP66 | UL | CSA | POLYPRO ENCLOSURES

- Meets NEMA 4, 4X, 12 & 13
- Enclosure and window flammability evaluated per UL 508A
- IEC 60529, IP66, and CSA file no. 42186 rated
- Overlapping tongue-and-groove raised cover and seamless foam-in-place NEMA 4-rated gasket provide a secure seal
- Removable snap hinge cover allows acces to cover and body for modifications
- Molded layout grid on inside of body and solid covers assists with component mounting
- Internal rail system for panel height adjustment
- Embosses for rear panel mounting
- Light gray textured finish

Includes polyester mounting brackets and four adjustable panel blocks. Screw cover and padlockable non-metallic snap-down latch provisions provided as well.

QLINE® E POLYCARBONATE NEMA ENCLOSURES

NEMA | RoHS Compliant Available | Hoffman® | IP67 | UL | CSA

- NEMA 4, 4X, 6, 12 and 13 & IP67, UL 508 flammability
- Contoured body with flush cover screws
- RAL 7035 light gray polycarbonate material
- Easily punched, drilled, filed or sawed
- Covers feature a molded-in hole for a wire lead
- Seamless foam-in-place gasket for water- and dust-tight seal
- Molded internal pads for mounting zinc-plated steel panels
- Mounting bracket and hinge kit available; order separately below

HOL-TITE® OIL TIGHT HOLE SEALS

RoHS Compliant Available · Hoffman® · UL · CSA

Hole plugs seal unused pushbutton holes, conduit openings and knockout holes against dust, oil and water. Seals made of galvanized steel have oil-resistant gasket and are secured with a 10-32 x 5/8" threaded stud and plated wing nut. 16-gauge steel with ANSI 61 gray powder paint finish. Stainless seals have polished front surface, are made of series 300 stainless steel. 10-24 x 5/8 stainless stud with stainless wing nut. 16 gauge stainless steel backplate. Both have oil-resistant gaskets.

Data Interface Ports

Type 12 Hinged Window Kit

Deep Hinged Window Kit

Folding Shelf

Keyboard Box

External Data Pocket

Arc flash events may happen when an electrical fault occurs within the confined space of an enclosure. Often triggered by opening doors to access controls, the resulting explosion can cause devastating personal injury and extensive equipment damage. Conventional compliance with safety standards specifies that only highly-trained personnel with fire retardant, protective gear and non-conductive wands may breach enclosures within a "flash protection boundary" established by NFPA 70E. This method is not only potentially hazardous, but entails considerable compliance costs and may require a production shutdown to monitor controls or initiate a simple programming change. The components of the Arc Flash Safety System isolate workers from energized equipment within the enclosure while meeting NFPA 70E safety standards.

INTERSAFE™ TYPE 4/4X/12 DATA INTERFACE PORTS

The INTERSAFE™ Data Interface Ports are a solution for the intersection of convenience and safety. Ports are mounted on an enclosure to allow access to the programming devices inside the enclosure without opening the enclosure door. Feature frame and door assembly with aluminum backplate. All standard configurations include a GFCI or standard duplex receptacle with a 5-amp circuit breaker for added safety. Door gasket (between the door and plate assemblies) and plate gasket (between the plate assembly and the enclosure) together provide a tight seal. Quarter-turn latch with screwdriver slot and padlock hasp on all configurations. Continuous hinges attach to the door frame to allow easy door removal. An important accessory for use with a broad range of enclosures, these ports maintain compliance with the NFPA 70E arc flash protection directive. 120 VAC receptacles and programming connectors are mounted to the plate in 75 standard configurations. Modifications and customization available to accommodate a wide variety of additional connectors, *go online or call.*

ACCESSORIES

Folding shelves provide a convenient location for mobile PCs, laptops and test equipment, and fold out of the way when not in use. Feature heavy gauge steel construction and automatic locking in raised position. External CONCEPT® Keyboard Box mounts to an enclosure to provide a self-contained Type 4 housing for connected keyboards. External Data Pockets enable operators to access system documentation without opening the enclosure door. NEMA Type 12/4 rated.

LED LIGHT KITS

IP 30 NEMA Hoffman®

LED Light Kits

LED Light Extension Connector/Cable Assembly

LED Light Input Connector/Cable Assembly

LED light kits provide interior enclosure lighting. These light kits are ideal for remote and darkened enclosure applications. The light can be mechanically fastened with included hardware to maintain enclosure UL listing (up to Type 4X), or can be magnetically attached to flat steel surfaces. The lights have auto-sensing circuitry (AC voltage 90 VAC to 260 VAC and DC voltage 20 VDC to 60 VDC). LED lights are light-weight and in a small form factor while providing 900 LM of 6500K light. Power consumption for all models is 5 watts.

Mfg. Part No.	Dimensions (in.) H x Dia. x D	Mounting Style	Power Source	Activation	Voltage	Stock No.	Price Each 1-4

LED Light Extension Connector/Cable Assembly

The extension connector/cable assembly is used to connect adjacent LED lights (daisy chain). Up to 10 LED lights can be ganged or connected in series. Pre-assembled connector/cable assembly with 39.4-in. (1000 mm) long cable between input and output connectors. Cables are constructed of 16 AWG copper wire.

Mfg. Part No.	Cable Length Between Input /Output Connectors (in.)	Power Source	Description	Stock No.	Price Each 1-4
LEDA10E	39.37	AC	AC LED Lights	52W5224	56.07

ARCA JIC SIZED POLYCARBONATE ENCLOSURES

RoHS Compliant Available

FIBOX Enclosing Innovations

- All rated UL 4, 4X, 6, 6P, 12, 13
- Feature oversized PUR gasket
- Non-toxic and halogen-free
- Continuous temperature range: -40°F to +175°F (-40°C to +80°C)
- Impact resistance per UL 508/UL 50
- Flammability rating: UL508
- AR664, AR865, AR1086, AR12106: NEMA 6, 6P

Precision injection-molded enclosures feature superior chemical resistance and wide temperature utilization range of polycarbonate plastic. Cover features overlapping design and superior protection of the formed-in-place PUR gasket. Enclosures include 4 mounting feet. Panels are white-painted carbon steel, *order separately below.* 16 x 14 x 18″ and 18 x 16 x 10″ sizes also available, *go online or call.*

NEMA WALL-MOUNT CABINETS

IP67 NEMA RoHS Compliant Available FIBOX Enclosing Innovations

- NEMA 1,4,4X,13; IP 66/67
- Constructed of corrosion and impact resistant Polycarbonate
- Light gray or smoked transparent cover option
- Padlockable
- Also available in UL/cUL approved polycarbonate plastic
- Also available with 3mm double bit lock/key instead of latches

CAB series wall mounting cabinets are designed especially for instrument builders to mount components at several different depths. A rigid internal door (swing door) can be mounted or hinged at different depths, with the mounting plate in the bottom or bus bars mounted. The Fibox® quick lock system allows easy access to the enclosure while still insuring tight sealing. Screw cover versions (CAB PCQ XXXXXX X) available in shallower sizes; *go online or call.*

ARIA FIBERGLASS REINFORCED POLYESTER NEMA ENCLOSURES

RoHS Compliant Available vynckier ENCLOSURE SYSTEMS, INC. IP66 UL CE NEMA

Opaque Cover w/ ¼-Turn Handle | Opaque Cover w/ Padlockable Latch | Bonded Window Cover w/ ¼-Turn handle | Bonded Window Cover w/ Padlockable Latch

- UL Type 4X; NEMA 4X; IEC 529 rated IP66-9
- Made of beige (RAL 7035) hot molded fiberglass reinforced polyester that is self extinguishing and halogen-free
- Internal three-point closing system with one-point entry
- Integrated rain shield
- Furnished with four threaded studs and bolts for mounting plate or mounting frame installation
- Seamless, polyurethane gasket in molded door edge channel
- Temperature resistance: -58°F to +302°F (-50°C to +150°C), momentary +392°F (200°C)
- **KLC-SP** 3mm (.12") lock also available for use with **PLH-PS** handle

QLINE® D POLYCARBONATE NEMA 4X 22mm & 30mm ENCLOSURES

NEMA RoHS Compliant Available Hoffman® UL CSA IP67

Contoured bodies with flush cover screws for attractive, contemporary appearance. Designed to insulate and house 30.5mm or 22.5mm pushbuttons in wet, dusty, and corrosive environments. Constructed of high-impact polycarbonate material that's RAL 7035 light gray and easily punched, drilled, filed, or sawed. Cross-point captivated cover screws are zinc-plated stainless steel. Removable polycarbonate screw cover caps and mounting hardware included. Molded internal pads for mounting panels, rails and other components. Gasket provides a watertight and dust-tight seal. Flammability rated UL 508. Meet NEMA/EEMAC Types 4, 4X and 12 and IEC60529, IP67 requirements. UL listed, CSA certified. For use with switches *on pages 1760 and 1770.*

22.5mm & 30.5mm PUSHBUTTON ENCLOSURES

NEMA RoHS Compliant Available Hoffman® IP65 IP66 UL CSA

Pushbutton Enclosure

Sloping Front Pushbutton Enclosure

Consolet Enclosure

Pedestal and Base

These pushbutton and Consolet enclosures provide protection against water, oil, and dust. Captivated cover screws thread into sealed wells. Units come with grounding stud in body and oil-resistant gasket and adhesive. All are UL listed, CSA certified.

PUSHBUTTON ENCLOSURES

Pushbutton enclosures feature "4-way" holes designed to accept all brands of oiltight 22.5 or 30.5mm pushbuttons, switches, and pilot lights. Steel construction with ANSI 61 gray polyester powder painted finish meets NEMA 12, 13 and IEC 60529, IP65. Corrosion-resistant stainless steel with smooth #4 brushed natural finish meets NEMA 4X, 12, 13 and IEC 60529, IP66 (available online).

ECONOBOX WITH MOUNTING BRACKET COVER

RoHS Compliant Available · BUD Industries, Inc.

- External mounting brackets cast into the cover allow box to be mounted on wall or panel
- Rugged ADC-10 alloy die-cast aluminum box
- Close fitting flanged cover attaches with screws
- Mounting brackets accept up to #6 mounting screws (not included)
- Offers EMC protection
- NEMA rated die-cast boxes available *on pages 2292-2294*
- Modifications available, *go online or call*

ALUMINUM & STEEL UTILITY CABINETS

RoHS Compliant Available

Bud Industries, Inc.

AU Series is designed with:
- Sturdy, all-riveted 0.040" aluminum construction
- Removable front and back panels for easy accessibility
- Available in natural aluminum or metallic gray (MG) finish.
- Ideal for mounting amplifiers, meters and test instruments

CU Series is designed with:
- Constructed of 20-gauge steel with metallic-gray finish
- Sturdy, all-riveted body with removable front and back panels
- Ideal for electronic equipment, monitors and frequency meters

Modifications available, *go online or call*.

CONTOUR SERIES UTILITY CABINETS

RoHS Compliant Available

Bud Industries, Inc.

Ideal for meters and other electronic components. Feature contoured, rounded corners and edges, removable flange panels, and louvered rear panel. 20-gauge steel construction. Body has gray textured finish; panels are white textured. Includes 4 rubber feet. Modifications available, *go online or call*.

DIE-CAST ALUMINUM ENCLOSURES

NEMA

RoHS Compliant Available

HAMMOND MANUFACTURING

IP54 IP66

- Lap joint construction protects against access of dust and splashing water and provides improved EMI/RFI shielding (watertight version comes with a self-adhesive, EVA foam gasket)
- Unpainted version is vibra finished for a smooth surface with no sharp edges
- Painted version has polyester powder paint applied to the exterior surface (black screws included to enhance appearance)
- Four M3.5 x 0.6 mm stainless steel, Philips head, machine screws secure lid into factory tapped holes
- No internal ribs for easy installation of connectors without interference or additional milling
- Low side wall draft angle (2 degrees or less) for easy PC board mounting

Unpainted

FLANGED LID-DIE-CAST ALUMINUM ENCLOSURES

RoHS Compliant Available

HAMMOND MANUFACTURING

Mfg. part no. 1590 flanged lid die-cast enclosures allow for easy mounting to walls or shelves. These enclosures share the same body and features as the regular **mfg. part no. 1590** enclosures except the lid is extended and four countersunk holes are cast into the flanges. The flanged lid also allows for added security as the lid/enclosure screws are hidden against the wall or shelf.

DIECAST ALUMINUM ENCLOSURES—WATERTIGHT WITH FLANGED LID

RoHS Compliant Available

HAMMOND MANUFACTURING

Feature 2-piece lap-joint construction with a bead of rubber-like silicone around the perimeter to provide protection against dust accumulation and water. Designed to meet IP65 classification. Flanged lid permits easy mounting and extra security by hiding screws. Assembled with machine screws in threaded holes with individual neoprene "O" rings. Natural finish.

WATERTIGHT THICK WALL DIECAST ALUMINUM ENCLOSURES

NEMA — RoHS Compliant Available — HAMMOND MANUFACTURING — IP66

- Designed to meet IP66 (includes pre-formed, one-piece silicone rubber gasket)
- Two-piece "tongue and groove" construction for protection against access of dust and water
- Ideal for repetitive opening and closing
- Wall mount using "through box blind hole" construction, outside of gasket protection
- Unpainted version is vibra finished for a smooth surface with no sharp edges
- Painted version is painted with polyester powder paint (inside and out)
- Lid secured with stainless steel, Philips head, counter sunk, machine screws into factory tapped holes that are threaded with the first installation of self tapping lid screws
- Lid screws are outside the gasket protection area to eliminate the need for "O" rings
- Lid screws are self captivating on six sizes (**mfg. part nos. 1550Z107, 1550Z108, 1550Z116, 1550Z117, 1550Z137 & 1550Z139**)

ALUMINUM DESKTOP CONSOLES

RoHS Compliant Available — HAMMOND MANUFACTURING

Mfg. part no. 1456 aluminum consoles are sold as complete units (top & bottom). The bottom section is fabricated from 0.081" thick aluminum and painted an off-white powder paint. The top sloped panel is 0.064" thick up to 14" wide models (0.081" thick over 14" wide) and is painted with a textured blue powder paint. Units include hardware and 4 self adhesive rubber feet.

LOW-PROFILE METAL INSTRUMENT CASES

RoHS Compliant Available

HAMMOND MANUFACTURING

Case is split into two equal halves, constructed of 18-gauge steel with choice of satin black or gulf-blue finish. Front and back panels are 0.064" thick aluminum (one satin black, the other satin off-white) for easy machining. Symmetrical design; either end can be front or rear. Each unit comes complete with hardware and rubber feet.

WATERTIGHT ALUMINUM INSTRUMENT CASES

RoHS Compliant Available

HAMMOND MANUFACTURING

- Designed to meet IP65 ratings
- Heavy duty extruded enclosures designed to house PC boards or for equipment interfacing
- Sized for standard Eurocards
- PC boards mount horizontally by sliding into internal slots extruded into the enclosure body
- Extruded aluminum body includes a recessed area for labels or membrane keypad
- End panels are diecast aluminum with full perimeter gaskets

IP65

Clear

Includes two diecast aluminum end panels painted in a black satin powder paint, two closed cell polyethylene foam end plate gaskets and rubber "O" rings for assembly screws All hardware and self-adhesive feet included as well.

EXTRUDED ALUMINUM CASES

RoHS Compliant Available

HAMMOND MANUFACTURING

- Designed for horizontal mounting of PC boards
- Panels are one piece with integral bezel
- PC boards slide horizontally into internal guides extruded into walls
- Includes all hardware and rubber feet
- Clear or black anodized finish

Version 1 contains:
- 2 aluminum end panels and 2 plastic bezels, optionally installed to create a modern look

Version 2 contains:
- 2 easy to machine, solid plastic end panels

DIECAST ALUMINUM RFI/EMI ENCLOSURES

RoHS Compliant Available

Pomona®

Shielded diecast aluminum enclosures fulfill requirements for EMI/RFI applications. Available with natural aluminum finish or blue baked enamel finish per federal standard 595 #25109 over primer wash per DOD-P-15328. Boxes include aluminum cover with clear anodized finish per MIL-A-8625 and cover screws. Select boxes feature component mounting capabilities. All rated 500VRMS, +150°C. *Order replacement covers and screws separately below.*

RASPBERRY PI MICROCOMPUTER ENCLOSURES

RoHS Compliant Available

Bud Industries, Inc.

- Available in two styles — The PI Sandwich and The PI Plate
- Designed to accept current version of Raspberry PI microcomputer
- Accommodate changes in component relocation on the PCB and the potential addition of components
- Easy snap-in installation of PCB
- Made of durable and impact resistant ABS with attractive translucent raspberry color

PI Sandwich

PI Plate

Raspberry PI microcomputer enclosures provide protection, flexibility and ease of access to all components with quick snap-in installation. The round version has a twist-lock cover and a central wiring access hub with cable management. The rectangular version is open on all four sides for direct access.

BOARD-GANIZER MULTI-DEVELOPMENT BOARD ENCLOSURE KIT

RoHS Compliant Available

Bud Industries, Inc.

- Made of aesthetically pleasing smoke colored ABS, the board-ganizer is a unique work space organizing platform designed to serve the rapidly growing community of electronics makers and developers
- As the cost of components keeps falling while capability is increasing, the board-ganizer allows the user to assemble 3 PCBs and shields in addition to a 600 tie points solder-less bread board
- The innovative enclosure lets the user combine and mix boards with no need of additional hardware; the boards are attached using specially developed adhesive backed rubber feet
- The fold and flatten feature makes it possible to work on a project with the boards side by side so they can be connected and wired. When the project is ready, it can be rolled up into a compact 5x5x3" enclosure – without the need of undoing any of the wiring.

Board-ganizer kit includes 4 side panels, 2 tops, package of adhesive backed rubber feet, 4 pins and instructions.

Bud Industries, Inc.

High-Impact ABS

Molded plastic enclosures meet IEC 529 enclosure IP54 classification for instrumentation, telecommunications, and other applications from hand-held to desktop sizes. 2-part design with tongue-and-groove joint between top and bottom covers and end panels. Internal guide slots for vertical mounting of PC boards; internal bosses for horizontal PC board mounting. Scratch-resistant, lightly textured top and bottom covers. Four M-3 screws are countersunk in bottom cover, threaded into brass inserts in top cover. UL 94V-0 ABS top and bottom covers are dark gray with light gray end panels. High-impact ABS top and bottom covers are light gray with dark gray end panels. Modifications available online.

DIN RAIL MOUNT MULTI-BOARD PLASTIC BOXES AND ACCESSORIES

RoHS Compliant Available

Bud Industries, Inc.

- Durable UL94V-0 rated ABS/PC blend plastic housing
- Three levels of PC board mounting locations - PC boards not supplied
- Bottom level accepts PC board with modular type terminals on 0.2" centers
- Removable terminal guards have snap-off tabs to match number of terminals used
- Snap-fit design allows tool-less assembly of all parts including PC boards
- Snap-fit front cover is easily removable for machining or silk-screening
- Fits standard 35mm DIN rail
- Finish: Light Gray

TABLET ENCLOSURES

RoHS Compliant Available

Bud Industries, Inc.

Features & Benefits:

- Molded in high impact ABS which is flame retardant to both UL94-V0 and UL94-HB
- Available in white (RAL9002, UL94-V0 of ABS) or black (RAL9005, UL94-HB of ABS)
- Ideal design for portable, desktop or wall mounted electronic application
- Space of the recessed area is designed for 4.3", 5.7", 7.0", 8.4" & 10.4" LCD module or touch screen use
- Lid & base incorporate a tongue and groove sealing design, optional EPDM gasket can be ordered and installed to meet IP65 rating of waterproof and dust
- Recommended working temperature -20°C to 80°C
- Add-on rubber feet are included
- Machine designers

PLASTIC ENCLOSURES FOR DEVELOPMENT BOARDS

RoHS Compliant Available

HAMMOND MANUFACTURING

NEW

- Machined from our popular 1593 series plastic enclosures
- Machined to accept popular development boards - choose from the Arduino Uno, Arduino Due, Arduino Mega 2560, beaglebone, beaglebone black, freescale freedom KL-05Z, freescale freedom KL-02Z or freescale freedom KL-25Z
- Molded in a choice of black, grey or Translucent Blue general purpose ABS plastic with a satin texture
- Enclosure is machined to allow access to I/O connectors & often used controls and/or LEDS
- Enclosure is secured with self tapping screws
- Black & Translucent Blue plastic enclosures include black screws, grey plastic enclosures include nickel finish screws
- Includes four (4) self adhesive rubber feet & instruction sheet

NON-METALLIC ENCLOSURES

WATERTIGHT ENCLOSURES

IP65 RoHS Compliant Available HAMMOND MANUFACTURING

ABS Plastic w/ Shallow Lid (Opaque Cover)

ABS Plastic w/ Shallow Lid (Clear Cover)

ABS Plastic w/ Deep Lid (Opaque Cover)

ABS Plastic w/ Deep Lid (Clear Cover)

Polycarbonate w/ Shallow Lid

- Designed to meet IP 65
- Ideally suited for mounting PC boards or DIN rail mounted components
- Flammability rating of UL94 HB
- Gasketed lid with two piece "tongue and groove" construction provides protection against oil, dust and water
- Rubber gasket is included and must be field installed
- Lid includes smooth recessed area for membrane, label or silkscreen (see chart below for recess size)
- Integral stainless steel bushings (for repetitive assembly and disassembly)
- Lid screws are self captivating (lid holes are threaded with the first installation of lid screws)
- Internal DIN rail mounting tabs are molded in

Lid is secured with self-captivating M3.5 stainless steel machine screws (included). All hardware is stainless steel to avoid corrosion caused by dissimilar metals.

MULTIPURPOSE FLAME RETARDANT ABS PLASTIC ENCLOSURES

RoHS Compliant Available HAMMOND MANUFACTURING IP54 NEMA

Standard Lid

Flanged Lid

- Ideally suited for mounting printed circuit boards horizontally
- Flanged lid is perfect for wall or shelf mounting and enclosure security
- Internal sides of enclosure are smooth for easy connector installation
- Tongue and groove lid to box construction provides protection against environmental elements
- Designed to meet IP54
- Lid and box both contain - four molded in PC board standoffs
- Molded from easy to machine, flame retardant ABS plastic
- ABS plastic material carries a UL flammability rating of 94V-0

Lid is secured with M3 x 10 mm Philips machine screws, threaded into integral brass bushings. Perfect for applications with repetitive assembly and disassembly are required. Stocked in satin texture black. Black enclosures include black screws.

HAND HELD FLAME RETARDANT ABS PLASTIC ENCLOSURES

RoHS Compliant Available

HAMMOND MANUFACTURING

- Ergonomically designed for hand-held comfort
- Choice of two versions, with or without battery door
- For instrument or mobile data enclosures requiring a keypad and display or when repetitive assembly and disassembly are required
- Molded from flame retardant ABS plastic material carries a UL flammability rating of 94V-0
- Lap joint construction provides protection against access of dust and splashing water designed to meet IP54
- Battery door and compartment versions include 4 or 8 battery clips (for 2 or 4-AA batteries) and 1 or 2 9V (PP3) battery clip/s
- Choice of two enclosure colors, grey (RAL7035) or black (RAL9011), the soft side plastic material is dark grey (RAL7012)

FLAME RETARDANT ABS PLASTIC TABLET ENCLOSURES

NEW

HAMMOND MANUFACTURING

- Low profile and ergonomically designed
- Perfect for instrument or mobile data enclosures requiring a touch screen
- Molded from flame retardant ABS plastic UL flammability rating of 94V-0
- Choice of black (RAL 9011) or grey (RAL 7035)
- Enclosure is assembled with six (6) - M3-0.5 x 18 mm philips machine screws
- Integral brass bushings are factory inserted into the top half of the enclosure
- Lap joint construction designed to meet IP54.
- P.C. board standoffs are molded into case top & bottom halves
- Bottom half of enclosure includes a square molded inlay for labels

HIGH-IMPACT (FRABS) PLASTIC HAND-HELD CASES

RoHS Compliant Available

HAMMOND MANUFACTURING

Molded in flame-retardant, high-impact ABS (FRABS) plastic, meets UL94V-0. Includes integral brass inserts and machine screws (M3 head) providing extra strength for repeated assembly and disassembly. Recessed top panel is ideal for membrane display; lap joint construction provides protection against dust and liquid. Extra-deep top and ultra-shallow base designed to enhance aesthetics and improve flexibility as a "hand-held" instrument. Twelve PCB bosses (six in both top and bottom) and vertical mounting slots (used with *optional* battery compartment dividers) are molded in. *Order battery dividers and belt clips separately; go online or call.*

HEAVY-DUTY (FRABS) PLASTIC BOXES

RoHS Compliant Available

HAMMOND MANUFACTURING

- Matte textured, thermoplastic/flame retardant high-impact ABS (FRABS) for easy punching and drilling
- Also available in economical plastic
- UL94V-0 Flammability rating at 1.77mm with 60°C continuous temperature
- countersunk lid
- Threaded brass inserts with M3 x 0.5 x 18mm philips machine screws
- Average wall thickness: 0.124"
- Ideal for frequent opening/closing

Removable PC card guides and watertight versions also available; *go online or call.*

INSTRUMENT ENCLOSURES

NEMA

RoHS Compliant Available

HAMMOND MANUFACTURING

IP43

- Designed to house PC boards for instrument use
- Molded in light gray general purpose ABS plastic (flammability rating of UL94 HB)
- Two-part clam shell construction with bottom halves having molded-in PC board standoffs
- Front and rear panels are interchangeable and removable for modifications
- "Tongue and groove" construction provides protection against dust & water
- Designed to meet IP43
- Threaded integral brass bushings (for repetitive assembly and disassembly)

All units are secured with M3 Philips machine screws except **mfg. part nos. RM2015S and RM2055S** which use self-tapping Philips screws. Larger enclosures also include PC board standoffs on the top half (four short M3 screws included).

WALL-MOUNT CABINETS -- EMPEROR SERIES

RoHS Compliant Available

Bud Industries, Inc.

- Steel construction
- EIA 310 compliant for 19" mount equipment
- Black textured powder finish

Furnished completely assembled with tempered glass front door and removable sides. Includes two pairs of fully adjustable panel mounting rails in center section, one fixed pair of mounting rails in the rear section, one ventilated shelf, and two fans installed in the top of the center section. Slots with readily removable covers are provided in the top and bottom of the rear section for easy cable installation. Sides are readily removable but come with key lock and with ventilation at top and bottom of cabinet. Four mounting slots provided in rear unit for rapid wall mounting.

VALURACK UPRIGHT CABINET RACK

RoHS Compliant Available

Bud Industries, Inc.

- Ready-to-use capability
- Welded together strength and sturdiness
- EIA-310 compliant
- Durable black texture powder-coated finish

VR series feature integral, full height, front panel mounting rails with EIA universal spaced mounting holes. Panel mounting rails are located in the front of the cabinet and are recessed 1". Welded-in supports allow for mounting additional adjustable panel mounting rails. Large 10" square hole in the bottom of the cabinet, along with 1.11" diameter knockouts provides cable access. Bottom of cabinet is pierced for use with casters or levelers. Top is perforated for use with 10" exhaust fan. Suggested 700# equipment load capacity and higher when used in conjunction with adjustable panel mounting rails for 4-point equipment mounting. A sampling of suggested cabinet rack accessories are available *on page 2336*. For full line of accessories, go online. Modifications available, *go online or call*.

KEYBOARD/MOUSE SHELVES

RoHS Compliant Available

Bud Industries, Inc.

Stationary

Sliding

Stationary and sliding shelves are constructed of heavy-gauge steel. **Mfg. part no. SA-1775** stationary shelf features mouse pad that can be bolted onto either side of the shelf. Utilize 1U (1.75″) of panel space height. **Mfg. part nos. KS-1785** and **KS-1787** sliding shelves lock securely in the open position. Feature a small mouse pad that slides out in either the left- or right-hand position. Utilize 2U (3.50″) of panel space height. Available in 19″ and 23″ panel space widths in either black textured finish or metallic gray.

"ZERO SPACE" FIXED VENTED SHELVES

RoHS Compliant Available

HAMMOND MANUFACTURING

- Rugged textured black powder paint finish
- No obstruction to front panel space or equipment
- Mounts on two pairs of panel rails (front and back)
- Includes all mounting hardware

The **RZVS series** are heavy duty, 14 gauge steel shelves which are vented to provide improved upward heat movement. Shelves require no front rail mounting or front rack space. Rear lip is covered with a rubber channel to avoid equipment scratching and cable chaffing. Rear lip also folds up for extra strength and acts as a rear equipment retainer. Sides are slotted for easy adjustment and fold up for easy hardware installation. Includes two equipment stops which can be fastened anywhere on the shelf.

Hoffman®

Wall-Mount Cabinet (Window Door)

Fixed Rack

Single-Sided Shelf

Power Distribution Unit

Double-hinged cabinets provide security, equipment access, cooling and support for network and other 19-in. rack-mount equipment. The cabinet has three components: front door, center section and wall section. Can be mounted to be left- or right-hinged and comes completely assembled and ready to mount. Constructed of quality welded 16 and 14 gauge steel coated with RAL 9005 black textured, low-gloss polyester powder paint.

COOLING FANS

Designed for use in enclosures where space is limited, these 117 mm diameter, ball-bearing style axial fans are powered by 115 VAC, 50/60 Hz single-phase motors with a 6 ft power cord with polarized plug for power connections. These fans are ideal for applications where compact and quiet service is desired.

19″ CHASSIS AND SUBRACKS

RoHS Compliant Available

Schroff™

EuropacPro Kit, Shielded, For CompactPCI, For Backplane Mounting Without I/O

EuropacPro Kit, Shielded, "Light", For Backplane Mounting

EuropacPro Kit, Unshielded, "Heavy", For Backplane Mounting

- 19″ Chassis and Subracks for VME, VME64x and CompactPCI for rack mount installations
- Subracks come in 84HP width and 3U/6U height, but can be configured to various sizes
- Designed to withstand loads of up to 17 or 33 lbs of static loads
- Shielded and non shielded versions
- All preconfigured for installation of back plane with insulation

VME UNSHIELDED SUBRACKS FOR UP TO 17lbs. STATIC LOAD

VME / VME64x BACKPLANES

RoHS Compliant Available

Schroff™

- Mounting options: isolated or connected to chassis GND
- Power input with power bugs
- Shrouds on slot 1 J1 and on all slots in J2
- Inboard termination
- Electric automatic daisy chain

Backplane 4Slot 3U VME J1

Backplane VME64x 6U w/o P0

VME / VME64x backplanes are specially designed to achieve exellent power distribution, best signal integrity and virtually zero cross talk. The SMD components used on VME / VME64x backplanes lead to a much lower failure rate than conventional components. Schroff uses ceramic capacitors on the VME / VME64x backplanes to gain a better noise reduction at frequencies above 10MHz. This feature reduces the radiated and conducted noise caused by the processor clock signals. In addition, ceramic capacitors have no limitation in useful lifetime, as compared to aluminium capacitors that dry out after 5 to 10 years, and are unaware of the hazardous fire risks known from tantalum electrolytics. VME / VME64x backplanes are fully compliant to the latest VITA specifications.

RoHS Compliant Available

Schroff™

- Isolated Assembling / Connection to ChassisGND
- VI/O
- Stiffeners to reduce bending of the backplane
- Geographical Addressing (GA)
- Up to 5 Slots 66MHz operation
- Hot Swap

CompactPCI backplanes are specially designed to achieve exellent power distribution, best signal integrity, virtually zero cross talk, and minimum clock skew. The SMD components used on Schroff CompactPCI backplanes lead to a much lower failure rate than conventional components. Schroff uses ceramic capacitors on the CompactPCI backplanes to gain a better noise reduction at frequencies above 10MHz. This feature reduces the radiated and conducted noise caused by the processor and PCI clock signals. In addition, ceramic capacitors have no limitation in useful lifetime, as compared to aluminium capacitors that dry out after 5 to 10 years, and are unaware of the hazardous fire risks known from tantalum electrolytics. CompactPCI backplanes are fully compliant to the latest PICMG specifications.

RETAINERS, PCB-TAINER™ SERIES 35-1, 35-2, 35-7

RoHS Compliant Available

Birtcher

Features:
- Spring action card retention
- Zero entry force
- Support PCB board thickness of 0.063″ (1.59)
- Typically screw or rivet mounted to a sheet metal chassis.
- DSCC 85020 and 85021 (except series 35-2)

Applications:
- Designed for non-cold wall applications
- For moderate shock and vibration environments
- Low heat dissipation

Beryllium copper (1/4H per ASTM-B-194)
Stainless steel (type 301 Cond 1/4H per AMS 5517)
Cadmium plate (QQ-P-416)
Silver plate (QQ-S-365, Type III, grade A)
(208212)

RETAINERS, LOK-TAINER™ SERIES 24

RoHS Compliant Available

Birtcher

Applications:
- Designed for non-cold wall applications
- For moderate shock and vibration environments
- Low heat dissipation

Features:
- Lever actuated
- Cam and lobe design
- No tools needed to engage/disengage PCB
- Zero entry force
- Typically screw or rivet mounted to a sheet metal chassis or to the PCB
- DSCC 84168

CARD GUIDES, LOK-TAINER™ SERIES 127

Birtcher

Applications:
- Designed for non-cold wall applications
- For moderate shock and vibration environments
- Low heat dissipation

Features:
- Screw actuation
- Cam and lobe design
- Precise clamping force
- Support PCB board thickness from 0.025″ (0.64) to 0.070″ (1.78)
- Zero entry force
- Typically screw or rivet mounted to a sheet metal chassis or to the PCB
- Beryllium copper (QQ-C-553) with cadmium (QQ-P-416) finish
- DSCC 88052

(196539)

RETAINERS, WEDGE-TAINER™ SERIES 340

Birtcher

Applications:
- Designed for sheet metal / heat sink applications where the retainer is not mounted to the PCB, or where a machined cold wall slot is not available or, not desired to reduce costs
- For rugged, heavy shock and vibration environments
- High clamping force and heat dissipation

Features:
- Combines a chassis mounted housing with a three piece screw actuated wedge lok retainer
- Screw actuation
- Support PCB board thickness from 0.060″ (1.52) to 0.094″ (2.39)
- Zero entry force
- Screw mounted (#4 40 UNC 2B) to the cold wall
- Profile (w x h): 0.480″ (12.19) x 0.315″ (8.0)
- Aluminum alloy (6061-T6 per ASTM-B221 or QQ-A-220/8) with chem film (MIL-C-5541, Class 1A, Gold) finish

Mfg. Part No.	Length in. (mm)	Wedge Segments	Screw Action	Stock No.	Price Each 1-4

RETAINERS, WEDGE-LOK® SERIES 40

Birtcher

Applications:
- Designed for cold wall applications
- For heavy shock and vibration environments
- High clamping force and heat dissipation

Features:
- Screw actuation
- Three wedge segments, shaftless
- Superior clamping force for various PCB thicknesses
- Profile (w x h relaxed, expanded): 0.225″ (5.72) x 0.260″ (6.60), 0.330″ (8.38)
- Zero entry force
- Can be disassembled before or after mounting
- Aluminum alloy (6061-T6 per ASTM-B221 or QQ-A-220/8) with chem film (MIL-C-5541, Class 1A, Gold) finish
- DSCC 84103 & CID 59590

EXTRACTORS, SERIES 71

Birtcher

Features:
- Lever ratio: 4.17
- Maximum extraction force per extractor obtained with 20 pounds of finger force is 50 pounds
- Aluminum alloy (5052-H32 per QQ-A-250/8) with chem film (MIL-C-5541, Class 1A, Gold) finish
- DSSC 84191

Applications:
- Designed for both sheet metal and cold wall applications
- Facilitates the insertion and extraction of PCB with high density backplane interconnects

Mfg. Part No.	PC Board Thickness in (mm)	Stock No.	Price Each 1-4	Price Each 5-9

CONDUCTION COOLED KEYING KITS

Birtcher

Features:
- Complies with VITA 1.6 standard
- 6 configurations per coding bracket set, 36 configurations in a 6U conduction cooled applications, and 1296 configurations in a 6U non-conduction cooled application
- Thread type: 2.5mm x 0.45
- Each kit includes two pairs of keys and mounting hardware
- Aluminum alloy (5052-H32 per QQ-A-250/8) with chem film (MIL-C-5541, Class 1A, Gold) finish

Applications:
- IEEE 1101.10 applications without a front panel, but with keying requirements

CARD GUIDES, SERIES 120

RoHS Compliant Available

CALMARK

Features:
- Extra deep guide
- Wide lead-in for easy card entry
- No mounting hardware required
- Narrow profile for excellent air flow
- Mid-span mounting point for greater stability
- Nylon, natural color (white)
- Suffix "-3" in **mfg. part no.** indicates for 2.4 (0.094) thick pcb
- Prefix "V0" in **mfg. part no.** indicates UL94V-0

RETAINERS, CARD-LOK SERIES 225

CALMARK

Applications:
- Designed for cold wall applications
- For heavy shock and vibration environments
- High clamping force and heat dissipation

Features:
- Screw actuation
- Three wedge segments, shaftless
- Superior clamping force for various PCB thicknesses
- Zero entry force
- 2-56 tapped hole for mounting
- Can be disassembled before or after mounting
- Profile (w x h, relaxed, expanded): 0.225″ (5.72) x 0.270″ (6.86), 0.325″ (8.26)
- Aluminum alloy (6061-T6 per ASTM-B221 or QQ-A-220/8) with chem film (MIL-DTL-5541, Class 1A, Gold) finish

OPEN FRAME RACKS - SMARTRACK SERIES

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

SRW012US SR4POST25 N060-004

SmartRack open frame cabinets are perfect for network equipment in IT environments with limited floor space. The open frame rack is a heavy duty open frame rack designed for secure, high density servers and networking applications in IT environments.

42U 4-POST SMARTRACK PREMIUM OPEN FRAME RACK

SmartRack Premium open frame rack feature vendor-neutral square hole/cage nut mounting for guaranteed compatibility with all EIA-310-D compliant 19″ equipment. Premium open frame racks ship fully assembled for rapid deployment and roll into place on heavy-duty casters. 3000 lb stationary / 2250 lb rolling load capacity.

CLIMATECAB CABINETS

NEMA

Black Box Corporation The World's Source for Connectivity

- Ideal for indoor use when you need to keep your servers outside a climate-controlled data center
- Digitally controlled air conditioners are available in 5000, 8000, and 12,000 BTUs (1465, 2344, and 3516 W) and in 120V or 230V (other models available upon request)
- NEMA 12 rated for protection against falling dirt; circulating dust, lint, and debris; and dripping or splashing liquids in indoor environments
- Fully gasketed openings, including a gland plate in the base, help to protect your devices from dust and other contaminants
- PLEXI-GLAS® window in front door
- Fully welded 12-gauge steel frame holds up to 1500 pounds (680 kg)
- Three-point locking handles on front and rear doors
- Feature standard 19″ rails
- Include casters and levelers for easy placement
- Rack angles are adjustable front to rear

The **ClimateCab** NEMA 12 Cabinet is your answer when you need to house servers or IT equipment but don't have a cooling infrastructure in place. In smaller installations, you can save thousands by using a **ClimateCab** cabinet instead of installing a complete data center with a custom cooling system and raised floors. **ClimateCab** is sealed against dripping water and dust, too. Sealed cable entries prevent air exchange. The digitally controlled air-conditioning unit (included) keeps your equipment comfortably cool. Just install your equipment, plug in the AC unit, and you have a complete, self-contained, self-supporting data center! The air-conditioning unit helps to control the temperature inside your ClimateCab by removing the heat buildup created by hot network devices. This unit uses closed-loop cooling in which the clean air inside the cabinet is kept separate from the ambient air to protect delicate components from humidity, dust, and other contaminants. The AC mounts in the side of the cabinet in minutes with eight bolts and can easily be installed by one or two people. Mounting hardware, gaskets, and instructions are included.

C-230 SERIES SOLID BEARING SLIDES

RoHS Compliant Available

GENERAL DEVICES Electronic Hardware Manufacturers

C-230-S Side and End View

Made of cold rolled steel, these 3-section, fully extendable slides fit standard rack or enclosure and provide high resistance to shock and vibration. They are well-suited for mobile applications. A quick disconnect stop latch permits instantaneous removal of the chassis. Slides are coated with Poxylube® dry film lubricant for smooth sliding action. To select overall slide length, determine cabinet mounting depth. **Sold in sets of 2.** *Up-and-down pivoting slides are also available; go online or call.*

Ejector Handle

Screw-mounted, DIN-based front panel kits include **V classic** pull-only fixed handle or **I VME64** VME64 ejector handle. Both include removable handle identification panels, aluminum front panel, and all mounting hardware including PCB board mounting support bracket hardware. Aluminum front panel have brushed grain finish and clear conductive irridite plating to match standard finish for Vector packaging products. Fits **mfg. part no. CCA-160, -220, -280, -340, -400** (mm) standard DIN 19″ subracks in sizes 3U and 6U.

MCLEAN SIDE- AND TOP-MOUNT AIR CONDITIONERS FOR ENCLOSURES

RoHS Compliant Available

Hoffman®

MCLEAN® IS NOW HOFFMAN COOLING

OUTDOOR AIR CONDITIONERS

T15 series subcompact single phase units are ideal for cooling smaller enclosures with 8″ or greater depth, making it easily installed in wall-mount enclosures or enclosures with narrow side walls. Each equipped with a thermostat control, EMI/RFI noise suppressor, condensate management system with base pan side drain and reusable/washable air filter. Feature high-performance, industrial-grade ball-bearing fans to provide maximum heat transfer. Max. ambient temperature: 125°F, 52°C. Popular RAL7035 smooth light gray polyester powder finish over steel cabinet body. Units include power cord with standard grounded outlet plug, built-in hanging brackets, mounting hardware and gasket, and instruction manual.

Mfg. Part No.	Dimensions (in.) H x W x D	Supply Voltage Max. (VAC)	Full Load (A)	BTU Cooling Rating Max. (BTU/hr)	Stock No.	Price Each 1-4
● T150126G100	15.75 x 6.3 x 6.3	230	1.5	900	27M2901	2486.25

SIDE-MOUNT AIR CONDITIONERS

Compact, mid-size and full-size single phase units are easily installed on door, side or front of enclosure with supplied hanging or mounting brackets. Each equipped with a thermostat control that offers convenient digital display of enclosure temperature and high-temperature alarm. Feature high-performance ball-bearing fans or centrifugal blowers. Max. ambient temperature: 125°F, 52°C. Popular RAL7042 smooth gray polyester powder finish on cabinet body and RAL 7035 light gray grille. Mounting gasket and instructions included.

Mfg. Part No.	Dimensions (in.) H x W x D	BTU Cooling Rating (BTU/hr)	Stock No.	Price Each 1-4
● M170216G009	17.65 x 12.00 x 8.68	1800	01C5608	2658.10

*UL recognized, cULrecognized

TOP-MOUNT AIR CONDITIONERS

Top-mount, single phase units are ideal for use where there is little or no clearance around the enclosure. Equipped with a thermostat control that offers convenient digital display of enclosure temperature and high-temperature alarm. High-performance CFM ball-bearing centrifugal blowers. Max. ambient temperature: 125°F, 52°C. Popular RAL7042 smooth gray polyester powder finish on cabinet body and RAL 7035 light gray grille. Mounting gasket and instructions included.

Mfg. Part No.	Dimensions (in.) H x W x D	BTU Cooling Rating (BTU/hr)	Stock No.	Price Each 1-4
MHB110216G306	10.25 x 17.00 x 21.08	2200	20C7121	3305.99

All air conditioner models operate at 115VAC, 50/60Hz, unless otherwise noted. Units use a CFC-free or environmentally-safe refrigerant. All models are UL/cUL Type 12 rated. 230VAC units are also available; *go online or call.*

(13037)

COMPACT COOLING FANS

RoHS Compliant Available

Hoffman®

MCLEAN® IS NOW HOFFMAN COOLING

For use in enclosures where space is limited and reliable cooling is required. Excellent for general air circulation. Powered by 115VAC, 60/50Hz single phase motors and available in three sizes with nominal airflows of 100, 240, and 560cfm. Fans have leadwires with ends stripped ½″ (12mm). Ideal for applications where compact and quiet service is desired. Fan bracket designed to provide easy mounting of cooling fans inside enclosure. One finger guard is furnished (an additional finger guard is recommended for maximum safety. All mounting hardware is included. 230V compact cooling fans available; *go online or call.*

Fig. 1 Fig. 2 Fig. 3

Fig. 4 Fig. 5 Fig. 6

Fig. 7 Fig. 8 Fig. 9

- UL Type 12, IP54 or IP55 rated
- Click-fit design quickly installs into enclosure wall; no tools or screws required
- Enclosure side wall mounting
- UV-resistant plastic with light gray finish
- Standard foam-in-place gasket
- Similar cut-out sizes as other filter fan manufacturers
- Terminal wire connections
- Simple snap-open grille for easy filter replacement
- cULus recognized, CSA certified, CE compliant (fan motor only)

For use in enclosures where reliable filtered airflow is required. Parts that end with "3" are black and "4" are light gray. *Order exhaust grille kits separately below.*

LOUVER PLATE KITS

RoHS Compliant Available · Hoffman® · MCLEAN® IS NOW HOFFMAN COOLING

Louver Plate Kit

Filter

Designed to provide ventilation in enclosures where excessive internal heat or excessive moisture is a problem. Gasketing or sealing the perimeter of the louver plate reduces problems associated with moisture intrusion. Made from 14 gauge steel with an ANSI gray polyester powder finish over phosphatized surfaces or 316 stainless steel. Aluminum air filters provide good arrestment of airborne dust and dirt. Hardware is furnished for mounting.

SPECTRACOOL™ NARROW INDOOR AIR CONDITIONERS

RoHS Compliant Available

Hoffman®

MCLEAN® IS NOW HOFFMAN COOLING

- Narrow design accommodates 12-in. (300-mm) deep cabinets
- Energy efficient rotary compressor
- R407c and R134a earth-friendly refrigerants
- Attractive industrial design
- Reliable mechanical thermostat on enclosure side of the unit; digital display on ambient side
- Easy-mount flanges for simple installation
- Dust-resistant condenser coil
- Cleanable, reusable aluminum mesh filter
- UL Listed

Mounting hardware, gaskets and user manual furnished with the unit. Finish: powder coat RAL 7035 light gray. Material: galvanized sheet metal.

FILTER FANS AND EXHAUST FILTERS

IP54

RoHS Compliant Available

STEGO INC.

SIMPLY INNOVATIVE. BETTER FOR SURE.

NEMA

The **018 series** filter fan and the **118 series** exhaust filter have been purposefully designed to provide more value than alternative products. Design features include: high-tech adhesive mounting or screw mount, high airflow, quiet operation, minimum ingress, protection against falling liquids or dust. **Mfg. part no. 01803.0-01** is a 4 fan design to provide redundancy. Rated NEMA 12. UL recognized type 12 with medium filter mat and IP55 with fine filter mat. Cutout template included for easy installation. Replacement filter media available online .

FIBOX Enclosing Innovations

- Molded in-place gasket to ensure tight seal
- For use with any enclosure, metallic or non-metallic
- Suitable for outdoor use
- UV resistant and splashproof

This device is used in pairs on opposing exterior sides to permit passive cross flow ventilation. Dimensions: 50 x 70 x 20mm. Includes hardware, drilling templates and mounting instructions. Easy installation. Can be used with any 40 x 40mm fan with maximum height of 15mm. *Order fan separately online or call.*

ELECTRIC HEATERS

Designed to protect sensitive mechanical, electrical and electronic component equipment from the harmful effects of condensation, corrosion and low temperatures. Thermostatically controlled fan-driven heaters maintain a stable temperature within enclosures. Adjustable from 0° to 100°F (-18°C to 38°C). Heated air is discharged through the top of anodized aluminum housing. Ball-bearing fan runs continuously for even temperature distribution. Terminal strip with clamp connector accepts both solid and stranded wire. Includes four 10-32x self-tapping screws. Additional 230V models are availalbe; *go online or call.* UL recognized, CSA certified, CE compliant.

TEMPERATURE CONTROL SWITCHES (THERMOSTATS)

RoHS Compliant Available

Hoffman®

These easy to install thermostats are designed to regulate and monitor air temperature in switch-gear enclosures that are set up to operate with heaters, fans, filter ventilators, heat exchangers, and/or signal transmitters. **Mfg. part no. A-TEMNC** (normally closed) is specifically designed for use with heaters while **mfg. part no.** (normally open) is designed to control fans, filter ventilators, or for switching signal transmitters in the event of overheating. Both models have a bimetallic adjustable set point range of 30° to 140°F. Connections consists of tubular screw terminals for 14 AWG (0.04 in^2). Plastic housing is rated UL94-V0. Dimensions: 2.37H x 1.31W x 1.55"D, Protection rating: IEC IP30, UL recognized CSA certified. **NOTE:** switching capacity information, in table below, applies to both **mfg. part no. ATEMNC** and **ATEMNO** switches.

120V SELF-CONTAINED PORTABLE AIR CONDITIONING UNIT

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

- Compact, portable, self-contained design reduces maintenance—no water collection tank or drain required
- Cool a 500 square foot room with 12,000 BTU of cooling power
- Offers both hot-spot and general room cooling with two exchangeable vent styles

Got a hot spot? Fix it and forget about it with the **SRCOOL12K** portable AC unit. It automatically evaporates condensation and safely removes it through the exhaust, so you won't have to install a drain or constantly empty a water tank. The **SRCOOL12K's** portable, no-maintenance design makes it the perfect choice for cooling network wiring closets, server rooms or anywhere with a hot spot. Supplemental cooling for confined server rooms where the facility HVAC is inadequate or unavailable.

Mfg. Part No.	Description	Stock No.	Price Each
SRCOOL12K	Includes SRCOOL12K cooling unit, Louvered front vent, Directional front vent, Cold Air directional delivery tube, Hot exhaust air removal tube, Dropped ceiling or window heat ventilation kit	80R2267	1098.00

HAMMOND MANUFACTURING

SHG

SKT

Heaters protect against low temperatures, condensation and corrosion in electrical/electronic enclosures by maintaining a stable temperature environment. Heaters are 115V/50/60Hz. **SHGL** heater fans are similar to **SHG** heaters but have an axial fan for forced air circulation. **SKT** thermostats control and monitor air temperature. Mfg. part numbers with **suffix NC** (Normally Closed) for the control of heaters and heater fans. Mfg. part numbers with **suffix NO** (Normally Open) for the control of cooling units such as filter fans. All dimensions are 2.4H × 1.3W × 1.4"D. **SDA412** breather kit (pressure compensation plugs) provides for controlled pressure compensation due to temperature variations (e.g., night/day operations) and protect against dust and humidity. Two plugs per cabinet in opposite locations are recommended. 2.6" diameter × 1.2" height. IP45 protection. CE compliant.

HYGROSTAT

RoHS Compliant Available

STEGO INC. SIMPLY INNOVATIVE. BETTER FOR SURE.

Designed to control the relative air humidity inside of enclosures. When connected to an enclosure heater/de-humidifier, it will turn the heater on at the set humidity level in order to raise the dew point. This helps prevent damage and malfunction of electronic components caused by condensation and corrosion. Can also be used to control cooling fans, warning lights or other devices. Product mounts on standard DIN rail. Switching capacity: 5A resistive (0.2A inductive); 20W DC.

SMALL PTC ENCLOSURE HEATERS

RoHS Compliant Available

STEGO INC. SIMPLY INNOVATIVE. BETTER FOR SURE.

RC 016 HGK 047

The **RC 016** and **HGK 047 series** heaters are designed to prevent condensation in small enclosures or to maintain minimum operating temperatures of electronic components in camera housings, actuators, valve and pump controls, telecom receivers/transmitters, and control boxes. PTC (Positive Temperature Coefficient) heating elements provide a "self-regulating" and "self-limiting" characteristic, making the heater safer and more energy efficient. The **RC 016** heater mounting flange dimension is 0.49" (12.5mm).

SPACE SAVING FAN HEATERS

RoHS Compliant Available

STEGO INC. SIMPLY INNOVATIVE. BETTER FOR SURE.

- Compact size
- Flat design
- Built-in overheat protection
- Clip fixing
- 3-side DIN rail mountable
- Operating / Storage temperature: -49 to +158°F
- UL File No. E187294 (all), VDE (230VAC only)

Compact high-performance fan heaters prevent formation of condensation and frost and provides an evenly distributed interior air temperature in enclosures with electric / electronic components. **Important:** Heater must be operated together with a fan. Danger of overheating.

HEATER WITH FAN

Mfg Part No.	Heating Capacity	Voltage (VAC)	Min. Airflow (free blowing) (CFM)	Dimensions (H x W x D) (in.)	Stock No.	Price Each 1-9
03114.9-00	300	120	63	4.68 x 5.94 x 1.85	82K8780	302.34
HEATER WITHOUT FAN (FAN MOUNTING KIT INCLUDED)

FAN HEATERS

RoHS Compliant Available

STEGO INC. SIMPLY INNOVATIVE. BETTER FOR SURE.

The **CR 027 series** is a compact, high capacity PTC technology fan heater for large enclosure applications. Fan heaters are used to maintain minimum operating temperatures in enclosures. This helps prevent failure of electronic components caused by condensation and corrosion. PTC technology uniquely adjusts heating power to ambient temperature. The **CR 027 series** comes with an integral thermostat making it easy to install on standard DIN rail.

DIMENSIONS: 6.5" (165mm)H x 3.94" (100mm)W x 5.0" (128mm)D

Mfg. Part No.	Power (W)	Operating Voltage (VAC)	Operating Temperature	Description	Stock No.	Price Each 1-4
02700.9-00	550	120	32-140°F	Fan Heater w/adjustable thermostat	82K8756	234.18
02701.9-00	650	120	32-140°F	Fan Heater w/adjustable thermostat	82K8758	323.77

(87964)

HYGROTHERM

RoHS Compliant Available

STEGO INC. SIMPLY INNOVATIVE. BETTER FOR SURE.

The **ETF 012 series** senses the ambient temperature and relative air humidity. Depending on which contact combination is chosen, it then turns on or off a connected device if either the temperature is below, or the humidity above the set point. The integrated LED in each adjustment knob is lit indicating the active function. Product mounts on standard DIN rail. Switching capacity: 6A resistive (1A inductive). NC & NO relay output.

DIMENSIONS: 3.03" (77mm)H x 2.36" (60mm)W x 1.69" (43mm)D

Mfg. Part No.	Temperature Range	Humidity Range	Supply Voltage (VAC)	Stock No.	Price Each 1-9
01230.9-00	32-140°F	50% to 90% Relative Humidity	100-240	01M9584	206.25

DC AXIAL FANS WITH CONNECTORS

RoHS Compliant Available ebmpapst

- Electronic protection against reverse polarity
- Impedance protected against locked motor and overloading
- Made from fibreglass plastic - PBT housing, PA impeller
- Air exhaust over struts
- Rotation CCW looking at motor
- Fitted with 3-pin Molex connector (22-01-2035)
- Sensor signal for speed monitoring

DC DIAGONAL FANS (CONT.)

- Ball bearings
- Lead wire connection
- Plastic housing and impeller
- Increased service life and lower noise due to digital motor management
- Divergent airflow increases flow rate 30% over standard tubeaxial fans
- Optimal variable speed control
- Software enables precise configuration of fan to any application
- Max. temp. rating: +65°C, +75°C (DV6400)

12V versions also available *; go online or call. Order fan accessories separately on pages 2394-2395.*

DC HIGH POWER AXIAL FANS, R SERIES

NMB Minebea

- Motor protection: locked rotor,reverse polarity
- Insulation resistance:10M Ω measured with 500VDC between all leads shorted together and case
- Dielectric withstand voltage: AC 700V 1 min.
- Allowable ambient temperature range: -30°C ~ +70°C (operating)
- Dual NMB ball bearings
- Low noise

R150

R172

R series axial fans are ideal for routers and switches applications, base stations, storage and server rack systems, modular data systems, CT scanners, MRI, X-Ray and ultrasound machines among others.

DC TUBEAXIAL FANS - SQUARE

RoHS Compliant Available

- Dual ball bearings provide long-life and reliability
- Lead wire connection
- Low noise at various airflows
- Plastic housing and impeller

NMB Minebea

HIGH AIR FLOW LONG LIFE DC FANS

NEW

RoHS Compliant Available

SANYO DENKI

Fig. 1

Fig. 2

Fig. 3

- Material - Frame: aluminum, Impeller: plastics (flammability: UL94V-1)
- Motor protection System: current blocking function and reverse polarity protection
- Dielectric strength: 50/60Hz, 500VAC, 1 minute (between lead conductor and frame)
- Storage temperature: -30°C to +70°C (non-condensing)
- Lead wire: +red, -black
- Sensor: yellow, Control: brown

The San Ace 60L, 80L, 92L 9LG, type has an expected life of 180,000 hours (approximately 20 years), 1.8 times that of our conventional long life fan,[1] making this fan ideal for equipment that must operate without maintenance for extended periods.

HIGH AIRFLOW COUNTER ROTATING FANS

NEW

SANYO DENKI

- Lead wire connection
- Frame: Plastics (Flammability: UL94V-0),
- Impeller: Plastics (Flammability: UL94V-1)
- Storage Temp.: -30°C to +70°C (Non-condensing)

San Ace 60 CRA type is a perfect cooling solution for power supplies, communications equipment, servers, and data storage systems.This product has the PWM control function, designed for controlling the rotational speed of the fan from the device side.

Mfg. Part No.	Dim. (mm) H x W x D	Voltage (VDC)	Power (W)	Max. Airflow (cfm)	Noise (dBA)	Stock No.	Price Each 1-9

IP68 SPLASH PROOF FANS

NEW

RoHS Compliant Available

SANYO DENKI

IP68

- Lead wire connection
- Frame: Aluminum (Black coating)
- Impeller: Plastics (Flammability: UL94V-1)
- Storage Temp.: -30°C to +70°C (Non-condensing)

These cooling fans deliver IP68 protection rating water and dust resistance with lifespan and high air flow. These fans are a perfect cooling solution for PV inverters, quick chargers for electric vehicles and LED panels. These products have the PWM control function, designed for controlling the rotational speed of the fan from the device side.

TÜV Rheinland

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6 Fig. 7 Fig. 8 Fig. 9 Fig. 10 Fig. 11 Fig. 12 Fig. 13 Fig. 14 Fig. 15

- Ball bearing
- Lead wire connection
- Plastic frame and impeller (semi-round fans have aluminum frame)
- Fans with **-01** suffix in mfg. part no. include tachometer
- Fans with **-011** suffix in mfg. part no. include tachometer and are ribless
- Fans with "**P**" after voltage in mfg. part no. include pulse width modulator
- Temp. range: -10°C to +60°C

"**GV**" fans have guide vanes molded into the outlet face of the frame. These flow conditioning tabs straighten the flow and reduce turbulent losses exiting the fan, thereby converting it to additional static pressure. "**SG**" fans ofer up to 260 CFM of airflow and have a 3-phase motor to improve efficiency and reduce switching noise. "**GE**" fans have a custom designed frame to reduce the magnitude and varations in vibration caused by the motor and rotating impeller. *Order Sanyo Denki finger guards separately online or call.*

ACMAXX TUBEAXIAL FANS

RoHS Compliant Available

ebmpapst

- Can be used from 85-265V, 50-60Hz
- Offer 75% lower power consumption over traditional AC tubeaxial fans
- Wide input voltage, high efficiency and reliability
- Plastic housing and impeller
- External rotor motor with completely integrated drive and control electronics
- Lead wire connection, ball bearings
- Max. temp. rating: +60°C, +70°C

Order fan accessories separately online or call.

AC CENTRIFUGAL BLOWERS

RoHS Compliant Available

ebmpapst

- Housing and impeller: galvanised sheet steel
- Rotor: partially cast in aluminium
- Ball bearings
- May be mounted in any position
- **Mfg. part no. D2E146-AP47-75** IP44 rated

AC dual inlet, forward curved centrifugal blowers offer the advantage of matched motor and impeller in a compact space saving design. Integrated external-rotor motor is mounted on one side of the housing using a bracket. All units supplied pre-wired into terminal block including motor start capacitors and outlet flange for easy mounting.

- Lead wire connection
- Ball bearings
- Shallow, compact design
- Excellent for spot cooling
- Plastic housing and impeller
- Max. temp. rating: +70°C (**RL48, RL65, RLF35, RG160**)
- Max. temp. rating: +75°C (**RL90, RLF100, RG90, RG125**)

DC radial blowers with electronically commutated external rotor motors and fully integrated commutation electronics. Electronic protection against reverse polarity and overloading. Blocking and overloading by PTC-resistor; partially impedance protected (**RL90DC series, RG90DC series,** and **RG160DC series**). Clockwise rotation viewed from rotor. Air enters through the center of impeller and exhausts through in housing. Mount in any position. Can be used for either pressurizing or evacuating. Electrical connection: 2 leads AWG 22 TR 64. Stripped and tinned ends.

DC MOTORIZED IMPELLER, HIGH POWER, F SERIES

RoHS Compliant Available

NMB™ Minebea

F175 F225 F250 F280

- Motor protection: locked rotor, reverse polarity
- Insulation resistance: 10Mohms min measured with 500V DC between all leads shorted together and case
- Dielectric withstand voltage: AC 700V 1 min.
- Allowable ambient temperature range: -30°C ~ +70°C (Operating)
- Dual NMB ball bearings
- Low noise

F series high power cooling fans are designed with a new high efficiency 3 phase motor, NMB developed magnet materials, a microcontroller based drive for greater flexibility and a wide range of voltages, these new series offer high efficiency, high performance and total cooling solutions without compromise.

PLASTIC FAN FILTER ASSEMBLIES (CONT.)

09450

Media

Assemblies consist of guard, polyurethane foam filter media, and media retainer for axial fans. Polyurethane foam media has high surface area for filtration of dust particles and is designed to produce minimal pressure drop.

FAN VIBRATION SLEEVES, FINGER GUARDS & FILTER MEDIA

RoHS Compliant Available

Qualtek Electronics Corp.

- Reduce the transmission of vibrations to the panel housing reducing noise level up to 9dB
- Fan vibrations absorbed by the flexible sleeves reducing damage and increasing the lifespan of the fan
- Easy to attach to axial fans, no tools required
- Body material: TPE
- Fire resistance: UL94-V0
- Panel thickness (min. - max.) 0.75 - 1.25mm

EMI/RFI FAN FILTERS

RoHS Compliant Available

Qualtek Electronics Corp.

Anodized (Black) Finish

Mill (No Finish)

Stainless Steel

- Mill finish enhances EMI/RFI shielding
- Provide maximum airflow with effective filtering
- Tightly-woven corrugated mesh screen is encased in a formed aluminum frame built for ruggedness and durability
- All units are easily washed in a solvent or degreaser and can be mounted directly to the fan or to a panel

Designed to fit standard 2.5″ (60), 3.125″ (80), 3.625″ (92), and 4.5″ (120) tubeaxial fans. Suffix in mfg. part no. denotes finish: **B** = anodized (black), **M** = mill (no finish), **SS** = 30 x 30 stainless steel convoluted mesh with stainless steel frame. Also available in clear (irridite) - **C suffix**; *go on line or call.*

COLD PLATES • PELTIER COOLERS • HEAT SINKS – PC BOARD

HI-CONTACT LIQUID COLD PLATE FOR POWER APPLICATIONS

RoHS Compliant Available

AAVID THERMALLOY

- Extruded base and continuous tube construction
- Joint free tube reduces chances for leaks
- Tube directly contacts the base of the device cooled improving thermal resistance
- Thin epoxy joint between tube and plate outperforms 'dry' joints
- Plate Material: Extrusion, aluminum
- Tube Material: Copper, 9.5 mm (0.375") O.D. x 1.24 mm (0.044") wall
- Unfinished standard

Hi-Contact™ cold plates feature a interlocking groove and tube geometry that improves mechanical robustness and thermal performance over conventional designs. Designed for medium power density applications.

CP SERIES COLD PLATE FOUR PASS HEAT SINKS

RoHS Compliant Available

OHMITE

- Tubing: copper, 0.375" OD, nominal wall thickness of 0.050"
- Plate: Aluminum 6063-T5
- Thermal resistance 0.43 °C/W @ flow of 1.5 GPM
- Wt: 805g

CP4 series liquid coldplates are designed for Ohmite heatsinkable type resistors, such as TAP600, TAP800, TA1K0, TA2K0, and various SOT-227 resistor packages. The CP series provides maximum heat removal for SCRs, rectifiers, diodes, thyristors, and other high-power semiconductor devices.

MAX CLIP SYSTEM EUROPEAN HEAT SINK EXTRUSIONS

RoHS Compliant Available

AAVID THERMALLOY

- High performance , low cost
- Eliminates need for screws, washers and holes
- Provides consistent mounting force
- Compatible with a wide range of Max Clips for different component styles and mounting pressures
- Attachment to board with self tapping screws or M3/M4 solderable standoffs
- Suffix B: black anodized, U: unfinished

HEAT SINKS FOR BALL GRID ARRAYS

RoHS Compliant Available AAVID THERMALLOY

Pad Version

- Tape mounted versions eliminate the need for mounting holes in the PC Board
- Heat sinks can be used with metal BGA Package
- Heat sinks are compatible with Ther-a-grip tapes

Clip Version

- Clip design allows for easy removal in case of rework
- Minimal PC Board space is required for mounting
- Clip design compatible with solder anchor sold seperately; *go online or call*
- Each heat sink utilizes a phase change pad as the interface for optimal thermal performance

Pad Version

Clip Version

Configurations available for a wide range of BGA package sizes. Black anodize.

CHIPSET HEAT SINKS

NEW WAKEFIELD SOLUTIONS

- Material: AL 6063
- Finish: Black Anodize

Pin Fin

Eliptical Fin

Wakefield-Vette heat sink assembles onto chip set using the space that is between the PCB and the substrate of the solder balls. The solder balls provide a minimal gap of 0.5mm to 0.7mm. Attachment feature is below a 0.4mm thickness. The clipping system willnot interfere or damage chip. Contact area is the edge of chip. Heat sinks for chip set can match up to devices from Intel, Broadcom, Xilinx. TI, Motorola and more.

TO-220 PKG. CHANNEL-STYLE HEAT SINKS

RoHS Compliant Available

WAKEFIELD SOLUTIONS

270, 271, 272 | 273 | 274 | 287

- **272 series** accepts two devices
- Provide two-sided cooling by adding **271 series** heat sink to **270** or **272** heat sink on top of TO-220 device
- **273** and **274 series** heat sinks for plastic-case power SCRs and transistors
- **286, 287, 288 series** have wave-solderable pins
- Black anodized finish aluminum
- **E suffix** denotes RoHS compliant

BOARD LEVEL HEAT SINKS FOR TO-220 AND TO-218 COMPONENTS

RoHS Compliant Available

WAKEFIELD SOLUTIONS

Vertical mount, slim profile, unidirectional fin heat sinks offer wave solderable pins on 0.4" (10.2mm) centers for vertically mounting TO-220 and TO-218 components. Ideal for a variety of applications where quick assembly and space are considerations. Material: black anodized aluminum. Note: Thermal compound is assumed between device and heat sink. Tab temperature with **mfg. part no. 634-20ABPE** heat sink will typically be about 15% lower. Tab temperature with **mfg. part nos. 634-10ABP/10ABPE** heat sink will typically be about 25% higher. **E suffix** in mfg. part no. indicates RoHS compliant.

Mfg. Part No.	Dimensions (mm) H x W x L	Stock No.	Price Each 1-9	Price Each 10-49	Price Each 50-99

SURFACE MOUNT HEAT SINKS

RoHS Compliant Available

WAKEFIELD SOLUTIONS

- No Interface Material Required
- Copper with Tin-Lead Plating for Improved Solderability and Assembly
- EIA Standards and ESD Protection are Specified
- For Use with Water-Soluble or No-Clean SMT Solder Creams or Other Pastes

Compatible with surface mount technology (SMT), these heat sinks allow greater packaging densities and reduction in PC-board area, increasing the power dissipation of surface mount devices (SMD) while maintaining manufacturer's component thermal specifications.

C40 SERIES T0-247, T0-264 and SOT-227 PKG. HEAT SINKS

NEW

OHMITE

- Aluminum Alloy 6063-T5
- Spring clip: music wire, per ASTM A228 with bright nickel plating
- Solder foot: cold-rolled steel, per ASTM A-366 with pure tin over copper strike

C40 series heat sinks are ideal for high power density and small size (1U or 2U) electronic packaging with forced convection cooling.This compact, high performance heat sink with iwith an exchangeable cam clip system for T0-47, T0-264 and SOT-227 devices.This powerful heat sink can be thru-hole soldered in single or paired configurations. The paired unit has mounting holes to accomodate a 40mm x 40mm fan.

RADIAL-FIN HEAT SINKS FOR BRIDGELUX LED LIGHT ENGINES

RoHS Compliant Available

WAKEFIELD SOLUTIONS

19754-M-AB — 19755-M-AB — 19756-M-AB — 19757-M-AB — 19758-M-AB

- Manufactured specifically for Bridgelux LED light engines
- Aluminum construction
- Radial-Fin geometry optimized for natural convection
- Black anodized
- Mounting features as part of extrusion
- Easy mounting with std. hardware

Size and level of performance can be matched to specific LED requirements. Non-anodized versions and custom lengths available; *go online or call.*

HEAT SINKS FOR DC/DC CONVERTERS

RoHS Compliant Available

WAKEFIELD SOLUTIONS

Standard mounting hole pattern for "half-brick" mates with the majority of "half-brick" DC/DC converters. Standard mounting hole pattern for "full-brick" mates with Vicor DC/DC converters. Aluminum extruded fin construction keeps DC/DC converter modules cool in both forced and natural convection applications. Vertical and horizontal fin configurations are available in a variety of fin heights. **MS4 suffix** includes M3 x 8 Phillips head screws with captive washer and DeltaLink IV thermal interface pad. Material: black anodized aluminum.

HEAT SINK KITS FOR CHASSIS MOUNT SSRs

RoHS Compliant Available

CARLO GAVAZZI

RHS100 RHS45B RHS90A RHS301

- For use with most hockey puck SSRs, regardless of manufacturer
- Single phase or Three phase SSRs
- Up to two single phase SSRs can be mounted on some heat sinks

- Popular DIN-rail mounting
- Some versions with cooling fans for higher amperage loads

Mfg. part no. RHS301 for DIN rail mounting only. Kits delivered with heat sink, DIN rail adapter, mounting hardware, thermally conductive compound, and all the neccessary hardware.

HEAT SINKS

Mfg. Part No.	For Use With	Max. °C/W	Stock No.	Price Each
● RHS100	1 Single-Phase SSR	3.0°	92F3115	47.00
● RHS45B	1 Single-Phase SSR, Optional 40 x 40mm fan may be mounted onto the heatsink	2.0°	16C5558	51.00
RHS90A	1 Single-Phase SSR or 1 Three-Phase SSR, Optional 60 x 60mm fan may be mounted onto heatsink	1.35°	71K9819	78.00
● RHS301	1 or 2 Single-Phase SSRs or 1 Three-Phase SSR Optional 60 x 60mm fan may be mounted onto heatsink	0.8°	92F3084	111.00

INSULATORS

RoHS Compliant Available

AAVID THERMALLOY

Mica insulators provide high maximum operating temperatures (550°C) and excellent electrical properties. Aluminum oxide has unique thermal conductivity qualities and features low loss factors at high frequencies. It has high compressive strengths, high volume resistivity, low thermal expansion and it resists radiation.

Mfg. Part No.	Package	Material	Dimensions (mm) L x W x H	Stock No.	Price Each 1-24

THERMALFILM POLYIMIDE PLASTIC FILMS

UL

RoHS Compliant Available

AAVID THERMALLOY

Thermalfilm™ polymide plastic insulating films are designed to be an improved replacement for mica. Insulators have an extremely high resistance to flow or thin out under high compressive stresses, particularly at elevated temperatures. Physical, mechanical and electrical properties remain nearly constant over a wide range of temperatures and frequencies. They are radiation resistant, have no melting points, and have no known organic solvents. Thermalfilm is rated 94 V-0.

Mfg. Part No.	Package/Case	Dimensions (mm) L x W	Stock No.	Price Each 1-9	10-99	100-499
43-77-9G	TO-220	18.42 x 13.21	83K3539	0.47	0.42	0.32

THERMALLY CONDUCTIVE EPOXY ADHESIVE TRANSFER TAPES

RoHS Compliant Available

3M

- Tapes are pressure sensitive adhesives loaded with thermally conductive ceramic fillers
- Pressure is needed to form a bond and heat pressure on siome substrates
- The specialized acrylic chemistry of these tapes provide for good thermal stability of the base polymer
- Thermally conductive tapes are on a silicone treated polyester release liner for ease of handling and die cutting
- Tapes offer both good thermal conductivity and good electrical insulation properties
- Thermal conductivity (W/m-K): 0.60
- Color: grey

Thermally conductive adhesive transfer tapes are designed to provide a preferential heat transfer path between heat-generating components and heat sinks or other cooling devices (e.g., fans, heat spreaders or heat pipes). **Mfg. part nos. 9882, 9885, and 9890** provide best adhesion results when used with high surface energy substrates.

Mfg. Part No.	Width (in.)	Thickness (mm)	Roll of (yds.)	Stock No.	Price per Roll 1-4	5-9	10-24
9882 (1"X36YDS)	1	0.05	36	41T5550	119.14	110.58	102.03

THERMALLY CONDUCTIVE EPOXY ADHESIVE TRANSFER TAPES

RoHS Compliant Available

3M

- Tapes are tacky pressure sensitive adhesives loaded with thermally conductive ceramic fillers that do not require a heat cure cycle to form an excellent bond to many substrates
- Thermally conductive tapes are on a silicone treated polyester release liner for ease of handling and die cutting
- Tapes offer excellent adhesive performance with good wetting and flow onto many substrate surfaces
- Thermal conductivity (W/m-K): 0.60

Thermally conductive adhesive transfer tapes are designed to provide a preferential heat transfer path between heat-generating components and heat sinks or other cooling devices (e.g., fans, heat spreaders or heat pipes). The specialized chemistry of **mfg. part nos. 8810, 8815 and 8820** renders them modestly soft and able to wet to many surfaces, allowing them to conform well to non-flat substrates, provide high adhesion, and act as a good thermal interface.

Mfg. Part No.	Width (in.)	Thickness (mm)	Roll of (yds.)	Stock No.	Price per Roll 1-4	5-9	10-24

THERMAL INTERFACE MATERIAL • THERMAL COMPOUNDS

PYROLYTIC GRAPHITE SHEETS

RoHS Compliant Available

Panasonic

- Excellent thermal conductivity (2 to 4 times as high as copper, 3 to 6 time as high as aluminum)
- Lightweight: Specific gravity: 0.85 to 1.9 g/cm^3 (1/4 to 1/10 of copper, 1/1.3 to 1/3 of aluminum in density)
- Flexible and easy to be cut or trimmed. (withstands repeated bending)
- Low thermal resistance
- EYG **S**: pure PGS versions, EYG **A** taping versions

PGS (Pyrolytic Graphite Sheet) is a thermal interface material which is very thin, synthetically made, has high thermal conductivity, and is made from a highly oriented graphite polymer film. Ideal for cell phones, DVC, DSC, PC and peripherals, semiconductor manufacturing equipment, and optical communications equipment. **S** type (PGS only), **A-A**, **A-M** types (Adhesive type), **A-PA**, **A-PM**, **A-SM** types (laminated type (insulation and adhesive), **A-RV**, **A-KV** types (high heat resistance type).

THERMALLY CONDUCTIVE EPOXY ADHESIVE

RoHS Compliant Available

3M

TC-2707

TC-2810

- Reworkable 2-part epoxies for high adhesion
- Low CL ion content and outgassing
- Minimal odor
- Dispense manually or on automated line

Thermally conductive epoxy adhesive **mfg. part no. TC-2707** is an aluminum metal filled, two-part, thermally conductive epoxy adhesive for high adhesion. **Mfg. part no. TC-2810** is a boron nitride filled, two-part, thermally conductive epoxy adhesive. Dispense manually or on automated line.

Mfg. Part No.	Thermal Conductivity W/m-°K	Color	Stock No.	Price Each 1-4
● TC-2707	0.72	Gray	41T5530	41.84

THERMAL ADHESIVES AND GREASES

RoHS Compliant Available

AAVID THERMALLOY

Ther-O-Bond thermally conductive adhesive offers excellent heat transfer high voltage isolation. Readily bonds to metal, ceramics and most plastics. Thermalcote is a silicone based thermally loaded grease for use with all heatsinks. Thermal conductivity: 0.765 W/m°C. Thermalcote II is a silicone free thermal grease. Thermal conductivity: 0.699 W/m°C.

122 SERIES HIGH PERFORMANCE THERMAL JOINT COMPOUND

RoHS Compliant Available

WAKEFIELD SOLUTIONS

Stable silicone based, thixotropic paste formulated to significantly reduce contact thermal resistance where power densities are concentrated in devices such as flip chip, reduced die size and "overlock" microprocessors. Compatible with automated or manual dispensing methods. Thermal conductivity: 2.5W/m°K. Thermal resistance: 0.02°Cin^2/W. Shelf life: 5 years.

120/126 SERIES THERMAL JOINT COMPOUNDS

RoHS Compliant Available

WAKEFIELD SOLUTIONS

120 series silicone oil-based compound fills minute air gaps between major mating surfaces with grease-like material containing zinc oxide in silicone oil carrier. Thermal conductivity @ WC: 0.735W/(m)(K); 5.1 (Btu)(in.)/(hr)(ft²)(°F). Thermal resistance: 0.05°C/W for 0.001″ film. Operating temperature: -40°C to +200°C. Shelf life: 5 years. **126 series** is a non-toxic, synthetic, ester-based (non-silicone) compound with metal-oxide fillers. Thermal conductivity: 19.0 x 10⁴ cal/sec cm °C, min; 4.8 (Btu)(in.)/(hr)(ft²)(°F). Thermal resistance: 0.043°C/W for 0.008″ film. Operating temperature: -40°C to +200°C. Shelf life: 5 years. Western Electric approved, specification KS21343. Meets military specification MIL-C-47113.

150 SERIES THERMALLY CONDUCTIVE ADHESIVES

RoHS Compliant Available

WAKEFIELD SOLUTIONS

Delta Bond 152 thermally bonds components to chassis or heat sinks. **Mfg. Part Nos. 152-1A, 152-1B** and **152-KA** include resin and hardener. For **Mfg. Part Nos. 152-Q, 153-Q** and **154-Q** adhesives, order one bottle of **Mfg. Part no. A-4** or **B-4** hardener per one quart of resin. **Delta Bond 155** thixotropic paste offers high heat transfer, low shrinkage and a coefficient of thermal expansion comparable to copper and aluminum. Includes resin and hardener. **Delta Bond 156** is a modified acrylic adhesive for permanent mounting of components where heat must be effectively transmitted. Includes resin and hardener.

HEAT SINK COMPOUNDS

RoHS Compliant Available

TECHSPRAY

- Prevents overheating
- Easy application

1977-DP

1978-DP

These heat sink compounds are suitable for use with power transistors and other devices that generate heat. Ideal for electronic applications, creates a thermal bond, to close the gap between CPU and mechanical heat sink. **Mfg. part no. 1977-DP** is a transistor silicone grease. **Mfg. part no. 1978-DP** is a silicone-free heat sink compound that will not harden, dry out, melt, or contaminate wave solder baths. Designed to eliminate the phenomenon of silicone migration.

Mfg. Part No.	Description	Tube Size	Stock No.	Price Each
1977-DP	Transistor Silicone Grease	4 oz.	69K8373	16.91
1978-DP	Silicone-Free Heat Sink Compound	4 oz.	68K7301	29.64

(79384)

CIRCUITWORKS® HEAT SINK GREASE

RoHS Compliant Available

ITW Chemtronics

- Excellent thermal conductivity and dielectric properties
- Will not dry out, harden or melt
- Noncorrosive and nonflammable
- Thermally stable from -40°F/-40°C to +342°F/+172°C
- Meets MIL-DTL-47113D Type 1

CircuitWorks® Heat Sink Grease tube dispenser precisely applies silicone compound to facilitate heat transfer away from electronics and electrical components. Weight: 142g (5 oz.).

Mfg. Part No.	Stock No.	Price Each
CT40-5	00Z1880	22.59

(73262)

CIRCUITWORKS® SILVER CONDUCTIVE GREASE

RoHS Compliant Available

ITW Chemtronics

- Maximum Electrical and Thermal Conductivity
- Protects Against Moisture and Corrosion
- Thermally Stable Over a Wide Temperature Range
- Conductive Lubricant Containing Pure Silver
- Controls Static Discharge and Grounds Circuits

CircuitWorks® Conductive Grease is the syringe dispenser for precise application of grease to provide superior electrical and thermal conductivity, lubrication and protection. Weight: 6.5g.

STANDARD TERMS & CONDITIONS OF SALE

For the most updated Terms & Conditions of Sale, visit newark.com/terms-and-conditions.

1. PLEASE READ THIS AGREEMENT CAREFULLY. IT CONTAINS THE SOLE TERMS AND CONDITIONS OF SALE THAT APPLY TO THE PURCHASE OF PRODUCTS FROM NEWARK CORPORATION d/b/a/ Newark element14 ("THE COMPANY"). ANY DIFFERENT OR ADDITIONAL TERMS SET FORTH IN CUSTOMER'S PURCHASE ORDER OR SIMILAR COMMUNICATION ARE OBJECTED TO AND SHALL NOT BE BINDING ON THE COMPANY UNLESS A SEPARATE AGREEMENT HAS BEEN SIGNED BY AN AUTHORIZED OFFICER OF THE COMPANY. BY PLACING AN ORDER FOR PRODUCTS FROM THE COMPANY, OR BY ACCEPTING DELIVERY OF THE PRODUCTS DESCRIBED ON THE APPLICABLE PACKING SLIP, BILL OF LADING AND/OR INVOICE RECEIVED WITH THE PRODUCTS, YOU AGREE TO BE BOUND BY AND ACCEPT THESE TERMS AND CONDITIONS OF SALE.

2. AVAILABILITY AND PRICING: Product listings, specifications, availability, and pricing are subject to change without notice. Orders are not binding upon the Company until accepted by an authorized representative of the Company. Prices listed and charges discussed herein are in U.S. dollars. Some products may not be available for shipment outside the United States. The Company reserves the right to refuse service, terminate accounts or cancel orders in its sole discretion. The Company may also change or modify these Terms and Conditions of Sale from time to time without notice. If ordering from the Company's catalog, the prices shown therein reflect the latest information available at the time of the printing of the catalog or uploading of an electronic catalog. Customers using electronic catalogs agree to immediately upload updated versions upon receipt from Company. Prices charged will be those prevailing when an order is placed regardless of method of order. For scheduled deliveries over 60 days, the Company reserves the right to charge the Customer the price of the products at shipment if higher. The Company's quoted prices do not reflect the cost of accommodating Customer's purchases via credit card or any third-party procurement services, software or ecommerce providers and the Company may accordingly pass through the additional charges incurred as a result of Customer's use of such purchasing methods. Prices shown do not include any Federal, State or local taxes or any present or future sales, use, excise, value-added or similar taxes. Where applicable, such taxes shall be billed as a separate item and paid by Customer. Orders are accepted with the understanding that such taxes will be added, as required by law. The Company charges local sales tax unless Customer has a valid sales tax exemption certificate on file with the Company. Selected products containing precious metals are subject to a surcharge.

3. PAYMENT TERMS: Standard terms for Customers that are registered businesses and meet the Company's credit criteria are Net 30 days from invoice date, unless otherwise agreed in writing by the Company. All payments are due within 30 days of the invoice date, without any deductions or setoffs. The Company shall have the right of set off and deduction for any sums owed. If Customer fails to pay within payment terms, the Company may defer shipments until such payment is made and may, at its option, cancel all or any part of unshipped orders. The Company reserves the right to add a $20.00 service charge on all returned checks. Credits granted by the Company must be used within one year. Credits not taken within one year are subject to cancellation, and the Company shall have no further liability. Customer shall pay the Company all costs incurred by it in collecting any past due amount from Customer, including all court costs and attorney's fees, provided, however, if the foregoing charges exceed that rate which may be lawfully charged under applicable law, then such charges shall be calculated so as not to exceed the lawful rate.

4. OPEN ACCOUNTS/CUSTOMER'S FINANCIAL CONDITION: A Customer that desires to open a credit account must furnish such information as requested by the Company. The Company reserves the right in its absolute discretion to grant, refuse or discontinue any extensions of credit, or reduce or suspend any credit limit at any time. Company also reserves the right to cancel any order, require payment in advance, or require the Customer to provide adequate assurance of performance, without any liability by the Company, in the event of the Customer's insolvency, filing of a petition in bankruptcy, the appointment of a receiver or trustee for Customer, or the execution by Customer of an assignment for the benefit of creditors.

5. CREDIT CARDS: We accept credit and procurement cards from American Express®, MasterCard®, VISA®, Discover® and Government purchase cards. A surcharge may be assessed for Customers who routinely pay past due invoices by credit card.

6. RETURNS: Returning product to Newark element14 is easy. Please follow the simple procedures below to return product for replacement product or for a credit to your account, at your option:

- Please call your Newark element14 Customer Service Representative to obtain a Return Merchandise Authorization number (RMA) prior to returning product. Sorry, Newark element14 cannot accept any product returns without a RMA. For all non warranty related returns:
  - Returns must be made within 60 days of the original invoice date.
  - All returned product must be in the original packaging and in resalable condition.
  - "Not In Catalog Items" and all products specified as "Non Cancelable/ Non Returnable" (NC/NR) are not returnable.
  - Return freight charge must be prepaid. C.O.D. returns cannot be accepted.
- Warranty related return procedures will be determined by the manufacturer's warranty policy for the applicable product. Please contact your Newark element14 Customer Service Representative for details.
- Only product originally shipped by Newark element14 to you is eligible for return. By returning product to Newark element14, you confirm that you acquired such product from Newark element14.

7. INTERNATIONAL ORDERS: Export orders requiring special handling, packaging, and documentation are subject to additional charges. Export orders are accepted on the basis of payment in advance of shipment by a check in U.S. funds, wire transfer, international money order or credit card. Prices are FCA Company Warehouse in accordance with Incoterms 2000 and do not include insurance, freight, brokerage, duty or taxes.

8. EXPORT CONTROLS: Products purchased or received under these Terms and Conditions of Sale are subject to export control laws, restrictions, regulations and orders of the United States. Customer agrees to comply with all applicable export laws, restrictions and regulations of the United States or foreign agencies or authorities, and shall not export, or transfer for the purpose of re-export, any product to any prohibited or embargoed country or to any denied, blocked, or designated person or entity as mentioned in any such United States or foreign law or regulation. Customer represents and warrants that it is not on the Denied Persons, Specially Designated Nationals or Debarred Persons List and is not otherwise prohibited by law from purchasing the products or services hereunder. Customer shall be responsible to obtain any license to export, re-export or import as may be required.

9. SHIPPING & HANDLING/DELIVERY: All U.S. domestic shipments are FCA Shipping Point in accordance with Incoterms 2000 and in all cases title shall pass upon delivery to the carrier at point of shipment and thereafter all risk of loss or damage shall be upon Customer (without regard to which party pays for the shipping costs). Company and carrier handling charges apply. Next Day and Second Day Air Service is available within the 48 contiguous states, Alaska, Hawaii, and Puerto Rico. Delivery dates provided in advance are estimates only and shall not represent fixed or guaranteed delivery dates. Export shipments are on the basis of FCA Company Warehouse in accordance with Incoterms 2000, with the Company charging separately for the costs, insurance, and freight to bring the products to the named place of destination.

10. HAZARDOUS APPLICATIONS PROHIBITED: THE COMPANY'S PRODUCTS ARE NOT DESIGNED, RECOMMENDED OR AUTHORIZED FOR ANY OF THE FOLLOWING APPLICATIONS: HIGH-RISK APPLICATIONS SUCH AS SAFETY, LIFE SUPPORT, SURGICAL IMPLANT, NUCLEAR, OR AIRCRAFT APPLICATIONS, OR FOR ANY USE OR APPLICATION IN WHICH THE FAILURE OF A SINGLE COMPONENT COULD CAUSE SUBSTANTIAL HARM TO PERSONS OR CATASTROPHIC PROPERTY LOSS; OR FOR ANY MILITARY OR WEAPONRY USE, INCLUDING BUT NOT LIMITED TO CHEMICAL, NUCLEAR, BIOLOGICAL, AIRCRAFT, MISSILE, AND SIMILAR MILITARY APPLICATIONS. UNLESS AN AUTHORIZED OFFICER OF THE MANUFACTURER HAS AUTHORIZED OR APPROVED ANY SUCH USE(S) IN WRITING, OR ALTERNATIVELY HAS PROVIDED CUSTOMER WITH A DOCUMENT SIGNED BY AN AUTHORIZED OFFICER WAIVING CUSTOMER'S RESPONSIBILITY FOR ANY SUCH USE, CUSTOMER ASSUMES ALL RISK AND LIABILITY FOR USE OF COMPANY'S PRODUCTS IN ANY SUCH APPLICATIONS AND AGREES TO DEFEND, INDEMNIFY AND HOLD BOTH THE COMPANY AND THE MANUFACTURER OF THE PRODUCTS HARMLESS AGAINST ALL LOSSES, LIABILITIES, CLAIMS AND

For the most updated Terms & Conditions of Sale, visit newark.com/terms-and-conditions.

DAMAGES THAT MAY BE INCURRED DUE TO USE OF THE COMPANY'S PRODUCTS IN ANY OF THESE PROHIBITED APPLICATIONS.

11. WARRANTY & LIMITATION OF LIABILITY: Products are sold by the Company with such warranties as may be extended by the manufacturer of the product(s), and there are no warranties for value added services, services bundled with the products, or other services provided by the Company. COPIES OF THE MANUFACTURERS' WARRANTIES ARE AVAILABLE PRIOR TO THE PURCHASE OF PRODUCTS BY CONTACTING THE COMPANY. THE COMPANY MAKES NO OTHER WARRANTIES AND ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY, TITLE, AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. CUSTOMER IS RESPONSIBLE FOR INSTALLATION AND USE IN ACCORDANCE WITH MANUFACTURERS' INSTRUCTIONS AND THE COMPANY SHALL NOT BE RESPONSIBLE FOR CUSTOMER'S IMPROPER SELECTION OF A PRODUCT FOR A PARTICULAR APPLICATION OR OTHERWISE. No warranty will apply if the products are in any way altered or modified after delivery by the Company.

THE COMPANY'S LIABILITY ON ANY CLAIM FOR LOSS OR DAMAGE ARISING OUT OF THIS AGREEMENT OR FROM THE PERFORMANCE OR BREACH OF THIS AGREEMENT OR CONNECTED IN ANY MANNER WITH THE SUPPLYING OF ANY PRODUCTS OR SERVICES HEREUNDER, OR THE SALE, RESALE, OPERATION OR USE ALLOCABLE TO SUCH PRODUCTS OR PART THEREOF INVOLVED IN THE CLAIM, WHETHER BASED ON CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE AND FOR PROPERTY DAMAGE AND DEATH) OR OTHER GROUNDS, SHALL NOT IN ANY EVENT EXCEED THE PRICE ALLOCABLE TO SUCH PRODUCTS OR PART THEREOF INVOLVED IN THE CLAIM, REGARDLESS OF CAUSE OR FAULT. IN NO EVENT SHALL THE COMPANY BE RESPONSIBLE TO CUSTOMER OR ANY THIRD PARTY FOR ANY CONSEQUENTIAL, INCIDENTAL OR INDIRECT DAMAGES, INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, REVENUES, SALES, DATA, BUSINESS, GOODWILL OR USE, EVEN IF THE COMPANY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSS OR DAMAGE. THE PARTIES AGREE THAT WITHOUT THIS LIMITATION OF LIABILITY THE COMPANY WOULD NOT HAVE AGREED TO THE PRICE OR TERMS AND CONDITIONS OF THIS AGREEMENT. THE LIMITATION OF LIABILITY SET FORTH HEREIN APPLIES BOTH TO PRODUCTS AND SERVICES PURCHASED OR OTHERWISE PROVIDED HEREUNDER. Any cause of action against the Company must be instituted within 1 year from the date of purchase or provision of the products or services.

If the Company provides Customer with advice, training, applications support, or other assistance which concern any products supplied hereunder, or any equipment, system or the like in which the product may be installed, the Company's giving of such advice or assistance will not subject the Company to any liability, whether based on contract, warranty, tort (including negligence) or other grounds. In order to maintain quality Customer service, the Company may monitor or record telephone calls and other communications.

12. DESCRIPTIONS: All specifications, drawings, illustrations, descriptions and particulars of weights, dimensions or capacity and other details including, without limitation, statements regarding compliance with legislation or regulation (together "Descriptions") wherever they appear (including, without limitation, in catalogs, on web sites, on dispatch notes, invoices or packaging) are intended to give a general idea of the products, but will not form part of this Agreement. If the Descriptions of any products differ from the manufacturers' description, the latter shall be deemed to be correct. The Company relies on such information, if any, as may have been provided to it by the manufacturers of the products and accepts no liability in contract or tort, or under statute, regulation or otherwise for any error in or omission from such Descriptions whether caused by the Company's negligence or otherwise. The Company may make changes to the products as part of a program of improvement or to comply with legislation. Where the product is flagged as RoHS compliant or where the ❀ or ● is used, this means that, based on information provided by our suppliers, the product does not contain the substances restricted by the European Community Directive (2002/95/EC) on the Restriction of the use of certain Hazardous Substances, commonly known as the RoHS Directive, at levels in excess of the anticipated maximum concentration values or the existence of the restricted substances in the product at levels in excess of those concentrations is allowed as one of the particular applications listed in the Annex to the RoHS Directive. ❀ RoHS Compliant Available means that those products, within a product family, which are marked with a ● are RoHS Compliant. This information is of a general nature and is not intended to address the circumstances of any particular individual or entity. No one should act on such information without appropriate professional advice. Please see our website, newark.com, for updated information and a current listing of RoHS compliant product. The information contained on our website supersedes the information contained in any Newark element14 printed catalog or other publication.

13. INTELLECTUAL PROPERTY RIGHTS: The products offered for sale by the Company may be subject to patent, trademark, copyright, design and other rights of third parties. The Company shall in no event whatsoever be responsible or liable in the event of any claim of infringement of any such rights.

The Company's entire catalog(s) and website(s), including without limitation, the content of the catalog(s) and website(s) is copyrighted as a collective work under United States laws and applicable international copyright laws and the Company owns the full copyright in its catalog(s) and website(s), including without limitation in the selection, coordination, arrangement and enhancement of the content contained therein. Except as stated below, none of the materials in the Company's catalog(s) or on its website(s) may be reproduced, distributed, republished, downloaded, copied in any form or by any means, displayed, posted, transmitted, modified, translated, added to, updated, compiled, or abridged without the prior written permission of the Company. Customer may download, store, print and copy selected portions of the content in the Company's catalog(s) and website(s) provided Customer: (1) only uses the content downloaded, stored, or printed for furthering Customer's business with the Company; (2) does not publish or post any part of the content from the catalog(s) or website(s) in any other catalog or on any other Internet site; (3) does not publish or broadcast any part of the content from the catalog(s) or website(s) in or on any other media; and (4) does not modify or alter the content from the catalog(s) or website(s) in any way or delete or modify any copyright or trademark notice.

14. FARS/DFARS: The Company agrees only to be subject to the "mandatory flow down" provisions found in FAR Section 52.244-6. The Company does not agree to be subject to any DFAR.

15. FORCE MAJEURE: The Company shall not be liable for loss or damage caused by any delay or failure to perform resulting in whole or in part from Acts of God, severe weather conditions, labor disruptions, governmental decrees or controls, insurrections, war, risks, shortages, inability to procure or ship product or obtain permits and licenses, insolvency or other inability to perform by the manufacturer, delay in transportation, any other commercial impracticability and/or any circumstances beyond the control of the Company in its business operations.

16. GOVERNING LAW: This Agreement and any sales hereunder shall be governed by the laws of the State of Illinois without regard to conflicts of law rules and venue shall be in the federal and state courts of Cook County, State of Illinois, United States of America. The parties expressly exclude the application of the 1980 United Nations Convention of Contracts for the International Sales of Goods, if otherwise applicable.

17. DISPUTE RESOLUTION: Actions by the Company for non–payment by the Customer of the purchase price of products sold by the Company, or for redress of other breaches by the Customer of these Terms and Conditions of Sale may be brought by the Company, at its option, before any U.S. or foreign judicial court of competent jurisdiction or at the Company's option, disputes between the Company and the Customer, including all claims for non–performance by the Company, shall be finally settled by arbitration in Chicago, Illinois, U.S.A. under the Commercial Rules of the American Arbitration Association, by a single arbitrator appointed in accordance with said Commercial Rules applying these Terms and Conditions of Sale and consistent provisions of the federal and state laws (except conflict of law rules) of the State of Illinois, U.S.A.

18. SEVERABILITY: If any provision or provisions of this Agreement shall be held to be invalid, illegal or unenforceable, such provision(s) shall be enforced to the fullest extent permitted by applicable law, and the validity, legality and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

19. WAIVER: The Company's failure to insist on performance of any term or condition contained in this Agreement, or failure to exercise any of the Company's rights hereunder, shall not constitute a waiver of any of the Company's rights or remedies under this Agreement.

20. NO THIRD PARTY BENEFIT: The provisions set forth in these Terms and Conditions of Sale are for the sole benefit of the parties hereto, and confer no rights, benefits or claims upon any person or entity not a party hereto.
